Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices, etc., occur from time to time.

(a) Rent figures are obtained by multiplying increases since June, 1941 by the average rental determined by the census of that date. The increases are based upon reports from real estate agents and periodic sample surveys which are now being conducted by direct interview.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

(c) Averages include prices for cuts with bone-in.

G—Strikes and Lockouts

TABLE G-1.—STRIKES AND LOCKOUTS IN CANADA, JANUARY, 1949, JANUARY AND DECEMBER, 1948†

| Date | Number of Strikes and Lockouts | | Number of Workers Involved | | Time Loss | |
|----------------------|--------------------------------|--------------|----------------------------|--------------|---------------------|------------------------------------|
| | Com-mencing During Month | In Existence | Com-mencing During Month | In Existence | In Man-Working Days | Per Cent of Estimated Working Time |
| January, 1949*..... | 10‡ | 10 | 1,811‡ | 1,811 | 9,700 | .01 |
| December, 1948*..... | 4 | 11 | 1,795 | 2,481 | 18,939 | .02 |
| January, 1948*..... | 19‡ | 19 | 12,595‡ | 12,595 | 135,780 | .17 |

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1949 ⁽¹⁾

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man- Working Days | Particulars ⁽²⁾ |
|--|---------------------|-------------------------|---|--|
| | Establish- ments | Workers | | |
| Strikes and Lockouts in Progress Prior to January, 1949 | | | | |
| MINING— Strip coal miners, Bienfait-Estevan Field, Sask. | 9 | 200 | 1,000 | Commenced November 3, 1948; for a new agreement providing for increased wages, retention of 40-hour week, welfare fund, etc., following reference to conciliation board; terminated January 7; conciliation, provincial; compromise on wages, 44-hour week, welfare fund to be referred to Royal Commission. |
| MANUFACTURING— Textiles, Clothing, etc.— Textile factory workers, St. Johns, P.Q. | 3 | 100 | 1,000 | Commenced July 12, 1948; alleged discrimination in dismissal of workers, terminated January 17; return of workers; in favour of employers. |
| Miscellaneous Wood Products— Wood heel factory workers, Montreal, P.Q. | 1 | 85 | 1,500 | Commenced November 19, 1948; because application for union recognition refused by Labour Relations Board as not representative of majority of employees; unterminated; partial return of workers. |
| CONSTRUCTION— Building and Structures— Electricians, helpers and apprentices, Victoria, B.C. | 14 | 90 | 900 | Commenced October 25, 1948; for a greater increase in wages than recommended by conciliation board; terminated January 14; negotiations; compromise. |
| SERVICE— Business and Personal— Cleaners and dyers, Vancouver, B.C. | 1 | 10 | 100 | Commenced December 7, 1948; for increased wages as recommended by conciliation board; terminated January 14; negotiations; in favour of workers. |
| Strikes and Lockouts Commencing During January, 1949 | | | | |
| MANUFACTURING— Rubber and Its Products— Tire factory workers, mixers, New Toronto, Ont. | 1 | (³) 100 | 200 | Commenced January 14; protest against change in method of work on new machine and resulting wage payment; terminated January 18; return of workers pending settlement under grievance procedure in agreement; in favour of employer. |
| Textiles, Clothing, etc.— Cotton factory workers, Welland, Ont. | 1 | 750 | 500 | Commenced January 10; for increased wages; terminated January 14; return of workers pending further negotiations; indefinite. |
| Woollen yarn factory workers, St. Hyacinthe, P.Q. | 1 | 37 | 110 | Commenced January 10; protest against dismissal of one foreman and for dismissal of another; terminated January 13; negotiations; in favour of employer. |
| Knitting factory workers, Paris, Ont. | 1 | 250 | 2,500 | Commenced January 18; for a union agreement providing for increased wages, reduced hours, union security, pay for eight statutory holidays, extension of vacation plan, etc; unterminated. |
| Woollen factory workers, Huntingdon, P.Q. | 1 | 189 | 1,890 | Commenced January 18; for a new agreement providing for increased wages; unterminated. |

(1) Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) 1,600 indirectly affected.

April, 1949

The Labour Month in Brief

Seasonal unemployment passed its peak early in March, and the advent of spring stimulated employment in many fields. Favourable conditions were anticipated for the spring and summer months. The cost-of-living index dipped fractionally within the narrow range it has maintained since last September. Average earnings of industrial workers rose slightly.

Employment

The seasonal peak of unemployment was reached during February, when approximately 212,000 men and 53,000 women were registered for work at the Employment Service. Employment conditions this winter were less favourable than in the previous year.

Seasonal unemployment, however, had already begun to give way in most regions by the end of the month. By March 24, the number of unplaced applicants had been reduced to 250,000, and

appeared to be dropping more rapidly than in the corresponding period of 1948.

During the winter of 1949 a higher proportion of the unemployed than in any previous year were covered by unemployment insurance. During the seasonal slack, an average of 76 per cent of all applicants filed claims for unemployment insurance; of these claims, about 80 per cent were entitled to benefits.

The chart below shows that at the end of January, of 257,000 persons who had registered as applicants for employment, about 198,000 were claimants for unemployment insurance benefit. Later figures show that at the end of February, of 262,000 unplaced applicants about 209,000 were claimants for benefit.

During the month of February a total of 210,681 persons were compensated for 3,734,487 unemployed days, as compared with 138,417 persons receiving benefit for 2,544,452 unemployed days in February, 1948.

In the past year a higher proportion of unplaced applicants for employment than ever before have been covered by unemployment insurance . . .

Unplaced applicants . . . persons registering as applicants for employment at offices of the National Employment Service.

Live claims . . . persons receiving or registering for unemployment insurance benefit.

Extreme weather conditions this year had been a disrupting factor in the employment situation, particularly in the Prairie provinces and British Columbia, where more than the usual amount of outside work had to be discontinued. Unfavourable market conditions in a few industries such as logging, lumber products and shipbuilding had also developed during this period, and the release of workers from these industries had aggravated the seasonal unemployment problem. British Columbia particularly was affected by a combination of these factors.

Steady improvement occurred during March; and according to a survey undertaken by the Department of Labour, employers looked forward to high employment levels for the spring and summer.

Industrial Relations

During the first two months of 1949, time loss from strikes and lockouts in Canada was below the level of the previous winter.

There were nine strikes and lockouts during February, involving 7,235 workers, with a time loss of 71,732 man-working days. About 80 per cent of the time loss was caused by a strike of some 4,550 asbestos miners and mill-workers in various centres in Quebec. Three strikes, involving knitting factory workers at Paris, Ont., rubber footwear factory workers at Kitchener, Ont., and chemical factory workers at Shawinigan Falls, P.Q., were responsible for 17 per cent of the strike idleness during the month.

Important settlements, reached during February in coal mines in both Eastern and Western Canada, are described elsewhere in this issue (p. 426).

During the month the Minister of Labour received the unanimous reports of two Boards of Conciliation and Investigation which dealt with interrelated disputes affecting the country's ocean-going shipping industry (p. 423).

At the end of February, the two Associations representing the dry cargo shipping companies announced on behalf of their member companies acceptance of the recommendations of the Board in settlement of the matters in dispute.

The Canadian Seamen's Union rejected the Board's major recommendations stating that they would result in discrimination in hiring against union members and a reduction in take-home pay, and asked for a further conference with the companies which was refused.

A strike began on the East Coast towards the end of March, further details concerning which will appear in next month's issue.

Cost of Living

A further fractional decline in the Dominion Bureau of Statistics cost-of-living index kept the index at the approximate level it has maintained for the past six months. The index receded three-tenths of a point between February 1 and March 1. This decline, the second in succession, brought the index four-tenths of a point below the index peak of 159·6. It was, however, 8·4 points above March 1 last year. The latest index stood at 159·2 as compared with 159·5 at February 1, 159·6 at January 1, and 150·8 a year ago. It was 57·9 per cent above the August, 1939, level.

As in January, the decline was due to a further decrease in the food group. Price reductions for shortening products, meats, butter and eggs were mainly responsible for the index moving down from 200·4 at February 1, to 199·1. There were moderate offsetting seasonal increases in a few vegetables. At the March 1 level, the food group index was down 6·3 points from the October peak of 205·4, but still 13·2 points above the March 1, 1948, level.

Earnings

The levelling off in the cost of living, accompanied by continued advances in hourly earnings, enabled real weekly wages in the manufacturing industry to show steady gains during the last four months of 1948. At January 1, 1949, the preliminary index of real wages (1946=100) stood at 107·6.

Average hourly earnings of hourly-rated wage-earners in manufacturing were 97·2 cents at January 1, 1949, as compared with 96·0 at December 1, and 86·6 at January 1, 1948. Preliminary estimates indicated a further rise in average hourly earnings as of February 1, 1949.

Industrial Production

Canada's index number of industrial production in January, on the base 1935-39=100, stood at 178·9, a drop of 6·8 points from the December level, but 1·1 points above January, 1948.

The sub-index for all manufactures was down to 188·5 in January from 197·2 in December and 189·3 in January last year.

A Message from the Honourable Humphrey Mitchell Minister of Labour

Through this special issue of the **LABOUR GAZETTE**, I extend my heartiest greetings to labour and industry in Newfoundland on the occasion of the entry of Britain's oldest colony into Confederation with Canada.

This issue of the **LABOUR GAZETTE** has been designed to commemorate that historic occasion. Its articles and illustrations will serve to make Canadians in general more familiar with matters of labour interest in our tenth province; while the wide circulation which it will be given among Newfoundlanders, will help to intro-

duce them to the services offered by the Department of Labour.

The ties of geography and of common traditions are now reinforced by political ties. The sturdy spirit in which labour and industry in Canada have worked together in war and in peace to make their nation great will find a ready response among their Island kinsmen.

It is in an earnest desire to contribute to the success of Confederation that I extend to the people of Newfoundland a cordial invitation to make full use of any facilities afforded by the Department of Labour.

A Message from Arthur MacNamara, C.M.G., LL.D., Deputy Minister of Labour

I am happy to join with the Minister of Labour in welcoming the people of Newfoundland and in offering to them the complete co-operation of the Department of Labour.

The present issue of the **LABOUR GAZETTE** includes a survey of the work accomplished in the Department of Labour which, in common with other branches of the Canadian Government, has been active in preparing for Newfoundland's entry into Confederation.

One of the Department's most important functions is the maintenance of industrial peace. For such Newfoundland industries as come within our jurisdiction we offer conciliation and other procedures for the prevention and settlement of labour relations disputes. We also actively encourage in all industrial undertakings the formation of labour-management production committees,

through which the two parties may co-operate in improving productive efficiency.

Offices of the National Employment Service have already been set up in three centres on the Island. These will help to make it easier for workers to find jobs, and employers to find suitable workers. They will also provide assistance in meeting the special needs of physically handicapped persons, older workers, veterans, and young men and women entering employment for the first time.

Unemployment insurance will be administered through these offices, and special arrangements have been made to enable Newfoundland workers who may become unemployed to draw up to six months' benefit during the period before they would have had a chance to build up benefit rights through contributions.

It is to be hoped that agreement will be reached to enable Newfoundland to participate in Canadian Vocational Training. Having trained workers for Canada's industrial war machine, and helped to rehabilitate many thousands of veterans, that program is now concentrated on giving young persons the opportunity to develop skills to aid them in their chosen careers.

I have mentioned only a few of the more important Labour Department

services which will be made available to our new compatriots.

It is my hope that the articles which follow in this special issue will serve on the one hand to make the people of Canada better acquainted with their new province, and, on the other hand, to acquaint the people of Newfoundland in some small measure with the new horizons opened to them by their entry into the Dominion of Canada.

*Newfoundland, Britain's first outpost,
has a longer history than that of Canada. . . .*

In 1497, John Cabot made an enthusiastic report on the fishing possibilities of the North Atlantic Banks, and soon after European fishing fleets began to make annual trips to the Newfoundland coast. For a long time the Island was regarded only as a base for these operations, and its status was not defined until 1713, when British sovereignty in the Island was confirmed. By 1832, a representative assembly had been established, and in 1855 the people were granted responsible government.

Delegates from Newfoundland took part in the pre-Confederation conference at Quebec in 1864, and the confederation issue was again discussed with Canada in 1895. At neither time, however, were the two countries able to reach an agreement.

Newfoundland's economy has always been greatly dependent on the export market, and periods of world depression have been particularly hard to weather. The great depression of 1929 dealt the country a severe blow. By 1933, it was evident that drastic measures were essential, and the government requested that a Royal Commission be appointed to recommend a course of action. As a result of the Commission's findings, the Newfoundland constitution was suspended, and a commission, consisting of three members from Newfoundland and three from the United Kingdom, took office in 1934.

Newfoundland played a full part in both world wars and contributed generously in both men and money to the Empire's war effort. In World War II, its strategic position made it a key point in the defence of North America, and the government approved the establishment of allied naval, air and army bases in the Island. Again Newfoundlanders made a large per capita contribution to the joint effort.

In September, 1946, a National Convention was elected to discuss a future permanent form of government. Two referendums were held, and on July 22, 1948, a majority of Newfoundland voters chose Confederation with Canada. On March 31, 1949, therefore, Canada welcomed Newfoundland into the Canadian Confederation, and the federal union of British North America, as it was originally conceived in 1867, became complete.

ECONOMIC CONDITIONS IN NEWFOUNDLAND

Confederation of Newfoundland with Canada has brought a group of over 100,000 workers into the Canadian labour force. The characteristics and problems of this group are peculiar to the economy of the Island. The following article appraises current economic conditions in Newfoundland as they affect labour and outlines some of the outstanding characteristics of the economy.

Newfoundland, like Canada, has been experiencing prosperous economic conditions during recent years. Production and trade have expanded greatly since the beginning of the decade; employment has reached an all-time high; and income per worker exceeds all previous levels.

The wartime stimulus to the basic industries on the Island, including the construction of large defence bases by the British, Canadian and United States' governments, has been the main factor contributing to these improved economic conditions. This war stimulus and its aftermath continue to have a buoyant effect on the Newfoundland economy.

While the general outlook in the immediate future is optimistic, there are a few indications of less favourable economic conditions in some areas. These include a lower than usual fish catch during 1948 and some difficulties arising out of trade with countries in the "sterling area". Each of these circumstances introduces uncertainties for some segments, at least, of the population.

There are no reliable current statistics on the total number of persons gainfully employed in Newfoundland. On the basis of information available there are, it is estimated, around 115,000 persons in the working force, distributed among the principal industries as in Table I.

Before reviewing current conditions in each of these industries, mainly from the standpoint of labour, some general observations will be made with respect to prices, wages and income.

Prices, Wages and Income

With expanded purchasing power and shortages of goods and services throughout the war and post-war years, prices have risen sharply since pre-war years. Based on available information, it appears that the cost of living in Newfoundland has risen by at least 85 per cent since 1938, compared with just under 60 per cent in Canada over the same period. Both of these indexes include rent. Taking food and clothing prices alone, the increase in Newfoundland,

TABLE 1.—ESTIMATED DISTRIBUTION BY INDUSTRY OF GAINFULLY OCCUPIED IN NEWFOUNDLAND

| | Number | Percentage of Total |
|---------------------------------------|---------|---------------------|
| Fishing..... | 28,000 | 24.4 |
| Bank fishermen..... | 1,300 | |
| Labrador Floaters..... | 1,100 | |
| Stationers..... | 2,500 | |
| Shore fishermen..... | 23,100 | |
| Logging..... | 9,000 | 7.8 |
| Agriculture..... | 4,000 | 3.5 |
| Mining..... | 3,500 | 3.0 |
| Transportation and communication..... | 8,500 | 7.4 |
| Manufacturing..... | 15,000 | 13.0 |
| Building and construction..... | 6,000 | 5.2 |
| Trade and Finance..... | 8,000 | 7.0 |
| Service..... | 22,000 | 19.1 |
| All Others..... | 11,000 | 9.6 |
| | 115,000 | 100.0 |

it is estimated, has been well over 100 per cent since 1938.

To provide a more direct comparison of current Newfoundland and Canadian prices and of changes since 1938, a few food items have been selected for St. John's and Halifax. In almost every case the St. John's price is higher, sometimes by a substantial amount. The dependence of Newfoundland on imports from either Canada or the United States for several of these items explains, of course, a major part of the difference.

In the face of these price increases, which no doubt would have been greater were it not for wartime control measures, there has been a tendency to tie wage settlements to the upward movement in the cost of living. Although wages are higher in all industries, there has been little uniformity in the increases taking place. Wage differentials between industries, as a result, are considerably altered from those existing in 1939. Currently, wage rates are highest in pulp and paper manufacturing. Here the workers

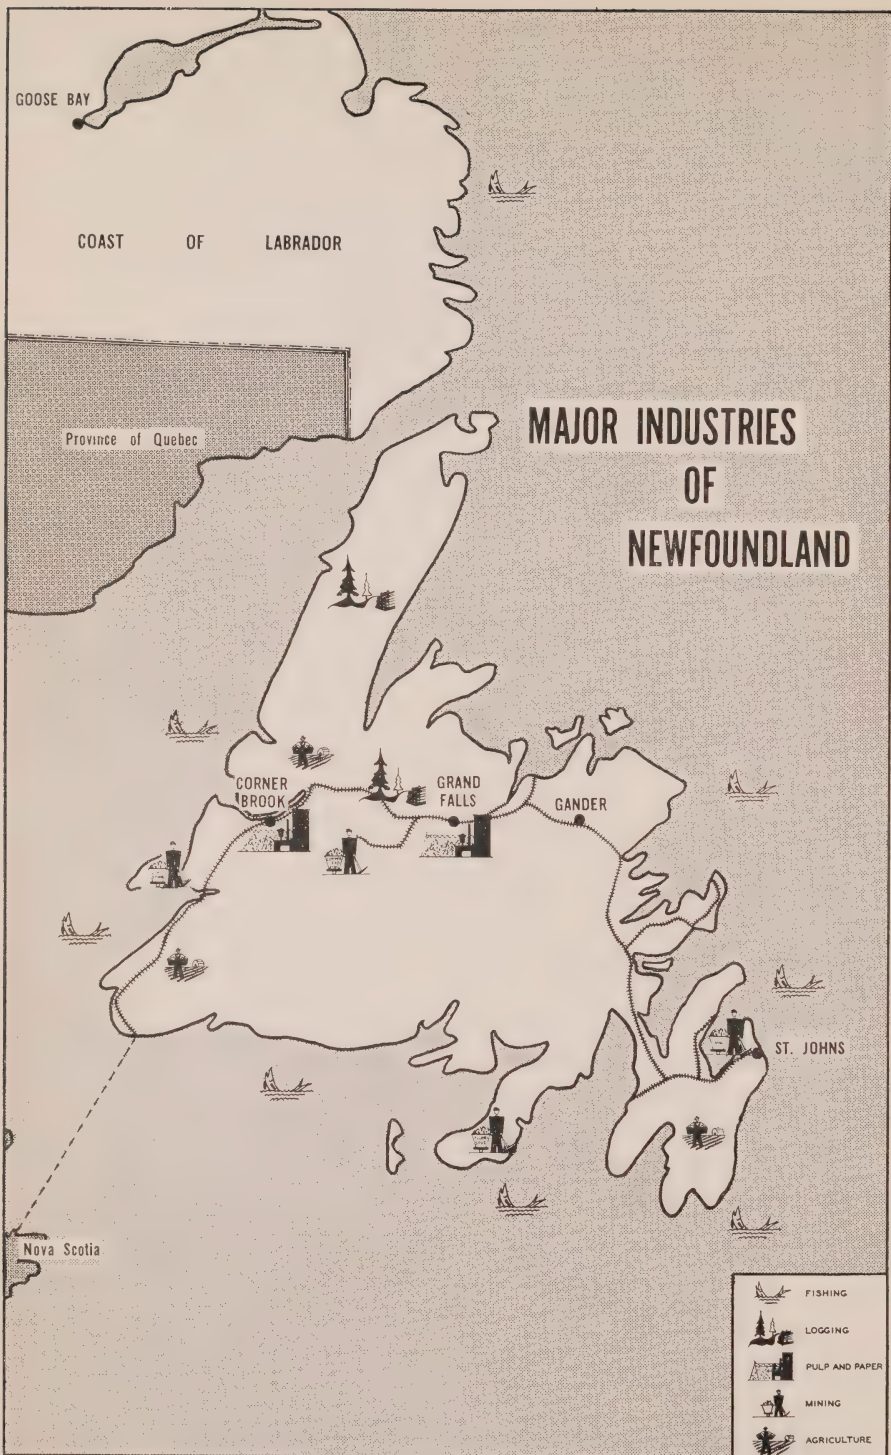

In anticipation of the added responsibilities the Department of Labour is assuming, following the entry of Newfoundland into Confederation, a group of departmental officials visited the Island last October and examined, at first hand, the requirements of their new tasks. The group consisted of Mr. C. R. McCord, Administration Branch, Mr. George V. Haythorne, Research and Statistics Branch, and Dr. E. P. Laberge and Mr. L. J. Curry of the Unemployment Insurance Commission.

The following series of articles is based largely on the background material gathered by this group. Among the officials responsible for their preparation are Mr. Haythorne, Mr. J. Tait Montague, Research and Statistics Branch, Mr. Ray Brown, Unemployment Insurance Commission, Miss M. Buckley, Labour Legislation Branch, Mr. J. W. Willard, Department of National Health and Welfare, and members of the staff of the LABOUR GAZETTE.

Several government officials, both in Canada and Newfoundland, have made helpful suggestions in regard to all of these articles.

DISTRIBUTION OF NEWFOUNDLAND'S LABOUR FORCE

received average earnings of around \$210 per month in the year 1947. In sharp contrast with this, female persons in the outports are reported to be receiving wages from \$20 to \$30 per month.

For a full comparison, all items in the cost of living would need to be examined, but on the basis of the data presented here, and of other information at hand, it seems

clear that real wages in St. John's are lower than those in Halifax. Not only are money wages in Newfoundland generally lower, but prices of consumer goods and services are generally higher.

Another indication of the somewhat lower wage level in Newfoundland is the much higher proportion of persons paying income taxes who receive under \$2,000 per year.

Newfoundland's economic development has been determined to a great extent by geographical conditions. . . .

It is a part of the Acadian region of Canada, which includes the Maritime Provinces, and its area of 42,000 square miles is only 9,000 square miles less than the combined area of those three provinces. Labrador, under Newfoundland sovereignty, is 110,000 square miles in extent.

The surface of the Island is rough and broken. Almost one-third is covered by lakes and streams, and about sixty per cent is forested, with spruce and pine predominating. Fertile soil is limited to a few areas, most of which are on the western side. Off the coast lie those parts of the Continental Shelf known as the Grand Banks, world famous as fishing grounds.

Newfoundland's economy is therefore based on the primary industries of fishing, forest products and mining. The bulk of its production in these industries is exported, while the greater part of what the country consumes must be imported. Most of the imports of food and consumers' goods are from Canada and the United States, with almost two-thirds from Canada.

The forest lands of Newfoundland comprise a broad belt extending from the southeast corner of the Island along the west and north sides of the Island to the Avalon Peninsula. Of this area, which covers some 16,000 square miles, 8,800 square miles are suitable for commercial purposes.

There are four chief mining centres in the country. The largest mine, at Bell Island, produces iron ore for Nova Scotia and United States steel mills. A mixed deposit of copper, zinc and lead is mined at Buchans, and limestone at Aguathuna, while a deposit of fluorspar is found at St. Lawrence.

Aside from a number of farms near St. John's and a few other centres, the principal agricultural districts are on the western side of the Island.

The Government-owned railway, the main artery of transportation, swings through the centre of the Island from St. John's in the southeast to Port-aux-Basques in the southwest, where it makes a boat connection with North Sydney, Nova Scotia. The road systems are regional and confined to the more highly-populated areas—the outlying districts depend entirely on the shipping services to supply their needs.

This is so, even though Newfoundland excludes single persons earning under \$1,000 and married persons earning less than \$2,000 annually. The comparable exemptions in Canada are \$750 for single workers and \$1,500 for married workers.¹

The ratio of those paying income taxes, to all persons over 20 years of age offers another rather striking comparison. In Newfoundland this ratio is one to twenty while in Canada it is one to four. These income tax figures reflect the fact that a number of Newfoundlanders, especially in the outports, still live at close to subsistence levels. If the fish catch is low, as it was during the past season, there is little alternative to substantial amounts of government assistance. In August, 1948, for example, relief payments were made to nearly 4,000 families. This was the highest number of families in receipt of such aid since April, 1939, when there were close to 19,000 families on relief lists.

Fisheries

(a) Fishing

It is estimated that close to 25 per cent of all workers in Newfoundland depend directly on fishing as their chief means of livelihood. This proportion represents an important change from earlier periods when as many as 80 per cent of the workers were engaged in this type of activity. With the development of other industries, fishermen have been attracted elsewhere.

The biggest fish catch is cod. This is caught on the Grand Banks to the South of Newfoundland, along the shores of the Island itself, and off Labrador. Throughout the past season, some of the "inshore"

fishing was good, but in many places the run of fish was unusually low. Summer "bank" and Labrador fishing were also good, but the relatively small quantities of bait available may mean a lower winter "bank" fishery. Most fishermen supplement their income by catches of haddock, herring, lobster, salmon, whales and seals. These are caught at various places and times around the shores of Newfoundland and Labrador. Market restrictions during the war adversely affected the fishing industry, but activity is now returning to pre-war levels.

There is little doubt that the returns from fishing have dropped during the past 12 months. This may have a marked effect on the industry, especially since many persons have returned to it since the war. Another difficulty which the industry has faced is some hesitation among firms about stocking fishing supplies until future tariff arrangements are known. This made the outfitting of fishing vessels a more difficult task. The markets for fish present an even more serious obstacle. During the war and early post-war periods, national and international bodies provided a ready market for fish. These outlets have been curtailed and while some pre-war markets are re-opening, others are in the "sterling bloc" and exchange difficulties are being experienced.

The Newfoundland fishing industry has made some advances technologically, in recent years. Some of the most modern types of fishing equipment are now used among the cod fishermen. The extent to which this and other factors are making manpower now engaged in fishing redundant would require further analysis. It seems apparent though, especially if improvements in production methods are extended, that it may be in the interests of all concerned for more persons in fishing communities to shift to other occupations.

¹ The Canadian exemptions were raised to \$1,000 and \$2,000 in the 1949-50 Budget, brought down on March 22, 1949.

TABLE 2.—A COMPARISON OF CURRENT NEWFOUNDLAND AND CANADIAN FOOD PRICES AND OF CHANGES SINCE 1938

| Food Item | 1938 Prices | | 1948 Prices* | | Increase 1938 to 1948 | |
|---------------------------|-------------|---------|--------------|---------|-----------------------|---------|
| | St. John's | Halifax | St. John's | Halifax | St. John's | Halifax |
| | cts. | cts. | cts. | cts. | % | % |
| Bacon, per lb..... | 35 | 33 | 81 | 68 | 131 | 106 |
| Sugar, "..... | 6 | 6 | 14 | 9 | 133 | 50 |
| Prunes, "..... | 7 | 13 | 20 | 20 | 186 | 54 |
| Cheese, "..... | 26 | 23 | 63 | 50 | 142 | 117 |
| Eggs, per doz..... | 54 | 41 | 93 | 75 | 72 | 83 |
| Potatoes, per gallon..... | 10 | 14 | 37 | 35 | 270 | 150 |

* Data from the Labour Relations Office, St. John's and Dominion Bureau of Statistics. All figures are for the month of August, except those for St. John's in 1938, which are for October. This later month should be kept in mind in interpreting the figures, especially those for eggs and potatoes.

(b) *Fish Processing*

Fish processing has been encouraged by the government as a means of increasing the marketability of the Island's fish catch. At present there are about 25 fish plants operating on the inlets and bays about the coast of Newfoundland. Only two of these are operated on a year-round basis; the remainder operate for from five to seven months during the year. At their peak, these plants employ close to 3,000 workers. The chief products are canned and dried fish of various types including lobster and salmon, and fish oil.

Forestry

(a) *Logging*

Although almost one-third of the 42,000 square miles in Newfoundland, apart from Labrador, is forest area, it is estimated that little more than one-half of the forests are at present of practical value for commercial purposes. These lands, for the most part, have been leased to private enterprises. The forests are comprised predominantly of soft woods which are used extensively for the pulp and paper industry. The supplies are large, which is no doubt one reason why only limited progress has been made in regard to conservation measures.¹ Surveys of woods resources are, however, in progress.

A trend towards more summer work is evident in the cutting operations. Summer cutting enables a saving to be made in stumpage and permits a more balanced year-round labour force. Mechanization has been introduced, especially in hauling operations.

(b) *Pulp and Paper Mills*

There are two large pulp mills in Newfoundland. One is at Grand Falls, operated by the Anglo-Newfoundland Development Company, Ltd., and the other is at Corner Brook, operated by the Bowater's (Newfoundland) Pulp and Paper Mills Ltd. The former mill has a capacity of 650 tons of

pulp per day and the latter, with a recent addition, has a capacity of 1,000 tons per day, making it the largest pulp mill in any country.²

(c) *Sawmills*

In addition to the pulp and paper mills there are some 900 sawmills in operation, mostly during the summer months. As in the Maritimes, most of these mills employ only a few men. Less than twenty of them are large enough to warrant hiring all types of sawmill employees.

Mining

There are four mining centres in Newfoundland, which employ approximately 3,500 workers. The largest is Bell Island where the Wabana Iron mines are located. These mines produce a medium grade hematite iron ore which is shipped to the steel mill in Sydney, Nova Scotia. During the thirties, large quantities of ore were shipped to Germany; during 1948, the output was shipped mainly to Sydney and to the United Kingdom, in about equal quantities.

Another mining centre is Buchans where a mixed deposit of copper, zinc, and lead is located. The output of this mine is being shipped today largely to the United States, although a substantial amount of lead concentrates was shipped to Belgium in 1948. New deposits of ore have been discovered recently, which will add to the life of the mine.

A third mining centre, is located at St. Lawrence, on the Burin Peninsula where a deposit of fluorspar is found. This mineral is being used as a flux in the manufacture

¹ Authoritative sources state that there are sufficient uncut forests on the Island to enable cutting at the present rate for over 90 years without making any inroad on the second growth.

² Prior to this addition, the Three Rivers plant of the Canadian International Paper Company, was the largest mill.

TABLE 3.—AVERAGE HOURLY WAGE RATES FOR SELECTED OCCUPATIONS IN ST. JOHN'S AND HALIFAX IN OCTOBER 1947

NOTE:—As reported to the Newfoundland Office of Labour Relations and the Research and Statistics Branch of the Canadian Department of Labour:

| Occupation | St. John's | Halifax |
|--------------------------|------------|---------|
| | \$ | \$ |
| Electrician..... | .90 | 1.23 |
| Bricklayer..... | .85—1.00 | 1.33 |
| Plumber..... | .90—1.00 | 1.19 |
| Construction Labour..... | .55 | .64 |

of steel and aluminum. Among other uses, this mineral is employed as an ingredient in the manufacturing of high octane gas.

The fourth mining centre is Aguathuna on the west coast where a large limestone deposit is located. This limestone is used largely at the steel mill in Sydney.

There is considerable surveying activity at present both on the Island and in Labrador. The recently discovered high grade iron ore deposit in Labrador extends into Quebec and the latter government is aiding in developing the area. Prospecting rights have been granted to a Canadian company. Present indications are that it will be some years before this area is developed.

Agriculture

As a result of the limited amount of arable land in Newfoundland, agriculture is the least important of the four main primary industries. Much of the farming is carried on in conjunction with other work, which makes it doubly difficult to obtain satisfactory information on the total manpower in the industry.

Aside from a number of farms around St. John's and a few other centres, the only other principal agricultural districts are in the Codroy and in the Humber valleys on the west side of the Island. There is a good market for all agricultural products in Newfoundland, but the main difficulty, especially with the outlying areas, is the distance to the principal outlet, St. John's.

During the war, close to 2,000 farm workers from Newfoundland were recruited for employment on dairy farms in the eastern United States. A small number also worked on farms in the Maritimes. Most of these persons have now returned to agriculture or other industries in Newfoundland. A small number of carefully

selected veterans have also been settled on farms mainly in the Codroy and Humber Valleys. It is estimated by Newfoundland authorities that a number of persons with limited farm experience could be secured for employment in Canadian agriculture at the present time.

Manufacturing

Apart from the processing of fish and forest products, manufacturing activities on the Island are largely confined to St. John's. The plants, for the most part, are small and devoted mainly to tasks of assembling. Primary activities are limited mainly to boots and shoes, confectionery, paints, nails, clothing, furniture, margarine and other products manufactured largely for the local market.

It is important to the primary industries of the country that certain products be assembled locally in a manner suited to domestic requirements. The fishing industry, for example, is dependent on the local manufacture of nets and cordage. Difficulties encountered in securing ample supplies of raw materials for these firms are often a serious threat to their existence. The total employment provided by these firms is not known, but it is thought to be around 3,500.

Construction

Construction workers have found almost continuous post-war employment in housing, especially on projects in St. John's. Many workers have also been employed at Corner Brook where new plant facilities for the Bowaters' Company have been built and a new hospital has been erected. There has also been considerable construction work carried on at the United States Defence base at Stephenville and at the government air base at Gander.

TABLE 4.—NUMBER PAYING INCOME TAX IN CANADA AND NEWFOUNDLAND IN 1946

NOTE:—Computed on the basis of the Newfoundland exemptions

| Income Class | Newfoundland | | Canada | |
|--------------------------|--------------|-------|-----------|-------|
| | No. | % | No. | % |
| Under \$2,000..... | 4,751 | 47.6 | 440,600 | 41.3 |
| \$2,000 to \$3,000..... | 2,377 | 23.7 | 380,450 | 35.6 |
| \$3,000 to \$4,000..... | 1,140 | 11.4 | 124,450 | 11.7 |
| \$4,000 to \$5,000..... | 514 | 5.1 | 45,740 | 4.3 |
| \$5,000 to \$10,000..... | 793 | 7.9 | 57,770 | 5.4 |
| \$10,000 and over..... | 429 | 4.3 | 17,974 | 1.7 |
| Total..... | 10,004 | 100.0 | 1,066,984 | 100.0 |

Retail and Wholesale Trade

With the great amount of purchasing power throughout Newfoundland during recent years, the retail and wholesale trades have become highly prosperous. There has been some uncertainty in some branches of trade during recent months. Until the plans connected with Confederation were settled, there was a tendency to keep stocks of goods at a minimum. The trade is also facing difficulties in securing export allotments from various countries. On the other hand, the payment of family allowances should increase purchasing power and benefit trade.

Transportation

The shipping industry is highly seasonal for practically all of the Newfoundland ports. With the exception of St. John's and the smaller ports along the southern coast, shipping closes up entirely for several months in the winter. This means, there is a rush of shipping every fall to the outlying ports before freeze-up.

The narrow gauge railway, from Port aux Basques to St. John's is the only trans-

insular route. The importance of this five hundred and fifty mile railway to the economy of the Island was demonstrated by the month-long strike of its employees in the fall of 1948. Lack of transportation facilities resulted in grave problems of supply for many areas. At the same time, some of the vegetable crops being harvested at the time on the west coast were damaged before the strike was settled.

There have been several air bases established on the Island. Two of these were built for defence purposes by the United States government. These are located at Stephenville and Argentia. A third air base at Gander was originally built by the United Kingdom and Newfoundland. During the war this base was greatly expanded by Canada for military purposes but it has now been returned to Newfoundland for civilian purposes. It is the most important "midway" base on northern transatlantic routes. Of the remaining two air bases, Goose Bay which was built in Labrador during the war, is an alternative transatlantic base. Torbay, near St. John's, is used as the terminus for Trans-Canada Air Line flights from Canada.

A fisherman-farmer of Torbay returns home with his horse. Much of Newfoundland's farming is performed on a part-time basis by fishermen.

THE LABOUR MOVEMENT IN NEWFOUNDLAND

Although the structure and nature of the labour force in Newfoundland has not favoured the growth of trade unionism, approximately one-third of the workers are now organized.

A few unions have existed in Newfoundland for at least half a century. Two of these are the Seal Skinners' Union and the Coopers' Union, both of which are now relatively inactive. A third union in this group is the Longshoremen's Protective Association which was formed in 1903 and is still in operation. Further, there have been groups formed from time to time among the fishermen, comprised largely of "own account" workers and serving a purpose parallel to that of labour unions. These early unions operated entirely within single localities and had no affiliation with other labour bodies.

The development of the labour movement proper in Newfoundland began during the 1930's. Those who were primarily responsible for this development were the skilled workers who emigrated from the mainland to work on the railroads and in the pulp and paper plants of the Island. The first railway unions were organized about 1935 and union activity among the paper makers appears to date from a few years earlier. The unions were organized as branches of international unions affiliated with the Trades and Labour Congress of Canada and the American Federation of Labour. In 1936-37 the Newfoundland Trades and Labour Council, now known as the Newfoundland Federation of Labour (NFL), was formed, under the leadership of these unions. Through this Federation many other workers were unionized along craft lines. These included machinists, carpenters, electricians, plumbers and shop and office employees in St. John's.

The NFL now consists of 19 AFL unions and 29 purely national unions. Its relationship to the AFL is thus somewhat similar to that which obtains in Canada between the TLC and the AFL. The NFL has also maintained fraternal relations with the Trades and Labour Congress of Canada.

The future relationship between the Newfoundland Federation and the TLC was described recently by Mr. C. W. Strong, Secretary of the Federation, as follows:—

"The Newfoundland Federation of Labour will now become a provincial body, primarily to deal with provincial legislation. It will be an affiliate to the Trades and Labour Congress of Canada which will take the place of this Federation in issuing charters to unions not directly connected to the international unions. Per capita tax and other sources of income will be considerably altered."

During the 'thirties, organization was also progressing independently among woodsmen and miners. The former activity grew largely out of the Fishermen's Protective Union and the latter represented an independent effort.

During the last twelve months, organizers from Canadian Congress of Labour unions have been on the Island. As a result of their efforts the workers at the Wabana Iron Mine voted to make their independent union into a local of the United Steel Workers of America. Communication workers at one or two points on the Island also affiliated with a CIO-CCL union. Representatives of the American Federation of Labour are also carrying on a campaign to organize other groups of workers.

As a result of the expansion in union organization there were 76 trade unions in Newfoundland as at October, 1948. They were affiliated as follows:—

| | |

The structure and nature of the labour force in Newfoundland have not favoured the growth of trade unionism. This can be attributed in large measure, to the heavy reliance of the economy on the fishing industry. Those engaged in fishing are largely "own-account" workers and only

* Montreal Gazette, March 31, 1949.

during their "off-season" do they accept employment with other enterprises. The situation in agriculture, some logging operations and certain other seasonal activity is much the same. Consequently, close to half of the manpower enters unionized occupations on a seasonal basis only and a large section of industry in Newfoundland is necessarily carried on with a minimum number of full-time workers.

From the point of view of the unions the persistence of the large number of seasonal workers is a serious disadvantage since it reduces the possibility of stable union organization. In some cases this is partially offset by organizing one industry through another. For example, the Fishermen's Protective Union is active among woods

workers as well as fishermen. Evidence of this is seen in the fact that the unions in Newfoundland, almost without exception, fall into one of the following groups:—

- (1) Unions formed on the basis of a skilled trade.
- (2) Unions formed by workers in the stabilized sections of the secondary industries.
- (3) Unions formed by workers who have common primary and secondary occupations.

In spite of these disadvantages to union organization many Newfoundland workers now belong to unions. According to the latest available figures, approximately one-third of the labour force is organized.

LABOUR LEGISLATION IN NEWFOUNDLAND

The following is a summary of some of the more important labour laws of Newfoundland. These include recent legislation dealing with workmen's compensation, minimum wages, and investigation and conciliation in industrial disputes. Older laws limit hours of labour in shops, require safety measures, medical care and monthly payment of wages in logging camps, and provide for registration of trade unions and control of employment of children.

Newfoundland's new Workmen's Compensation Act is, like its predecessor, of the individual liability type, but it has a number of provisions found in the laws of other provinces having a collective liability system. These include weekly payments instead of a lump sum in disability cases, medical and hospital care and compensation for industrial diseases. There is no workmen's compensation board. Provision is made for appointment of magistrates as Compensation Commissioners to take evidence near the scene of the accident.

The Trade Disputes (Arbitration and Inquiry) Act, like the Canadian laws on this subject, provides for investigation and conciliation in industrial disputes by conciliation officers and tripartite boards. An unusual provision is that which permits publication of a fair and accurate account of proceedings and evidence during progress of an inquiry but bans publication of

comment until the award or result of the inquiry has been published by the Commissioner.

The Trade Union Act makes provision for registration of trade unions similar to that made by the Trade Unions Act of the Dominion, but adds a section making applicable to Newfoundland certain provisions of the law of England including those relating to picketing and protection of unions from prosecution as conspiracies.

The Minimum Wage Act enables minimum rates of wages to be fixed by the Governor in Commission after recommendations have been received from the Advisory Committee.

Laws dealing with hours of work, holidays and health measures in shops, control of employment of children and safety measures and medical care for loggers are generally similar to laws and regulations in the Canadian provinces.

Workmen's Compensation

The Workmen's Compensation Act, 1948, applies to persons employed under a contract of service or apprenticeship, including a person plying for hire with a vehicle or vessel used under any contract of bailment (other than a hire purchase agreement) in consideration of the payment of a fixed sum or a share in the earnings or otherwise. Employees of the Crown are covered in cases where the Act would apply if the employer were a private person, but the Governor in Commission may exclude any class of such workmen if they are provided for by a scheme not less favourable than the Act. The Act also applies, with certain modifications, to masters, seamen and apprentices to the sea service, apprentices to the sea fishing service, and to members of the crew of an aircraft, provided such persons are workmen within the meaning of the Act and the ship or aircraft is registered in Newfoundland or operated by an employer residing or having his principal place of business in Newfoundland.

The Act does not apply to persons employed otherwise than by way of manual labour at a remuneration exceeding \$2,400 a year, domestic servants, out-workers, members of the employer's family, living in his house, or casual workers employed otherwise than for the purpose of the employer's trade or business, unless employed for the purpose of a game or recreation and engaged and paid through a club.

The Act renders an employer liable to pay compensation for personal injury by accident arising out of and in the course of employment which disables a workman for three days or longer from earning full wages in his employment, unless the injury is attributable to the serious and wilful misconduct of the workman. Compensation is also payable for disability or death caused by any of the industrial diseases in the Schedule to the Act.

Compensation in fatal cases is a lump sum, calculated according to rules set out in the Act, but not exceeding \$6,000.

Compensation in cases of total disability is a weekly payment not exceeding 50 per cent of average weekly earnings, but if this amount is less than \$10 a week the workman is entitled to an additional sum equal to one-half of the difference between the maximum weekly payment and the sum of \$10 or his average weekly earnings, whichever is less. Compensation for partial disability is paid on the same basis, in proportion to the diminution of average

earnings. A workman receiving weekly payments is entitled to a supplementary allowance amounting to one-sixth of his weekly payment for each child under 16, but the total of such allowances and the weekly payment may not exceed 75 per cent of average earnings in cases of total disability and 75 per cent of the diminution of such earnings in cases of partial disability.

An injured workman is also entitled to such medical, surgical and dental aid, and hospital and skilled nursing services, and to such artificial member or members and apparatus and dental appliances as may be necessary.

Except as otherwise provided in the Act, compensation is to be recovered through court action. If the court decides that compensation is payable, questions as to the amount and duration of the payments and apportionment among the various dependants may, if there is no agreement and if the court so decides, be referred to the Registrar of the Supreme Court of Newfoundland, and any Order by the Registrar is enforceable as a judgment of that Court. If, in any claim, the employer agrees that compensation is payable, the Registrar, on application of employer, workman, or any dependant, may determine the rights of the parties. All decisions and Orders of the Registrar are subject to the right of appeal to the Supreme Court. The Court or Registrar may refer any matter to a Compensation Commissioner, near the place of employment of the injured workman, who is to take evidence regarding the accident. All stipendiary magistrates resident outside the Central Judicial District of Newfoundland are Compensation Commissioners under the Act.

Where the amount of compensation or any other matter under the Act is decided by agreement, a memorandum of the agreement is to be sent by any interested party to the Registrar, who may record it in a special register, after which it becomes enforceable as a judgment of the Court.

Where the injury was caused by the personal negligence or wilful act of the employer or of some person for whom he was responsible, nothing in the Act is to affect the civil liability of the employer, but the workman may, at his option, claim compensation or take action.

Contracts that the Act shall not apply are void, but employers' schemes for compensation may be approved by the Registrar, if not less favourable to the workmen than the Act and if approved by the workmen on vote by ballot.

Deductions from wages to meet costs of compensation are forbidden, under penalty.

Notice of an accident must be given as soon as practicable and proceedings to recover compensation must be commenced within six months after the accident or, if it results in death, within six months after death. Failure to meet these conditions, if due to some reasonable cause, is not a bar to recovery of compensation.

Trade Unions

The Trade Union Act defines a "trade union" as any combination, temporary or permanent, for regulating relations between workmen and masters or between masters and masters or between workmen and workmen, or for imposing restrictive conditions on the conduct of any trade or business, whether such combination would or would not, if the Act had not been passed, have been deemed to be an unlawful combination by reason of one or more of its purposes being in restraint of trade. The Act does not affect agreements between partners as to their own business, or between an employer and his employees as to such employment, or any agreement in consideration of the sale of the goodwill of a business or instruction in a profession, trade or handicraft.

The Act enables any seven or more members of a trade union to register the union with the Registrar of Companies on complying with the rules laid down in the Act, but if the purposes of the trade union are unlawful the registration is void.

The rules of a registered trade union are binding upon its members and a copy must be delivered by the union to any person on demand, on payment of a reasonable sum. A registered union must have an office and a penalty may be imposed on a union and its officers if the union is in operation for seven days without having such an office.

Provision is made for dissolution and amalgamation of trade unions and for change of name.

The Act declares the purposes of a trade union, merely because they are in restraint of trade, not to be unlawful so as to render any member of the trade union liable to criminal prosecution for conspiracy or otherwise or to render void or voidable any agreement or trust.

Nothing in the Act is to enable any Court to entertain proceedings instituted with the object of directly enforcing, or recovering damages for, the breach of certain specified agreements, but this provision is not to constitute such agreements unlawful. The agreements enumerated in-

clude any agreement between the members of a trade union as to dues, fines and benefits, agreements between two trade unions, or any bond to secure the enforcement of any of these agreements.

Two Imperial Statutes, The Conspiracy and Protection of Property Act, 1875, as amended in 1906, and The Trade Disputes Act, 1906, both printed in the Schedule to the Act, are declared to be the law of Newfoundland so far as they can be applied, and the Trade Disputes Act, 1906, is to apply to all trade unions registered under the Newfoundland Trade Union Act and to all trade disputes in the Colony. The Conspiracy and Protection of Property Act limits the application of the law of conspiracy to trade disputes. The Act, as amended, includes provision that an act done in pursuance of an agreement or combination by two or more persons shall, if done in contemplation or furtherance of a trade dispute, not be actionable unless the act, if done without such agreement or combination, would be actionable. The Act also provides penalties for wilful and malicious breach of contract by persons employed in supplying a town with gas or water or which may endanger life or damage property. The Trade Disputes Act, 1906, extends legal picketing to cover "peacefully persuading and communicating information" and "peacefully persuading any person to work or abstain from working".

Conciliation in Industrial Disputes

The Trade Disputes (Arbitration and Inquiry) Act, 1944, applies to any dispute or difference between employers and workmen, or between workmen and workmen, connected with the employment or non-employment or the terms of employment or the working conditions of any person. It does not apply to workers employed by the Crown.

Any such dispute, whether existing or apprehended, may be reported to the Commissioner appointed to administer the Act, by or on behalf of either party to the dispute. Whether a dispute has been so reported or not, the Commissioner may refer it to the Labour Relations Officer or take steps to bring the parties together by themselves or their representatives under a chairman mutually agreed upon or nominated by the Commissioner, or by some other person or body, or, on application of either party, by appointing a conciliator or board of conciliation. The Labour Relations Officer or other person appointed must inquire into the dispute and report to the

Commissioner. If a settlement is effected a memorandum of the terms is to be drawn up and signed by the parties or their representatives and a copy delivered to the Commissioner.

Alternatively, the Commissioner may, with the consent of both parties, refer the dispute to an arbitration tribunal consisting of: an arbitrator appointed by the Commissioner, to act alone or to be assisted by assessors nominated by and equally representative of the employers and workmen concerned and appointed by the Commissioner; or one or more arbitrators nominated by or on behalf of each party and an independent chairman, all appointed by the Commissioner. In the latter case, if the members of such tribunal are unable to agree as to the award the matter is to be decided by the Chairman. Where machinery for the settlement of disputes has been set up under a collective agreement the Commissioner may not refer a dispute for settlement under the Act unless there has been failure to settle it by such machinery and unless both parties consent.

An arbitration tribunal may not make an award inconsistent with the provisions of any Act regulating wages, hours of work or conditions of employment.

The award of the tribunal, with the opinions of the arbitrators concurring or dissenting, is to be submitted to the Commissioner who is to have them published as soon as possible. If there is any question as to the interpretation of the award, either party to it or the Commissioner may apply to the tribunal to decide the question and such decision is to be notified to the parties and become a part of the original award.

The Commissioner may inquire into the causes and circumstances of any existing or threatened trade dispute, whether reported to him under the Act or not, and may refer any matters connected with it to a board of inquiry appointed for the purpose. The board is to consist of one person, or of a Chairman and other persons, appointed by the Commissioner and reporting to him. The Commissioner may also refer to the board any matter connected with the economic or industrial conditions in Newfoundland if such matter arises out of or is relevant to the dispute.

The Commissioner may have published any information obtained or conclusions arrived at by the board, together with any minority report. It is forbidden, however, to include in any report or publication made or authorized by the board or any member of it or by the Commissioner, any

information as to any trade union or any individual business which is not available otherwise than through evidence given at the inquiry, unless such union, person or company consents. No member of the board or person concerned in the inquiry may disclose such information without such consent.

An arbitration tribunal or a board of inquiry has full power to require any person to furnish information, to give evidence under oath and to produce documents. A witness may not, however, be required to give evidence if it incriminates him or if he has lawful ground for refusing it.

Any party to a trade dispute may be represented before a board or tribunal by a legal practitioner and a board of inquiry may permit any interested person, other than a party to the dispute, to be so represented. If a legal practitioner is allowed to appear, the board may exclude him at any stage of the inquiry.

A board or tribunal may exclude or admit the public or the press during any sitting. When the press has been admitted a fair and accurate account of the proceedings, including evidence, may be published, but until the award or result of the inquiry has been published by Order of the Commissioner, publication of comment is forbidden, under penalty.

No person may be appointed as an arbitrator or assessor or as chairman of a tribunal or as member of a board of inquiry if he has any financial interest in the inquiry or dispute.

Provision is made for payment of expenses and for the making of rules of procedure to guide boards and tribunals.

Wages

The Labour (Minimum Wage) Act, 1947, enables the Governor in Commission to appoint an advisory committee to investigate terms and conditions of employment of workmen in any trade, business, industry or occupation, and to make recommendations as to minimum rates of wages to be paid to such workmen. The committee is to consist of one or more representatives of employers and workmen concerned, together with a chairman and such other persons as it is considered advisable to appoint.

The Governor in Commission after considering the report of the Committee, may make an Order fixing minimum wages. The Order may apply throughout Newfoundland or in any area, whether covered by the Order appointing the Advisory Committee

or not, and may prescribe time rates, piece rates, and overtime rates, or any of them.

If an employer is convicted of paying less than the minimum rate, the Court may, on the motion or with the consent of the workman, award the workman the balance of wages found to be due him, such amount to be in addition to any penalty imposed on the employer. The right of a workman to recover the balance of wages due him by a civil action is not barred except by satisfaction of the amount awarded.

The Act further requires the keeping of wage records by employers, authorizes the Governor in Commission to appoint officers to investigate complaints and inspect premises and wage records, voids any agreement for the payment of wages contrary to the Act or any Order made under it, and provides penalties for infraction of the Act.

The Workmen's Wages Act, 1944, applies to any person engaged in manual labour or clerical work under contract but does not apply to domestic servants or loggers, or to sharesmen who are engaged in a fishing voyage and are within the scope of the Masters and Servants Act.

The Workmen's Wages Act requires wages to be paid at least monthly, in cash or, with the consent of the workman, by cheque on a chartered bank doing business in Newfoundland. No deductions may be made except, by written agreement with the workman, for medical attendance, for certain specified things used by the workman in his trade and for food prepared and consumed on the employer's premises, for religious, charitable or educational purposes and for certain goods and services supplied by the employer.

The Masters and Servants Act enables a justice of the peace, on complaint of a fisherman, shareman or other employee, concerning non-payment of wages, to summon the employer and direct payment of wages found due.

Logging

The Logging Act, 1938, forbids any person to operate a logging camp unless he is registered in the Department of Natural Resources. The Commissioner of Natural Resources may, however, exempt any employer in respect of a particular operation, subject to prescribed conditions.

Bowater's Newfoundland Pulp and Paper Mills, Corner Brook. This is the largest pulp mill in any country.
National Film Board Photo.

Employers must, annually, before commencement of the logging season, furnish the Department with information relating to their camps, including sanitary arrangements, numbers to be employed, and particulars regarding the contract physician and hospital accommodation.

If he finds that conditions are not satisfactory the Commissioner may, if the employer does not remedy them within a specified time, forbid the camp to be operated.

At every camp a notice must be kept posted showing the rates of time wages and maximum and minimum remuneration for piece work for the various kinds of work under various circumstances. Wages must be paid at least monthly, in cash or, with the employee's consent, by cheque, and no deductions are permitted except those set out in the Act, which include board, medical fees, tools, fares, and other items allowed by the Commissioner.

Provision is made for the inspection of camps and the employment of sworn scalers. Wholesome food must be supplied to the inspector's satisfaction and the Commissioner may fix maximum and minimum prices to be charged for it by employers.

If a breach of the Act reported in writing to the employer or foreman by an inspector is not remedied, within ten days proceedings may be taken against the employer and penalties are provided for offences.

In case of a dispute between an employer and a body of loggers numbering not less than 25, either party may apply to the Commissioner for a conciliation board and a tripartite board may be appointed to inquire into the dispute and report to the Commissioner.

The Sanitation and Medical Attendance, Logging Camps, Act, 1938, lays down rules for the construction and equipment of such camps, their inspection and the provision of medical services. The employer in a camp where the average number of men employed for one month or more equals or exceeds 20 must make a contract with one or more qualified medical practitioners and for necessary medicines and medical or surgical supplies. If he is unable to do this, the Commissioner for Public Health and Welfare may prescribe other means for the medical care of such employees. The employer may deduct from wages a sum not exceeding that fixed by the Regulations to pay for medical care. An employer failing to make provision for medical services is liable for medical and hospital care of any sick or injured logger and for maintenance

of such logger's dependants during the period of disability. The Commissioner may require an employer to make provision in any camp for sick or injured loggers.

Provision is made for the inspection of camps, control of communicable diseases, and for the making of regulations for carrying out the Act.

Shops

The Shops Act, 1940, defines "shop" to include any premises where wholesale or retail trade is carried on and any office associated with it, except establishments of the Board of Liquor Control. Certain trades and businesses are exempt from the provisions of the Act except those provisions relating to periods of duty for shop assistants, seats, sanitation, sale of goods in case of illness, partitioning of shops where both ordinary and exempted trades are carried on, and penalties for violation of the Act. Thus exempt are barber shops and shops where the principal trade or business is the sale of: refreshments for consumption on the premises; newspapers and periodicals; motor, cycle and aircraft supplies and accessories; tobacco and smokers' requisites; photographic films; medicines, medical and surgical supplies or funeral furniture; milk, cream, bread, fruit and other perishable foods, confectionery.

The Governor in Commission is authorized to proclaim any area a shop-closing area, whereupon the schedule of days and hours of closing shops attached to the Act is to apply to such area. The closing days are: New Year's Day, St. Patrick's Day, Good Friday, Memorial Day (July 1), Armistice Day, Christmas Day and Boxing Day. Where any such day falls on Sunday the day following is to be a closing day. Every Wednesday is to be a half-holiday except during the twelve days immediately preceding Christmas Day and in a week when there is a whole holiday. On a Saturday which is not a whole or half holiday, on Friday when Saturday is a whole holiday and during the twelve days before Christmas, shops may be open until 9.30 p.m. but on other week-days the closing hour is 6 p.m.

No assistant may be employed in a shop to which the Act applies for more than 54 hours per week in the aggregate, exclusive of the periods of relief from duty provided for in the Act. Except during the twelve days immediately preceding Christmas no person under 18 years of age and no woman may be employed in a shop for more than 8 hours per day exclusive of periods of relief. On days when hours

of work after 6 p.m. are permitted such a person may be employed until closing time. During the Christmas period working hours for such persons may not exceed 60 and for other persons 66. The limits of working hours may be exceeded if compensation agreed upon between the employer and the assistants is paid in respect of the extra services, but the hours during which shops may be open may not be exceeded. The limit of hours may also be varied by Order of the Governor in Commission.

Any shop assistant who has been on duty for five consecutive hours must have relief from duty for a continuous period of one hour. An hour for meals must also be allowed between 12 noon and 3 p.m. and if the shop is open between 5 p.m. and 8 p.m. another hour must be given between those hours. These relief periods may be varied by Order of the Governor in Commission.

The employer in a shop must provide one seat for every three female shop assistants and must also provide suitable sanitary conveniences as determined by the Commissioner of Health and Welfare.

Provision is made for opening shops to supply articles required in cases of illness or for the convenience of ships.

Inquiries into Accidents

An Act requiring notice of, and inquiry into, accidents applies to construction, working and repair of railways, tramways, gas and electric works, canals, bridges, tunnels, harbours, docks, lumber and pulp mills, factories, mines and other works; construction or repair, by means of a scaffolding, of any building more than 30 feet in height or the use or working of any such building in which more than 20 persons other than domestic servants are employed; and the use or working in the open air of any engine. The Act applies to accidents to employees of a Government department. The Minister of Justice may bring under the Act any dangerous employment in which 20 persons or more, excluding domestic servants, are engaged.

Employers covered by the Act must send, within six days, to the nearest stipendiary magistrate, written notice of any accident to an employee causing loss of life or an injury which prevents the employee from working for five hours on any of the three working days following the accident. The Magistrate must report to the Minister of Justice who may order a formal investigation if he considers it necessary and may appoint a person having special knowledge to conduct the investigation.

Employment of Children

The Children's Protection Act enables any constable or welfare officer to apprehend without warrant and take to a shelter or detention home any child who is a "neglected" child as defined in the Act. The definition includes a child under 17 years of age who is employed in a restaurant, brewery, shop, tavern or other place where intoxicating liquor is made, bottled or sold or who is employed anywhere between 9 p.m. and 8 a.m.; a child under 14 who habitually peddles or sells articles in the streets after 9 p.m.; a girl under 17 or a boy under 12, or a boy under 14 without written consent of his parent or guardian, who peddles or sells newspapers or other articles in the street.

Any person is liable to a penalty who causes a child under 17 to be in a public place for the purpose of playing, singing, performing, or offering anything for sale, but the Director of Child Welfare may issue a permit for a child over 10 years of age to take part in an entertainment for charitable or educational purposes, on such conditions as he may think fit.

The Act makes it unlawful to employ any child under 16 years of age in any occupation declared by the Governor in Commission to be a prohibited occupation, or between 9 p.m. and 8 a.m. in any employment other than one in which only members of the employer's family are employed. It is also forbidden to employ during school hours a child who is required to attend school. Employers must keep records of employed children which must be open to the inspector at all reasonable hours.

The School Attendance Act requires children between 7 and 14 years of age, unless excused, to attend school for the full school term, and forbids employment of a child for remuneration during school hours. A certificate of exemption may be granted, for a period named in the certificate, to a child whose services are needed for the maintenance of himself or some person dependant upon him.

Miscellaneous

Other statutes forbid employment of girls and women and of boys under 13 years of age below ground in a mine, provide for the inspection of steam boilers, and for the examination and licensing of firemen and stokers.

SERVICES OF THE DEPARTMENT OF LABOUR EXTENDED TO NEWFOUNDLAND

Many of the services of the Department of Labour were automatically made available to the people of Newfoundland at the time of Confederation. Others will come into effect as soon as the necessary working arrangements have been completed with the provincial authorities.

Officials of the Department of Labour have been preparing for the increase in their responsibilities which result from Newfoundland's entry into Confederation. Each branch has made an effort to forecast the nature and extent of the demands and to make the necessary arrangements.

Considerable planning was also necessary to extend to Newfoundland the facilities of the Unemployment Insurance Commission and the National Employment Service.

There follows an outline of the services associated with the Department of Labour which will be made available to the people of Newfoundland.

Industrial Relations

The Industrial Relations Branch of the Department of Labour will perform the same functions and duties in the Province of Newfoundland for the Dominion Government as it now does in the other provinces of Canada.

A new office was opened in St. John's on April 1, from which the Branch will administer the conciliation, labour-management co-operation, fair wage, and prevailing rate functions under the Minister of Labour and the labour relations functions of the Canada Labour Relations Board.

The Industrial Relations Branch is concerned primarily with industries falling within the scope of Dominion jurisdiction—navigation, shipping, interprovincial railways, canals, telegraphs, steamship lines and ferries both interprovincial and international, aerodromes and air transportation, radio broadcasting stations, works declared by Parliament to be for the general advantage of Canada or two or more provinces.

Unemployment Insurance and National Employment Service

When Newfoundland joined Canada, unemployment insurance and the National Employment Service became available to the people of that tenth province on the same terms as in the other nine. For months, the Unemployment Insurance Com-

mission prepared for the time when confederation would be an accomplished fact and the federal unemployment insurance law would become applicable in the new province. As the time grew nearer practical steps were taken to bring plans into actual operation.

The Commission is responsible under the Act for administration of unemployment insurance and the National Employment Service. Newfoundland has had an employment service for some years which was created primarily to take care of returned soldiers. This service, according to the terms of the confederation agreement between Canada and Newfoundland, was taken over and incorporated in the National Employment Service. It had functioned only in the city of St. John's.

For administrative purposes Canada is divided into five regions by the Unemployment Insurance Commission. The Maritime Region has consisted of the provinces of New Brunswick, Nova Scotia and Prince Edward Island. Newfoundland is now added to the Maritime Region, headquarters of which are in the city of Moncton, N.B. It is planned to open three offices of the Commission in Newfoundland. These will be located in St. John's, Newfoundland's largest community; in Grand Falls, and in Corner Brook. For some little time the Assistant Regional Superintendent of the Maritime Region has been in Newfoundland organizing this work.

A special feature of the agreement between Canada and Newfoundland provides that unemployment assistance will be given to unemployed insurable persons who have been unable to build up contributions. Such persons, who under the Canadian plan are not eligible for unemployment insurance, will be paid on the same conditions and terms as if they had been insured. They will be entitled to draw a maximum of six months' benefit over the next two years during unemployment. This arrangement lapses after two years, following which benefit will be paid only to those who have built up the requisite contributions.

The Commission has taken steps to acquaint the people of Newfoundland with the nature of the unemployment insurance plan. Through the medium of radio broadcasts the plan has been explained and its outstanding provisions touched on. The first broadcast was made by the Chief Commissioner, Colonel J. G. Bisson, O.B.E., and his two fellow-commissioners, R. J. Tallon, who was nominated by employee organizations, and C. A. L. Murchison, K.C., the nominee of the employers. It covered the main features of the Act and referred to the work of the employment service. Subsequently broadcasts went into greater detail and indicated to employers and employees and the general public the value of the plan and what was expected of them in order that the plan might be carried forward.

In addition, newspaper publicity explained the plan and dealt with additional points in respect to contributions, benefit and other matters requiring explanation.

Under the Unemployment Insurance Act contributions are collected from employers and employees. In the aggregate these are approximately equal. The Dominion Gov-

ernment then adds one-fifth to the total collected, and also pays all administration costs. The first step which has to be taken consists of registering all employers with insurable employees. Subsequently books must be issued to employees in order that contributions may be recorded. It is anticipated that the staff required for the operation of the three offices will number approximately fifty.

Vocational Training

Under the Canadian Vocational Training Program the Dominion provides each province with financial assistance to aid in the development of their training projects.

Assistance is available for four main types of projects, although all provinces have not entered into agreements covering every phase of the program.

- (1) Youth training (with which is included financial assistance to nurses in training and university students);
- (2) Assistance to vocational schools (under which the Dominion is helping the provinces to increase their resources for technical education);

Iron ore cars emerge from main haulage of Dominion Steel & Coal Company's No. 6 mine at Bell Island. The mine is under Conception Bay.

National Film Board Photo.

(3) Apprenticeship training (a field in which steady expansion is being shown, and an approach made towards uniformity in standards);

(4) Training of persons released from gainful employment (carried on in co-ordination with the National Employment Service).

With the entry of Newfoundland into confederation, the granting of aid for any or all of these projects becomes the subject of negotiation between the Dominion and the new province.

Immigration and Farm Placements

The officials of this Branch have had the opportunity of discussing the problems of farm labour with interested officers from the Newfoundland government. Representatives of the latter government took an active part in the recent Dominion-Provincial Farm Labour Conference.

The extent to which the work of the Immigration and Farm Placements Branch will be affected by confederation will depend on the enactment of enabling legislation by the new provincial government. It is expected however, that it may be possible to develop a considerable movement of farm and other labour between the Island and the mainland. It is evident that there are many workers in Newfoundland with farming experience who, if they were available, could assist with harvesting on the mainland.

International Labour Organization

The International Labour Organization is a specialized agency of the United Nations. Its purposes are to improve world labour conditions through the fixing of international minimum standards, and by promoting social justice in all countries to help to secure universal and lasting peace.

A unique feature of the ILO is its tripartite structure, whereby representatives of employers and workers as well as governments participate fully in the work of the Organization.

Canada's relationship with the ILO is modified by the fact that much of the subject matter dealt with at ILO Conferences falls within provincial rather than federal jurisdiction. The Department is thus in frequent communication with the provinces in regard to ILO matters; and the participation of Newfoundland in such discussions will be sought.

Government Annuities

The Government Annuities Act came into effect in Newfoundland automatically on April 1. Canadian Government annuities offer protection to persons wishing to provide for their old age. The Act provides for their sale, both on an individual and group basis to a maximum of \$1,200 for any one annuitant.

The larger Newfoundland post offices have been given literature, posters and application forms with respect to Canadian Government annuities, and have been instructed with regard to procedures.

An annuities' representative is to be appointed to cover the territory of Newfoundland.

Research and Statistics

The work of the Research and Statistics Branch is devoted to assembling information and research into employment, labour-management relations and various other matters affecting labour, much of which is made available to the public through the LABOUR GAZETTE and other publications. Through these activities the Branch is able to contribute both to the day-to-day and longer-run work of the operating branches of the Department.

Fulfillment of these functions requires an extensive background knowledge concerning the economy of the country; consequently full use of the time immediately preceding confederation was made in gathering together as much material as possible so that the Branch might be ready to increase the scope of its regular work to include the new province.

Labour Legislation

One responsibility of the Labour Legislation Branch is the dissemination of information concerning labour laws and regulations in Canada and abroad. This information is made available to the public through special publications and through the LABOUR GAZETTE. This service is being extended to provide detailed information on Newfoundland labour law.

The summary of present labour legislation in Newfoundland appearing in this issue of the LABOUR GAZETTE will accordingly be followed at intervals by other information on this subject.

Labour Gazette

Following up the material presented in this special issue, the LABOUR GAZETTE will continue to record events and statistics concerning labour and industry in Newfoundland.

Information and Publicity

The functions of the Information Branch, in replying to questions and keeping the public informed of the work of the Department, will be extended to apply to Newfoundland. Press releases, advertising campaigns, films, and a semi-monthly bulletin to employers, are among the means used by the Branch in providing its publicity service.

Library

The facilities of the Library of the Department of Labour will be extended to Canada's new province.

Books and pamphlets are available for loan; a select list of recent additions appears monthly in the *LABOUR GAZETTE*.

A short bibliography on Newfoundland, prepared by the Library of the Department of Labour, appears below.

CANADA'S HEALTH AND WELFARE PROGRAM WILL APPLY IN NEWFOUNDLAND

Such services as family allowances, old age pensions, physical fitness and recreation programs, and health services, are being extended to Newfoundland.

A major contribution to Newfoundland's way of living will be made by the various health and welfare services already enjoyed by the people of Canada. The services described below are administered by the Department of National Health and Welfare.

Family Allowances

The payment of Family Allowances in Newfoundland will benefit an estimated 117,000 children in more than 45,000 families. It will place in Newfoundland homes between eight and nine million dollars annually in consumer purchasing power to be applied "exclusively towards the maintenance, care, training, education and advancement of the child."

If Canadian experience is taken as a criterion, Family Allowances will be spent largely on food, clothing, medical care and education, and will improve the level of school attendance. Reports of the Director of Child Welfare of Newfoundland place poor economic conditions of the home, particularly the lack of proper clothing, as an important contributory factor to poor school attendance in the outlying areas. By supplementing family income, Family Allowances will not only improve the well-being of the whole child population but,

in so doing, will enable parents to co-operate with the provincial authorities in enforcing the compulsory School Attendance Act passed by Newfoundland in 1942.

Under the Family Allowances Act, 1944, the Allowances are payable in respect of virtually every child below the age of sixteen years. The Allowances are paid out of the Consolidated Revenue Fund of Canada, are tax free, and involve no means test. Payment is made monthly, and normally to the mother, though any person who substantially maintains the child may be paid the Allowance on its behalf.

Old Age Pensions

Unlike Family Allowances, the Canadian Old Age Pensions program is a joint federal-provincial undertaking. Its application in the tenth province depends, first, on the decision of the Newfoundland legislature to enact legislation authorizing payment of pensions in accordance with the federal Act and, second, on the completion of an agreement between the Government of Canada and Newfoundland. It should be noted that the federal Act permits each province to specify the maximum pension to be paid and to adjust the allowable income within the limits of the Act.

If the program should be on the same basis as in neighbouring provinces, it is estimated that between nine and ten thousand persons aged 70 and over may be eligible for benefit. With a maximum pension of \$30 a month, which is the maximum to which the Federal Government will contribute 75 per cent of the cost, the total expenditure might approximate \$3,300,000 annually. Of this amount, the Federal Government's share would be about \$2,500,000, and Newfoundland's \$830,000. Under the existing Newfoundland pension program, which limits eligibility to persons 75 years and over, or to a widow who is 65 at the time of her husband's death, approximately three thousand persons are receiving Old Age Pensions.

Pensions for blind persons aged 21 years and over, numbering some six hundred, according to latest estimates of the Canadian National Institute for the Blind, may add another \$200,000 to the total expenditure on pensions.

Physical Fitness and Recreation

Development of year-round community recreation programs for all age groups in Newfoundland, as elsewhere, has been hampered by the lack of trained leadership, adequate facilities, and the scattered population. Discussion and craft groups and a few summer camps are sponsored by religious organizations and service clubs, and at least one industry retains a full-time recreation officer. Also, the Department of Education provides instruction in various crafts for young people and adults. Both the International Grenfell Association and some 79 Jubilee Guilds encourage handicrafts as a means of augmenting family income.

Financial assistance to promote community recreation is now available to Newfoundland under the terms of the National Physical Fitness Act, as to all provinces signing an agreement with the Federal Government. Should Newfoundland participate in the federal fitness program, approximately \$7,000 would be available annually to provide leadership training and to assist communities and voluntary associations to meet needs beyond the resources of local groups.

The services of the Physical Fitness Division of the Department of National Health and Welfare are available to all provinces whether or not they participate in the national program. They include consultant and reference services, pamphlets, bulletins, films, and information concerning developments both in Canada and abroad.

The National Council on Physical Fitness, largely composed of provincial representatives, meets twice each year to advise the Minister.

Health Services

Newfoundland health services will be substantially assisted by union with Canada, through direct financial aid under the National Health Grant Program, and through services extended by federal departments concerned with health matters.

Under the National Health Grant Program the new province will be eligible to receive over \$900,000 in 1949-50 and, as with the other provinces, progressively increased amounts during succeeding years. The Health Survey Grant will make possible a thorough analysis of existing health resources and needs, to help in planning the expansion of services; the Hospital Construction Grant will assist in the provision of badly needed new hospitals of all kinds; and general health services will be greatly strengthened and extended through the grants for General Public Health, Tuberculosis, Mental Health, Venereal Disease, Crippled Children, Cancer, and Public Health Research. The Professional Training Grant will supplement the health grants in assisting to provide for training of the personnel required for this expanded program.

Newfoundland will be relieved of the cost of certain services, such as the administration of legislation covering food and drugs, narcotic control, proprietary or patent medicines, and quarantine, which now become a federal responsibility. The Department of National Health and Welfare will extend to Newfoundland its medical and hospital care program for sick mariners. The comprehensive treatment and rehabilitation services administered by the Department of Veterans Affairs now become available to Newfoundland veterans and the new province will be eligible for federal assistance in the restoration of sight of blind pensioners. As a part of Canada, Newfoundland will have a direct interest in the research programs of the Divisions of Health and Medical Research of the National Research Council.

In addition to this assistance Newfoundland will now benefit from the important consultant services provided by the Department of National Health and Welfare in child and maternal health, dental health, epidemiology, hospital design, mental health, venereal disease control, industrial health, blindness control, nutrition, public health engineering, civil aviation medicine and laboratory investigation.

NOTES OF CURRENT INTEREST

Strikes and lockouts reduced in 1948

The annual report, *Strikes and Lockouts in Canada and Other Countries*, covering the year 1948, is being issued as a supplement to the April LABOUR GAZETTE,

and will be mailed to subscribers.

Some of the important features noted in this year's report are as follows:—

There was a marked improvement in industrial relations in 1948 as compared with the two previous years.

During 1948 the loss of time due to strikes and lockouts was little more than one-third of the loss in 1947 and one-fifth of that in 1946, the peak year. The number of strikes and lockouts in 1948 and the number of workers involved were the lowest recorded for any year since 1939.

During the year there were 154 work stoppages, involving 42,820 workers, and resulting in a time loss of 886,000 man-working days.

Based on the number of wage and salary workers in Canada, the total amount of time lost was about one-tenth of one per cent of the estimated working time, equivalent to an average loss for each wage and salary worker in Canada of about one-quarter of a day.

The demand for higher wages, to offset increases in the cost of living, was the central issue in two-thirds of the strikes during the year, causing about 85 per cent of the total time loss.

Such demands were often linked with various questions involving unionism, working conditions, etc. However, since 1945, when most of the strike idleness resulted from questions involving unionism, the question of union security has not been a major issue.

Of the 154 strikes and lockouts during the year, about one-fifth were settled in favour of the workers, and one-quarter in favour of the employers, while about 40 per cent resulted in a compromise or partial gain for the workers, about the same proportion as last year. Most of the important strikes were in this latter group, involving about 60 per cent of the total workers and over 70 per cent of the time loss.

Settlement of 60 of the 154 strikes in 1948 was brought about by direct negotiations. Negotiations played an important part in the settlement of differences in many other cases, following reference to conciliation boards, labour courts, etc. Provincial conciliation, assisted by civic con-

ciliation in three cases, effected settlement in 34 strikes; 11 strikes were referred to labour boards, commissioners, etc.; seven were settled by arbitration; and 29 by return of workers.

Entry of Displaced Persons to Canada in 1948

Information in regard to the immigration of Displaced Persons was given in the House of Commons on February 16 in reply to questions.

A reply by the Hon. J. A. MacKinnon, Minister of Mines and Resources to Mr. Alastair Stewart (Winnipeg North) indicated that during the year 1948, the Department of Labour co-operated with the Immigration Branch in arranging for the entry of 21,012 persons for whom employment was found in Canada.

In addition to this total, 24,962 Displaced Persons admitted to Canada during the calendar year 1948 were destined to relatives under existing immigration regulations, and 632 were admitted under guarantee of employment by their sponsors. In some cases the relatives in Canada also supplied employment.

Mr. Paul E. Coté, Parliamentary Assistant to the Minister of Labour, answered another question of Mr. Stewart's by stating that 6,629 Displaced Persons had completed their work contracts in Canada.

Mr. Coté described the employment policy in regard to Displaced Persons as follows:—

"On completion of undertaking, Displaced Persons may accept employment of their own choosing in the same manner as other residents. They are encouraged to remain in the employment to which they were assigned but are informed that the facilities of the National Employment Service are available to them if they wish to take other work. Local offices of the National Employment Service have been instructed to interview such applicants carefully to ensure that the most suitable possible placements are made having regard to the applicants' wishes and skills or trades possessed."

Housing construction in Canada, 1948

Dwelling units completed in Canada in 1948 reached a total of 81,243 (76,097 new constructions and 5,146 conversions), according to estimates of the Dominion

Bureau of Statistics. This compares with 79,359 units completed in 1947, and brings

the total number of dwelling units completed in the last four years to 276,516.

Activity in the residential construction field was considerably greater than in 1947. Although completions in 1948 were only 1,884 units more than in 1947, the number of dwelling units under construction increased from 42,215 units at the end of 1947 to 56,456 at the end of 1948. Contractors took advantage of the good building weather in the late fall and concentrated on getting construction started rather than completing the dwellings which had reached the closed-in stage. The high carry-over indicated that the usual seasonal decline in the number of completions would be less pronounced in the winter months which followed.

Most of the new dwelling units completed in 1948 were of the one-family detached type. These numbered 61,787, the remainder comprising 4,560 two-family attached, 1,607 in rows or terraces 7,836 in apartments and flats, and 307 other types.

Completions of newly constructed units by provinces were as follows: Prince Edward Island 230; Nova Scotia 2,588; New Brunswick 1,991; Quebec 20,171; Ontario 26,391; Manitoba 4,561; Saskatchewan 3,211; Alberta 6,223; British Columbia 10,731.

The average length of time required to build the dwelling units completed in 1948 was 6.5 months. The Quebec average of 5.5 months—the lowest among the provinces—reflects the higher proportion of multiple units being built in this region upon which there is a saving of time per unit. A definite seasonal pattern is indicated by the monthly averages. In general, dwellings completed in the first half of the year required more than the average time to build, while those in the latter half required less than the average.

It is estimated from the types of dwellings constructed that 25 per cent of those completed in 1948 are for rental purposes, and that the remainder will be owner-occupied. Almost 40 per cent of the rental units were built under the management of Central Mortgage and Housing Corporation.

Student-at-law held insurable under U.I. Act

A recent decision of the Umpire under the Unemployment Insurance Act deals with the question whether law students, articulated to solicitors, are insurable. Although this decision relates to two students articulated under the form of articles approved by the Law Society of Upper Canada, it is never-

theless of interest to law firms throughout the country, since the form of articles used is very similar in most of the provinces.

The Umpire's decision was that a student-at-law is under a contract of apprenticeship and, when remunerated for services performed under this contract, is included in the class of employees employed in insurable employment.

A summary of the case appears elsewhere in this issue under the heading *Selected Decisions of Umpire under the Unemployment Insurance Act.*

Old age and blind pensioners in Canada

The number of persons receiving old age pensions in Canada increased from 241,032 at September 30, 1948, to 248,289 at the end of the quarter December 31, 1948.

The Dominion's contributions under the Dominion-Provincial scheme totalled \$16,352,748.46 for the quarter ended December 31, 1948 as compared with \$15,868,086.44 in the preceding quarter. Since the inception of the Act the Dominion has contributed \$528,742,751.93.

The average monthly pension in six provinces ranged between \$29 and \$30; in two provinces it was slightly less than \$29, and in the remaining province it was \$26.32.

In only one province was the number of pensioners as high as three per cent of the total population.

Pensions were being paid to 9,425 blind persons as at December 31, 1948, as compared with 9,140 at September 30, 1948.

The cost of pensions, in respect of blindness, to the Dominion was \$645,658.66 for the quarter ended December 31, 1948, and \$627,921.12 in the preceding quarter. Since the inception of the Act the total has been \$14,844,262.88. The average monthly pension was between \$29 and \$30 in all provinces but one where it was \$28.54. Pensioners numbered less than one-tenth of one per cent of the total population in most provinces.

Exemption of part-time subsidiary work under U.I. Act

The Unemployment Insurance Commission has made a Special Order under the provisions of paragraph (p) of Part II of the First Schedule to the Unemployment Insurance Act, which excludes from the provisions of the Act the following part-time subsidiary employment:—

Employment of any person who is in receipt of fixed annual remuneration not

exceeding in value \$500 a year and who is not ordinarily dependent for his livelihood on any insurable employment.

This Order is effective from November 20 1948. It replaces a former Order made in 1943, which excluded employment of any person in receipt of fixed annual remuneration not exceeding in value \$250 a year. The Order has been amended to take account of the rise in wages and salaries in the past three or four years.

The Order chiefly affects persons carrying on part-time jobs at a small annual rate of remuneration such as secretaries of clubs, co-operatives, rural municipalities and school boards, when they normally depend for their livelihood on some other employment or are engaged in business on their own account.

The Order does not apply to persons who ordinarily work in insurable employment but happen to be temporarily employed part-time at wages of \$500 or less per year.

In view of the increase in wages between 1943 and 1948 it is expected that the new Order will exclude substantially the same group as the former Order.

Coca-Cola, Limited, introduces pension plan

Coca-Cola, Limited, initiated a contributory retirement income plan for its employees and for those of its subsidiary organizations on December 31, 1948.

A trust fund has been established into which are paid the contributions of both the Company and its employees. The fund will be administered by an "Employees' Retirement Plan Committee" appointed by the Board of Directors of the Company. Investment of the fund will be controlled by the Royal Trust Company.

The employees' contributions have been predetermined and set out in a "schedule of contributions" included in the plan. They approximate four and one-half per cent of each employee's income derived from the Company.

The Company pays the cost of operating the plan and, in addition, all "past service benefits" as well as "the greater portion of the contributions for future service benefits."

"Past service" covers the period of continuous service from an employee's thirtieth birthday, or the date he (or she) first entered the continuous employ of the Company, whichever is later, to the date of the introduction of the plan.

"Future service" is defined as the period of an employee's continuous service with the Company following his thirtieth birth-

day, during which he contributes to the plan. The total of past and future service cannot exceed 35 years.

Under normal circumstances a member's wife (or husband) is named as a "contingent member" (beneficiary) but in special cases, another relative may be chosen, subject to the approval of the Retirement Plan Committee.

To be eligible for membership, an employee must be at least 30 years, and under 60 years of age and have completed five years of full-time service with the Company. The normal age for retirement has been set at 65, but under special circumstances a member may retire at any time after his sixtieth birthday and receive a correspondingly smaller retirement income.

Three options are offered an employee when he reaches retirement age: (1) monthly cheques for the remainder of his lifetime; (2) monthly cheques for a smaller amount than under option (1), payable for the remainder of his lifetime, and continued after his death to the "contingent member" for life; (3) monthly cheques for a smaller amount for the remainder of the lifetime of the member, and after his death monthly cheques for one-half the amount continued to the beneficiary for life.

If the contingent member dies before the retirement income payments start, options (2) and (3) are automatically cancelled and payments are made in accordance with option (1). If the member dies before reaching the retirement age, the sums he has contributed to the fund are paid to the contingent member with interest.

Amendment of British Wages Councils Act

A Bill to amend the British Wages Councils Act 1945, was introduced in the House of Commons on October 28, 1948, by Mr. George Isaacs, Minister of Labour and

National Service, and received Royal Assent on December 16. The 1945 Act (L.G., 1945, p. 129 and p. 874) re-enacted the Trade Boards Acts of 1909 and 1918, but reconstituted the Trade Boards established for purposes of minimum wage regulation as Wages Councils. It empowered the Minister of Labour to establish Wages Councils where a reasonable standard of remuneration was not maintained. Wages Councils have authority to fix a statutory minimum wage, including a guaranteed wage, and annual holidays with pay, but without restriction to the previous maximum of one week. Under the Act there are now 59 Wages Councils in 51 trades. The remaining eight are made up of eight trades with separate Councils in Scotland.

The amending Act has two main purposes: (1) to provide a simpler and more satisfactory procedure for the regulation of wages and conditions of service of workers in the road haulage industry by bringing to an end the Road Haulage Wages Act, 1938, and placing these workers under the Wages Councils Act; and (2) to expedite and improve the statutory machinery for regulating the minimum wage of workers in relation to whom Wages Councils operate.

As regards road haulage workers the wage-regulating machinery set up under the Road Haulage Wages Act which consisted of a central board and 11 area boards resulted in considerable delay in getting decisions. The Road Haulage Central Wages Board is now to become a Wages Council, governing those workers whose wages were regulated by order under the Road Haulage Wages Act. The existing wages order for these workers is to continue in effect as if it had been made under the Wages Councils Act.

Other clauses amend the Wages Councils Act. If an order is made abolishing or varying the field of operation of a Wages Council, the Minister has power not only to transfer the workers affected to another existing Wages Council, as at present, but also, in suitable cases, to establish one or more new Wages Councils.

Application for the abolition of a Wages Council may now be made by a Joint Industrial Council, Conciliation Board, or other similar body constituted by organizations which represent substantial proportions of workers and employers.

The Act reduces from 21 to 14 days the period following the publication of wages regulation proposals by a Wages Council during which objections can be received from the interested parties.

Employment status of older workers An article in the January issue of *Industrial Bulletin*, published by the New York State Department of Labour, discusses the employment problems of older workers and points out that "the difficulties vary according to whether the older worker is already employed or is unemployed and looking for a job."

The growth in the membership of trade unions in recent years and the care taken by them to guard against any arbitrary discharge of their members, together with the emphasis placed on seniority provide elements of greater security for employed older workers, the article states.

It is pointed out that while seniority provisions in union contracts are not usually designed primarily to give job security to older workers they have an important role in preventing the use of lay-offs as a device for getting rid of older workers whose ability may be slightly impaired by age. It is held to be questionable whether the retention of older workers who have lost some of their skill or speed may not be offset by such factors as greater stability and loyalty, generally considered attributes of the older worker. It should be noted that "piece work systems in some cases automatically accommodate the declining capacities of older workers."

It is asserted that "almost general" pre-war practice in industry of arbitrarily setting the retirement age for men at 65 years has now become less general as a result of experience during the war, when shortages of manpower enabled older workers to demonstrate their worth. Such alternatives as the transfer of older workers to jobs more suited to their abilities, or less rigid attendance schedules, or adjustments on the same job may in many instances make it possible to retain the services of older workers.

A much more difficult problem that confronts older workers is that of finding jobs during a period of unemployment. It is pointed out that "most wage-earners, whether because of discharge, selective or mass layoff, or business failure, become unemployed one or more times during their working life." When any of these occur, it is almost always more difficult for older workers to obtain jobs than it is for younger persons. If the unemployment is prolonged, "emotional balance" becomes impaired, skills become dulled and initial difficulties in finding jobs may snowball into . . . forced retirement from the job market."

It is suggested that "one of the reasons for arbitrary age limits is ignorance of the capabilities of older workers." An employer may have had limited contacts with older workers, or his attitude may be coloured by unfortunate isolated experience. "These employers fail to understand that some older persons can perform the typical jobs of younger workers; that many older workers excel in jobs requiring long training, experience, knowledge and skill; and that older persons, as a group, tend to have positive qualities of dependability, judgment and loyalty." Again the practice of automatically rejecting older persons having minor physical or personality defects

deserves study and possible revision. Reference is made to a study made by the United States Bureau of Labour Statistics which shows that "physically handicapped workers compare very favourably in respect of accident rates, absenteeism and output with non-handicapped workers in the same occupations." (See also L.G., 1947, p. 126; and 1948, pp. 292, 491, 708, 1090.)

It is declared that "from a long range viewpoint, our society can ill afford a mounting proportion of older persons among its consuming population unless they at the same time assume a more prominent role among its producers. It can ill afford arbitrary barriers which leave older persons with less than equal status in the labour market."

Wage rates and prices reduced at U.S. General Motors

Following a reduction in the official United States cost-of-living index, a wage cut of 2 cents an hour was announced by the General Motors Corporation, effective for March, April and May.

The wage cut is in accordance with the agreement reached last year between the company and the United Automobile Workers of America (CIO) linking wages with the cost-of-living index under a formula which provides for quarterly wage adjustments in accordance with fluctuations in the cost-of-living index (L.G., July 1948, p. 701).

This wage change is the second since the GM wage formula was established last May. In September, 1948, the company's hourly-rated workers received a 3-cent rise for the quarter. No adjustment was made last December because the index had not fluctuated sufficiently. The next possible change, in June, 1949, will be determined by the index for May 15.

The present 2-cents-an-hour decrease will be more than offset on May 29 by a 3-cent rise which will come into effect under another feature of last year's contract, providing for an annual 3-cent increase to improve the standard of living of workmen in accordance with estimated gains in productive efficiency.

Simultaneously with the announcement of the wage cut, GM reduced prices on its passenger cars by \$10 to \$40 and on trucks by \$100 to \$150.

A similar contract is in effect between General Motors of Canada and its employees at Oshawa and Windsor, represented by the UAW (L.G., Sept., 1948, p. 965). No wage changes have so far resulted from this agreement.

Growth in number of apprentices in U.S.A.

A recent report of the Bureau of Apprenticeship in the United States Department of Labour indicates a substantial growth in apprenticeship.

At the end of November 1948, registered apprentices totalled over 229,000, as against about 84,000 in March, 1940. It is estimated, however, that the present number of actual working apprentices may be 20 per cent more than the figure given since many apprentices fail to register.

The largest numbers of apprentices are being trained, in the order of their numerical importance, for employment as (1) workers in the building trades; (2) carpenters; (3) machinists; (4) plumbers; (5) electricians, and (6) printers. California and New York lead the states in the numbers of apprentices registered in industrial training programs; both have over 30,000 such persons registered.

Economic conditions in New Zealand

An article by P. V. McLane, Commercial Secretary for Canada in New Zealand, appearing in the February 12 issue of *Foreign Trade*, indicates that full employment still prevails in New Zealand.

The article states that there were 21,485 vacant positions on November 30, 1948, of which 11,348 jobs were for men and 10,137 for women. "These figures comprised those known to the National Employment Service. Judging from the falling off in the labour force in the woollen industry and other basic industries, there would be positions available for a much larger labour force than exists now. Establishment of new industries and the forty-hour week have accentuated the difficulty."

Comparing the 1936 Census with that of 1945, the article notes that, "despite the employment of a considerable number of older persons and younger women continuing on or entering active employment, the proportion of persons not actively engaged increased from 56.79 per cent in 1936 to 60.38 in 1945, due to the gradually rising number of people in the older-age groups and the greater number of births in the later war years."

Additional features occurring during the intercensal period are "the reduced male employment in primary production, compensated for in some measure by additional female labour; increased female participation generally in industrial activities; diversion of labour from domestic and personal services to industrial pursuits; and finally,

the marked increase in the public administration and professional groups, which includes service personnel and administrative staffs in New Zealand."

Discussing industrial relations in New Zealand, the article states:—

"In 1947, there were 133 industrial disputes involving 22,170 workers with a loss of 78,835 working days and some £123,326 in wages. There was more unrest during 1947 than in any of the previous ten years. For the nine months of 1948, there were 78 disputes involving 21,260 workers with a loss of 91,884 working days and some £162,369 in wages.

"Miners, dock workers, and members of the building and construction trades proved the most contentious. In the coal mining industry there were 30 disputes involving 7,926 workers and losing 31,916 working days and £60,900 in wages. Dock workers had only seven disputes, but they involved 2,428 workers, and lost 28,679 working days and £38,678 in wages. In the building and construction trade there were 11 disputes which involved 5,513 workers, who lost 22,965 working days and £45,548 in wages.

"In the last few years the leading cause of strikes has been due to unsatisfactory working conditions. Other causes have been distribution of work in coal mines and on wharves, conveyance to and from work, atmospheric conditions in coal mines, accommodation on ships, supply of food, methods of handling cargoes and so forth. There have been disputes with the object of raising wages and a number of strikes were called because the trade unions claimed dismissals of workers were on insufficient grounds.

"With respect to wages and salaries of factory workers during the same period, males were paid an average of £254 annually in 1938-39, rising to £377 in 1945-46 and £384 in 1946-47. Females on the other hand, were paid £108 in 1938-39, £184 in 1945-46 and £194 in 1946-47. These rates are somewhat higher at the present time.

"The output in individual industries has, however, been affected by the shortage of staff. Some of the newer industries have been able to attract workers not only from the farms but from some of the basic industries, such as the woollen industry. Recently the New Zealand Retailers' Association approached the government with a request for a substantial importation of wool blankets. The retailers estimated that the increased demand for blankets was 250,000 pairs a year. Before the war the local mills could supply about 200,000 pairs annually. Output is now down to 120,000 pairs."

Action against Communists in India

In the Parliament of India on February 28, the Prime Minister, Pandit Nehru, told a questioner that the total number of persons arrested in the previous ten days over a proposed railway strike was 870 and explained the Government's policy on the matter. To a supplementary question on whether the Government proposed to declare the Communist Party an unlawful body, he replied that the Government were reluctant to declare any organization, as such, unlawful. For the present they proposed to deal not with the organization as such but with individuals.

"The policy of the Government," he explained, "has been not to interfere in any way with the functioning of trade unions and other labour organizations. The Government are of the opinion that the formation and legitimate functioning of trade unions should be encouraged so that labour may play its proper part in industry and in the promotion of its own interests. The Government have attempted to give the widest latitude to all peaceful propaganda of any policy or doctrine, even though they were opposed to that doctrine. The Government have therefore refrained from taking any action against the Communist Party of India as such in spite of the virulent propaganda and incitement to violence which the Communist Party members have indulged in. Where violence has been actually attempted or encouraged the Government have taken action. Such action has been limited to individuals who were connected with this violence or incitement to violence."

Pandit Nehru added: "The Communist Party of India has in the past year adopted an attitude not only of open hostility to the Government, but one which can be described as bordering on open revolt. This policy has been given effect to intensively in certain limited areas in India and has resulted in violence including murders, arson and looting as well as acts of sabotage. . . .

"For the past few months the Government have been greatly preoccupied with meeting a serious economic situation causing distress to millions. It was implicit in our program that there should be a rapid movement of commodities throughout the country.

"Towards the end of November the Working Committee of the All-India Railwaymen's Federation met in Nagpur and decided on taking a ballot among members affiliated to it. At this time we had addi-

tional confirmation of information which had been coming to us from time to time that Communist elements working in railway unions were not above exploiting the proposed strike for political purposes and in particular above using violence and sabotage to gain their ends.

"Negotiations took place between the Transport Minister and Mr. Jai Prakash Narayan, President of the All-India Railwaymen's Federation, with a view to devising means for averting the strike. It was clear to the Government that a strike on the railways, particularly at the present juncture, would be an unmitigated disaster to the country. Apart from the fact that the dislocation of transportation would nullify the steps that the Government had been taking to meet the serious economic situation, a famine was developing in Gujerat and Cutch and a strike would be disastrous to millions of human beings and cattle in these areas. These discussions were conducted in a friendly atmosphere and certain arrangements were agreed to. As a result the Railwaymen's Federation decided not to proceed with the strike."

Despite this decision certain Communist elements in the Federation proceeded with their strike program, Pandit Nahru continued. Reliable reports continued to reach the Government that a widespread program of sabotage had been planned and that it was decided to enforce the strike by violence. Many such instances had already occurred. Recently, there were unfortunate clashes between students and others and police in Calcutta, during which hand grenades and bombs were used against the police and public property such as busses and tramcars. There was proof that the agencies which provided these weapons were using them for similar purposes for the railway strike.

"The Communist Party of India has recently concentrated on the issue of a general strike on the railways, as well as other essential services of paramount importance to the community. It has looked upon these strikes not from a trade union or economic point of view, but as a weapon to create a chaotic state in the country, and which it is thought would help the party to gain its other objectives. It is deliberately seeking to create famine conditions by paralyzing the railway system so that foodstuffs should not be transported, the object being to create a general background of chaos, breakdown of administration and mass uprising. A large number of prominent Communist Party members have gone underground and the Government

have evidence to indicate that organized attempts are being made to conduct campaigns of sabotage. The permanent way was to be damaged, locomotives interfered with and general sabotage of vital installations was aimed at." He recalled the destruction of a Calcutta telephone exchange some time ago.

Fortunately the great majority of railwaymen and other workers declared themselves opposed to a general strike and to such methods. The Communist Party however appeared bent on flouting the opinion of this majority of workers and pursued a technique of terrorizing those disagreeing with it. While interfering with the freedom of action of others, it wanted full freedom for itself to carry on its own anti-social and disruptive activities. If any action was taken by the Government to check them, protests were raised on the ground of civil liberties being interfered with. As part of this technique, organizations ostensibly for protecting civil liberties were started, their real object being to encourage anti-social activities. The Government were anxious that civil liberties should be fully maintained. But it was not the Government's conception of civil liberty to permit coercion and terrorism against the general community. It was the paramount duty of the Government to give security to the people and prevent their normal life from being interfered with by violence.

"No Government and no social life would be possible if these methods were tolerated. Hence the Government have been compelled to take measures to meet this situation. If any strike takes place on the railways, or elsewhere, they are determined to deal with it firmly. Such a strike has nothing to do with economic questions or normal activities of trade unions. The Government have already shown their earnest desire to meet all legitimate demands from their employees. They will always be prepared to consider any difficulties that their employees have to face, and to remove them as far as possible. They are determined to maintain the well-established rights of labour. But they cannot submit to threats of violence and incitement to active revolt from any quarter.

"In furtherance of this policy, the Government have arrested members of the Communist Party of India and taken such other precautionary measures as they deem necessary. They have asked provincial governments to do likewise to ensure that vital installations are protected."

VACATIONS WITH PAY IN MANUFACTURING INDUSTRIES, OCTOBER 1947

Almost every worker employed in manufacturing in Canada now receives an annual paid vacation. Six of the nine provinces require such vacations by law. The commonest form of vacation is one week after a year of service. Two-thirds of the workers are also eligible for a second week's holiday, usually after five years' service. Vacations of three weeks are available to about 20 per cent of the workers in manufacturing, usually after 20 or 25 years' service.

This study was prepared in the Research and Statistics Branch, Department of Labour, and is the first of three, dealing with working conditions in the manufacturing industries. The others will deal with statutory holidays and hours of work.

The information on vacations with pay in manufacturing industries contained in this article was compiled from replies to a general questionnaire on working conditions, sent to establishments across Canada as part of the Department's annual wage survey covering the last pay period preceding October 1, 1947.

A total of 4,339 establishments in the various manufacturing industries were included in the survey of vacations and these establishments reported a total employment of 576,477, exclusive of office staffs. The coverage was nearly two-thirds of the total number of persons employed in manufacturing, and is believed to be representative of manufacturing as a whole.

The following shows the manufacturing industries in Canada which have been used with a breakdown by establishments and wage-earners:—

| Industry | Number of Estab- lishments | Wage- earners |
|--|----------------------------------|------------------|
| Primary Textile Products..... | 322 | 63,389 |
| Cotton Yarn and Cloth..... | 35 | 20,025 |
| Woolen Yarn and Cloth..... | 94 | 14,079 |
| Knitting—Hosiery, etc..... | 167 | 20,614 |
| Rayon Yarn and Cloth..... | 26 | 8,671 |
| Clothing..... | 375 | 25,328 |
| Men's and Boys' Suits and Overcoats..... | 64 | 8,360 |
| Work Clothing..... | 61 | 4,684 |
| Men's Shirts..... | 56 | 4,388 |
| Women's and Misses' Suits and Coats..... | 71 | 2,481 |
| Dresses..... | 123 | 5,415 |
| Rubber Products ¹ | 43 | 19,515 |
| Pulp and Its Products..... | 94 | 43,310 |
| Paper Boxes..... | 77 | 6,272 |
| Printing and Publishing..... | 394 | 21,868 |
| Newspaper Printing (Daily)..... | 76 | 6,664 |
| Book and Job Printing ² | 246 | 9,039 |
| Lithographing, etc. ³ | 72 | 6,165 |
| Lumber and Its Products..... | 643 | 52,243 |
| Sawmill Products..... | 214 | 22,827 |
| Planing Mills, Sash, Doors, etc..... | 206 | 9,978 |
| Wooden Furniture..... | 158 | 11,389 |
| Veneers and Plywoods..... | 17 | 4,172 |
| Baskets and Wooden Boxes..... | 48 | 3,877 |

¹ Includes two establishments manufacturing synthetic rubber.

² Includes weekly newspapers.

³ Also includes engraving, stereotyping and electrotyping.

| Industry | Number of Estab- lishments | Wage- earners |
|---|----------------------------------|------------------|
| Edible Plant Products..... | 462 | 45,951 |
| Flour | 35 | 3,628 |
| Bread and Cake..... | 169 | 12,105 |
| Biscuits | 29 | 4,143 |
| Confectionery | 46 | 6,354 |
| Canned Fruits and Vegetables..... | 183 | 19,721 |
| Fur Products | 88 | 2,620 |

| Batteries | 14 | 1,760 |
| Chemical Products: | | |
| (Acids, Alkalis and Salts)..... | 21 | 3,390 |

Provincial Legislation on Vacations with Pay

Paid vacations for factory workers have been provided by statute or by statutory authority in recent years in all the provinces except the Maritimes.*

In British Columbia, Manitoba, Ontario, and Saskatchewan, there are separate statutes providing for these holidays; in Alberta, holidays are provided by Orders

under the Labour Act, 1947, and in Quebec, by an Order under the Minimum Wage Act which, with the Collective Agreement Act, was amended in 1946 to permit such Orders.

In all these provinces, a worker is entitled to the holiday and pay shown in the table below after a year of employment. In Quebec, a worker is entitled to a half-day for each calendar month of employment if he has worked less than a year and in Saskatchewan, to one day for each month. In all these provinces provision is made for payment for holidays earned but not taken by workers who terminate their employment.

* See *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, issued by the Legislation Branch of the Department of Labour.

PROVINCIAL LEGISLATION ON VACATIONS WITH PAY

| Province | Length of Holiday | Pay |
|-----------------------|-------------------|---|
| Quebec..... | One week | Regular weekly pay, if on time basis; otherwise 2 per cent of annual earnings |
| Ontario..... | One week | 2 per cent of annual earnings |
| Manitoba..... | One week | Regular Pay |
| Saskatchewan..... | Two weeks | 1/26 of annual earnings |
| Alberta..... | One week * | Regular Pay |
| British Columbia..... | One week | Regular Pay |

* Two weeks after 2 years' employment.

TABLE I.—VACATIONS WITH PAY IN THE MANUFACTURING INDUSTRIES IN CANADA, 1947

(Expressed in percentages of total establishments and workers covered in survey)

NOTE.—5.7 per cent of the establishments, employing 2.0 per cent of the workers, either gave no information on this subject or reported giving no paid vacations.

| Length of Service Required | One Week | | Two Weeks | | Three Weeks | |
|------------------------------|-----------------|---------|-----------------|---------|-----------------|---------|
| | Estab-lishments | Workers | Estab-lishments | Workers | Estab-lishments | Workers |
| | % | % | % | % | % | % |
| <i>Initial Vacation</i> | | | | | | |
| One Year or Less..... | 82.4 | 90.2 | 11.4 | 7.4 | .2 | .1 |
| More than One Year..... | .2 | .2 | .1 | .1 | | |
| Total..... | 82.6 | 90.4 | 11.5 | 7.5 | .2 | .1 |
| <i>Maximum Vacation</i> | | | | | | |
| One Year or Less..... | 45.7 | 28.7 | 13.8 | 7.5 | .4 | .3 |
| 18 Months to Four Years..... | .1 | .2 | 8.0 | 5.0 | .1 | .1 |
| Five Years..... | | | 17.4 | 33.6 | .2 | .6 |
| Six to Fifteen Years..... | | | 2.6 | 3.1 | 1.0 | 1.1 |
| Twenty Years..... | | | .2 | .4 | 1.9(1) | 5.4(1) |
| Twenty-five Years..... | | | .3 | .3 | 2.6(2) | 11.7(2) |
| Total..... | 45.8 | 28.9 | 42.3 | 49.9 | 6.2 | 19.2 |

(1) 14 per cent of these establishments and 33 per cent of the workers came under a 21-year service requirement.

(2) 5 per cent of these establishments and 3 per cent of the workers came under a 30-year service requirement.

Results of Survey

The survey shows that at least 98 per cent of the workers in manufacturing receive annual paid vacations. There is, however, considerable variation in the kind of vacation given, and in the length of service required for the worker to qualify for paid vacations of different lengths (Table 1).

No Vacation.—Six per cent of the establishments, accounting for two per cent of the workers, either gave no information or reported giving no vacations, in which cases the industries were usually of a seasonal nature, such as Fruit and Vegetable Canning or in Planing and Sawmills where casual labour is often employed.

Initial Vacation.—An initial vacation of one week was reported by 3,067 establishments, after a service of one year and in the case of 509 additional establishments, after a shorter period of service, these two groups including 90 per cent of the workers. Twelve per cent of the establishments, employing eight per cent of the workers, provided an initial vacation of two weeks, usually after one year of service. In the Maritime Provinces, where there are no legislative requirements with respect to annual paid vacations, two-thirds of the workers were in the 113 establishments reporting a paid vacation of one week after a year of service; one-quarter of the workers in this same area were in the 23 establishments reporting an extra week after five years of service.

Maximum Vacation.—Nearly 30 per cent of the total number of workers were in establishments in which the vacation did not exceed one week, regardless of the length of service.

About 50 per cent of the workers were in establishments which provided a maximum vacation of two weeks after a service ranging up to 25 years, but mainly after five years. It should be pointed out that of the 270 establishments providing a maximum vacation of three weeks, 202 employing 94,000 workers reported an initial vacation of one week along with an intermediate provision for two weeks, after a length of service ranging from nine months to ten years; the distribution of these establishments, by province, is as follows:—

| Province | Number of Establishments | Workers |
|-------------------------|--------------------------|---------|
| Maritime Provinces | 5 | 5,298 |
| Quebec | 39 | 21,543 |
| Ontario | 114 | 56,397 |
| Manitoba | 9 | 4,668 |
| Saskatchewan | 7 | 1,117 |
| Alberta | 16 | 3,687 |
| British Columbia | 12 | 1,315 |
| Canada | 202 | 94,025 |

Of these 202 establishments, 131 employing 72,965 workers reported allowing two weeks after five years of service and 58 others employing 19,005 employees had a service requirement ranging from one to three years.

VACATIONS WITH PAY IN MANUFACTURING

Almost all wage earners in manufacturing are eligible for an initial annual vacation of at least one week....

and many are eligible for vacations of two or three weeks after periods of service of varying length....

Of the establishments reporting a maximum vacation of three weeks, 60 per cent of the workers were in the 110 establishments granting it only after 25 years of service.

Provinces (Table 2).—In all provinces except Saskatchewan, the great majority of both workers and establishments under initial vacations were in the category of one week after one year; in Saskatchewan, most of the establishments provided for two weeks after one year.

The largest group of establishments in the Maritime Provinces, Ontario and British Columbia reported a maximum vacation of one week after one year, although in each of these areas the largest group of employees were in establishments reporting a maximum vacation of two weeks after five years. In Quebec, the main maximum provision both from the standpoint of establishments and workers was one week after one year; similarly, in Saskatchewan the maximum was two weeks after one year and in Alberta, two weeks after two years.

Industrial Groups (Tables 3 to 6).—Considerable variation was found in the vacation arrangements in effect in the various manufacturing industries. The most common initial vacation reported by establishments, covering the greatest number of

workers in all industries, other than in Electric Current Production and Distribution, was one week after one year. In the latter industry, 60 per cent of the workers were in the 65 establishments providing two weeks' initial vacation after one year of service.

In each of six of the main industrial groups more than 50 per cent of the establishments did not provide for more than one week, regardless of the length of service, although this category included only 40 per cent of the workers in these six industries.

More than 50 per cent of the total workers received a maximum vacation of two weeks after a service period ranging up to 25 years, and mainly after five years. In the case of seven of the industries shown, a maximum vacation of two weeks was paid to more than one-half the workers in each industry and to 64 per cent of the total number of workers in these industries as a whole. In Tobacco Products, Electric Current Production and Distribution, and in Electrical Products the majority of the workers were in establishments giving a maximum of three weeks, in most cases after 25 years; 48 of these establishments employing 30,283 workers also had intermediate provisions for a two-week vacation.

TABLE 2.—LENGTH OF PAID VACATIONS GIVEN IN MANUFACTURING INDUSTRIES IN CANADA, BY AREA, 1947

NOTE.—Of the 4,339 establishments used in this survey, 245 employing 11,477 workers either gave no information on this subject or reported giving no paid vacations.

| Province or Area | Initial Vacation | | | | Maximum Vacation | | | | | |

INTERNATIONAL LABOUR ORGANIZATION

Second Session of Textiles Committee, Geneva, October 27-November 5, 1948

Improved conditions were proposed by the ILO Textiles Committee in regard to the remuneration, safety, health and welfare of textile workers. Training, recruitment, immigration, and industrial relations were among the other matters discussed.

The second session of the ILO Textiles Committee was held at Geneva, Switzerland, from October 27 to November 5, 1948.

The plan of representation on the Committee conforms to the tripartite character of the ILO. Each country participating in the work of the Committee is entitled to nominate two delegates each to represent Government, employers and workers.

The following twenty countries were represented at the second session: Argentina, Australia, Belgium, Brazil, Canada, China, Denmark, Egypt, France, India, Italy, Mexico, Norway, Netherlands, Peru, Poland, Sweden, Switzerland, United Kingdom and United States. All countries except Brazil appointed tripartite delegations; Brazil was represented by Government delegates only. The workers' delegates from Poland were unable to attend this meeting, but otherwise, attendance was fairly complete. Altogether, the 20 countries were represented by 101 delegates, 23 advisers and 3 substitutes, a total of 127. The International Federation of Textile Workers' Associations was represented by two observers.

Canada's delegation was as follows:—

Government Delegates

Mr. G. E. Nixon, M.P. (Algoma West), Sault Ste. Marie, Ontario; Mr. V. C. Phelan, Director of Information, Department of Labour, Ottawa, Ontario.

Employers' Delegates

Mr. Harold G. Smith, President of Mohawk Mills Ltd., Hamilton, Ontario; Mr. J. T. Irwin, Industrial Relations Adviser, Primary Textiles Institute, Toronto, Ontario.

Workers' Delegates

Mr. John Robinson, Director, Greater Hamilton Joint Board of the Textile Workers' Union of America (CCL), Hamil-

ton, Ontario; Mr. Gaston Ledoux, President, National and Catholic Textile Federation (CCCL), Granby, Quebec.

The Governing Body had appointed Miss G. J. Stemberg, from the Government of the Netherlands, as general chairman of the sessions of the Committee. The Committee elected two Vice-Chairmen: Mr. H. F. Farrar (United Kingdom) for the Employers' Group, and Mr. Alphonse Segier (Belgium) for the Workers' Group. The Secretary-General of the Textiles Committee was Mr. Jef Rens, Assistant Director of the ILO.

Agenda

The agenda for the second session of the Committee as determined by the Governing Body of the ILO, was as follows:—

1. General Report, dealing particularly with
 - (a) the action taken in the various countries in the light of the decisions of the first meeting;
 - (b) the steps taken by the Office to follow up the studies and inquiries proposed by the Committee; and
 - (c) recent events and developments in the industry.
 2. Employment problems, with special reference to recruitment and training.
 3. Industrial relations.
- For each of these items a report had been prepared in advance by the International Labour Office.

Procedure

At the opening of the session, plenary meetings were held for the purpose of determining procedure and to give opportunity for general discussion of the business before the meeting. After the conclusion of the general discussion, subcommittees were convened to deal with items 2 and 3 of the agenda, and worked through to a conclusion of their deliberations. Then,

further plenary meetings were held for the consideration of the subcommittees' reports. Arising out of the work of the subcommittees, the Textiles Committee adopted a series of resolutions.

The Chairman and Reporter of the Subcommittee on Industrial Relations was Mr. V. C. Phelan, one of the Canadian Government representatives on the Committee. Another Canadian was also an officer of this Subcommittee, Mr. J. T. Irwin being elected as Employers' Vice-Chairman.

Employment

The Committee had before it an extended draft (of over 30 paragraphs) on the subject of vocational training, submitted by the International Labour Office. The subcommittee on Employment considered the draft text in detail, and while many amendments were adopted, in general the text was found acceptable; subsequently it was adopted by the full Committee in plenary session, on recommendation of the Subcommittee.

The text covers the following phases of vocational training in the textile industry: technical education, apprenticeship, training of semi-skilled workers, training of adult workers, teaching problems, and international co-operation. The Office text adapted to the special requirements of the textile industry the principles set forth in earlier instruments adopted by the ILO General Conference in 1939, dealing with vocational training in industry generally.

The intention of the text, which took the final form of a resolution from the Textiles Committee, is to suggest ways and means of improving employee efficiency and increasing production; of improving the relations of the individual employee with his employment; and, generally, of producing conditions under which the employee might have more reason to feel settled in his employment and more content with the conditions under which he is engaged.

The resolution urges that vocational training should be organized in the textile industry in a systematic and adequate manner. Technical schools in each country should have facilities adapted to the training of operatives, supervisors, and technicians, and management personnel.

Apprenticeship training, the resolution states, should include practical, theoretical and general instruction. The resolution further advocates the establishment of analogous rules for all branches of the industry and for all occupations concerning: establishment of the apprenticeship con-

tract; duration of apprenticeship; supervision of apprenticeship; organization of examinations at the end of apprenticeship and the issue of certificates of skill; and remuneration of apprentices.

For semi-skilled workers, training should be given before entering productive employment in the case of school leavers, and during employment in the case of other workers. Training should also be given to adult workers entering the industry for the first time, at schools or within the undertakings.

Instructors in vocational training centres and workers responsible for the guidance of apprentices should receive previous training for teaching. With this in view special centres or courses should be organized for the teaching staff. Training methods should receive systematic study with a view to adapting them to modern teaching methods and a new technique in industry. This study should be based on a previous job analysis of textile occupations. Modern instruction materials such as films should be developed as much as possible.

The resolution concludes with suggested measures for international co-operation, which it is proposed should be co-ordinated through the agency of the International Labour Office. These measures include the regular exchange of information on training programs and methods, exchanges or loans of technicians and instructors, organization in certain countries of training courses for technicians and instructors from countries where vocational training is less developed, and the international exchange of apprentices and other trainees.

The Committee adopted, also on the recommendation of the Subcommittee on Employment, a resolution concerning the recruitment of manpower in the textile industry, based on an ILO text. To encourage satisfactory numbers of workers to enter the industry, the resolution suggests the setting up of certain principles in relation to working conditions, covering wages and other matters; the development of social services in the interests of the workers; full utilization of available resources, specifically through vocational guidance of juveniles, the recruitment of women workers and recruitment of foreign workers from abroad where necessary; and the use of public employment services.

The section of the resolution dealing with improvement of conditions in the textile industry is as follows:—

A. *Methods of Remuneration*

Textile workers should be assured of conditions of remuneration not less favour-

able than those of workers in other industries in general for work requiring similar skill and effort.

With this in view appropriate measures should be taken, such as:—

(a) raising wage levels in the textile industry when these are lower than the general wage level;

(b) aligning of women's wages based on the principles adopted on this subject by the 31st Session of the International Labour Conference;

(c) applying a wage-for-age scale for juveniles on condition that it is not contrary to the principle of equal pay for work of equal value.

B. Working Conditions

The risks of industrial diseases and the causes of danger to health and safety, such as dust, noise and fatigue should be eliminated.

General conditions of hygiene and welfare of workers should be improved by measures such as provision of sanitary installations, cloak rooms and rest rooms, re-spacing of machinery, internal renovation of work rooms and improved conditions of lighting and ventilation.

With this in view special committees should be set up within undertakings or within the industry concerned, upon which the workers should be represented, to promote welfare of workers and to administer the welfare funds.

C. Development of Social Services

Social services should be set up and developed whenever possible and desirable for use of the personnel, such as creches and day nurseries, canteens, dining rooms or other facilities for workers' meals, transport services, housing.

The immigration of foreign workers, in the Committee's view, should be organized by means of bilateral agreements, in the elaboration and application of which Governments should have the benefit of the views of the workers' and employers' organizations of their countries. The resolution calls for the guarantee to foreign workers of equality of treatment with national workers. In particular this should apply to wages and employment conditions, the application of social security legislation, and the right to join trade unions.

On the recommendation of the subcommittee, the main Committee also adopted a resolution looking to the improvement of welfare facilities for textile workers, in relation to such matters as factory canteens; mess rooms, standards of construction; accommodation and furniture; day nurseries; and seating accommodation.

Industrial Relations

The Committee, on the recommendation of the Subcommittee on Industrial Relations, voted to endorse the following:—

The Committee notes the adoption by the Conference at its 31st Session of an

International Convention on Freedom of Association and the Protection of the Right to Organize and expresses the hope that all States Members will proceed to a speedy ratification of the said Convention.

This Subcommittee had held several meetings, but with fairly inconclusive results. The Employers' Group took the position that as the general subject of industrial relations had been dealt with at the San Francisco Conference, and as some further phases of the question would be before the General Conference in 1949, a large part of the field was disposed of at San Francisco, and therefore, closed, while the remainder would be dealt with at the 1949 Conference and should not be anticipated by the meeting of the Textiles Committee.

The Workers' Group sharply disagreed with the employers on their contentions, arguing that a resolution submitted by themselves, outlining methods of meeting industrial relations problems of the textile industry, should be proceeded with without going into other ILO decisions on the general aspects of the case.

Repeated efforts on the part of the Chairman and other Government members on the subcommittee having failed to conciliate the difference between employers and workers, the resolution quoted above proved to be the only area in which agreement could be reached.

The Subcommittee Chairman (Mr. V. C. Phelan) having been pressed for a ruling on the limitations, if any, placed on the work of the Subcommittee by the Governing Body in regard to industrial relations, ruled that in his opinion the Governing Body had left it within the competence of the Committee to suggest and recommend on general matters of industrial relations, in their application or pertinence to the textile industry, and also on any problem of industrial relations peculiar to, or inherent in, the textile industry.

At the Plenary Session various speakers agreed that the Governing Body should be asked to rule on whether an industrial committee may proceed to deal with a matter already treated with (in a more general way) at an ILO Conference, or about to be dealt with at such a Conference. It was felt that a ruling from the Governing Body would obviate any future difficulty such as the Subcommittee on Industrial Relations had found confronting it.*

* At a subsequent meeting in December, the Governing Body adopted a statement clarifying the functions of industrial committees (L.G., Feb., 1949, p. 158).

There did not appear to be placed before the Subcommittee on Industrial Relations any evidence of any peculiarity of industrial relations in the textile industry contrasted with industry in general, nor any evidence of any abnormal industrial relations problem existing at the moment. Therefore, while the work of the Subcommittee may appear to cover industrial relations in a very brief fashion, the general principles in this regard adopted by the ILO at San Francisco, or to be adopted at Geneva in 1949, apply to textiles as to other industries.

Disparities in Textiles Wages Between Various Countries

The Committee adopted a resolution, repeating the request put forward to the Governing Body by its 1946 Brussels Session, asking for a thorough study on wage disparities and on real wages in textile producing countries.

Japanese Textile Industry

The question of the revival of the textile industry in Japan was introduced at the meeting, the Employers' Group having brought forward a resolution on the subject. A revised text, submitted by the Government Group on the Steering Committee, was adopted in Plenary Session by 70 votes to 4. The final text reads as follows:—

1. The Governing Body of the International Labour Office is invited to consider the advisability of—

- (a) Communicating through the appropriate channel to the Japanese Government and asking it to communicate to the employers' and workers' organizations in Japan the decisions and documents of the present Committee;
- (b) Arranging through the appropriate channel to secure additional information upon present labour legislation and labour practices in the Japanese textile industry.

2. The forthcoming visit of an official of the International Labour Office to Japan with the permission and encouragement of the Occupying Authorities in order to establish regular channels of communication is noted with satisfaction.

3. The Governing Body is invited to follow with the closest attention on the basis of the information thus received the social evolution in relation to economic development of the Japanese textile industry and, pending the next session of the Textiles Committee, to take such decisions as the circumstances may require.

4. The Governing Body is invited to consider the advisability of arranging through the appropriate channel for the presence of a tripartite observer delegation from Japan at the next session of the Textiles Committee.

Health and Safety of Textile Workers

The Committee decided to ask the Governing Body to instruct the International Labour Office to prepare on the basis of the ILO General Safety Code for Industrial Establishments a report demonstrating the extent to which particular textile questions are not covered thereby and to make recommendations thereon for submission to the Third Session of the Textiles Committee for its consideration.

It was also proposed that the Office should undertake a study of

- (a) occupational diseases in the textile industry, in particular of the various forms of dermatitis as well as dust diseases and intoxication due to contact with chemical agents used in the various processes of textile manufacturing, and
- (b) methods of reducing noise in textile factories, with a view to suggesting preventive measures which may be adopted in the industry.

A resolution on maternity protection asked the Governing Body to initiate consideration of the revision of the Maternity Protection Convention, 1919, so as to facilitate the more general ratification of the Convention in a revised form.

Classification of Artificial and Organic Fibres

The Governing Body having asked the Committee for an opinion as to whether employment on artificial and organic fibres should be treated as a matter of textiles or one of chemicals, the Committee, after reciting its reasons, reported as follows:—

The Textiles Committee considers that from every point of view—technical, social and economic—it would be out of the question to remove the manufacture of rayon and other synthetic fibres from their customary classification as part of the textile industry.

The proceedings and resolutions of the Textiles Committee were to be examined by the Governing Body during the course of its 108th Session, February 21 to March 8, 1949.

LABOUR AND INDUSTRY IN ONTARIO

Steady growth in the industrial capacity of Ontario is indicated in the twenty-ninth report of the Provincial Department of Labour for the fiscal year ending March 31, 1948. During the year covered by the report, the value of industrial, shop and office building projects approved rose to \$59,407,600, an all-time high. It is pointed out that the tendency of many large industries to establish plants in smaller communities since World War II, has resulted in increasing the prosperity of these centres.

Factory Inspection Branch

Inspection.—Factory inspection staffs were increased and inspection districts were revised during the year, thus making possible a larger number of inspections. A total of 27,659 separate establishments were inspected, or 5,242 more than in the preceding year. In addition, 55,597 investigations were undertaken for other branches of the Department.

By arrangement with officials of the Niagara Parks Commission, inspectors of the Factory Inspection Branch undertook technical inspections of plants and equipment of concessionaires on the Commission's property. The customary inspection of gaols and reform institutions was also carried out.

Inspection Statistics.—The distribution of the services rendered by the inspectors of the Composite Inspection Branch follows:—

| | | |
|------------------------------------|--------------|--------------|
| Factory Inspection Branch | 1947 | 1948 |
| First inspection | 18,219 | 23,616 |
| Second inspection | 4,175 | 3,983 |
| Visits <i>re</i> fruit camps | 23 | 60 |
| | <hr/> 22,417 | <hr/> 27,659 |
| Apprenticeship Branch | 1,178 | 1,228 |
| Industrial Standards Act..... | 327 | 780 |
| Main Office | 2,938 | 2,283 |
| Minimum Wage Branch..... | 512 | 494 |
| Operating Engineers Branch.. | 355 | 297 |
| Steam Boiler Branch..... | 963 | 515 |
| | <hr/> 6,273 | <hr/> 5,597 |
| Totals | 28,690 | 33,256 |

The number of orders issued relating to various requirements of the Factory, Shop and Office Building Act totalled 14,423 in 1948 as compared with 11,050 in 1947.

In addition, there were investigations of accidents and the usual visits, office calls and conferences incidental to inspections.

Industrial Accidents.—A total of 12,241 industrial accidents was reported. Of these totals, 773 accidents and one fatality involved females.

The number of fatal accidents rose from 42 in the fiscal year 1946-47 to 63 in 1947-48. The report states in this connection that "everywhere employers and employees have been encouraged to redouble their efforts to cut down the number of these tragedies."

It continues: Progress is being made in controlling and eliminating silicosis hazards from industry. In addition, employers in the grain-elevator industry are giving co-operation to remove dust hazards from their industry. A full-time, grain-elevator inspector has been stationed at the head of the Lakes.

Accidents occurred in the following industries:—

Pulp, paper and printing trades, 1,623; metal trades, 4,829; rubber and rubber goods, 496; textiles, 520; food, 916; lumber and wood-working, 568; clothing, 45; chemicals, 248; conveyances, 1,067; transportation, 329; clay, glass and stone, 1,024; leather, 151; retail trades, 122; construction, 17; unclassified, 286.

In addition, there were 291 accidents (32 of them fatal), "not within the jurisdiction of the Factory, Shop and Office Building Act." Of these, 93 were classified under construction; 42 under lumber and wood-working; 38 under food; 33 under pulp, paper and printing trades; 25 under metal trades and the other 60 under various industries.

Of the 310 cases of industrial diseases recorded, 108 were dermatitis, 28 were lead poisoning and five were silicosis.

Hours of Labour.—Of the 608,706 persons, referred to in the reports as employed in industrial and commercial establishments in the province, 583,149 worked on weekly schedules up to 49 hours. While detailed statistics on the 5-day week are not available, inspectors of the Branch report that a steadily increasing number of industrial and clerical employees in Ontario do not work on Saturdays.

During the calendar year 1947, 361 firms made use of overtime permits, as compared with 373 firms in 1946 and 530 in 1945. A gradual increase from year to year was indicated in the number of firms making

use of double-shift permits for the employment of females and youths in two eight-hour shifts.

Child Labour.—The child labour problem is reported to be decreasing in Ontario. Only 61 persons under 14 years of age were found employed during the year. Most of the cases occurred during the school recess and because incorrect ages given by children were not checked by employers. As all cases were rectified, no prosecutions were instituted.

Homework.—During the year 540 employer permits were issued authorizing the giving out of work to be done at home at rates approved by the Industry and Labour Board. Home-worker permits were issued to 2,962 persons to undertake work in manufacturing or assembling household articles, or wearing apparel, at home.

Approval of Building Plans.—There were 287 plan approvals for the metals industry with a total value of \$12,781,700. The food industries were the next largest with 179 approvals, valued at \$12,775,700, or only \$6,000 less than the metals. The third largest plant expansion program was undertaken by the clay, glass and stone industries, which includes the manufacture of artificial abrasives. The value of new construction in this category was \$6,260,900. Large storage buildings for imported raw materials were erected by most of the artificial abrasive companies.

"Further improvement in foundries has been effected by the installation of mechanical ventilation and alterations to the buildings, the plans of which were approved by this Branch. This particular section of the metals group exposes more workers to the silicosis hazard than any industry except mining and much improvement remains to be made particularly among the jobbing foundries."

As a result of medical studies of the respiratory hazards in artificial abrasive manufacture, mechanical exhaust systems for electric furnaces were ordered by factory inspectors. The installation of dust-control equipment was being completed as rapidly as the necessary materials were being obtained.

Violations and Complaints.—Violations of the Acts in the enforcement of which the inspectors have a responsibility were reported as follows:—

| | 1947 | 1948 |
|--|-------|-------|
| The Adolescent School Attendance Act | 1 | 3 |
| The Minimum Wage Act..... | 3,095 | 2,260 |
| The Operating Engineers Act. | 152 | 1 |
| Totals | 3,248 | 2,264 |

Complaints received during the year numbered 66. Upon investigation, sufficient grounds for complaint were found in 45 cases, and insufficient grounds in 21 cases. Subjects of complaint were as follows:—

| | 1947 | 1948 |
|-------------------------------|------|------|
| Adolescents | 17 | 8 |
| Child labour | 14 | — |
| Dust | 8 | 1 |
| Elevators | 6 | 3 |
| Fire hazards | 3 | 3 |
| Fumes | 8 | 3 |
| Guarding machinery | 3 | 2 |
| Lack of heat..... | 12 | 4 |
| Long hours | 13 | 6 |
| Lunch and dressing rooms..... | 1 | 1 |
| Miscellaneous | 17 | 11 |
| Multiple | 1 | 4 |
| Exits | 1 | 1 |
| Sanitation | 5 | 10 |
| Toilet accommodation | 14 | 7 |
| Ventilation | 4 | 2 |
| Totals | 127 | 66 |

Board of Examiners of Operating Engineers

The Board issued 20,091 certificates, of which 19,740 were to operating engineers for the fiscal year 1947-1948. This includes those issued by renewal, examination and duplicate and provisional certificates and 351 were plant registration certificates. This was an increase of 1,276 over the preceding year.

There were 1,195 applications for examination and 602 applications for re-examination received by the Board. Of the 1,195 applications, 96 did not meet the requirements of the regulations and were not accepted.

Boiler Inspection

Mainly as a result of an inter-provincial agreement to comply fully with the provisions of the American Society of Mechanical Engineers' Code for uniform inspection, the number of inspections increased over 200 per cent the last two months of the fiscal year 1947-48. There was, however, a seven per cent decrease in the number of inspections of used boilers and unfired pressure vessels, due to the scarcity of such units.

Certificates were issued as follows:—

| | 1947 | 1948 |
|--|-------|-------|
| New boilers and unfired pressure vessels | 2,041 | 2,845 |
| Used boilers and unfired pressure vessels | 963 | 805 |
| Low pressure boilers accepted by affidavit | 541 | 545 |
| Pressure vessels accepted by affidavit | 2,370 | 2,673 |
| Boilers under 3 horse power accepted by affidavit..... | 80 | 87 |
| Duplicate certificates | 19 | 49 |
| Totals | 6,014 | 7,004 |

Conciliation and Arbitration

The Conciliation staff was increased by the addition of two conciliation officers during the year to cope with the increased activity of the Branch.

As in former years, the Branch co-operated with the Federal Department of Labour in accordance with a standing arrangement between the two Departments whereby assignments which are at distant points from Toronto may be handled by federal industrial relations officers. The provincial Conciliation Branch in turn assisted, on request, representatives of the Dominion Department of Labour.

During the fiscal year 1947-48, 228 conciliation cases, not including strike cases, were handled. In 190 of these cases which had been referred to the Branch by the Ontario Labour Relations Board, the union had been certified by the Board as the collective bargaining representative and in 89 of them the conciliation officer was able to effect a collective agreement. The other 101 cases were dealt with by 72 conciliation boards set up for the purpose. In general, the cases dealt with wages, union security and hours of work.

The services of the Branch were requested in 35 strike situations that involved 9,224 employees and resulted in a total loss of 243,419 man-working days. Conciliation and mediation brought about settlements "in almost all of these strikes."

In all, 13 votes involving 4,634 employees were held by the Branch in different parts of the province at the request, or with the consent of the parties concerned. Most of the votes were requested to determine the desires of employees with respect to union security and, in one case, "senior seniority for shop stewards."

Cases of alleged discrimination or unfair practices handled by the Conciliation Branch during the year numbered 88. Of these, 56 were settled by the Branch and 32 were referred to an Industrial Disputes Inquiry Commissioner.

Under the Industrial Standards Act, 30 conferences were conducted during 1947-48 and 25 industrial standards schedules were agreed to, approved by the Minister of Labour and made effective by the Government. These conferences were held in several of the larger centres in the province and were related to several trades connected

with the construction industry, barbering, retail gasoline service and the hard furniture industry.

Ontario Labour Relations Board

During the fiscal year 1947-48, the peace-time jurisdiction of labour relations was returned to the Province. Early in April, 1947, the Legislature enacted the Labour Relations Board Act, 1947, which provided for (a) the continuance in force within the Province, with any necessary alterations, the provisions of P.C. 1003 and P.C. 4020; (b) the disposition of appeals pending before the Wartime Labour Relations Board (National); and (c) the appointment of conciliation officers and conciliation boards by the Federal Minister of Labour in matters referred for such purposes by the Ontario Labour Relations Board on or before the date of the coming into force of the Act.

It is stated that "at the end of the fiscal year (1947-48) the labour relations regulations in force in the Province were in all material respects identical to those contained in P.C. 1003. . . . There remained, however, no link between the two jurisdictions."

The Ontario Board held 88 sessions during the year and considered a total of 900 applications, including 641 petitions for certification; 229 requests for the appointment of a conciliation officer; 15 applications for leave to institute proceedings; two petitions for establishment of grievance procedure; two requests for the appointment of an arbitrator; and 11 applications requesting cancellation of existing collective agreements.

Apprenticeship

As the number of discharged war veterans desiring trade training reached its climax in the fiscal year 1947-48, the Apprenticeship Branch was unusually active. At the end of the year, 2,337 discharged members of the Armed Forces were learning the building trades alone, in addition to 1,312 civilian apprentices, 451 of whom were new registrations.

At the end of March, 1948, there were 1,312 apprentices in nine building trades as follows: bricklaying, 110; masonry, 7; carpentry, 235; painting and decorating, 31; plastering, 30; plumbing, 344; steamfitting, 71; sheet metal work, 119; electric wiring and installation, 365. There were 1,172 registered in motor vehicle repairing; 169 in hairdressing and 14 in the barbering trade.

Examinations were held in Toronto and some 40 other centres throughout the Province in accordance with arrangements made through local apprenticeship committees. There were 108 such examinations for motor vehicle repairing, which were taken by 1,944 candidates; 43 examinations in hairdressing for 725 candidates; 108 examinations for 108 candidates in barbering; and 15 examinations for 15 hairdressing teachers. As a result of these examinations 1,067 certificates were issued

for motor repairing; 134 for barbering and 656 for hairdressing. In addition, there were issued for these trades a total of 185 first certificates; 22,220 by renewals; 1,365 by rehabilitation; 89 by duplicate, and 44 by miscellaneous, making a grand total of 25,670 certificates.

The Apprenticeship Branch increased its activities during the year to include the supervision of training and job placement in designated trades for inmates of reform institutions and penitentiaries.

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

Unanimous reports were received during February from the Conciliation Boards which investigated disputes affecting unlicensed seamen employed on deepsea dry cargo ships of Canadian registry and on East Coast passenger vessels operated by Canadian National (West Indies) Steamships, Ltd., and Canadian Pacific Steamships, Ltd.

Disputes affecting employees of certain coal mining companies in Eastern and Western Canada were settled by direct negotiations.

Introduction

Deepsea Shipping

During February the Minister of Labour released the reports of two Boards of Conciliation and Investigation which dealt with interrelated disputes affecting the country's ocean-going shipping industry, and overshadowing in importance any industrial dispute that has occurred in Canada since the threatened strike on her major railway systems which was successfully averted in July, 1948.

One of the disputes involved twenty-six deepsea shipping companies, operating some 150 dry cargo vessels of Canadian registry from East and West Coast ports, and the Canadian Seamen's Union (TLC) representing the unlicensed employees of the companies. The operators are members of the Shipping Federation of Canada, Inc., Montreal, and the Shipowners' Association (Deep Sea) of British Columbia, Vancouver (L.G., Jan., 1949, p. 52).

The second dispute affected the Canadian flag passenger vessels owned by Canadian National (West Indies) Steamships, Ltd., and Canadian Pacific Steamships, Ltd., and operated from East Coast Canadian ports, and the unlicensed personnel of such vessels represented by the Canadian Seamen's Union (TLC) (L.G., Feb., 1949, p. 173). The main passenger vessels involved were the "Lady" boats of the Canadian National line and the ss. *Beaverbrae* of Canadian Pacific Steamships, Ltd.

The two Conciliation Boards were composed of the same members, having the Hon. Mr. Justice J. O. Wilson, of the Supreme Court of British Columbia, Vancouver, as Chairman, and Messrs. Theodore Meighen, K.C., and John Kerry, K.C., both of Montreal, as members appointed on the nomination of the employers and the union respectively.

The dispute affecting the Canadian flag dry cargo vessels arose during negotiations

for the renewal of the 1947-1948 collective agreement between the parties. The collective agreement was scheduled to terminate on October 15, 1948, but, by law, continued in effect until termination of the conciliation proceedings.

The Conciliation Board reported that the shipowners and the Union differed very widely as to the terms of the new agreement to be entered into, at least half of the very numerous provisions relating to wages and working conditions being in dispute. The Board's hearings did not resolve these difficulties. The Board reported that the atmosphere was not conciliatory, and that its efforts did not have the hoped for effect of reconciling the parties.

Having failed at conciliation, the members of the Board then endeavoured in private sessions to reconcile their own divergent views as to the terms which should be incorporated in a new collective agreement between the parties. Their report stated that the members of the Board, having in mind the importance to the nation of the Canadian Merchant Marine and the calamitous implications to the seamen, to the shipowners and to the country, of a breach of relations between the parties, each yielded his personal point of view on many matters and as a result were able to arrive at unanimous recommendations as to the provisions of the proposed collective agreement. They also stated that they were of the firm opinion that the agreement recommended was a fair compromise and ought to be accepted by the parties to the dispute.

The principal issue in dispute had been a demand of the shipowners that the practice of securing unlicensed seamen through a hiring hall operated by the Canadian Seamen's Union be abandoned. The operators had been willing to give preference to Union members in hiring men but proposed that they should be permitted to secure replacements so far as practicable through the Seamen's Section of the National Employment Service. The Union for its part demanded that the hiring of original crews or replacements either in Canada or as far south as the ports of Norfolk and San Pedro on the East and West coasts of the United States should be done whenever possible through the Union's hiring halls.

On this fundamental question the Board recommended that the companies agree that all unlicensed personnel engaged by them in Canada be hired either through the office of the Union or through the Seamen's Section of the National Employment Ser-

vice, without discrimination against Union members. It further recommended that any unlicensed personnel hired in Canada, who are not members of the Union, should be required as a condition of employment either to join the Union and to continue as members thereof during their employment or, in the alternative, to tender to the Union one month's dues as well as initiation fees as presently established and to pay subsequent monthly dues as required of Union members, with failure to pay arrears of monthly dues at pay-off constituting a bar to further employment until such arrears are paid.

In connection with the clause of the collective agreement dealing with Union recognition, the Board recommended that the companies recognize the Union as the sole collective bargaining agent for all unlicensed personnel employed on all deep-sea dry cargo ships of Canadian register (not including those with passenger certificates), owned and operated or bareboat operated by the companies, whether or not the crews are under Canadian Articles. Previously recognition of the Union was limited to the unlicensed crew members of such ships when under Canadian Articles.

The Board recommended that the parties agree that they will co-operate to exclude all subversive elements from the personnel employed by the companies and by the Union.

It was also recommended that, as in the previous agreement, the authority of the Master to direct and discipline the crew, be clearly recognized. The Board further recommended that the companies agree that the recognized powers and rights of Masters will not be exercised in conflict with any of the provisions of the collective agreement and that the Union agree that when any seaman considers an order or direction of the Master to be in conflict with the terms of the agreement, he shall nevertheless obey such order or direction and thereafter seek redress through the grievance machinery provided in the agreement.

The Board recommended retention of the clause providing that there shall be no strike, lockout, slow-down or stoppage of work and that no ship be tied up or delayed during the life of the agreement.

It was also recommended that no change be made in current wage rates, overtime rates or basic hours of work at sea or in port. During the negotiations and in proceedings before the Board, the Union had requested increased rates of pay and the shipowners had proposed substantial reductions. The Board did recommend, however,

that subsistence allowances to seamen when travelling be increased from \$1 to \$1.25 per meal or from \$3 to \$3.75 per day.

With regard to a strongly contested contention of the shipowners that seamen should be required to carry "continuous discharge books" with entries as to the wages and quality of their work during previous employment, the Board recommended that neither the Union nor the companies interfere, directly or indirectly, with the rights granted seamen by Sections 182 and 183 of the Canada Shipping Act. These sections of the Act provide that seamen shall be entitled to a Certificate of Discharge in a continuous discharge book specifying the period of his service but not containing any statement as to his wages or the quality of his work unless requested by the seamen; and that where a seaman is discharged before a Shipping Master, the Master of the vessel shall make and sign a report of the conduct, character and qualifications of the seaman discharged, or may state in the said report of character that he declines to give any opinion upon such particulars.

It was also recommended that the parties agree that no additional clauses be adopted in Ship's Articles by the Master and seamen which are repugnant to the terms of the collective agreement.

Other recommendations of the Board included the following:—

(1) that, in making promotions at sea or in port, full consideration be given to seniority and that, all things being equal, seamen who are senior in length of service shall receive all available promotions;

(2) that, in addition to one seaman's delegate from each department, there be a ship's delegate of each vessel, who may put to the Master any dispute which cannot be settled by the departmental delegates with the departmental heads;

(3) that the companies continue the existing system of issuing passes to authorized employees of the Union permitting them to board the companies' vessels, but that such passes shall be valid only for a period of three months, instead of indefinitely as heretofore, unless revoked for specified reasons;

(4) that where the service of a seaman signed on at an Eastern Canadian port ceases by reason of the termination of a voyage at a Western Canadian port, and *vice versa*, he shall have the same rights in respect to repatriation to the port of engagement as are provided under the Canada Shipping Act where service is terminated at a port outside of Canada;

(5) that a suitable supply of drugs for the emergency treatment of normal ship-board contingencies be carried on ship and suitable accommodation for the housing of sick and injured personnel be provided when made necessary by the special nature of the illness or injury;

(6) that all stores and provisions issued to the crew shall be only for use and consumption aboard the ship and that any unused stores or provisions remain the property of the shipowner and must not be taken ashore, sold, destroyed or given away; and

(7) that unlicensed personnel shall be entitled to advances against their earned basic pay when in port, as formerly, provided that the Master may, in his discretion, retain at all times a sum equivalent to a full month's pay and that allotments of pay to dependents must be provided for before such advances are made.

In the dispute involving certain passenger vessels of Canadian National (West Indies) Steamships, Ltd., and Canadian Pacific Steamships, Ltd., the Conciliation Board reported that the questions involved were largely the same as those considered in the dry cargo dispute and that the solution arrived at had been the same. As in the previous case the draft of a collective agreement was recommended to the parties for adoption.

The principal difference in the collective agreement recommended for the passenger vessels, as compared with that for dry cargo vessels, lay in the wage schedule. The manning scale for passenger vessels is more comprehensive than for dry cargo vessels and the wage rates are higher in most instances, but the Board recommended no change from the schedule contained in the previous agreement.

At the end of the period under review, the Shipowners' Association (Deep Sea) of British Columbia reported to the Minister of Labour that its members were prepared to accept the unanimous recommendations of the Conciliation Board provided that the expiry date of the new collective agreement should be October 15, 1949. In accepting the Board's report, the West Coast operators protested the "ever increasing vitiation" of the Master's authority and the "continued increasing expenses" in the operation of Canadian Ships. East Coast Canadian-flag operators also indicated that they were prepared to accept the report of the Board, on the understanding that the new collective agreement would be for one year effective as from October 15, 1948. At

the time of going to press no word had been received from the Canadian Seamen's Union as to its acceptance or rejection of the recommendations of the Boards.

Coal Mining

Settlements were indicated during February in disputes affecting coal mining areas in Eastern and Western Canada, which are recorded here because of their importance to the national economy, although the industry comes under the jurisdiction of the provinces concerned.

In Western Canada, a lengthy series of demands which had been formulated at a "wage scale convention" held during November, 1948, by District 18, United Mine Workers of America (CCL), was presented early in January to the Western Canada Bituminous Coal Operators' Association and to the Domestic Coal Operators' Association of Western Canada. Among other things, the union requested abolition of the contract system, under which certain underground workers are paid incentive wages on a tonnage basis and, in the bituminous mines, are able to earn wages varying from \$13.89 to \$17.80 per day on the average. In place of the contract system, the union urged the establishment of a basic day wage of \$14.05 for eight hours of underground work five days a week.

Other demands of the union called for an increase in the companies' contributions to the miners' Welfare Fund from the present 5 cents per ton to a minimum of 20 cents per ton on all coal produced for use or sale; concessions in regard to holidays with pay and statutory holidays; extra pay of 50 cents and \$1 per shift for men working on the afternoon and night shifts, respectively, and a review of rates for water and light in places where the companies own or control such utilities.

The mine operators opposed the abolition of the contract system of wage payments on the ground that it would remove the incentive of underground workers to maintain maximum production and would ultimately result in an increase in the costs of production. They also urged the abolition of the Welfare Fund in view of the prospect that governmental steps might be taken to extend social security measures, but stated they they were prepared to offer an alternative to the Welfare Fund, the particulars of which were not disclosed.

Negotiations between the parties broke down about January 26, and a conciliator was named by the Alberta Minister of Industries and Labour to deal with the dispute in so far as it affected the coal

mines of that province. The conciliation proceedings lasted for about a week, but no settlement resulted.

Direct negotiations between the parties were resumed about mid-February following the submission of an amended list of demands on the part of the union. This list dropped the request for abolition of the contract system, but substituted in its place numerous requests which the union described as aimed at the equalization of wage rates, but which the operators resisted strongly on the ground that practically every demand would involve, directly or indirectly, an increase in the cost of production.

Agreement was finally reached on the basis of an increase in the contributions of the companies to the miners' Welfare Fund from 5 cents to 15 cents per ton of coal produced for sale or use, together with other relatively minor concessions relating to the check-off of the union's initiation fees, holidays with pay, and an undertaking that joint committees comprising representatives of the union and the two employers' associations would study the problem of the cost of services provided by public utilities on company-owned townsites. The name of the Welfare Fund was changed to the "Welfare and Retirement Fund", and it was mutually agreed that neither the union nor the operators would request any change in the amount of payments into the Fund for a two-year period. A new collective agreement amending the previous contract between the union and the Domestic Coal Operators' Association of Western Canada, was signed on February 16, 1949, and a similar agreement between the union and the Western Canada Bituminous Coal Operators' Association was signed on February 21.

In Eastern Canada, negotiations commenced during November, 1948, between District 26, United Mine Workers of America, and the Dominion Coal Company, Limited, and other coal mining companies associated with the Dominion Steel and Coal Corporation, Ltd. The union sought a wage increase of \$2.56 per day across the board, together with additional increases for certain classifications of mine workers. The companies responded with the offer of an increase of 25 cents per day, which was rejected by the union, and a deadlock ensued in mid-January. Negotiations between the parties resumed early in February, when an international vice-president of the union assisted in the conversations between the parties. On February 5 it was reported that a mutually

satisfactory settlement had been reached, subject only to ratification by the workers concerned, through a referendum to be conducted by the union among its members. Full details of the reported settlement were

not revealed by the parties, but it was publicly reported that the new collective agreement would provide for an increase of 50 cents per shift above the current basic wage rate of \$7.64 per day.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act and under the Conciliation and Labour Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board under the former Act.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until succeeded by the Wartime Regulations in 1944.

Proceedings begun under the wartime Regulations are continued in so far as the services involved in such proceedings are authorized under the new Act. Likewise, decisions, orders and certifications given by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the new Act.

The Act applies to industries within Dominion jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations, and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Dominion Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, Industrial Inquiry Commissions, for the consideration of complaints that the Act has been violated or that a party has failed to bargain collectively, and of applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to admin-

ister provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements, and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Conciliation services are also provided by the Industrial Relations Branch under the provisions of the Conciliation and Labour Act. This statute empowers the Minister of Labour to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or arbitrator when requested by the parties concerned.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour. From time to time, as required, a third article under this section will cover Conciliation Proceedings under the Conciliation and Labour Act.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton. The territory of the officer resident in Vancouver comprises British Columbia and Alberta; an officer stationed in Winnipeg covers the provinces of Saskatchewan and Manitoba and Northwestern Ontario; two officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the province of Quebec and the officer resident in Fredericton, represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of February. During the month the Board received seven applications for certification, held two hearings, issued four

certificates designating bargaining agents, rejected one application for certification, allowed the withdrawal of one application, and issued Reasons for Judgment in two cases.

Applications for Certification Granted

1. Canadian Seamen's Union for a unit of employees of Maritime Towing and Salvage Company, Limited, comprising unlicensed personnel employed aboard the vessels *Banscot*, *Bansturdy*, *Bansun*, *Bansaga*, *Banswift*, *Banstar*, *Banspray II*, and *Foundation Wallace*.

2. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees for a unit of employees of Canadian Pacific Air Lines Limited, comprising clerical employees in the accounting office, Montreal, P.Q. The occupational classifications of general auditor, auditor, chief clerk, assistant chief clerk, travelling auditor, and private secretary to the general auditor were excluded from the bargaining unit.

3. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees for a unit of employees of Canadian Pacific Air Lines Limited, comprising clerical employees in the accounting office, Edmonton, Alberta. The occupational classifications of regional agent, accountant, travelling auditor, and chief clerk were excluded from the bargaining unit.

4. The Catholic Syndicate of Garage Employees of the Quebec Railway, Light and Power Company, Inc., for a unit of employees of the Quebec Railway, Light and Power Company, comprising garage employees employed by the Company at its garages at St. Dominique, Chemin de la Canardiere and Montmagny Street, Quebec, P.Q., including tradesmen, apprentices, servicemen, beginners, and temporary, seasonal and casual workers. Office workers, foremen, specialists, storehouse men, caretakers, furnace firemen, bus drivers, and men in charge of maintenance of buildings and heating systems were excluded from the bargaining unit.

Application for Certification Rejected

1. The Brotherhood of Railway Carmen of America and the Quebec Railway, Light and Power Company, Quebec, P.Q. (L.G., March, 1949, p. 289). Following an investigation of the application, the Board rejected the application for the reason that it was not supported by a majority of the employees affected.

Application for Certification Withdrawn

1. Marine Checkers and Weighers Association and Union Steamships Limited, Vancouver, B.C. (L.G., March, 1949, p. 289). On the request of the President of the Association, the application for certification was withdrawn.

Applications Received

1. Commercial Telegraphers' Union, Canadian Marconi System Division No. 59, Trans-Oceanic District, on behalf of employees of the Canadian Marconi Company, employed as radio-telegraph operators, technicians, telephone operators, and local delivery clerks employed at the central telegraph office, Montreal, P.Q., and shift engineers employed at Drummondville, P.Q. and Yamachiche, P.Q.

2. National Association of Marine Engineers of Canada, Inc., District 3, on behalf of marine engineers employed on vessels of the Upper Lakes and St. Lawrence Transportation Company, Ltd., Toronto, Ontario.

3. National Association of Marine Engineers of Canada, Inc., District 3, on behalf of marine engineers employed on vessels of the Quebec and Ontario Transportation Company, Ltd., Montreal, P.Q.

4. National Association of Marine Engineers of Canada, Inc., District 3, on behalf of marine engineers employed on vessels of the Paterson Steamship Company, Ltd., Fort William, Ontario.

5. Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Division 1415, on behalf of terminal employees (Windsor Terminal) and bus drivers of Eastern Greyhound Lines Ltd., Windsor, Ontario.

6. National Association of Marine Engineers of Canada, Inc., District 3, on behalf of marine engineers employed on vessels of Colonial Steamships Ltd., Port Colborne, Ontario.

7. Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 59, on behalf of pursers, assistant pursers, and freight checkers in the pursers' department, on vessels of the Union Steamships Ltd., Vancouver, B.C.

Reasons for Judgment in cases dealt with by the Board in its February sittings follow:—

REASONS FOR JUDGMENT in dispute between

Canadian Telephone Employees' Association, Applicant, and Bell Telephone Company of Canada, Respondent.

This is an application by the Canadian Telephone Employees' Association for the Board's consent, in accordance with the provisions of subsection (4) of section 7 of the Industrial Relations and Disputes Investigation Act, to the making of two applications for certification of the association as bargaining agent for employees of the Bell Telephone Company of Canada, notwithstanding that a period of ten months of the term, of existing collective agreements covering such employees has not expired.

One application is for certification in respect of a bargaining unit consisting of certain clerical employees of the Company; the other application is for certification in respect of a unit of employees in the Plant Department of the Company.

The purpose of the applications is to certify the applicant association as bargaining agent for employees in these two units in place of three other employee associations which are certified as bargaining agents for three established employee units which are to be merged into two new bargaining units.

The applicant association has been recently organized and has not previously represented employees of the Company as a bargaining agent.

The reason advanced by the applicant for making the premature applications is to enable the applicant to get negotiations under way without the delay which, it is stated, will be occasioned if certification proceedings are to be deferred until ten months of the term of the existing collective agreements have expired. The applicant claims that in view of the widespread nature of its organization and of the company operations, negotiations will, it is anticipated, be lengthy.

The three presently certified bargaining agents do not oppose the present applications for consent. The employer states that it does not desire to make any representations to the Board in the matter subject to the condition that if the Board's consent is given, the applicant should not, if certified, be entitled to terminate existing collective agreements prior to the present termination date thereof. Certain other certified bargaining agents, representing employees of the company in classifications other than

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, A. Deschamps, J. A. D'Aoust, A. J. Hills, A. R. Mosher, G. Picard and H. Taylor, members.

those apparently included in the proposed bargaining units, wish to be advised of the filing of applications for certification, if permitted by the Board, in order that they may have the opportunity of intervening if the situation so warrants.

The principle laid down in the Act, that an application for certification may not be made to the Board before the expiration of ten months of the term of an existing agreement binding employees in the bargaining unit, is one which, in the opinion of the Board, should not be lightly departed from. Otherwise the whole scheme of orderly collective bargaining established by the Act will be jeopardized. In other cases where applications for certification have involved substantial numbers of employees engaged in widespread operations, as for example railway and telegraph operations, the trade unions and employers involved have not found it necessary to make application for consent to the filing of applications for certification prior to the expiry of the normal ten months' period of existing agreements. In the opinion of the Board the circumstances which are advanced as special reasons for a departure from the principle above set out are not sufficiently convincing to distinguish it from what might be termed a normal application to displace a certified bargaining agent which is a party to an existing collective agreement.

While the application for consent is not opposed by the presently certified bargaining agents, the employer has given a conditional consent only thereto and the Board cannot take for granted in the circumstances of the case that the applicant and the presently certified bargaining agents are the only parties which, in the period following the expiry of the ten months' period of the present agreements, may have an interest in the matter of representation of employees in the proposed bargaining units.

For the reasons stated, the Board declines to give its consent to the making of the applications for certification prior to the expiry of the ten months of the term of the collective agreements in force covering the employees affected.

(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman
for the Board.

Dated at Ottawa, February 17, 1949.

REASONS FOR JUDGMENT in dispute between

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Applicant,
and
National Harbours Board, Respondent,
and
Association of Federal Employees of Quebec Harbour, Inc., Intervener.

This is an application made by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, for the certification of that Union as the bargaining agent of hourly rated employees of the National Harbours Board at the Port of Quebec. The intervener is the certified bargaining agent for employees in the proposed bargaining unit.

The intervener opposes the application and contends, among other things, that the application is premature in view of the existence of an agreement between the intervener and the respondent, dated April 23, 1948, and in view of subsection four of section seven of the Industrial Relations and Disputes Investigation Act which provides:—

(4) Where a collective agreement is in force, the application may be made at any time after the expiry of ten months of the term of the collective agreement, but not before, except with the consent of the Board.

A collective agreement was entered into by the intervener with the respondent company, dated April 22, 1947, and effective May 1, 1947, covering the said employees. This agreement contains the following termination clause:—

This agreement shall become effective on the first day of May, 1947, and shall remain in effect for one (1) year from the effective date hereof and shall continue in effect until such time as either party hereto gives two (2) months' notice in writing of desire to revise or terminate same; it being expressly understood and agreed that the effective date of commencement of the payment of the prevailing wage rates enumerated in Article 2 shall be 1st November, 1946.

Under date of February 28, 1948, the intervener, as a party to this collective agreement, wrote to the National Harbours Board as follows:—

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, J. A. D'Aoust, A. J. Hills, A. R. Mosher, G. Picard and H. Taylor, members. The reasons for judgment of the Board were delivered by the Vice-Chairman.

We would kindly request that our letter mailed to you earlier this morning containing expression of our desire to terminate, as of the 1st of May, 1948, the collective agreement covering wages and working conditions of employees paid at prevailing rates at this Port and which became effective on May 1, 1947, be considered as null and void. This Association has made a more careful study of the problem and has moved to annul its decision on the ground that it does not appear to be in the best interests of our Association nor conducive to better labour relations with the other party to the agreement. In view of this we would, therefore, request that our notification for denunciation be cancelled and replaced by the attached notification for revision of the existing contract.

Following this notice, the parties to the agreement agreed on a revision of the wage rates which had been fixed by that agreement for employees in the bargaining unit. The terms of the agreement were not otherwise revised. This revision was given effect to by a supplementary agreement entered into on the 23rd of April, 1948, between the parties to the agreement.

This supplementary agreement provides . . . that the agreement dated the 22nd day of April, 1947 . . . is hereby amended by the cancellation of Article 2 thereof with respect to the rates of pay and the substitution thereof, effective November 1, 1947, of a new Article 2 with respect to the rates of pay, in the form and terms hereto attached to form part hereof.

The applicant contends that the revision of the wage rates effected by the agreement of April 23, 1948, amended the then existing collective agreement without creating a new collective agreement or a new term of agreement and that the term of the collective agreement now in force runs therefore from May 1, 1947. This contention, however, does not take cognizance of the construction of the termination provision of the agreement under which the notice of revision was given.

In the opinion of the Board, the giving of the notice by the intervener for revision of the agreement effective May 1, 1947, fixed a termination date for that agreement just as effectively as though a notice for termination thereof had been given. It will be observed that the provisions of the termination clause in the agreement, which have been quoted above, make no distinction in this respect.

In the circumstances, the agreement signed on April 23, 1948, should, in the opinion of the Board, be regarded as a renewal agreement or a new agreement which came into operation immediately

following upon the termination of the previous agreement, namely on May 1, 1948.

At the time the present application for certification was made to the Board, namely, December 2, 1948, ten months of the term of the collective agreement then in force had not expired. Therefore, in the opinion of the Board, the application was premature.

The application is accordingly rejected on this ground but, in the circumstances, without affecting the making of a further application at a proper time.

(Sgd.) A. H. BROWN,
*Vice-Chairman
and Acting Chairman
for the Board.*

Conciliation and Other Proceedings Before the Minister of Labour

Appointment of Conciliation Officers

On February 4, 1949, the Minister of Labour appointed Mr. R. H. Hooper, Winnipeg, Man., as Conciliation Officer under Section 16 of the Industrial Relations and Disputes Investigation Act to deal with a dispute between the Canadian Brotherhood of Railway Employees and Other Transport Workers (CCL) and the Canadian Pacific Transport Co., Ltd., Brandon, Man.

On February 14, 1949, the Minister of Labour appointed Mr. R. H. Hooper, Winnipeg, Man., as Conciliation Officer under Section 16 of the Industrial Relations and Disputes Investigation Act to deal with a dispute between the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1374 (AFL-TLC) and Western Canadian Greyhound Lines, Ltd., Calgary, Alta.

On February 28, 1949, the Minister of Labour appointed Mr. F. J. Ainsborough, Toronto, Ont., as Conciliation Officer under Section 16 of the Industrial Relations and Disputes Investigation Act to deal with a

dispute between the United Chemical Workers, Local 14 (CIO) and the Polymer Corporation, Ltd., Sarnia, Ont.

Agreement Facilitated by Conciliation Officer

On February 23, 1949, the Minister of Labour received a report from R. H. Hooper, Conciliation Officer, indicating the settlement of matters in dispute between the Canadian Brotherhood of Railway Employees and Other Transport Workers (CCL) and the Canadian Pacific Transport Co., Ltd., Brandon, Man.

Conciliation Board Reports Received

On February 17, 1949, the Minister of Labour received the report of the Conciliation Board established under the War-time Labour Relations Regulations, P.C. 1003, to deal with a dispute between Transit Tankers and Terminals, Ltd., and the Canadian Seamen's Union (TLC) (L.G., May, 1948, p. 467). The text of the Board's report is reproduced below.

On February 17, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between various east

and west coast deep sea dry cargo shipping companies, represented by the Shipping Federation of Canada, Inc., and the Shipowners' Association (Deep Sea) of British Columbia, and the Canadian Seamen's Union (TLC), representing unlicensed personnel employed by the companies (L.G., Jan., 1949, pp. 52-53). The text of the Board's report is reproduced below.

REPORT OF BOARD in dispute between

East and West Coast Canadian Deep Sea Dry Cargo Shipping Companies, and Canadian Seamen's Union.

To the Minister of Labour.

SIR:

The Board of Conciliation and Investigation in this matter was appointed by you on November 16, 1948, and consisted of the following persons:—

John Kerry, K.C., nominated by the Union.

Theodore Meighen, K.C., nominated by the Shipowners.

The Hon. Mr. Justice J. O. Wilson, appointed by you as Chairman.

The Members of the Board have duly taken Oath and have conducted the proceedings according to law.

Sittings of the Board were held at Montreal in November, 1948, and in January and February, 1949.

The object for which the Board was appointed was to negotiate a settlement of the differences existing between the Shipowners, who operate the greater part of the deep-sea tonnage of Canada, and the Union, which represents, generally speaking, all their employees except Commissioned Officers and other persons employed in Supervisory capacities.

The Shipowners and the Union had maintained collective bargaining agreements since 1946. The latest agreement between them came into effect October 15, 1947, and would have expired October 15, 1948, save that it was, by law, kept operative until the conclusion of these proceedings.

The Shipowners and the Union differed very widely as to the terms of the new agreement to be entered into. Without particularizing, it can be said that at least half of the provisions of the very long agreement involved were in dispute. The hearings did not resolve these difficulties. The atmosphere was not conciliatory, and

On February 24, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between Canadian National (West Indies) Steamships, Ltd., and Canadian Pacific Steamships, Ltd., and the Canadian Seamen's Union (TLC), representing unlicensed personnel employed by the companies (L.G., Feb., 1949, p. 173).

On February 17, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between various East and West Coast Deep Sea Dry Cargo Shipping Companies, represented by the Shipping Federation of Canada, Inc., and the Shipowners' Association (Deep Sea) of British Columbia, and the Canadian Seamen's Union (TLC), representing unlicensed personnel employed by the companies.

The Board was composed of the Hon. Mr. Justice J. O. Wilson, of the Supreme Court of British Columbia, Vancouver, Chairman, and Theodore Meighen, K.C., and John Kerry, K.C., both of Montreal, appointed on the nomination of the companies and the union, respectively (L.G., Jan., 1949, pp. 52-53).

the efforts of this Board did not have the hoped for effect of reconciling the parties.

Having failed at conciliation, the Board held daily private sessions extending over a period of one week. In these sessions an earnest attempt was made to arrive at a form of agreement fair to both parties. The views of Members of the Board diverged widely on many matters in dispute. But the importance to Canada of the industry involved and the calamitous implications to the Seamen, to the Shipowners and to the country, of a breach of relations between the parties were kept in mind. As a result the Members of the Board were able to arrive at a unanimous opinion as to the terms which should be embodied in the new agreement to be made between the Union and the Shipowners. Each of those terms does not necessarily represent the view of each Member of the Board as to the ideal

provision to cover the matter provided for. But the agreement as a whole is a reconciliation of divergent views setting out the collective opinion of this Board as to the agreement into which the parties to this dispute should enter. The Members of the Board have, in the interests of industrial peace, yielded, each one of them, on many points. It is their unanimous view that the parties to this dispute should pursue the same course. They are of the firm opinion that the agreement recommended is a fair compromise and ought to be accepted by the parties to this dispute.

All of which is respectfully submitted.
Dated at Montreal, February 16, 1949.

(Sgd.) J. O. WILSON,
Chairman.

(Sgd.) T. R. MEIGHEN,
Member.

(Sgd.) JOHN KERRY,
Member.

Memorandum of Agreement for Dry Cargo Freight Vessels

Made this.....

between:

Acadia Oversea Freighters Limited;
Argonaut Navigation Company Limited;
Atlantic Shipping Agencies Limited;
Bristol City Line (Canada) Limited;
Canadian National (West Indies) Steamships Limited; Canadian Shipowners Limited; Canadian Transport Company Limited; Canadian Union Line Limited; Dominion Shipping Company Limited; Elder Dempster Lines (Canada) Limited; Federal Commerce & Navigation Company Limited; Furness (Canada) Limited; Johnson Walton Steamships Limited; Kerr Silver Lines (Canada) Limited; Lunham & Moore Shipping Limited; Montreal Australia New Zealand Line Limited; Montship Lines Limited; Pickford & Black Limited; Quebec Steamship Lines Limited; Saguenay Terminals Limited; Triton Steamship Company Limited; Western Canada Steamship Company Limited; Vancouver Oriental Line; hereafter called the Companies,
and

The Canadian Seamen's Union,
hereinafter called the Union.

Witnesseth that:

Whereas the Companies operate ocean-going and coastwise ships; and

Whereas the parties are desirous of promoting collective bargaining and stability of industrial relations in the manner and upon the terms herein set out;

Now therefore the parties hereto hereby agree each with the other as follows:—

ARTICLE I

Section 1—General Purpose of Agreement

The general purpose of this Agreement is to advance the mutual interests of the Companies and their employees, to provide for the proper operation of the Companies' vessels under conditions that will advance to the fullest extent possible the safety and welfare of the employees and economy of operations and to provide the fullest opportunities for the employment of Canadian seamen in Canadian ships. It is recognized and declared by the parties to be the duty of the Companies and their employees covered by this Agreement to co-operate fully, individually and collectively, for the attainment of these objectives.

Section 2—Union Recognition and Employment

(a) The Companies recognize the Union as the sole collective bargaining agent for all unlicensed personnel (except unlicensed Officer Personnel, such as Cadet Officers, Junior Engineers, Sanitary Engineers, Junior Officers, Electricians, Purser and Chief Stewards) from time to time employed by the Companies on all deep sea dry cargo ships (not including ships with passenger certificate) of Canadian register, owned and operated or bare-boat operated by the Companies. The said unlicensed personnel may hereinafter be referred to as Seamen.

(b) The Companies agree that all unlicensed personnel engaged by them in Canada will be hired either through the office of the Union or through the Seamen's Section of the National Employment Service. The Companies agree not to discriminate against Union members. Any unlicensed personnel hired in Canada, who are not Members of the Union, will be required, as a condition of employment, either to join the Union and to continue as Members thereof during their employment or, in the alternative, to tender to the Union one month's dues as well as the initiation fees as presently established and to pay subsequent monthly dues as required of Union Members (and failure to pay arrears of monthly dues at pay-off shall be a bar to further employment until such arrears are paid).

(c) The Companies agree to provide space at the pay-off for a Union Patrolman to enable him to contact Members of the unlicensed personnel for the purpose of collecting Union dues.

Section 3—

The Parties agree that they will co-operate to exclude from the personnel employed by the Companies and the Union, all subversive elements.

Section 4—Continuous Employment

The Companies agree that all unlicensed personnel shall have the right to continuous employment and may be re-employed at the end of each voyage, except in the case where a man is discharged for cause. It is agreed that this clause shall not apply to vessels when in drydock or when undergoing major repairs which are likely to exceed three weeks.

Section 5—

The Union agrees that the Master of the vessel has the exclusive right to direct the crew and to hire, promote, demote, transfer, lay off, suspend or discharge employees and that such hours, both ordinary and overtime, shall be worked at sea and in port, as shall be directed by the Master or his deputy.

It is agreed by the Owners that these powers and rights will not be exercised in conflict with any of the provisions of this Agreement and by the Union that when any seaman considers that an order or direction of the Master is, in his opinion, in conflict with the terms of this Agreement, he shall, nevertheless, obey such order or direction and thereafter, through the grievance machinery herein provided, seek redress.

It is agreed that there shall be no strike, lock-out, slow-down or stoppage of work, nor shall any ship be tied up or delayed during the life of this Agreement.

Section 6—Promotions

In making promotions, at sea and in port, full and due consideration shall be given to Seniority and, all things being equal, seamen who are senior in length of service shall receive available promotions.

ARTICLE II

Section 1—Delegates

On each vessel there shall be one seamen's delegate from each department and one ship's delegate who may or may not be one of the Departmental delegates. The ship's delegate may put to the Master any dispute which cannot be settled by the Departmental delegates with the Departmental head. Any complaints so presented which are not adjusted satisfactorily to all concerned shall be referred to the operators' or ship's agent and to the Union upon the vessel's arrival in a Canadian port, as provided in this Agreement. Such delegates shall in no way interfere with the operation of the ship or with the ship's discipline.

Section 2—Adjustment of Grievances

The Companies and the Union agree that forty-eight (48) hours prior to arrival in home port, a list of any grievances arising out of the Agreement shall be presented to the Master. Within forty-eight (48) hours after the ship's arrival both the Company representative and a Union representative shall jointly investigate said list of grievances and agree in writing on any outstanding grievances that may remain for the oncoming crew, and these are to be adjusted before the departure of the vessel. The fulfilment of such agreement shall be considered as binding on both incoming and outgoing crews. Grievances not agreed upon by the Company and Union representatives shall immediately be sent to the Port Committee for adjustment. The owners will further make the utmost endeavour to remedy any complaint made after and apart from the complaints so listed but shall not be required to remedy such additional complaints before the sailing of the vessel, unless it is possible to do so without delaying the sailing. This section is not, however, to be interpreted as applying to disputes on monetary matters.

Section 3—Port Committee

(a) There shall be a Port Committee at Montreal, P.Q., Saint John, N.B., Halifax, N.S., and Vancouver, B.C. Such Committee shall consist of one representative from the Union and one representative from the Companies. Either the Companies or the Union may refer any dispute or grievance arising out of the terms of this Agreement to a Port Committee in writing and it shall be the duty of the said Port Committee to meet within 24 hours after receiving such written notice, Saturdays, Sundays and holidays excepted. In the event that the said Port Committee cannot agree on the settlement of a dispute or grievance, the matter shall be referred to the Regional Committee.

(b) In the event of any question of interpretation or violation of this Agreement or disputes of any nature, either by the members of the Union or by the Companies, the crew shall proceed with and complete the voyage and the question or dispute shall be referred to a Port Committee within 24 hours after the arrival of the vessel at a Canadian port, Saturdays, Sundays and holidays excepted.

(c) In no event shall the members of the unlicensed personnel tie up or delay any vessel of the Companies for the settlement of any grievances.

Section 4—Regional Committee

The Regional Committee shall consist of two representatives from the Union and two representatives from the Companies, named by the Shipping Federation for the East Coast Companies and by the B.C. Shipowners Association for the West Coast Companies, who shall meet in the port of Montreal and/or Vancouver. Either the Union or the Companies, or both, may refer any dispute or grievance on which a Port Committee has not been able to come to any agreement to the Regional Committee in writing and it shall be the duty of the Regional Committee to meet within 48 hours after receiving such written notice, Saturdays, Sundays and holidays excepted. In the event that the Regional Committee cannot agree on a settlement of the dispute, the matter shall, if it involves any difference between the Companies and the Union or any employee concerning the interpretation or violation of this Agreement, but not otherwise, be referred to an Arbitrator appointed by and acceptable to all members of the Regional Committee.

Section 5—Arbitration

(a) Failing agreement as to the selection of this Arbitrator (see Article 11, Section 4) he shall be named by the Minister of Labour of Canada.

(b) A decision of the Arbitrator in any such matter properly so referred to him shall be binding on all parties concerned.

(c) Before any matter shall be referred to arbitration, every effort shall be made to settle the question to the mutual satisfaction of all concerned through conference between the Union representatives and the Company officials.

Section 6—Discrimination

The Companies and the Union agree that in the employment of unlicensed personnel there shall be no discrimination because of race, colour or creed.

Section 7—Obligation of the Union Employees—Passes

The Companies agree that by the distribution of passes authorized employees of the Union may board the Companies' vessels reporting to the Officer in Charge, for the purpose of consulting the seamen employed thereon, provided, however, that the issuance of passes in any event shall be subject to the requirements of security, also that the Union employees shall not violate any provision of this Agreement.

It is also agreed that no Union employee shall call a meeting of men on duty on board any vessel without the consent of the officer in charge or interfere with or retard the work of the crew, provided, however, this shall not restrain the right of crew members off duty to hold meetings as they may decide.

Failure on the part of any Union employee to live up to all the terms and conditions of this Agreement, including the provisions for the adjustment of all questions and disputes in accordance with the terms of this Agreement, shall be sufficient grounds for revocation of any pass issued to such employee. The Union agrees to turn in any pass so revoked. Unless so revoked, such passes shall be valid for a period of three months.

Section 8—Emergency Duties

Any work necessary for the safety of the vessel, passengers, crew or cargo, or for the saving of other vessels, lives or cargoes, shall be performed at any time on immediate call by all members of the unlicensed personnel, and notwithstanding any provision of this Agreement which might be construed to the contrary, in no event shall overtime be paid for work performed in connection with such emergency duties, of which the Master will be the sole judge.

Section 9—Drills

Whenever practicable, lifeboat and other emergency drills shall be held on weekdays between the hours of 8:00 a.m. and 4:30 p.m. Preparation for drills, such as stretching fire hoses and hoisting or swinging out boats, shall not be done prior to signal for such drills, and after drill is over all hands shall secure boats and gear and replace fire hose in safe custody. In no event shall overtime be paid for work performed in connection with such drills.

Section 10—Lockers

One locker shall be provided for each employee so that each employee has one locker of full length with sufficient space to stow a reasonable amount of gear. Lockers now installed are to remain unchanged. Where new lockers are installed, they are to be, as nearly as practicable, of the following outside dimensions: height—6 feet; width—15 inches; depth—21 inches, and shall have a shelf fitted about ten inches from the top of the locker.

Section 11—Washrooms

Adequate washrooms and lavatories shall be made available for seamen, washrooms to be equipped with a sufficient number of shower baths which shall be adequately supplied with hot and cold fresh water whenever practicable.

Section 12—Cleanliness of Quarters

(a) All quarters assigned for the use of seamen are to be fumigated when necessary

and practicable and kept free from vermin as far as possible by the owners.

(b) Seamen are, in their own time, to make their bunks and keep their sleeping quarters and lockers clean and tidy. The said quarters shall also be thoroughly cleaned at least once a week in the Companies' time by seamen assigned for the purpose.

(c) Ordinary seamen on duty shall be required to keep the toilets and showers of the unlicensed personnel of the Deck Department clean at all times.

Firemen on day work, trimmers and/or wipers shall be required to keep the toilets and showers of the unlicensed personnel of the Engine Department clean at all times.

On vessels where stewards' accommodation is amidships, midship messmen shall be required to keep the toilets and showers of the Stewards' Department clean at all times. Where the stewards' accommodation is divided, crews' messboys shall be required to keep the toilets and showers aft clean.

The cleaning of the said toilets and showers is to be done between the hours of 8:00 a.m. and 5:00 p.m. on weekdays and between the hours of 8:00 a.m. and 12:00 noon on Saturday; in port, this work to be done between hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, provided, however, one hour's overtime shall be allowed for the performance of this work at any other time.

(d) For the purpose of this section, it shall be the duty of a responsible Officer to make arrangements for adequate time for cleaning of quarters required to be done on the Companies' time and personnel necessary to do the work. This work shall be carried out to the satisfaction of the Master or Officer in Charge.

(e) The Companies agree to undertake at least once every year to repaint crew's quarters in a light colour (the date of such painting is to be stencilled on the bulkhead of each compartment). The unlicensed personnel shall keep said painting always clean by regular washing, etc., during the interval between annual paintings.

Section 13—Other Conveniences

(a) Crew Equipment. The following items shall be supplied the unlicensed personnel employed on board the vessels of the Companies:—

1. A suitable number of clean blankets on commencement of each voyage.

2. Bedding shall consist of two sheets and one pillow slip, which shall be changed weekly (conditional on the return of previously issued linen by each man). White sheets and pillow slips shall be provided as replacements are required.

3. One face towel and one bath towel, which shall be changed twice weekly (conditional on return of previously issued towels by each man).

4. Four boxes of matches each week.

5. Spring-filled mattresses and suitable pillows.

6. Bunk lights and bunk curtains.

7. All dishes to be made of crockery.

8. Two cakes of standard toilet soap, and either one cake of laundry soap or one box of washing powder weekly.

9. Prophylactics shall be available at times specified by the Master.

10. Two hot plates, two toasters, two ship's clocks, one refrigerator and one water cooler shall be provided on all ships. Such equipment shall be in proper working order at time of sailing of vessel from home port and shall be signed for by the ship's delegate, who shall not thereby be held personally responsible.

11. Electric fans in all foc'sles and mess-rooms if no other form of mechanical ventilation is provided.

(b) When it is established that there is wilful damage or pilferage of any equipment, the person or persons responsible for such wilful damage or pilferage shall be held responsible and the cost of such damage or pilferage shall be deducted from the wages of the person or persons responsible.

(c) Bedding, linen, bunk curtains and equipment issued direct to unlicensed personnel shall be signed for at issue and such bedding, linen, bunk curtains and equipment, or their replacements, shall be turned in to the Chief Steward by each man before signing off and a receipt issued to the man. When only partial issue of linen is made in accordance with this Agreement, the men shall receive thirty cents (30c.) for each item in short supply each week in lieu thereof. When no linen is issued in accordance with this Agreement, the men shall receive two dollars (\$2.00) per week in lieu thereof.

(d) It is understood that the provision of the conveniences specified above is subject to their being available.

(e) It is agreed by the Companies and the Union that, during the period that this Agreement is in effect, the Companies shall be required to provide only the conveniences specified in this section, and neither the crew nor Union officials shall be allowed to delay any vessel for conveniences not specified in this section.

Section 14—Meals

(a) Meals served to the crew shall be the same as those served to the officers.

(b) Fresh fruit in season shall be supplied each day. When fresh fruit is not available, juices shall be supplied.

(c) Fresh milk shall be supplied in all Canadian ports, and in foreign ports when obtainable. The allowance shall be one quart per man per day.

Section 15—Meal Hours—Relieving for Meals

(a) Meals for unlicensed personnel employed in the Deck and Engine Departments shall be served at the following times:—

At Sea:

| | | |
|-----------------|---------------|------------|
| Breakfast | 7.20 a.m. to | 8.30 a.m. |
| Dinner | 11.20 a.m. to | 12.30 p.m. |
| Supper | 5.00 p.m. to | 6.00 p.m. |

In Port:

| | | |
|-----------------|---------------|-----------|
| Breakfast | 7.20 a.m. to | 8.00 a.m. |
| Dinner | 12.00 noon to | 1.00 p.m. |
| Supper | 5.00 p.m. to | 6.00 p.m. |

Unless unforeseen circumstances interfere, all unlicensed personnel shall be given a reasonable time to take their meals within the hours above set out.

(b) The twelve to four watch on sailing day shall knock off at 11:00 a.m. in order to eat at 11:20 a.m. and to be ready to go on watch at 12:00 noon.

(c) Meal hours may be varied, but such variations shall not exceed one hour either

way provided that one unbroken hour shall be allowed at all times for dinner and supper when vessel is in port. When watches are broken, if one unbroken hour is not given, the men involved shall receive one (1) hour's overtime in lieu thereof at the regular overtime rate. On sailing day, watches may be set as required by the Master and meals shall be taken at least one (1) hour prior to commencing watch. This sub-section shall apply to day men in port and at sea.

Section 16—Coffee or Tea Time

Fifteen (15) minutes shall be allowed for coffee or tea at 10:00 a.m. and 3:00 p.m., personnel to be allowed this time off in rotation as directed by the officers.

Section 17—Night Lunches

(a) If it is anticipated that any crew member or members will work overtime all night, coffee or tea and a lunch at mid-night shall be provided for these men—one (1) hour to be allowed for such coffee or tea and lunch.

(b) Should any crew member or crew members be required to work overtime during part of a night, coffee or tea and lunch shall be made available at 9:00 p.m. and 3:00 a.m. for the men then working—fifteen (15) minutes shall be allowed for the taking of such lunches and this time shall be included in overtime, if work continues.

(c) When crew members are called after midnight to work overtime, coffee or tea shall be made and ready at time of calling by the watch or watches and may be taken during the fifteen (15) minutes readiness period.

(d) In the evening, light lunches consisting of cold meat and coffee shall be available for all members of the unlicensed personnel.

Section 18—Travelling

Unlicensed personnel, when transported by the Companies during the course of their employment, shall be provided with tourist transportation by rail or bus, including berth when travelling by night and with subsistence at the rate of one dollar and twenty-five cents (\$1.25) per meal or a maximum of three dollars and seventy-five cents (\$3.75) per day, in addition to their regular monthly wage. When travelling by water, second class or tourist transportation may be provided, this to include berth and meals at the above mentioned rates.

When crew members of West Coast vessels have to travel on coastal passenger vessels overnight, first class accommodation shall be provided.

Section 19—Room and Meal Allowances

When the Company does not provide meals on the vessel, unlicensed personnel during the course of their employment shall receive eighty-five cents (85c.) per meal. When the Company does not provide suitable sleeping accommodation, three dollars (\$3.00) shall be allowed for room per night.

Section 20—Return to Port of Signing

In the event a ship of the Companies is sold or laid up, the crew shall be repatriated to the port of engagement, with subsistence, transportation and wages as provided in this Agreement.

Where the service of a seaman signed on at an Eastern Canadian port terminates by reason of the termination of the voyage at a

Western Canadian port, and vice versa, he shall have the same rights in respect to his return to a proper return port as are provided under the Canada Shipping Act where service is terminated at a port out of Canada.

Section 21—Substitutes Signed on Abroad

When substitute seamen have to be signed on abroad owing to members of the unlicensed personnel leaving the ship at a port abroad during the course of the voyage, the Companies shall have the right, on the return of the ship to a Canadian port, to resign any such substitutes for one voyage, but if such substitutes again return to a Canadian port, they shall be repatriated.

Section 22—Reporting on Board

All crew members off watch shall be required to report on board and be available for duty not less than two (2) hours before time of sailing, as posted on Notice Board.

Section 23—Medical Examination

(a) It is agreed that the Companies have the right to have all personnel medically examined for fitness, and that any personnel found medically unfit for service shall not be employed or, if employed, may be dismissed.

(b) Where the Companies refuse to employ any man for medical reasons as aforesaid, the question of that man's fitness for sea duties in the category in which he is to be employed may be reviewed by a doctor nominated by the Union, and if there is a difference of opinion between the Companies' doctor and the Union's doctor, the matter may be referred for determination to a competent medical authority acceptable to both the Companies and the Union; the cost of such appeal shall be shared jointly by the Companies and the Union.

(c) A suitable supply of drugs for the emergency treatment of normal shipboard contingencies, to be administered as and when prescribed by the Master, shall be carried on the ship and suitable accommodation for the housing of sick and injured personnel shall be provided when made necessary by the special nature of the illness or injury.

Section 24—

All stores and provisions issued to the crew are only for use and consumption aboard the ship and any unused or unconsumed stores or provisions remain the property of the shipowner and must not be taken ashore, sold, destroyed or given away.

ARTICLE III

Wages

Section 1—

(a) Scale of Wages:

| | |
|----------------------------|----------|
| Bosun | \$180.00 |
| Carpenter | 185.00 |
| A. B. | 170.00 |
| O. S. | 150.00 |
| First Cook | 200.00 |
| Second Cook | 170.00 |
| Second Steward | 170.00 |
| Galley Boy | 140.00 |
| Deck Boy (Utility Boy).... | 140.00 |
| Mess Man | 160.00 |
| Mess Boy | 140.00 |
| Oiler | 175.00 |
| Fireman | 170.00 |
| Trimmer | 165.00 |
| Wiper | 165.00 |
| Donkeyman | 180.00 |

Unlicensed personnel shall be entitled to advances against their earned basic pay when in port at times fixed by the Master to the extent that funds are available, provided that the Master may, in his discretion, retain at all times a sum equivalent to a full month's pay, and that allotments of pay must be provided for before advances are made.

(b) Standby Wages While in Port for Unlicensed Personnel not Under Articles.

When members of the unlicensed personnel not under articles are employed, they shall be paid the following hourly rates: straight time ninety cents (90c.) per hour. After 8 hours and on Saturdays, Sundays and holidays, they shall receive time and one-half. Except in case where regular standby shore gangs are employed, all requirements shall be hired in accordance with Section 1 of Article I.

Section 2—Division of Wages of Absent Members

(a) When a vessel sails from any port and the vessel does not have its full complement of unlicensed personnel, the wages of the missing crew member or members shall be divided amongst the seamen of the Department concerned.

(b) When men are promoted for the purpose of replacing men who are injured or sick, they shall receive the differential in pay only while so acting.

Section 3—Overtime Rates

For the purposes of this Agreement the overtime rates shall be as follows:—

| | Cents per hour |
|---|----------------------|
| Bosun, Carpenter, Donkeyman, First Cook | 90 |
| Able Seaman, Oiler, Fireman, Wiper, Trimmer, Second Cook, Second Steward, Messman | 80 |
| Ordinary Seamen, Deckboy, Galley Boy, Messboy | 70 |

Section 4—Commencement of Overtime

Overtime shall commence at the time any employee shall be called to report for work outside of his regular schedule, provided such member reports for duty within fifteen (15) minutes. Otherwise overtime shall commence at the actual time such employee reports for duty, and such overtime shall continue until the employee is released.

Section 5—Computation of Overtime

When overtime worked is less than one (1) hour, overtime for one hour shall be paid. When overtime worked exceeds one (1) hour, the overtime work performed shall be paid for in one-half ($\frac{1}{2}$) hour periods. When men on their watch below are called out to work on overtime and then knocked off for less than two hours, excepting when a man is recalled for his regular duties, overtime shall be paid straight through, but this shall not apply to men who are used for docking or undocking or to knocking off for meals.

Section 6—Relieving for Time Off

Mutually satisfactory arrangements for relieving each other in order to secure time off in port may be made between the unlicensed personnel and the Master of the ship or the Officer in Charge. In no event where mutual arrangements have been made will overtime be paid for the person carrying out the duties.

Section 7—Changing Watches

Time customarily used in changing and relieving watches shall not be considered as overtime.

Section 8—Checking of Overtime

All overtime worked must be ordered by the Master or Head of a Department.

After overtime has been worked, each member of the crew who has worked overtime shall obtain from the Officer in Charge within twenty-four (24) hours a slip duly signed by such Officer and counter-signed by himself, certifying to the overtime worked and setting out the work done. The permanent overtime book shall also be signed jointly by Officer in Charge and crew members.

Under this section where a case arises wherein overtime or the amount is in dispute the slips shall be signed by the Officer and the man, and marked "Disputed" with the reasons for same, and such disputed overtime shall then be handled under the grievance procedure in the Agreement.

In case of any dispute as to overtime, no claim for overtime will be allowed, unless supported by such signed slips, except where it is established that the Master or Head of department refused to issue one.

Section 9—Payment of Overtime

All money due the crew for overtime work shall be paid at the time of signing off or, in any event, not more than twenty-four (24) hours after the vessel pays off, unless in dispute.

Section 10—Penalty Cargoes

(a) When members of the unlicensed personnel are required to clean holds in which penalty cargo has been carried, they shall be paid for such work, in addition to their regular wages, at the rate of straight overtime for the watch on deck, and overtime and one-half for the watch below.

(b) For the purposes of paragraph (a), the following shall be considered penalty cargoes: in bulk, arsenic, bones, caustic, soda, cement, chloride of lime, lampblack or carbon black, sulphur, raw manure, soda ash, bone meal, kainite, superphosphate, potash; also green hides in bags or bundles.

(c) On vessels carrying explosives in fifty-ton lots or over, the Companies agree to pay members of the unlicensed personnel, in addition to their regular monthly wages, fifteen (15) dollars per month while such cargo is on board the vessel. Such cargo time shall start from the day the first sling load is aboard and continue until the day the last sling load goes over the ship's side.

(d) When members of the unlicensed personnel are required to work explosives, they shall be paid for such work, in addition to their regular monthly wages, at the rate of two dollars and fifty cents (\$2.50) per hour.

(e) For the purpose of this Agreement, explosives shall consist of the following items; black powder, blasting caps, detonating caps, dynamite, TNT, and all other explosives and highly inflammable materials such as high octane gasoline, which have a flash-point below 73 degrees Fahrenheit, but excepting such stable items as unfused shells and ammunition.

Section 11—Discharging Ballast

In port, whenever members of the crew may be required to discharge ballast out of

holds, or handle or discharge ballast on deck, they shall receive straight overtime between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, and overtime and one-half between the hours of 5:00 p.m. and 8:00 a.m. Monday through Friday, and on Saturdays, Sundays and holidays.

Section 12—Longshore Work by Crew

In the event that any member of the said crew is required to drive winches for the purpose of handling cargo or to work cargo, he shall be paid in addition to his regular wage, the overtime rate under this Agreement. If such work is required to be performed on Saturdays, Sundays or holidays, the rate shall be time and one-half.

Section 13—Securing Cargo in Hold

(a) If cargo is not properly secured by longshoremen before going to sea, the watch on deck shall be paid at the regular overtime rate as provided in Article III, Section 12.

(b) On Deck. The Watch on deck may be required to secure cargo on deck without the payment of overtime between the hours of 8:00 a.m. and 5:00 p.m. weekdays. If a watch below is called to secure cargo on deck, it shall be paid at the regular overtime rate, except as provided in Article II, Section 9.

(c) Any work necessary for the safety of the vessel, passengers, crew or cargo shall be performed at any time on immediate call by all members of the unlicensed personnel, notwithstanding any provision which might be construed to the contrary. In no event shall overtime be paid for such work performed in connection with such emergency duties.

Section 14—Handling Dunnage for Cargo

When the crew are required actually to lay dunnage for cargo or to erect or dismantle or demolish shifting boards, they shall be paid at the regular overtime rate for the watch on deck, and overtime and one-half for the watch below.

Section 15—Cargo Gear

Rigging up or securing cargo gear shall be done by the watch on deck without the payment of overtime except that overtime shall be paid to the watch on deck for such work performed on Saturday afternoons, Sundays and holidays at sea. In port, overtime shall be paid for this work on Saturdays, Sundays and holidays.

Section 16—Cleaning Bilges

When employees are required to enter and clean bilges, or clean rose boxes wherein the remains of grain (dry grain excepted) or organic fertilizer are present, the watch on duty shall be paid at the regular overtime rate and the watch below at the rate of overtime and one-half. This shall also apply to bilges that have been flooded with fuel oil. In other cases, the cleaning of bilges and rose boxes shall be considered a routine duty.

Section 17—Shore Leave

Crew should be granted shore leave during regular hours off duty in port, weather and other conditions permitting, but where, owing to regulations of the immigration or local authorities, shore leave is impossible, the Master is required to make the crew fully aware as to why shore leave cannot be granted.

Section 18—Sick Seamen

Any member of the unlicensed personnel who in any port outside of Canada has to be signed off from a vessel owing to an illness other than venereal disease or alcoholism shall, in addition to medical care and maintenance to which he is entitled under the Canada Shipping Act, also be entitled to two-thirds of his basic pay until he is declared medically fit for duty and offered an available job or has been repatriated to a proper return port, whichever first happens, provided that in any event such sick pay shall not continue after twelve (12) weeks from the date the seaman was signed off articles sick.

Where a seaman has an allotment payable to a dependent, as defined under the Canada Shipping Act, the Companies undertake to continue such allotment up to the amount of the sick pay due the seaman under the conditions stated above.

Section 19—Marine Disaster

Any member of the unlicensed personnel who suffers loss of clothing and personal effects through marine disaster or shipwreck shall be compensated by the payment of one hundred and fifty dollars (\$150.00).

ARTICLE IV

Section 1—Holidays

When a vessel is in port, the following holidays shall be observed and where they fall on a Sunday, the Monday following shall be considered a holiday, provided such procedure is being adhered to by shore establishments in Canada:—

1. New Year's Day
2. Good Friday
3. Dominion Day
4. Labour Day
5. Thanksgiving Day
6. Christmas Day.

When the vessel is at sea, the work performed on a holiday shall be confined to that usually performed on a Sunday.

Section 2—Holidays With Pay

All unlicensed personnel shall be granted fourteen (14) days' holiday with basic pay after twelve (12) months' continuous satisfactory service with one Company, and thereafter, at the option of the employee, seven (7) days' holiday with basic pay after each six (6) months' continuous satisfactory service with the Company.

ARTICLE V

Deck Department—Working Rules

Section 1—Work in Port

(a) Routine Work. In all ports, members of the Deck Department may be required to perform all normal maintenance work and to chip, sougee, scale, prime and paint the vessel, including over side; and they shall also handle all ship's stores and stow deck stores as may be required.

(b) Hours of Work. The hours of labour in port shall be eight (8) hours between the hours of 8:00 a.m. and 5:00 p.m. on weekdays. All work performed in port after 5:00 p.m. and before 8:00 a.m. and on Saturdays, Sundays and holidays shall be paid for at the regular overtime rate, except as provided in Article II, Section 9.

When vessel is in port and men are called back after 5:00 p.m. and before 8:00 a.m. or on Saturdays, Sundays or holidays for the purpose of shifting ship, a minimum of two (2) hours overtime shall be paid for each call, except when men are knocked off for a period of two hours or less, in which case time shall be continuous.

(c) Gangway Watches. In port, sailors may be required to act as night watchmen between the hours of 5:00 p.m. and 8:00 a.m. without the payment of overtime, except on Saturdays, Sundays and holidays. Sailors standing gangway watch shall care for the lights about the deck, including cargo lights, if being used, and shall tend mooring, lighter and gangway lines as directed by the Officer in Charge. It is understood that any time on duty in excess of eight (8) hours under this section is to be considered as overtime and paid for at the regular overtime rate.

(d) Watches. When a vessel arrives in port, watches may be maintained until twelve noon on such day of arrival. If arrival occurs after twelve noon, watches shall be broken when the vessel is moored at the loading or discharging berth.

In all open roadsteads and ports where the vessel does not lie alongside a dock, watches shall be maintained or broken at the discretion of the Master.

In all ports where the vessel is alongside a dock, watches shall be broken if the scheduled stay of the vessel will exceed twenty-four (24) hours. When the scheduled stay of the vessel will be less than twenty-four (24) hours, watches may be maintained or broken at the discretion of the Master, with the exception of gangway watches.

(e) Washing Down. When members of the Deck Department are required to wash down on Saturdays, Sundays or holidays, they shall be paid overtime, except where sanitation makes the work necessary.

It is agreed by the both parties to this Agreement that the words "except where sanitation makes the work necessary" shall apply only in those instances where cleanliness will safeguard the health and safety of the crew.

(f) Docking and Undocking. When men off watch are called upon to assist in docking or undocking, they shall be paid for such work at the regular overtime rate, but in no event is overtime to be paid to men on watch for this work.

Section 2—Work at Sea

(a) Watches at Sea. The sailors assigned to watch-keeping duties shall, while at sea, be divided into three watches, which shall be kept on duty successively for the performance of ordinary work incidental to the sailing, management and upkeep of the vessel.

The strength of watches may vary and vary from time to time, but the strength of a navigational watch shall be not less than three, though not all members of such watch need be engaged on navigational duties at the same time.

Sea watches shall, when practicable, be set not later than noon on the day of departure, except when the vessel sails before noon, in which event sea watches shall be set not later than the departure of the ship to sea. The setting of sea watches earlier than provided herein shall be optional with the Master.

(b) Work Performed at Sea. All work in excess of eight (8) hours between midnight and midnight of each day shall be paid for at the regular overtime rate, except as provided in this Agreement.

No work except for the safe navigation of the vessel is to be done after 5:00 p.m. and before 8:00 p.m. and on Saturday afternoon and Sundays. Sanitary work shall be done between 6:00 a.m. and 8:00 a.m. without the payment of overtime.

Section 3—Work on Hatches

In ports where the custom of the port is that longshoremen shall take off and put on hatches or beams to prepare hatches for discharging or loading cargo and where members of the deck department are required to do this work, they shall be paid overtime for the watch on deck and overtime and one-half for the watch below.

Section 4—Carpenter's Work—In Port and at Sea

(a) Carpenters shall paint, chip, oil and clean the windlass and take soundings, shore up cargo and do customary carpenter's work aboard the vessel.

(b) Carpenters shall, if required, work the windlass when mooring or unmooring or letting go or heaving up anchors.

(c) The boatswain shall, if required, work the windlass and take soundings when no carpenter is carried.

(d) In port, when carpenters are required to take soundings after 5:00 p.m. and before 8:00 a.m. and on Saturdays, Sundays and holidays, they shall be paid overtime for such work performed.

ARTICLE VI

Engine Department—Working Rules

Section 1—Work in Port

(a) Hours of Work. The hours of labour in port shall be eight (8) hours between the hours of 8:00 a.m. and 5:00 p.m. weekdays. All work performed in port after 5:00 p.m. and before 8:00 a.m. and on Saturdays, Sundays and holidays shall be paid for at the regular overtime rate, except as otherwise provided in this Agreement.

When a vessel is in port and men are called back after 5:00 p.m. and before 8:00 a.m. or on Saturdays, Sundays or holidays for the purpose of shifting ship, a minimum of two hours overtime shall be paid for each call, except when men are knocked off for a period of two (2) hours or less, in which case time shall be continuous.

(b) Watches. When a vessel arrives in port, watches may be maintained until twelve noon on such day of arrival. If arrival occurs after 12:00 noon watches shall be broken at the discretion of the Master, when the vessel is moored at the loading or discharging berth.

In all open roadsteads and ports where the vessel does not lie alongside a dock, watches shall be maintained or broken at the discretion of the Master.

In all ports where the vessel is alongside a dock, watches shall be broken if the scheduled stay of the vessel will exceed twenty-four (24) hours. When the scheduled stay of the vessel will be less than twenty-four (24) hours, watches may be maintained or broken at the discretion of the Master.

Section 2—Oilers—Duties in Port

Oilers in port shall perform routine duties and assist engineers in maintenance and repair work. They shall not be required to do any boiler cleaning but shall, however, assist in the general maintenance of the main engine, auxiliaries and other machinery under the supervision of the Engineer in Charge.

Only such maintenance work as is necessary shall be performed between the hours of 5:00 p.m. and 8:00 a.m.

When watches are broken, oilers' hours shall be those of day workers.

Oilers shall assist with the taking and placing on board of engine room stores.

Section 3—Fireman—Duties in Port

(a) When watches are not broken, firemen's duties shall be the same as at sea. When watches are broken, their hours of employment shall be the same as those of day workers. They shall assist in general repair and maintenance work, general cleaning, polishing and painting work, as directed by the Officers in Charge.

They shall wash down steam drums of water tube boilers or water side of Scotch boilers.

When required to do any cleaning of boilers and fire boxes, other than the above, they shall be paid overtime.

Firemen shall assist with the taking and placing on board of engine room stores.

(b) After 5:00 p.m. until midnight on day of arrival, the fireman detailed to look after plant shall continue on sea watches until midnight and shall take care of auxiliaries, ice machine and tend water, in addition to maintenance of steam, and shall receive overtime until midnight, except as otherwise provided.

(c) In port, firemen shall maintain a regular donkey watch between the hours of 5:00 p.m. and 8:00 a.m. without the payment of overtime. On Saturdays, Sundays or holidays, they shall receive the regular overtime rate. Donkey watch shall be maintained for the purpose of keeping steam for the auxiliaries, winches and safety of the ship.

Section 4—Firemen on Day Work or Trimmers—Duties in Port

(a) Firemen on day work or trimmers shall do general cleaning, scaling, painting and polishing work in the Engine Department and assist in handling engine room stores. They shall also do general maintenance work and assist in repair work as directed and supervised by the Officer in Charge.

(b) Firemen on day work or trimmers shall be required to paint and clean the fidley behind and on top of boiler spaces but this work is not to be done in the tropics.

(c) Firemen on day work or trimmers shall wash down fire room and engine room tank tops and shall clean bilge strainers and cleaning away sticks, rags or other rubbish shall be regarded as part of the usual duties of the firemen on day work or trimmers.

(d) Firemen on day work or trimmers shall be paid overtime when required to clean inside the boilers. They shall, however, wash boilers with hose, haul up refuse and help clean fire room without payment of overtime.

Section 5—Duties of Donkeyman

(a) When cargo is being worked with ship's winches after 5:00 p.m. on arrival day, the donkeyman shall oil winches and look after the deck machinery until midnight; after midnight an oiler shall be detailed to oil winches and look after deck machinery until 8:00 a.m.

(b) On other than arrival days, a donkeyman shall oil winches and look after the deck machinery between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday.

(c) In the event a donkeyman is not available or obtainable, an oiler may be assigned to his duties. If an oiler is not available or obtainable, any member of the Engine Department with oiler's qualifications may be assigned by the Engineer in Charge.

Section 6—Duties of Firemen and Oilers in Port When Working Cargo

(a) On days of arrival, if cargo is to be worked with ship's winches after 5:00 p.m., firemen and oilers shall remain on sea watches until midnight.

(b) When oilers are required to oil winches, the firemen shall take care of the entire plant during this period.

In the event an oiler is not available or obtainable, any member of the Engine Department may substitute for the oiler.

It shall be the duty of the oiler to turn the steam on deck and prepare the winches for working cargo if required.

(c) While cargo is being worked with the ship's winches, between the hours of 5:00 p.m. and 8:00 a.m., week-days and on Saturdays, Sundays and holidays, coal firemen shall receive overtime at the regular overtime rate. Oil firemen shall receive overtime at the regular overtime rate on Saturdays, Sundays and holidays.

(d) Oilers shall receive overtime while cargo is being worked with the ship's winches between the hours of 5:00 p.m. and 8:00 a.m. on week-days and on Saturdays, Sundays and holidays.

(e) In port, firemen shall maintain a regular donkey watch between the hours of 5:00 p.m. and 8:00 a.m. without the payment of overtime. On Saturdays, Sundays and holidays they shall receive the regular overtime rate. Donkey watches shall be maintained for the purpose of keeping steam for the auxiliaries, winches and the safety of the ship.

Section 7—Work at Sea

(a) Watches at Sea. Engine room ratings assigned to watchkeeping duties shall, whilst at sea, be divided into three watches, which shall be kept on duty successively for the performance of ordinary work incidental to the sailing, management and upkeep of the vessel. The remainder of the engine room ratings shall be considered as day workers. Arrangements for maintenance of sea watches shall be at the discretion of the Officers in Charge. Sea watches shall, when practicable, be set not later than noon on the day of departure, except when the vessel sails before noon, in which event sea watches shall be set not later than twelve (12) hours before the departure of the ship to sea. The setting of

sea watches earlier than provided herein shall be optional with the Officer in Charge.

(b) Work Performed at Sea. All work in excess of eight (8) hours between midnight and midnight of each day shall be paid for at the regular overtime rate, except as provided in this Agreement.

(c) Oilers—Duties on Sea Watches. Oilers on sea watches shall perform routine duties, oil main engine (if reciprocating), watch temperatures and oil circulations (if turbine), oil auxiliaries, steering engine and ice machine. They shall also assist the engineer on watch in all matters pertaining to the safe working of the vessel and its machinery.

Oilers shall do only such cleaning or station work as shall be required to leave safe working conditions for their relief, keeping the spaces around the main engine and auxiliaries clean of oil before going off watch.

Oilers shall not be required to do any cleaning of boilers. They shall, however, assist in the general maintenance of the engine room and machinery under the supervision of the Engineer in Charge.

(d) Firemen—Duties at Sea. Firemen shall perform routine duties, keep burners, drip pans and fuel oil strainers clean on all watches, punch carbon, keep steam, watch oil pressures and temperatures and shall tend water when gauges are in fire room. They shall not be required to leave the confines of the fire room to oil auxiliaries or do any work not directly connected with steaming of boilers. On vessels using coal as fuel, firemen shall perform the regular duties of firemen on this type of vessel assisting in the dumping of ashes at sea.

Firemen on watch may be assigned stations to keep clean. Each man shall have a station equal in area below the lower grating and not below the floor plates or behind the boilers. On vessels having irregular gratings, ten feet from the floor plates shall be considered the firemen's limit.

Blowing tubes shall not be part of a fireman's recognized sea duties on ships that have only one fireman on watch without a water tender on watch, provided, however, that the fireman on watch may be required to assist in blowing tubes to the extent of helping to open and close breeching doors and turning steam on or off. Where automatic soot blowers are used, firemen shall handle valves connecting with same.

(e) Trimmers—Duties at Sea. Trimmers on sea watches shall perform the routine duties. They shall see that there is sufficient supply of coal conveyed from the bunkers to the stokehold for the firemen to maintain steam. They shall also pull ash pits and dump ashes. Watches shall be four (4) hours on and eight (8) off. They shall assist the firemen in maintaining the cleanliness of the stokehold.

(f) Firemen and Trimmers—At Sea and in Port. Firemen and trimmers shall keep the galley supplied with fuel at sea and in port under direction of the Chief Engineer or Engineer in Charge.

ARTICLE VII

Steward's Department—Working Rules

Section 1—Working Hours at Sea and in Port

The working day at sea or in port shall not exceed eight (8) hours in a spread of twelve (12) hours. In order to give effect to this provision, the Companies agree to set up standard work schedules for all ratings in the Steward's Department. Complaints having their origin in this Article shall be subject to the grievance procedure contained in this Agreement.

Section 2—Overtime While in Port

On Saturdays, Sundays and holidays while in port, the members, who work, of the Steward's Department under this Agreement shall be paid regular overtime rates for all hours worked.

Section 3—Routine Work

The regular routine laid out below shall be carried out within the regular hours specified under Section 1 and it shall be the duty of the Steward's Department to organize its work so that this can be accomplished.

Routine duties for members of the Steward's Department shall be the supervision, preparation and serving of meals, and the preparation of night lunches, the cleaning and maintaining of the quarters of the licensed personnel and passengers and all dining and mess rooms, smoking and lounging rooms, washrooms, toilet facilities, galley, pantries, store rooms, linen rooms and refrigerating spaces and all departmental equipment.

Where Petty Officers have separate mess room, engineers' messman shall serve meals and be responsible for cleaning of such mess-room and pantry.

Section 4—Chipping and Painting

Members of the Steward's Department shall not be required to chip or scrape paint, nor shall they be required to do any painting.

Section 5—Steward's Stores

Members of the Steward's Department shall not be required to carry any stores or linen to or from the dock, except when such work is necessary and no other assistance is immediately available, in which event overtime at the regular rate shall be paid, but when stores or linens are delivered aboard ship they shall assist in placing same in their respective places and overtime shall be paid for such work to all men required to put in more than eight (8) hours work that day.

(b) Daily supplies of provisions such as milk, bread and vegetables shall be handled without the payment of overtime.

ARTICLE VIII

Company Safety Regulations

It is agreed that any safety regulations which the Companies may now have in force

for the safety of the vessel and crew, and any further safety regulations which the Companies shall put into effect during the terms of this Agreement and bring to the attention of the crew, shall be strictly adhered to by all crew members. Violation of such regulations shall warrant dismissal from the ship.

The Companies agree that no crew member shall be required to work under unsafe conditions.

ARTICLE IX

Definitions

Wherever used in this Agreement, the words:—

(a) "In Port" shall mean from the time a vessel is at its dock and properly secured or from the time the anchor is dropped in any safe port for the purpose of loading or unloading cargo until the raising of anchor or casting off lines from deck.

(b) "Day of Arrival in Port" shall mean the day the vessel arrives from sea at a port for the purpose of loading or unloading cargo, and subsequent moves within that port shall be considered as shifting ship.

(c) "Day of Departure" shall mean the day the vessel leaves for sea from the port from which the vessel is finally cleared.

ARTICLE X

Government Laws and Regulations

Nothing contained in this Agreement shall be construed to render null and void the obligations of the signatories under the provisions of the Canada Shipping Act or other Government legislation or regulation.

Neither the Union nor the Companies will interfere, directly or indirectly, with the rights granted Seamen by Sections 182 and 183 of the Canada Shipping Act.

ARTICLE XI

Articles

It is agreed by the Companies and the Union that no additional clauses shall be adopted by the Master and Seamen in the Agreement with the crew which are repugnant to the terms of this Agreement.

ARTICLE XII

Duration of Agreement

This Agreement shall come into effect on the and shall remain in full force and effect for a period of one year thereafter.

This is the Agreement referred to in the attached report.

(Sgd.) J. O. WILSON,

(Sgd.) T. MEIGHEN.

(Sgd.) JOHN KERRY.

REPORT OF BOARD in dispute between

Transit Tankers and Terminals Limited, and Canadian Seamen's Union (TLC).

To the Hon. Minister of Labour.

The above mentioned Board of Conciliation was appointed by the Hon. Minister of Labour on the 31st of March, 1948, to act in respect of disputes between the above parties.

The members of the Board of Conciliation were sworn at the city of Montreal, on the 2nd of April, 1948, by Mr. Justice Oscar Gagnon, judge of the Court of Sessions of Montreal.

All the sittings of the Board were held at the Court House, in Montreal.

The Board of Conciliation, at its first two meetings took cognizance of different documents deposited with the Board by the Department of Labour, to wit:—

- (a) Report from Mr. R. Trepanier, Industrial Relations Officer (4 pages);
- (b) Proposed Draft Agreement (10 pages);
- (c) Analysis of the above proposed Agreement (3 pages);
- (d) A Memorandum of Agreement made on the 1st of August, 1947 (10 pages).

On the 3rd of April, 1948, the president of the Board gave notice to the attorneys, Me Andre Demers, representing the Company and Me Abraham Feiner representing the Union that a meeting of the parties interested and their representatives would be held at the Court House in Montreal, Room 2, on the 9th of April, at four o'clock p.m.

On the 5th of April, 1948, a letter was sent by the president to Mr. M. M. Maclean, Director of Industrial Relations, advising him that Me Andre Demers, K.C. had expressed his intention to raise the question of the Board's jurisdiction at the meeting of the 9th of April; by reason of the same, the president requested the assistance of Miss Jeanne Marsan, stenographer, to make a report to the Department of the arguments and reasons of Me Andre Demers contesting the Board's jurisdiction.

On the 8th of April, 1948, the Department appointed Miss Jeanne Marsan to act as stenographer for the Board.

On the 9th of April, Me Andre Demers appeared before the Board and declared that he had instructions from his clients to

On February 17, 1949, the Minister of Labour received the report of the Conciliation Board established to deal with matters in dispute between Transit Tankers and Terminals Limited and the Canadian Seamen's Union (TLC).

The Board was composed of His Honour Judge C. E. Guerin, of Montreal, Chairman, C. G. Quinlan, also of Montreal, and Elphege Beaudoin, of Verdun, P.Q. (L.G., May, 1948, p. 467).

contest Order in Council, No. 1003 by a Writ of Prohibition; at the same meeting, Me Demers deposited with the Board a letter to this effect and the meeting was adjourned to the 16th of April.

On the 10th of April, Miss Marsan, stenographer, made a report to Mr. M. M. Maclean of the meeting of the 9th.

On the 10th of April, 1948, a letter was received by the president from Me A. Feiner that he objected to the postponement of the sittings and that he would also object to any other adjournments unless a petition be served upon the Board before the 16th instant.

During the sitting of the 16th of April, 1948, a petition for Writ of Prohibition was served upon the Board by the Company, petition returnable on the 21st of April, 1948. On the same date, a letter was addressed to the Department advising that a petition was served upon the Board, copy of which was enclosed in the letter.

The meeting for the 16th of April was postponed to the 23rd of April.

On the 23rd of April Mr. Andre Montpetit, of the Office of Brais, Montpetit and DeGrandpre, advised the Board that their legal firm would represent the Board before the Superior Court and the meeting was postponed to the 3rd of May, 1948.

On the 24th of April, 1948, a report was made by Miss J. Marsan to Mr. M. M. Maclean, Director of Industrial Relations, Ottawa.

On the 30th of April, 1948, Me Philippe Brais sent to the president a copy of judgment, rendered by Mr. Justice Smith, issuing the Writ of Prohibition.

On the 3rd of May, the arbitrators adjourned the sittings *sine die*, to await final judgment on the Writ of Prohibition.

On the 18th of June, 1948, a meeting was held to take cognizance of the Writ itself and communication of same was addressed to Me Philippe Brais.

On the 25th of June, a meeting was held to answer a letter of Me Brais asking the Board to file a declaration to the effect that the Board would not contest the Writ "s'en rapportant a justice" seeing that an Intervention had been presented on behalf of the Attorney General of Canada.

The meetings of the Board were suspended to the 13th of January, 1949.

On the 7th of December, 1948, a letter with a copy of judgment was received by the president of the Board, judgment declaring that the Company has desisted from the Writ of Prohibition.

On the 10th of December, 1948, letter with copy of judgment was sent to Mr. M. M. Maclean (Ottawa).

On the 13th of December, 1948, the President received instructions from Mr. Maclean to contact the parties interested and to convene a meeting of the Board.

On the 15th of December, 1948, a letter was sent to Me A. Feiner asking the latter to see the president and discuss the proceedings to be followed.

On the 21st of December, 1948, a letter was received by the president, asking him

to proceed with the Conciliation Board and a meeting was fixed for the 13th of January, 1949.

On the 13th of January, 1949, Me A. Feiner appeared before the Board declaring that the parties had arrived to an amicable settlement and that in consequence, there was no future need for arbitration.

On the 15th of January, 1949, the Board advised the president to prepare a report according to letter received on the 21st of December, 1948, from Mr. M. M. Maclean.

Seeing the Declaration made by Me Abraham Feiner, on the 13th of January, 1949, that there was no need for arbitration, the parties having arrived at an amicable settlement, the Board by these presents declares that the dispute between the parties has been settled and reports accordingly to the Hon. Minister of Labour.

Made and signed in Montreal, this 10th day of February, 1949.

(Sgd.) C. G. QUINLAN,
Nominee of the Company.

(Sgd.) ELPHEGE BEAUDOIN,
Nominee of the Union.

(Sgd.) C. E. GUERIN,
Chairman.

REPORT OF BOARD in dispute between

Canadian National (West Indies) Steamships, Limited, Canadian Pacific Steamships, Limited, and Canadian Seamen's Union.

To the Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR:

The Board of Conciliation and Investigation in this matter was appointed by you on December 1, 1948, and consisted of the following persons:—

John Kerry, K.C., nominated by the Union.

Theodore Meighen, K.C., nominated by the Shipowners.

The Hon. Mr. Justice J. O. Wilson, appointed by you as Chairman.

The Members of the Board have duly taken Oath and have conducted the proceedings according to law.

Sittings of the Board were held at Montreal in February, 1949.

On February 24, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between Canadian National (West Indies) Steamships, Limited, and Canadian Pacific Steamships, Limited, and the Canadian Seamen's Union (TLC), representing unlicensed personnel employed by the companies.

The Board was composed of the Hon. Mr. Justice J. O. Wilson, of the Supreme Court of British Columbia, Vancouver, Chairman, and Theodore Meighen, K.C., both of Montreal, appointed on the nomination of the companies and the union, respectively (L.G., Feb., 1949, p. 173).

The Board unanimously recommends that the parties to this dispute enter into an Agreement in the form attached hereto.

The same Board has already rendered a report on the dispute between the Canadian Seamen's Union and the Dry Cargo Ship-owners. The questions involved in this present dispute were largely the same as those considered in the Dry Cargo dispute, and the solution arrived at has been the same. Therefore, the Board has nothing to add to the remarks made in the previous report, which should be read with this report.

All of which is respectfully submitted.
Dated at Montreal, February 23, 1949.

(Sgd.) J. O. WILSON,
Chairman.

(Sgd.) JOHN KERRY,
Member.

(Sgd.) T. R. MEIGHEN,
Member.

The agreement referred to is in terms similar to that attached to the report of the Board in the dispute affecting the Dry Cargo vessels.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Research and Statistics Branch of the Department of Labour. These are obtained directly from the parties involved and from the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc. are summarized in separate articles following this.

Manufacturing

Vegetable Foods

PETERBOROUGH, ONT.—QUAKER OATS COMPANY OF CANADA LIMITED AND UNITED PACKINGHOUSE WORKERS OF AMERICA, FLOUR AND CEREAL MILL WORKERS DIVISION, LOCAL 293.

Agreement to be in effect from September 1, 1948, to August 31, 1950, and thereafter from year to year subject to notice, provided, however, that wage rates may be reopened during August, 1949, on request by either party to the other. This agreement is similar to the one previously in effect (L.G., Dec., 1947, p. 1799), with the following changes and additions.

A *maintenance of membership* clause has been added providing that an employee who, at the date of the agreement, was a member of the union in good standing, or who later becomes a member, shall maintain such membership during the term of the agreement, except that he may resign from membership in the union during the latter part of August in 1949, or 1950, without his employment being affected. *Vacation with pay* provisions now grant 2 weeks to employees after 4 years' continuous service with the company, instead of after 5 years as formerly.

Hourly wage rates effective August 29, 1948, certain female classifications (including increases of 12 cents per hour May 2, 1948, and 7 cents per hour August 29, 1948, for females): package department—starting rate 70 cents increased to 71½ cents after 4 weeks, blockers 71½ to 81 cents, packers 71½

A "Guaranteed Work Plan" is part of the agreement between the Quaker Oats Company of Canada Limited and the United Packinghouse Workers of America, Flour and Cereal Mill Workers Division and is included in the summary of this agreement given below.

to 74½ cents; shipping department—starting rate 70 cents, increased to 77 cents after 2 weeks and to 83 cents 4 weeks later and to 85 cents after approval; bag factory—starting rate 70 cents increased to 71½ cents after 4 weeks and to 74½ cents after approval. Minimum hourly wage rates for certain male classifications (including increases of 8 cents May 2, 1948, and 7 cents August 29, 1948, for males): package department—mechanics \$1.08 to \$1.19½, others 96 cents to \$1.02½ (excluding floor leaders); shipping department—starting rate 85 cents increased to 89 cents after 2 weeks and to 96 cents 4 weeks later, others 98 cents to \$1.05; bag factory—engraver \$1.17½, pressmen \$1 to \$1.05, baling press and cutting machine 96 to 98 cents; feed department—96 cents to \$1.05 (excluding leader); boiler room and pipe shop—engineers (second and third class) \$1.01 to \$1.19½, pipefitters \$1.02½ to \$1.10, helpers 96 cents to \$1; electrical department—electricians \$1.08 to \$1.10½, power house operators \$1.19½; repair department—millwrights, machinists, tinsmiths, welders \$1.19½, carpenters, painters and blacksmiths \$1.08 to \$1.19½, helpers 96 cents to \$1.02½; elevator—blenders and sweepers 96 cents, weighmen, shovellers and distributors \$1 to \$1.05; cereal departments—98 cents to \$1.08; paste goods department—98 cents to \$1; flour mill—bolters \$1.07, purifiers, wheat cleaners, corn mill \$1.02, oilers 99 cents, sweepers and helpers 96 cents.

The "guaranteed work plan", and the "wage bonus plan" are continued.

The guaranteed work plan provides that employees on an hourly or piecework basis who have 6 months' service within a 12-month period shall be entitled to the benefits of the plan which guarantees them, while they are on the payroll, 150 hours of work

in each month for which they will be paid their full hourly or base rate. This is approximately 80 per cent of the present base time of 44 hours per week. In case qualified employees are laid off they will be paid for one-half the guaranteed time or 75 hours per month, at their full hourly or base rate for 2 months if accumulated service is 6 months to less than one year, 3 months if service is one to 2 years, 4 months if service is 2 to 3 years and 6 months if accumulated service is 3 years or over. This plan shall be continued during the life of the agreement, except that in the event of failure to operate the plant or any department thereof due to a work stoppage, it shall be suspended during the period of such stoppage.

Wood Products

VANCOUVER, B.C.—HUNTING MERRITT SHINGLE DIVISION OF CANADIAN FOREST PRODUCTS LIMITED AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, SHINGLE WEAVERS, LOCAL 2802.

Agreement to be in effect from July 15, 1948, to July 15, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. *Check-off*: the company will honour authorization of wage deductions by employees and remit same to the union at least once a month until such authorization is revoked.

Hours of work: 8 per day, 5 days a week, a 40-hour week; provided the company will have the right to operate 44 hours per week with time and one-half over 40 hours. If a statutory holiday occurs during the work week, the employees shall not be required to work on Saturday or Sunday for the time lost except at overtime rates or by mutual consent. If, however, 4 or more hours in any one day are lost during the working week because of fire, floods, rain or any other unforeseen circumstances, this time may be made up on the following Saturday at straight time, provided the work week does not exceed 40 hours. *Overtime* at time and one-half will also be paid for work on any of 7 specified holidays. *Vacations with pay* will be granted in accordance with the provisions of the Annual Holidays Act of the Province and any amendments thereto. In addition employees with 5 or more years' continuous service with the company will receive an extra week or pay in lieu thereof.

Hourly wage rates: the present scale of wages shall be increased by 13 cents per hour or 11 per cent, whichever shall be the greater; contract workers will receive increases of 5 cents per square to shingle sawyers and 4 cents per square to shingle packers. The rates for certain classes of hourly paid employees are—block pilers \$1.12½, second boommen, boom and slipmen \$1.17½, sawyers \$1.20½ to \$1.33, shift engineers \$1.44, electricians \$1.36, firemen \$1.10½ to \$1.15½, flers \$1.47½, tallymen and loaders \$1.15½, loaders \$1.12½, labelling press and helpers \$1.08, machine men \$1.25½, carpenters \$1.53, mill sawyers \$1.75½. A *night shift differential* of 6 cents per hour is paid workers on second and third shifts.

Provision is made for *seniority rights* and *grievance procedure*.

Metal Products

MONTREAL, P.Q.—METALCRAFT MANUFACTURING COMPANY AND CRAFT-O-ART LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 528.

Agreement to be in effect from June 30, 1948, to June 30, 1949. The company recognizes the union as the sole and exclusive bargaining agency for all eligible employees. *Check-off*: the company agrees upon written authorization from employees to deduct union dues monthly from their pay for the duration of the agreement and to remit same to the union. *Hours of work*: 9 per day Monday through Friday, a 45-hour week. *Overtime*: time and one-half for first 4 hours worked in excess of 9 on all regular work days and for the first 4 hours on Saturday, double time thereafter and for all work on Sundays and 5 specified holidays. *Rest and wash-up periods*: a 10-minute rest period during each half shift and a 5-minute wash-up period at the end of each half shift shall be in force for all employees covered by the agreement. *Vacation with pay*: one week to employees with one year's service, 2 weeks to employees with 5 or more years' service. Employees with 2, 3 and 4 years' service receive one week plus a day with pay of 2½ per cent of year's earnings, one week plus 2½ days with 3 per cent pay and one week plus 4 days with 3½ per cent pay respectively. Employees with less than one year of service receive one-half day for each month of service with the company with pay of 2 per cent of total earnings during time worked.

Hourly wage rates are increased 8 cents per hour and the minimum for the following classifications during the agreement shall be: assembly, shipping, plating, grinding, casting, wiring and paint shop 65 cents; buffing, polishing, press room and machine shop 70 cents; marble workers 75 cents; spinning 80 cents. The minimum rate for unskilled employees shall be 50 cents with automatic increases of 5 cents per hour after 2, 6 and 9 months respectively. Boys under 18 years of age and female employees may be hired at 40 cents with the same automatic increases that apply to adult males. The number of boys and female employees that may be employed at one time is limited.

Provision is made for *seniority rights* and *grievance procedure*.

DELORA, ONT.—DELORA SMELTING AND REFINING COMPANY LIMITED AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 889.

Agreement to be in effect from September 1, 1948, to August 31, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the certified collective bargaining agency for all eligible employees. *Check-off*: the company agrees to deduct union dues and assessments monthly from the pay of employees who so authorize and to remit same to the union during the term of the agreement or until such authority is cancelled.

Hours of work: 8 per day, a 44-hour week (for continuous shift operations, an arrangement of 40, 44 and 48 hour weeks may be made if mutually satisfactory to company and union). *Overtime* at time and one-half shall be paid for work required in excess of standard work day or work week. Four

specified holidays are *paid holidays* for employees who work their regular shifts immediately preceding and following the holiday. Employees required to work on any of these holidays shall receive their regular hourly rate in addition to the foregoing. *Vacation with pay*: one week for employees with one year's service, employees with 5 years' service receive an additional day and pay equal to 2½ per cent of previous year's earnings, after 6 years' service an additional 2 days and pay equal to 2½ per cent of previous year's earnings and so on till after 10 years' service when employees receive 2 weeks with pay equal to 4 per cent of previous year's earnings.

Wage rates: all hourly wage rates within the bargaining unit in effect as of August 31, 1948, shall be increased 15 cents per hour as of September 1, 1948.

Provision is made for *seniority rights* and *grievance procedure*.

TORONTO, ONT.—ALUMINUM GOODS LIMITED (TORONTO WORKS) AND UNITED STEELWORKERS OF AMERICA, LOCAL 2858.

Agreement to be in effect from December 9, 1948, to December 8, 1949, and thereafter from year to year subject to notice. This agreement is similar to the one previously in effect (L.G., Nov., 1947, p. 1658) with the following changes and additions. *Check-off*: the company agrees to deduct union dues monthly from the pay of employees who so authorize and to remit same to the union. The employee may revoke this authorization at any time. *Hourly wage rates*, effective November 26, 1948: minimum rate for men 83 cents, for women 65½ cents. It is understood that the rate for new employees shall reach 88 cents for men and 71½ cents for women within 6 weeks or their employment will be terminated. Minimum and maximum rates for certain experienced classes in the various departments follow:—Alumilite—operator "A" \$1.00½ and \$1.08, operator "B" 88 cents and \$1.00½; Die Casting—machine operators 88 cents to \$1.08 and 93 cents to \$1.18, trimmers 88 and 93 cents; Holloware—press operators 93 and 98 cents, machine operators 83 to 98 cents, tool-setters \$1.03 to \$1.08 and \$1.08 to \$1.13; welders 93 cents to \$1.03 and \$1.03 to \$1.13; Job Shop—sheet metal workers \$1.10½ to \$1.20½ and \$1.15½ to \$1.30½; Machine Shop—machinists 98 cents to \$1.15½ and \$1.15½ to \$1.20½; toolmakers \$1.18 to \$1.28 and \$1.28 to \$1.43; Maintenance—plumbers, electricians 93 cents to \$1.08 and \$1.08 to \$1.28, carpenters 93 cents to \$1.08 and \$1.08 to \$1.18; apprentices 70½ cents and \$1.05½; Service—blacksmiths \$1.03 and \$1.13; Shipping—packers 88 to 93 cents and 93 to 98 cents. Inexperienced job rates for women and youths—(minimum and maximum) improves 77 to 93 cents and 83 cents to \$1.03; beginners 71½ to 74 cents and 77 to 85½ cents. Supervisors receive a premium of from 5 to 12½ cents, depending upon the number of employees supervised, on top of the rate supervised. A *shift premium* of 5 cents per hour will be paid for all hours worked between 7 p.m. and 7 a.m. which is not subject to further increase because of overtime or other provisions.

OWEN SOUND, ONT.—EMPIRE STOVE AND FURNACE COMPANY AND UNITED STEELWORKERS OF AMERICA, LOCAL 2863.

Agreement to be in effect from November 2, 1948, to July 7, 1949, and thereafter subject

to 30 days' notice. The company recognizes the union as the sole bargaining agency for all eligible employees. *Union shop*: all employees covered by the agreement shall be required to become members of the union 22 working days after the date of their hiring, but the provisions of the agreement shall not apply to any employee until he has been a member of the union for a further 22 working days. In consideration of the foregoing the union agrees to the use of the *union label* on any or all products sold by the company during the term of the agreement. *Check-off*: the company agrees to deduct union dues monthly from the pay of employees and to remit same to the union.

Hours of work: 9 per day Monday through Friday, a 45-hour week. *Overtime*: time and one-half for all hours worked in excess of regular daily and weekly hours; double time for all work on Sundays and 8 specified holidays, 4 of which are *paid holidays*. *Rest periods*: two 10-minute rest periods shall be observed, also a 5-minute wash-up period before each noon and evening quitting time. *Vacations with pay*: employees with one year's continuous service with the company shall receive one week with pay equal to 2 per cent of their earnings during previous year; employees with 5 or more years' continuous service with the company shall receive 2 weeks with pay equal to 4 per cent of their previous year's earnings.

Wage rates: present scale to continue for duration of agreement. *Off shift premium*: all employees working other than the regular day shift shall receive a premium of 10 cents per hour.

Provision is made for *seniority rights* and *grievance procedure*.

Shipbuilding

HALIFAX AND DARTMOUTH, N.S.—HALIFAX SHIPYARDS LIMITED AND INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS OF CANADA, LOCALS 1 AND 13.

Agreement to be in effect from November 1, 1948, to November 1, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. *Check-off*: the company agrees to deduct union dues weekly from the pay of employees who so authorize and to remit same to the union. This authorization is irrevocable during the term of the agreement. *Hours of work*: 8 per day Monday through Friday, 4 on Saturday, a 44-hour week; night shift work shall be 11 hours per night for which time and one-eighth will be paid for first 9 hours and overtime rate of time and one-half for last 2 hours. This does not include firemen, compressor operators and others on a 24-hour continuous employment basis. *Overtime*: time and one-half for any work in excess of 15 minutes other than during regular working hours; double time for all work on Sundays and 9 specified holidays (if proclaimed by the Dominion Government). *Vacation with pay*: employees with 12 months' service with the company within a period of 2 years shall be entitled to one-half day for each 25 days worked, to be taken during the succeeding vacation period. Vacation pay will be calculated at the employee's hourly rate at the time the vacation is granted for the standard working week of 44 hours, or part thereof.

Hourly wage rates for certain classifications follow: hammersmith and heavy forger \$1.27, blacksmith, anglesmith, plater, ship-fitter, boilermaker, flanging press operator, flanger, riveter, chipper and caulker, sheet metal worker, shipwright, carpenter, wood caulker, ship rigger, machinist, electrician, pipefitter, steamfitter, plumber \$1.17; lay-out man, layer-out (boiler shop) \$1.22 to \$1.32; tank or boiler cleaner, boiler scaler, bolter-up, reamer and countersinker, 97 cents; slinger, hooker-on, signalman, locomotive brakeman, assembler, erector, plate hanger 92 cents to \$1.02; rivet tester \$1.22; copper-smith, patternmaker, tool maker \$1.17 to \$1.37; crane operator 97 cents to \$1.27; garage mechanic, garage man, portable welders and compressors \$1.12; fireman, boilerman, oiler, greaser 92 cents; labourer 82 cents; passer boy, loft boy, marker (under 18 years of age) 69 cents; learner or trainee, starting rate 69 cents, after 3 months 75 cents, after 6 months the established rate for his occupational classification if engaged in unskilled or semi-skilled work, or the minimum helper's apprentice or improver rate if engaged in work subject to helper apprenticeship or improvership plan; indentured apprentices in certain skilled trades starting rate 63 cents, after 1,000 hours 69 cents, and an additional increase of 6 cents per hour for each additional 1,000 hours till rate of 87 cents after 4,000 hours is reached and then an additional $7\frac{1}{2}$ cents per hour for each additional 1,000 hours till \$1.17 per hour after 8,000 hours is reached (these are increases of 4 cents per hour over the rates previously in effect). A chargehand supervising 15 or more workers will be paid 10 cents per hour over the hourly rate, a lead-hand supervising 5 to 14 workers 5 cents per hour over the hourly rate. Men performing exceptionally dirty work recognized in the industry as "Dirty Work" shall be paid time and one-quarter while so engaged.

Provision is made for an *apprenticeship plan, seniority rights and grievance procedure.*

Non-Metallic Minerals and Chemicals

TORONTO, ONT.—WILLARD STORAGE BATTERY COMPANY OF CANADA, LTD. AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 512.

Agreement to be in effect from June 8, 1948, to June 17, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. **Check-off:** the company agrees to deduct union dues monthly from the pay of employees who so authorize and to remit same to the union. This authorization may only be cancelled by an employee within a period of 15 days prior to the anniversary date of the agreement.

Hours of work: 8 per day Monday through Friday, a 40-hour week. **Overtime:** time and one-half for work in excess of the regular hours, also for time worked on Saturday if employee has worked the full week (except in both cases for fixed shift jobs). Eight specified holidays are *paid holidays* for all hourly rated employees who work their scheduled shifts immediately preceding and following the holiday. Employees working any of these holidays shall receive their regular hourly rate for the time worked in

addition to the foregoing allowance. **Rest periods** of 10 minutes will continue for the departments in which they are in force providing that the time limit is observed. **Vacation with pay:** one week to employees with one year's service, 2 weeks to employees with 5 or more years' continuous service and 3 weeks to employees with 20 or more years' continuous service with the company. Employees with 90 days' service but less than one year shall receive a day for each 2 months' service.

Hourly wage rates for a new employee shall commence at the minimum starting rate of 87 cents. This rate shall be increased automatically to 92 cents per hour after 4 weeks and to 94 cents at the end of 12 weeks or the minimum rate of the classification to which he may have been assigned if capable of performing fully the duties of the job. Minimum and maximum rates for certain classifications follow: oxide mill—mill operators \$1.13 to \$1.23 (maximum rates), learners 99 cents to \$1.09; moulding grids—machine operators \$1.15 to \$1.21, pot tenders 89 cents to \$1.04, hand moulders \$1.01 to \$1.11, others, including learners 89 cents to \$1.13; plate finishing—saw operators 99 cents to \$1.09, others 94 cents to \$1.06; shipping—shippers 89 cents to \$1.11; receiving—receivers 89 cents to \$1.09; Maintenance—machinists \$1.03 to \$1.39, electricians \$1.23 to \$1.39, millwrights 99 cents to \$1.23; power plant—stationary engineers (third and fourth class) \$1.04 to \$1.19; general labourers 89 to 99 cents. Youths regularly employed on certain light work are exceptions to the above rates and their range shall be 76 to 94 cents. **A night shift bonus** of 5 cents per hour will be paid to all employees on second and third shifts (shifts starting after 2 p.m. or before 5 a.m.). A respirator must be worn by employees on certain operations at certain times for which the company pays a bonus of 3 cents per hour during the time a respirator is worn as instructed.

Provision is made for *seniority rights and grievance procedure.*

TORONTO, ONT.—THE IMPERIAL VARNISH AND COLOUR COMPANY LTD. AND THE INTERNATIONAL CHEMICAL WORKERS' UNION, LOCAL 166.

Agreement to be in effect from September 1, 1948, to August 31, 1949, and for a further 12 months' period unless at least 60 days' notice is given by either party. The company recognizes the union as the sole collective bargaining agency for all eligible employees. **Check-off:** the company agrees to deduct union dues monthly and initiation fees from the pay of employees who so authorize and to remit same to the union.

Hours of work: 8 $\frac{3}{4}$ per day Monday through Friday, a 43 $\frac{3}{4}$ -hour week for males; 8 per day Monday through Friday, a 40-hour week for females. **Overtime:** time and one-half for work in excess of the regular daily or weekly hours and for all work on Saturdays and Sundays (except as part of regular shift for firemen, watchmen, etc.) and on any of 8 specified holidays which are *paid holidays* for employees with 12 continuous months of service. **Vacation with pay:** employees with 12 months' service shall receive 2 weeks with two weeks' pay, the second week's pay being subject to deductions for poor attendance; employees with less than 12 months' service may take up to 2 weeks without pay;

employees with 25 or more years of service receive 2 weeks with pay regardless of their attendance records.

Hourly wage rate ranges for certain classes: Dry colour—operators 92 cents to \$1.12; Varnish—operators 93 cents to \$1.13 (excluding leader), helpers 88 to 90 cents; Lacquer—operators 92 cents to \$1.11, helpers 91 to 94 cents; Paint—operators 88 cents to \$1.17, helpers 87 cents to 89 cents; Shipping—operators 90 to 98 cents, helpers 88 to 90 cents; Maintenance—firemen, carpenters \$1 to \$1.09, pipefitters, electricians, millwrights \$1.04 to \$1.15, machinists \$1.04 to \$1.16, oilers and helpers 96 cents to \$1.03; youths (over 18 years) 73 to 86 cents; (under 18 years) 67 to 80 cents; females 64 to 76 cents. *A night shift premium* of 5 cents will be paid for every full hour worked on shift between 5 p.m. and 7 a.m. each day with certain exceptions.

Provision is made for *seniority rights* and *grievance procedure*.

Transportation and Public Utilities

Electric Railways and Local Bus Lines

OTTAWA, ONT.—OTTAWA TRANSPORTATION COMMISSION AND AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, DIVISION No. 279.

Agreement to be in effect from January 1, 1949, to December 31, 1949, and thereafter from year to year subject to notice. This agreement is similar to the one previously in effect between the Ottawa Electric Railway Company (predecessor of the above company) and the above union (L.G., Feb., 1947, p. 184) with the following changes—*Statutory holidays* are increased from 7 to 8 on which employees receive time and one-quarter for work performed. *Vacations with pay* regulations are changed to one week for employees after one year's service of at least 2,000 hours (formerly 1,800 hours, however 6-hour shift will count as 8 hours for qualifying purposes) and an additional day for each additional year of service up to 10 days after 5 years' service. *Hourly wage rates* have been increased (a cost-of-living bonus of 8 cents per hour from January 1, 1948, to March 31, 1948, and 10 cents per hour from April 1, 1948, to August 12, 1948, was paid, also an additional 4 cents per hour from August 13, 1948, and a further 6 cents per hour from January 1, 1949), so that the rates for certain classes now are as follows:

operators \$1 (first 18 months 90 to 98 cents), linemen (first to fourth class) 92 cents to \$1.02, groundmen 86 to 90 cents, trackmen 86 to 89½ cents, labourers 66 to 85 cents, truck drivers, switchmen 85 to 89½ cents, motor mechanics, body mechanics and automotive electricians 96 cents to \$1.08, blacksmiths 95 cents to \$1.04, carpenters 91 cents to \$1.04, machinists 96 cents to \$1.10, painters 91 to 99 cents, shop hands 88 to 96 cents, electricians and armature winders 91 cents to \$1.01, cleaners 85 cents, tradesmen's helpers 66 to 88 cents. There is also a provision in the agreement for a cost-of-living bonus of 2 cents for each 3 points that the index rises above 166.6.

Water Transportation

HALIFAX, N.S.—CERTAIN STEAMSHIP AND STEVEDORING COMPANIES AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 269 (GENERAL LONGSHOREMEN).

Agreement to be in effect from December 1, 1948, to November 30, 1949, and thereafter from year to year subject to 30 days' notice. This agreement is similar to the one previously in effect (L.G., April, 1948, p. 328) with the following changes—*Minimum wages per hour*: \$1.33 for day work, \$1.53 for evening work and \$2 for late night work, increases of 13 cents, 13 cents and 20 cents per hour respectively over the rates previously in effect.

ST. JOHN, N.B.—VARIOUS STEAMSHIP COMPANIES AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 273 (GENERAL LONGSHOREMEN).

Agreement covering the discharging and loading of deep sea vessels, to be in effect from December 1, 1948, to November 30, 1949, and thereafter from year to year subject to 60 days' notice. This agreement is similar to the ones previously in effect (L.G., April, 1948, p. 329, and Aug., 1946, p. 1091) with the following changes—*hourly wage rates*: day—general cargo \$1.38, bulk cargo \$1.48; night—general cargo \$1.48, bulk cargo \$1.58; increases of 13 cents per hour throughout over the previous rates. The rate for handling ammonium nitrate fertilizer shall be \$1.68 per hour for day work and \$1.78 per hour for night work. *Overtime*: double time shall be paid for work on Saturdays between 1 p.m. and 11 p.m. between May and December inclusive and time and one-half for these hours during January to April inclusive.

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the extension of one new agreement, the correction of 2 other agreements, and the amendment of 5 agreements. These include the correction of the agreement for the building materials industry for the province and the amendment of the agreement for barbers

and hairdressers at Sherbrooke in the *Quebec Official Gazette* of January 22, the extension of a new agreement for retail and wholesale commercial establishments at Roberval and the correction of the agreement for the men's and boys' hat and cap industry for the province in the issue of February 5, the amendment of the agreements for barbers and hairdressers at Mont-

* See footnote p. 450.

real and at Sherbrooke, for the furniture industry for the province and for clockmakers in the eastern townships in the issue of February 12. The amendment of the agreement for the men's and boys' clothing industry for the province is summarized below.

A request for the amendment of the agreement for the dress manufacturing industry for the province was gazetted January 22. A request for the amendment of the agreement for funeral undertakers at Montreal was gazetted January 29. Requests for the amendment of the agreements for garage and service station employees and for clockmakers, both at Montreal, for retail stores at Quebec and for the work glove industry for the province were all published February 5. Requests for the amendment of the agreements for the millinery industry, for the tanning industry and for the fine glove industry for the province and for ladies' hairdressers at Montreal were published February 19.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing

Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated January 12, and gazetted January 22, amends the previous Orders in Council for this industry (L.G., Aug., 1946, p. 1093; Aug., 1947, p. 1174, Sept., p. 1306, Oct., p. 1474, and previous issues) Agreement to remain in effect until July 1, 1949, and thereafter from year to year, subject to notice.

Statutory holidays: all employees with 3 months' continuous employment shall be granted 5 specified statutory holidays with pay, with the following exceptions—if an employer has entered into a collective labour agreement with a union representing his employees whereby an alternative arrangement (subject to investigation and examination by the Joint Committee or its duly authorized representatives) is given for the payment of statutory holidays (regardless of what statutory holidays are observed), providing for payment in lieu of holidays of a minimum sum equivalent to not less than 5 days' pay at regular rates, then such employer shall not be bound to pay the statutory holidays specified herein; employers or firms, members of the Quebec Association of Garment Manufacturers Inc., having contractual relations with individual unions, members of "La Fédération Nationale des Travailleurs de l'Industrie du Vêtement, Inc." shall not be bound to pay the fore-

mentioned statutory holidays occurring prior to July 1, 1949, under terms provided for in their agreements as to said holidays, subject to investigation and examination by the Joint Committee or its duly authorized representatives; employers manufacturing children's sportswear and children's clothing, and girls' clothing up to 14 years inclusive.

Cost-of-living bonus: effective November 27, 1948, all employers shall pay to their employees a cost-of-living bonus of 15 cents per hour, with the following exceptions—employers in the odd pants and sportswear industry producing, in an amount exceeding 25 per cent of their total production, garments not covered by this agreement, shall pay to their employees a cost-of-living bonus of 12½ cents per hour; employers manufacturing children's sportswear and children's clothing, and girls' clothing (up to 14 years inclusive) shall pay a bonus of 10 cents per hour; any employer who, by virtue of a collective labour agreement with the union representing his employees, has agreed to give a second week's vacation with pay to all his employees with 13 weeks' but less than 2 years' service, may continue to pay a cost-of-living bonus of 7½ cents per hour to beginners who have had no previous experience in this industry until they have completed 13 weeks of employment after which they shall be paid the full bonus of 15 cents per hour; employers who have obtained, before November 27, 1948, for the National Defence Department, contracts for the manufacturing of uniforms shall be required to pay a total bonus of only 11½ cents per hour until the said contracts are completed. These bonuses are not to apply in the case of overtime rates. All general bonuses given in lieu of the present cost-of-living bonus, prior to November 27, 1948, in an amount equal to the bonus provided for in the present amendment, shall be considered as payment of the extra bonus.

Vacation with pay: all employees shall be granted one week with pay equivalent to 12 per cent of total earnings during the 12 months preceding June 30; 2 weeks with pay to all employees with 2 years' continuous service, except those working in the manufacture of children's sportswear and children's clothing, and girls' clothing up to 14 years inclusive.

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

Recent proceedings under the Industrial Standards Acts, Etc.* include: in Ontario, a new schedule for the barbering industry in the Sarnia-Point Edward zone, published in *The Ontario Gazette* of January 22; in Alberta, a correction of the schedule for the radio service industry at Calgary, published in *The Alberta Gazette* of January 31. Other Orders in Council making schedules binding or revoking schedules are summarized below.

ONTARIO

Manufacturing

Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF ONTARIO.

An Order in Council, dated January 5, and gazetted January 22, amends the previous Orders in Council for this industry (L.G., May, 1939, p. 530; Dec., 1946, p. 1775).

Minimum wage rates: effective February 1, 1949, in the counties of Halton, Ontario, Peel, Wentworth and York, minimum hourly wage rates for employees other than those working on odd pants only are increased by 15 cents per hour for all classes; employees working only on odd pants receive an increase of 10 cents per hour. The minimum wage rates for the remaining part of the province of Ontario are 12½ per cent lower than the rates paid in the counties mentioned above.

* In six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, December, 1948, page 1422.

Overtime: minimum wage rates for overtime work are one and one-half times the minimum rates previously in effect for work performed during regular working hours (L.G., Dec., 1946, p. 1775).

Construction

CARPENTERS, OSHAWA AND WHITBY.

An Order in Council, dated December 23, and gazetted January 22, makes binding the terms of a new schedule for carpenters in the Oshawa-Whitby zone, to be in effect from February 1, 1949, during pleasure. It replaces the schedule previously in effect (L.G., June, 1947, p. 827).

Hours which were previously set at 40 per week are now 45 per week between April 15 and November 15 inclusive, and 40 per week during the rest of the year.

Overtime performed during a 3-hour period immediately following the regular working-day is payable at time and one-half; work performed at night, which cannot be performed during the day, is payable at the regular rate for the first 8 hours only; all other overtime work including work on Saturdays, Sundays and 7 specified holidays is payable at double time.

Minimum wage rate is increased from \$1.20 to \$1.30 per hour. The advisory committee may fix a special lower minimum rate for handicapped workers.

SASKATCHEWAN

Manufacturing

Vegetable Products

BAKERS, REGINA.

An Order in Council, dated January 11, and gazetted January 22, amends the previous Order in Council for this industry (L.G., Oct., 1948, p. 1130), by the addition to the wage schedule of the following from January 15, 1949: utility man (first class) with a minimum wage rate ranging from \$34 to \$37 per week and utility man (second class) from \$29 to \$32 per week.

Manufacturing

Fur and Leather Products

SHOE REPAIRERS, SASKATOON.

An Order in Council, dated January 7, and gazetted January 15, rescinds the Order in Council making this schedule binding (L.G., Aug., 1941, p. 1014).

Manufacturing

Metal Products

JEWELLERY INDUSTRY, SASKATOON.

An Order in Council, dated January 7, and gazetted January 15, rescinds the Order in Council making this schedule binding (L.G., Jan., 1940, p. 71).

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During January

(1) *Works of Construction, Remodelling, Repair or Demolition*

During the month of January the Department of Labour prepared 74 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 65 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum rates only*" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

| Department | No. of contracts | Aggregate amount |
|---|---------------------|---------------------|
| Canadian Commercial Corporation. | 4,877 | \$10,081,137.00 |
| Post Office. | 6 | 16,253.01 |
| R.C.M.P. | 3 | 38,502.40 |

*The labour conditions of these contracts contain the General Fair Wages clause providing for the observance of current or fair and reasonable rates of wages and hours of labour, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.

LABOUR LAW

Recent Regulations Under Provincial Legislation

Women workers in all occupations covered by the British Columbia Minimum Wage Act must now be granted a 30-minute rest-period after five consecutive hours of work, but if a rest-pause of 10 minutes or more is allowed during such period, work may be carried on for six consecutive hours after which there must be one-half hour free from duty. ¶Regulations under the British Columbia Metalliferous Mines Regulation Act enable the Department of Mines to issue permits to operators of quarries authorizing them to employ their workmen for a maximum of 10 hours in any 24. ¶In Saskatchewan, the regulations governing the payment of mothers' allowances have been revised.

British Columbia Female Minimum Wage Act

Rest Periods for Women Workers

For the first time, rest periods must be given to all female employees in every industry, business, trade or occupation in the Province except farming, fruit picking and domestic service, by Order 11, made on February 16, gazetted February 24 and effective March 28.

After not more than five consecutive hours of work, women workers must be allowed at least one-half hour free from duty, but if a 10-minute rest-pause is given during the five-hour period the half-hour rest need not be granted until after a six-hour spell of work.

British Columbia Hospital Insurance Act

Minor amendments in the regulations under the Hospital Insurance Act (L.G., 1948, p. 1436), made on January 21, and gazetted January 27, remove from the list of dependants of the head of a family a child under 21 who is in his custody and under his control and wholly dependent on him for support. Henceforth, therefore, as regards children, only those under 16 will be counted as dependants, with two exceptions: a child of 16 or over who is mentally or physically incapacitated and one under 21 who is a student at an educational institution.

A change is made in wording with regard to registration. It is now provided that every person, instead of every person liable to pay a premium under the Act, must register himself and his dependants on the

form and within the time prescribed. These amendments are effective from January 1.

British Columbia Hours of Work Act

Shops

A new Regulation (29A) replaces Regulation 29 which has been in effect for some years (L.G., 1939, p. 1231) and which permitted employees in wholesale and retail stores in all centres in the Province outside of Vancouver, Burnaby, Victoria, Esquimalt, Oak Bay and Saanich to work three additional hours on a Saturday and on the day preceding a statutory holiday occurring on Saturday, provided the maximum weekly hours were not exceeded.

The principal change in the new Order which was made on February 16, and gazetted on February 24 and will take effect from February 28 is that the city of New Westminster has been added to the list of places to which the Order does not apply.

British Columbia Metalliferous Mines Regulation Act

Hours of Work

Workers in quarry operations may work a maximum of 10 hours in any 24, if a permit authorized by the Minister of Mines has been obtained, by an Order in Council made on February 11, gazetted February 17, and effective from February 9.

The Act limits hours of employment above ground at or about mines, quarries or metallurgical works to eight in any 24, but enables the Lieutenant-Governor in Council, on the recommendation of the Minister of Mines, by regulation to substitute other provisions.

Without a permit, therefore, no employee in a quarry may work longer than eight hours. The permit, which is to be in the form prescribed in the regulations, stipulates that the hourly rate of pay of persons employed up to 10 hours daily must be based on and not less than the recognized local hourly rate for a normal eight-hour day, and that, where board is provided in addition to the daily wage, the value of the board must be added to the daily wage in computing the hourly rate.

Ontario Labour Relations Act

The rules of procedure made by the Ontario Labour Relations Board under the Labour Relations Act, 1948 (L.G., 1949, p. 186), were amended by O. Reg. 15/49 of January 20, gazetted February 12, to revise Form 15, which prescribes the form of Application for Certification by the Intervener.

Saskatchewan Social Aid Act

Revised Mother's Allowance and Dependent Children Regulations under the above Act were approved by Order in Council 127/49 on January 21, and gazetted February 5. Earlier regulations approved by Orders in Council 577/45 and 722/46 are rescinded (L.G., 1945, p. 916). No major changes were made regarding eligibility, and the maximum allowances payable are the same as before. These range from \$300 for a mother with one child to \$900 for a mother with 10 children. If the father is living with the family and the mother is not, the same schedule applies.

As regards conditions of eligibility, provision is now made for the payment of an allowance to a father who is incapacitated and living at home with the children if his wife is serving a sentence in a penal institution or has deserted the home. In the case of deserted wives, an allowance may be paid to a mother when the father has deserted the family for a period of not less than one year, and a conviction for non-support or a court order for support has been issued against the father. An allowance paid while the father is an inmate of a mental institution or sanatorium may be

continued after discharge for such further period as may be recommended by the Director of Medical Services of the Health Services Planning Commission.

Beginning September 1, 1949, an allowance is to be paid to the end of the school year in respect of a child who reaches his sixteenth birthday during the school year and continues to attend school. Until September 1, an allowance is to be continued if the Board approves.

If a guardian is appointed to receive an allowance on behalf of a child or children, the allowance payable must not exceed \$180 per year for the first child, \$120 for the second and \$60 for each additional child. In such cases, outside income is to be authorized by the Director of Social Aid but must not exceed \$300 a year. Under the earlier regulations, the same amounts were payable on behalf of the children but no annual outside income was allowed.

The maximum annual outside income permitted is, as before, \$540. To determine the maximum amount, the Social Welfare Board must take into account all sources of income including salary, wages, alimony or court orders for maintenance, income except family allowances, and the reasonable value of free board or room.

Instead of laying down detailed conditions covering cases where the mother is working and is forced to employ someone to look after the children, and regarding the amount that may be charged as income where revenue-producing property is owned, the new regulations are in more general terms. They permit the Board to authorize exemptions from income in cases where, in order to earn income, an applicant or recipient must make expenditures in the care of the home or management of a business or other sources of income. The Board may establish the value of shelter, lodging, board, room or other resources available to the applicant or recipient.

The net value of real and personal property which a parent or dependent child may have and be entitled to an allowance remains at \$5,000, but it is now provided that not more than \$1,000, rather than \$2,500, as previously, may be in cash, securities or other liquid assets.

Legal Decisions Affecting Labour

Labour Board's power to deal with wrongfully dismissed employees defined by B.C. Supreme Court

On August 24, 1948, the British Columbia Supreme Court made final a writ of prohibition, issued out of the same court on July

29, 1948, prohibiting The Labour Relations Board of British Columbia from proceeding under their Order to the F. W. Woolworth Co. Ltd. to "cease refusing to continue in employment" seven employees dismissed between March 9 and April 2 and to pay

such employees the wages lost by reason of their discharge. The Board had found that these employees were "illegally dismissed", under sec. 4 (2) a of the Industrial Conciliation and Arbitration Act, 1947, which provides that no employer shall discharge an employee because of union membership.

Under the 1948 amendment to the Act which did not have third reading until April 28, 1948 (several weeks after the dismissals), sec. 4, subsection (3) was added, providing that if an employer is guilty of "illegally discharging" an employee, he shall be bound to reinstate the employee with back wages. Mr. Justice Wood stated that for the purpose of the application it must be assumed, although it was not admitted by the company, that the discharges were illegal. He agreed, however, with the contention of the company that this amending section is not retroactive and therefore does not apply to the dismissals in question, which took place several weeks before the passing of the amendment.

On July 29, under sec. 6A, subsection (2) of the 1948 amendment to the Act, the Board ordered the company "to cease refusing to continue in employment" certain employees. However, the Court considered that although the employer "is bound to reinstate an employee and pay him back wages", nowhere in the Act is the Board itself given specific power to enforce this provision. Nor does the Court consider that the Board may indirectly enforce the required reinstatement by ordering the Company "to cease refusing to continue" to employ anybody. The employee must therefore obtain his remedy by some other method than by Order of the Board.

Thus, the Court concluded, that on the grounds of lack of jurisdiction the writ of prohibition should be made final against the Labour Board.

F. W. Woolworth Co. Ltd., and B.C. Labour Relations Board (1948), 2W.W.R. 826.

B.C. Court cannot consider Appeal concerning dismissal of store employees

On December 17, the British Columbia Court of Appeal dismissed the Crown appeal to restore a former conviction against the F. W. Woolworth Company Limited for violation of the provisions of the Industrial Conciliation and Arbitration Act 1947.

On June 4, the deputy police magistrate at Vancouver had convicted and fined the company \$250—the maximum penalty for violation of the Act. The charge was laid under Sec. 4 (2) a of the Act which reads:—

No employer, and no person acting on behalf of an employer shall: (a) Refuse to

employ or to continue to employ any person or discriminate against any person in regard to employment, or any condition of employment, because the person is a member or officer of a trade union or employees' organization.

However, in September, the conviction was quashed by the Vancouver County Court. Judge Lennox found as a fact that the Crown had failed to prove the offence, as charged.

The Crown then brought the case before the Court of Appeal to restore the conviction. Mr. Justice Sloan held that since the Court was being asked to define what was meant by "discrimination in regard to employment" and to determine if the conduct of the company toward its employees falls within the scope of this definition, the Court would be dealing with mixed questions of fact and law. Further, he pointed out that unless the Court weighed the evidence and reached their own conclusions of fact it would be unable to see how or if the lower court had erred. However, as Crown appeals are limited to law alone, the Court was of the opinion that it had no jurisdiction to entertain the appeal.

Rez v. F. W. Woolworth Co. Ltd. (1948). *W.W.R.I.*, 176.

Saskatchewan Appeal Court awards compensation to deceased workmen's parents as "partial dependents"

Even though a "member of a workman's family", within the meaning of the Saskatchewan Workmen's Compensation Act, has been able to maintain himself and family in his position in life without the assistance given by the deceased workman, he is nevertheless, a "dependent" within the meaning of that Act, if the cessation of the deceased's earnings has caused him actual pecuniary loss. This was the decision handed down by the Saskatchewan Court of Appeal on November 19, 1948, in consequence of which Chief Justice Martin awarded the parents of the deceased workman \$1,500. The case was tried on appeal from the judgment of Mr. Justice Smith of the District Court who had dismissed the action with costs.

The deceased workman, Joseph Malec, employed by the Canadian National Railways as a switchman was killed on November 24, 1946, in the course of his employment, as a result of a collision between two CNR trains. The action was brought by the mother and father of the deceased workman to recover compensation as partial dependents upon the earnings of the deceased at the time of his death.

Chief Justice Martin, in giving judgment, reviewed the evidence to show that the father of the workman could well support himself and his family without the assistance he had received from the deceased workman. The financial position of the claimant, however, was not a matter which could properly be regarded. In *Howells v. Vivian* (1903) it was held that the fact that a father can maintain himself and family without the assistance of the son's earnings does not mean that the father may not be a dependent.

Chief Justice Martin was of the opinion that the test laid down by the House of Lords in the decision in *Main Colliery Co. v. Davis* (1900) was the only one which could properly be regarded in determining whether or not the claimant was a dependent of the deceased workman and that test is "what the family was in fact earning, what the family was in fact spending, for the purpose of its maintenance as a family". It, therefore, followed that a decrease in family funds arising from the death of a workman which resulted in pecuniary loss to the survivors was evidence sufficient to support a claim for compensation founded on partial dependency.

It was established at the hearing that the workman, Joseph Malec, had assigned part of his pay to his mother while he was in the air force and since his discharge had been paying her \$40 per month board as well as giving her several gifts and opening a joint bank account with her. There was also evidence that the deceased had intended to purchase a farm for his father.

The Chief Justice accepted this evidence as proof of the desire of the workman to assist his parents and stated: "I have no doubt that in the present case the claimant suffered actual pecuniary loss as a result of the cessation of the workman's earnings". He pointed out that the exact loss could not be ascertained and that all the court could do was to fix what it considered to be a reasonable compensation for the pecuniary loss suffered by the dependents.

Malec and Malec v. Canadian National Railways, W.W.R., 1948, v. 2, p. 1069.

U.S. Supreme Court Upholds State Ban on Closed Shop

The Supreme Court of the United States, in a decision handed down on January 3, 1949, upheld the laws of three states, Arizona, Nebraska and North Carolina, banning the closed shop. The judgment confirms decisions of the Supreme Courts of the three states.

Mr. Justice Black, who delivered the opinion of the Court, dealt with the Nebraska and North Carolina cases together.

In the Nebraska case an employee of the Northwestern Iron and Metal Co., at Lincoln, refused to pay union dues and lost his union membership. The union demanded his dismissal but the company refused and the union then sued the company.

In the North Carolina case a fine of \$50 had been imposed on an Ashville contractor and six officers and members of AFL local unions who had signed a collective agreement limiting employment to union men.

A North Carolina statute and a Nebraska constitutional amendment provide that no person in those states shall be denied an opportunity to obtain or retain employment because he is or is not a member of a labour organization. Employers are therefore forbidden to enter into contracts or agreements obligating themselves to exclude persons from employment because they are or are not union members.

These state laws had been challenged on the grounds that they violated the right of freedom of speech, of assembly and of petition guaranteed to unions and their members under the United States Constitution, and that they deprived appellant unions and employers of equal protection and due process of law.

Mr. Justice Black considered it unnecessary to give the numerous reasons for rejecting the contention that these laws abridge freedom of speech, assembly and petition. He declared that

There cannot be wrung from a constitutional right of workers to assemble to discuss improvement of their own working standards, a further constitutional right to drive from remunerative employment all other persons who will not or cannot participate in union assemblies.

The Court then dealt with the contention that unions and their members were denied protection equal to that given employers and non-union workers. Because the outlawed contracts were an incentive to the growth of union membership it was said that the laws weakened the bargaining power of unions and correspondingly strengthened the power of employers. The Court considered that this might be true, but pointed out that the laws also made it impossible for an employer to make contracts with company unions which obligate the employer to refuse to employ members of other unions. They therefore protected the employment opportunities of members of independent unions and this alone was

sufficient to refute the charge that they deny equal protection to unions as against employers and non-union workers.

As to the contention that the laws do not give equal protection to union and non-union workers the Court pointed out that in identical language they forbid employers to discriminate against union and non-union members.

Mr. Justice Black then dealt with the claim that this legislation deprived the appellants of their liberty without due process of law, in violation of the United States Constitution, and was designed to deprive all persons within the two states of liberty to refuse to hire or retain any person in employment because he is or is not a union member, and to make a contract or agreement to engage in such employment discrimination against union or non-union members. He considered the decisive question under this contention to be:—

Does the Due Process clause forbid a state to pass laws clearly designed to safeguard the opportunity of non-union members to get and hold jobs, free from discrimination against them because they are non-union workers?

Referring to decisions of the Supreme Court in the early years of the century, declaring unconstitutional state laws which outlawed "yellow dog" contracts, provided for minimum wages, and regulated business activities, Mr. Justice Black stated that in later years the Court had steadily rejected the Due Process philosophy enunciated in this line of cases and returned

to the earlier constitutional principle that states have power to legislate against what are found to be injurious practices in their internal commercial and business affairs, so long as their laws do not run afoul of some specific Federal constitutional prohibition, or of some valid Federal law. Under this constitutional doctrine the Due Process clause is no longer to be so broadly construed that the Congress and state legislatures are put in a strait jacket when they attempt to suppress business and industrial conditions which they regard as offensive to the public welfare. . . .

Just as we have held that the Due Process clause erects no obstacle to block legislative protection of union members, we now hold that legislative protection can be afforded non-union workers.

In the Arizona case the unions sought injunctions requiring the American Sash and Door Co. and other employers to carry out the provisions of closed shop contracts.

In delivering the opinion of the Court in this case Mr. Justice Black referred to his opinion in the Nebraska and North Carolina cases stating that for reasons given in these cases the Court rejected the appellant's con-

tentions that the Arizona amendment denies them freedom of speech, assembly or petition, impairs the obligation of their contracts or deprives them of due process of law. But the Arizona amendment provides that no person may be denied the opportunity to obtain or retain employment because of non-membership in a union and forbids employers to enter into agreements excluding any person from employment because of non-membership in a union. It was argued that failure to provide the same protection for union as for non-union workers denied unions and their members equal protection of the laws. But although the Arizona amendment does not expressly prohibit discrimination against union workers Arizona had, prior to the passing of the amendment, made it a misdemeanor to coerce a worker to make a contract not to join or become a member of a labour organization as a condition of obtaining or keeping employment, and a provision of the Arizona code made such a contract void and unenforceable.

In conclusion, Mr. Justice Black referred to earlier decisions in which the Supreme Court had said concerning state laws;

that the existence of evils against which the law should afford protection and the relative need of different groups for that protection is a matter for the legislative judgment.

Mr. Justice Murphy dissented in the Arizona case but without comment. Mr. Justice Rutledge and Mr. Justice Frankfurter concurred, the former noting, however, that no question had been raised in any of the cases involving the right to strike.

If today's decision should be construed to permit a state to foreclose that right by making illegal the concerted refusal of union members to work with non-union workers, and more especially if the decision should be taken as going so far as to permit a state to enjoin such a strike, I should want a complete and thorough reargument of these cases before deciding so momentous a question.

But the right to prohibit contracts for union security is one thing. The right to force union members to work with non-union workers is entirely another. Because of this difference, I expressly reserve judgment upon the latter question until it is squarely and inescapably presented. Although this reservation is not made expressly by the Court, I do not understand its opinion to foreclose this question.

Lincoln Federal Labour Union No. 19129, AFL et al. v. Northwestern Iron and Metal Co. et al.; Whitaker et al. v. State of North Carolina, Nos. 47 and 34; American Federation of Labour et al. v. American Sash and Door Co. et al, No. 27 (1949).

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act. Published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant had not shown just cause, within the meaning of the Act, for having voluntarily left his employment. CU-B. 341 (March 23, 1948.)

MATERIAL FACTS OF CASE:

The claimant, a single man, aged 25 years, registered for work as a steam press operator, was last employed as a presser by a cleaning and pressing establishment, from October 6, 1947 to November 4, 1947, at a wage of \$1 an hour.

On November 28, 1947, he made claim for benefit, stating that he had lost his employment due to a shortage of work. The local office made the following comments:—

(We) telephoned the (employer) today re the above claimant's separation from his employment and (were) informed that while the claimant actually left voluntarily there was not full time work available for him. During his first week of employment ending October 11, 1947, he worked 30 hours, 2nd week 18 hours; 3rd week 30½ hours; and 4th and last week only 12 hours. This apparently was all the employment available for him.

The Insurance Officer disqualified the claimant for a period of six weeks, as from November 5, 1947, under Section 41 (1) of the Act, on the ground that he had voluntarily left his employment without just cause.

From this decision the claimant appealed to a Court of Referees, before which he appeared, and the Court unanimously reversed the decision of the Insurance Officer in a decision which reads in part:—

The Court has taken note of CU-B. 216, which has been referred to us for consideration in coming to a decision, but we do not feel that the circumstances in this appeal to the Umpire can be considered as parallel.

We are of the opinion that the hours worked during the four weeks employment

with (the employer) justify claimant in his separation as he testified that on more than one occasion he reported twice in one day for work.

The Insurance Officer appealed to the Umpire on the grounds that the Court of Referees erred in its interpretation of CU-B. 216 and in its finding that the claimant had just cause for voluntary separation.

DECISION:

The question to decide is whether the claimant had just cause to voluntarily leave his employment.

The claimant does not dispute that his wages were at the prevailing rate of pay in the district for the kind of work he was doing; but he contends that the weekly sum he was earning, as a part-time employee, was insufficient for his maintenance and that of his dependents.

In decision CU-B. 216, which was referred to the Court of Referees for their consideration I stated:—

... I think it is desirable in a general sense and in the interest of all concerned that, where a claimant has the opportunity of being partially employed, he should remain in that employment in the hope in the meantime of finding other or additional work, rather than to become totally unemployed.

On the evidence before me, I find that the Insurance Officer has rightly applied the above-quoted principle to the present case.

The claimant was not justified in leaving his employment voluntarily and the decision of the Court of Referees is therefore reversed.

The claimant is disqualified from receipt of benefit for a period of six weeks as from the date that this decision is communicated to him.

Held that the claimant had shown just cause, within the meaning of the Act, for having voluntarily left his employment. CU-B. 358 (April 29, 1948.)

MATERIAL FACTS OF CASE:

The claimant, a single man, aged 22 years, registered for work as a cutter and trimmer, was last employed by a textile firm as a doffer at a wage of 43 cents an hour, from October 6, 1947 to October 17, 1947, when he voluntarily left his employment.

On October 22, 1947, he made claim for benefit but failed to give any reason for having voluntarily left his employment. The employer stated that he had left voluntarily, without giving any reason or notice.

The Insurance Officer disqualified him for a period of six weeks, as from October 18, 1947, under Section 41 (1) of the Act, on the ground that he had voluntarily left his employment without just cause.

From this decision the claimant appealed to a Court of Referees on the ground that his health was not strong enough to work nights, and he furnished the following medical certificate:—

I, the undersigned, licensed doctor, certify that of, had to stop working at nights for health reasons.

The Court of Referees unanimously reversed the decision of the Insurance Officer.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees, his submission reading, in part, as follows:—

In my opinion all medical certificates produced by a claimant with the object of proving that he had good cause to voluntarily leave his employment, should mention that the doctor had been in attendance on the claimant during a certain period near the time that he ceased working, that the patient was then suffering from a stated illness, and that he is actually capable or incapable, whichever is the case, to work in such or such employment.

DECISION:

The question to decide is whether the claimant has shown just cause for having voluntarily left his employment.

When the claimant filed his claim for benefit on October 22, 1947, he offered no reason for having voluntarily left his employment and the Insurance Officer justly disqualified him from receipt of benefit. In his appeal to the Court of Referees, however, the claimant stated that he had left his employment on account of health reasons and submitted a medical certificate in support thereof. The Court unanimously found "that the medical certificate met all the requirements of the Act and jurisprudence" and consequently, removed the disqualification imposed by the Insurance Officer.

While appreciating the excellent suggestion made by the Insurance Officer in his appeal to me regarding the information which should be included in medical certificates in such cases, I find that the medical certificate submitted in the present case, although not fully descriptive, is yet definite enough and it is reasonable to believe, in the absence of evidence to the contrary, that the doctor has reached his conclusion after having carefully considered the claimant's physical condition, either before or immediately after he voluntarily left his employment.

Under the circumstances, the decision of the Court of Referees is upheld and the appeal of the Insurance Officer is dismissed.

Held that a student-at-law is under a contract of apprenticeship and when remunerated for services performed under this contract is included in the class of employees employed in insurable employment, unless otherwise excepted. —CU-C 13 (February 12, 1949).

MATERIAL FACTS OF CASE:

The appellants, a firm of Barristers and Solicitors engaged in a general law practice in the city of Toronto, applied to the Unemployment Insurance Commission for a decision, under Section 45 of the Act, on the question of the nature of the relationship between a solicitor and a student-at-law in the Province of Ontario, and whether the student-at-law is included in the class of employees employed in insurable employment.

The submissions indicated that each of the two appellants was the holder of Articles of Clerkship in the form prescribed by the Law Society of Upper Canada in

respect of a student-at-law. During the period in question one of the students received as an honorarium the weekly sum of \$15, and the other the weekly sum of \$5. While serving the appellants, as aforesaid, both these students-at-law were in attendance at Osgoode Hall Law School.

The Commission rendered its decision on March 15, 1948, to the effect that a student-at-law in the Province of Ontario, by virtue of his Articles of Clerkship, is engaged under a contract of apprenticeship within the meaning of paragraph (a) of Part I of the First Schedule to the Act and is, therefore, included in the class of persons in insurable employment. The Commission further decided that although both the students concerned were employed under a contract of apprenticeship, the second-mentioned student, by reason of the fact that he was a full-time enrolled student earning less than \$5.40 per week, was in employment excepted under the provisions of paragraph (p) of Part II of the First Schedule of the Act and Special Order No. 13 made thereunder. The first student was held to be in insurable employment, by reason of the fact that his earnings exceeded \$5.40 per week.

From this decision of the Commission the appellants on June 15, 1948, appealed to the Umpire on the following grounds:—

The sole point at issue between the parties hereto is whether the activities of a student-at-law amount to "employment". The Commission has assumed this point at issue with the natural results as found. This is begging the question.

Employment is not defined in the Act. The Act says in effect "Employment means Employment".

Any fair definition of the word "Employment" must include the connotation "means of livelihood". Unless the activity is carried on for the purpose of earning a living or a substantial part of a living it cannot be regarded as employment.

Mental or physical exertion which is done for another purpose, e.g. for fun, is not employment even though a person contracts to carry on such activity.

The applicants admit that the Articles of Clerkship between a solicitor and a student-at-law in the Province of Ontario amount to a contract, a contract of service. The Clerk covenants to keep the secrets of the solicitor, to obey him and to serve him. The solicitor covenants with the Clerk to teach and instruct him in the practice or profession of a solicitor and to offer the Clerk every assistance to be admitted as a solicitor. It is clear on the face of this contract that the prime purpose of the contract is the instruction of the Clerk.

As evidence of this prime purpose of the Articles the applicants have shown:—

- A. That during service under Articles their students were in attendance at Osgoode Hall Law School.
- B. That the services of their students were of considerable value to the applicants of a confidential nature and of expert quality out of all proportion to the amounts paid to them.
- C. That while in attendance at Osgoode Hall the students are faced with expenses so heavy that the amount paid to the student does not amount to a livelihood or any substantial part thereof.
- D. That to qualify as Barrister and Solicitor the student must serve under Articles in this fashion, cannot avoid such service and cannot take employment elsewhere.
- E. That it is not possible for a student to be unemployed or to take any benefit whatsoever under the Unemployment Insurance Act.

The applicants submit that a contract for instruction unless coupled with a contract for the earning of a living or a substantial part of a living does not amount to employment and is in a similar category to a contract for an activity which is done for fun or entertainment or similar purpose. Consequently, an Act respecting Unemployment Insurance has no application to the activity.

For these reasons the applicants ask that the decision of the Commission, dated 15 March, 1948, be reversed and set aside.

DECISION:

As indicated in the appellant's submission to me, "the sole point at issue is whether the activities of a student-at-law amount to employment" within the meaning of paragraph (a) of Part I of the First Schedule to the Unemployment Insurance Act which reads as follows:—

Employment in Canada under any contract of service or apprenticeship, written or oral, whether expressed or implied, or whether the employed person is paid by the employer or some other person, and whether under one or more employers, and whether paid by time or by the piece or partly by time and partly by the piece, or otherwise.

In the Articles of Clerkship, the student-at-law covenants to serve the solicitor in return for instruction in the practice or profession of a solicitor. This agreement, by its very essence, is a contract of apprenticeship and, therefore, when the student is remunerated for services performed under this contract, "his activities amount to employment" insurable within the meaning of paragraph (a) of Part I of the First Schedule to the Act, unless otherwise excepted.

For these reasons, the appeal is dismissed.

Unemployment Insurance Statistics

January, 1949*

According to the monthly report of the Dominion Bureau of Statistics there were during January, 1949, a total of 140,305 claims for Unemployment Insurance Benefit filed in local offices of the Unemployment Insurance Commission, compared with 114,506 in December and 109,311 during January last year. These totals include revised claims, that is, reconsideration of claims already existing, numbering 13,656 in January, 8,567 in December and 9,007 during January, 1948. Thus, new cases of recorded unemployment among insured persons represented mainly by initial and renewal claims, amounted to 126,649 this month, 105,939 in December and 100,304 in January, 1948.

Ordinary claims on the live unemployment register at January 31 numbered 197,675 (164,438 male and 33,237 female) as against 144,058 (118,678 male and 25,380 female) on December 31, and 130,798 (103,753 male and 27,045 female) on January 31 last year. "Ordinary claimants" are those who are wholly unemployed in the sense that they have been separated from their former employment or have been laid off for a period. In addition, there were 5,742 (4,953 male and 789 female) other claims recorded on the live register at the end of January, 1949, compared with 6,866 (5,849 male and 1,017 female) as at December 31, and 14,462 (13,348 male and 1,114 female) at January 31, 1948. "Other claimants" are largely short-time claimants, that is, those who, on a definite arrangement instituted at their places of employment, have been put on short-time so that they work either part of each week or on alternate weeks.

Claimants on the live unemployment register at January 31 are further classified in Table E-6, according to the number of days they have been continuously on the register since filing their most recent initial or renewal claim. It should be noted, however, that an initial claim is ignored if it has followed without interruption the termination of a claimant's benefit year, in which case the number of days of proven unemployment for which the claimant has continuously signed the register with respect to the immediately preceding and current claims is taken. Sundays, days of illness and any brief periods of employment

(usually of less than a week's duration) occurring during this period, are not included in the count of days on the register.

A total of 141,962 claims was disposed of during January, including 1,120 referred to Courts of Referees for further consideration and 1,139 special requests not granted, that is, requests for ante-dating, dependency rate of benefit and extension of the two-year period. Of the remaining 139,703 cases, in which entitlement to benefit was the main consideration, 115,744 were considered entitled to benefit and 23,959 not entitled to benefit.

Chief reasons for non-entitlement to benefit were: "insufficient contributions while in insurable employment" 13,751 cases; "voluntarily left employment without just cause" 4,604 cases; "discharged for misconduct" 857 cases; "refused an offer of work and neglected opportunity to work" 735 cases; "not capable of and not available for work" 603 cases; "not unemployed" 568 cases.

During January, 1949, 163,643 beneficiaries were paid \$6,727,221 for 3,056,418 compensated unemployed days, compared with 99,802 persons paid \$3,592,155 for 1,687,804 compensated unemployed days in December and 106,367 persons paid \$3,924,641 for 1,999,849 unemployed days in January, 1948. The average duration of the unemployment compensated was, then, 18.7 days in January, 1949, 16.9 days in December and 18.8 days in January last year. The average amount of benefit paid per beneficiary was \$41.11 in January, \$35.99 in December and \$36.90 in January last year. The average amount of benefit per compensated day of unemployment was \$2.20 in January, \$2.13 in December and \$1.96 in January, 1948.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for the month ending January 31, 1949, showed 3,603,997 employees were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1948, an increase of 53,565 since December 31, 1948.

As at January 31, 1949, 211,163 employers were registered representing a decrease of 130 since December 31, 1948.

* See Tables E-1 to E-7.

WAGE RATES IN THE CONSTRUCTION AND LOGGING INDUSTRIES, 1948

The Research and Statistics Branch of the Department of Labour, in an annual survey, obtains from employers statistics on wage rates, hours, and working conditions in Canadian industry. The tables which follow, presenting information on wage rates by occupation in two important industries, Construction and Logging, have been compiled from returns obtained in the 1948 survey.

Table I shows, for 29 cities across Canada, average wage rates for the eight principal Construction trades as of October 1, 1948. The index number of wage rates in this industry, on the base 1939=100, had risen to 176.3 by this date—an increase of almost 14 per cent over the summer of 1947. For the seven trades included in Table I, the rates for skilled artisans ranged from 75 cents per hour for sheet metal workers in Charlottetown to \$1.80 per hour for

plasterers in Toronto. Labourers in three cities, Windsor, Vancouver, and Victoria, were receiving \$1 per hour.

Wage rates in the Logging Industry are shown in Tables II and III. Differences in the size of timber in Eastern Canada as compared with the Coastal area of British Columbia and the seasonal nature of the industry in the east, make for technological differences; hence, direct comparisons by occupation are not possible. Separate tables of rates are shown for each of these areas.

Table II shows average wage rates per day for selected occupations in the Logging Industry in Eastern Canada as of February, 1948. The amounts represent daily wages, either in terms of time rates, or as average daily straight time earnings in the case of piece or contract work. Under the column headed, "With Board", are shown net amounts, that is, the actual money received

TABLE I.—AVERAGE WAGE RATES FOR SELECTED OCCUPATIONS IN THE CONSTRUCTION INDUSTRY, 1948

by the workers in addition to their board and lodging. In the column headed, "Without Board", gross amounts are shown, and the value of such board is deducted by the employer from these amounts. The average daily values of board are as follows: Nova Scotia, \$.70-1.25 per day; New Brunswick, \$.70-1.05; Quebec, \$1.00-1.25, with most firms reporting \$1.05; and Ontario, \$.70-1.50 (mostly \$1.20).

Board values as indicated above should be added to rates shown in column headed, "With Board", when comparing these rates with those in other industries. Earnings

of contract piece workers do not, of course, include overtime or other premium payments.

Average daily rates or straight time earnings in British Columbia (Coastal) Logging are set forth in Table III. The survey date for this industry is the pay period preceding October 1, 1948. Lodging, but not board, except for cooks, is supplied in addition to the rates shown. The average daily earnings of fallers and buckers on piece work (\$20.06) are almost double the rate for daily paid workers.

TABLE III.—AVERAGE WAGE RATES IN THE LOGGING INDUSTRY IN THE COASTAL AREA OF BRITISH COLUMBIA, OCTOBER 1948

An analysis of the current employment situation prepared by the Research and Statistics Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

CURRENT EMPLOYMENT CONDITIONS

The seasonal peak of unemployment was reached during February. Approximately 212,000 men and 53,000 women were registered for work at the Employment Service. Employment conditions this winter were somewhat less favourable than in the previous year. Seasonal unemployment, however, had already begun to give way in most regions by the end of the month. Apart from the seasonal aspect, employers looked forward to continued high employment levels throughout the first half of 1949, according to a recent survey undertaken by the Department of Labour.

Unemployment rose to its seasonal peak during February. Inactivity prevailed in most seasonal industries and, while lay-offs were relatively small, very few openings were available for the large number of workers released in January. A surplus developed among unskilled workers, particularly, and among skilled and semi-skilled construction, lumber products and transportation workers. By February 24, unplaced applicants at employment offices had reached a peak of 265,000. During the seasonal slack, an average of 76 per cent of all applicants filed claims for unemployment insurance; of these claims, 80 per cent were entitled to benefits.

The seasonal decline this winter had had a more severe effect on employment than in the previous year. Unplaced applicants at their peak in 1949 were 64,000 higher than at the same period in 1948. However, it should be taken into consideration that more workers were registering at employment offices this year because of the advantages of unemployment insurance. It was estimated that six per cent more of the labour force, or about 300,000 workers, were brought under the Unemployment Insurance Act in 1948. In addition, many more insured persons were now in the position to qualify for benefits.

Extreme weather conditions this year had been a disrupting factor, particularly in the Prairie provinces and British Columbia, where more than the usual amount of outside work had to be discontinued. Unfavourable market conditions in a few industries such as logging, lumber products and shipbuilding had also developed during this period, and the release of workers from

these industries had aggravated the seasonal unemployment problem. British Columbia particularly was affected by a combination of these factors. However, by the end of February, improvement was noticeable both in British Columbia and in Canada as a whole.

A forecast of employment designed to show cyclical rather than seasonal movements, prepared by the Department of Labour on the basis of information received from leading employers throughout Canada, anticipated a continued, though modified, rate of expansion during the first six months of 1949. A wide variance was expected in the expansion rate between the various industries. Manufacturing employment was expected to show only a minor gain. This, however, was due to the expected sharp declines in food processing, sawmill, and shipbuilding employment; at least 17 other industry groups envisaged employment gains. Communications (telephones), mining and electric power industries were expected to show yearly advances of approximately 10 per cent at July 1. According to the forecast, retail trade employment will be maintained at much the same level as in 1948.

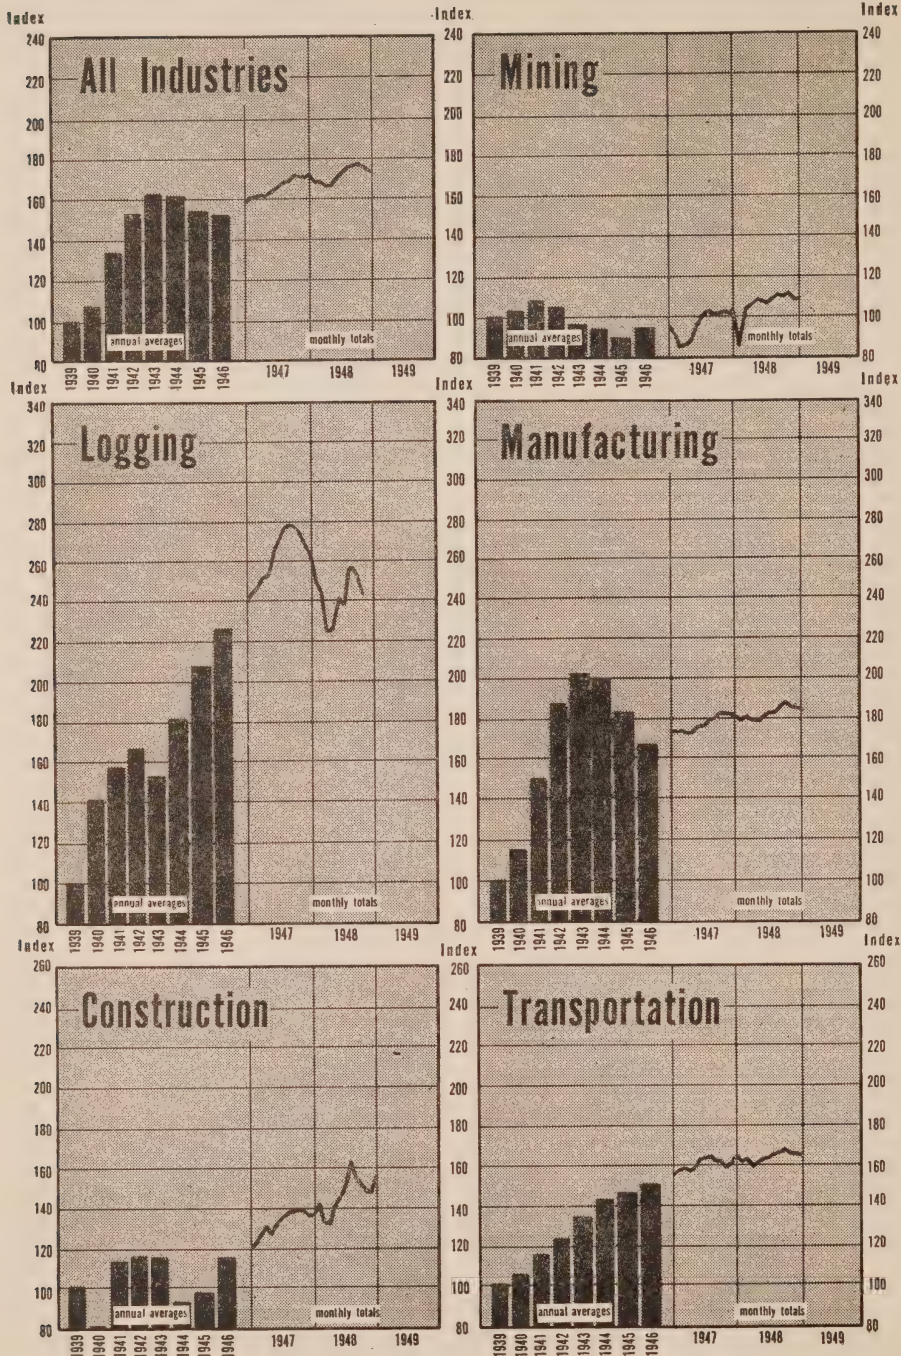

Industrial Analysis

Employment operations in **agriculture** continued slack during February. Farmers began placing orders for help at employment offices, but hirings, in most cases, were being deferred until April. Immigration to agriculture also was soon to increase; the first group of Dutch families were scheduled to arrive in March while Displaced Persons were to enter in April.

EMPLOYMENT TRENDS IN CANADIAN INDUSTRIES

Average 1939=100

Seasonally Adjusted

Primarily family units were expected to migrate to Canadian farms this year.

Wages of farm help continued to increase during 1948, although less extensively than in 1947. Average wages of farm help (without board) totalled \$104 a month at January 15, 1949, as compared with \$100 at the same date in 1948 and \$89 in 1947. Diverse trends were apparent in the various provinces. In Saskatchewan, Alberta and British Columbia, the rate of increase was maintained to a much greater extent, while in Nova Scotia and New Brunswick a decline in wages occurred during 1948. The central provinces showed no appreciable change during the year.

In the *mining* industry during February, a settlement was reached among the coal operators and 9,000 coal miners in Alberta and British Columbia, which granted an increase of 10 cents per ton to the miners' welfare fund. No wage increase was contained in the agreement. The contract system of pay, however, was replaced by a straight day wage of \$14.05.

On February 11, some 5,300 asbestos workers in Quebec went on strike for higher wages. The union was requesting an increase of 15 cents per hour, to bring the average hourly rate to \$1.

Hiring activity was quiet throughout the industry during February, with almost all mines fully staffed. By the end of the month, however, orders for help were coming into employment offices, as operators anticipated the withdrawal of farm workers and placed deferred orders for university students for summer operations.

Activity began to pick up in the *manufacturing* industry as a whole during February. Rubber plants and automobile factories were calling back staff laid off in December and January. Men's and women's clothing industries were now in their busy season; employment well above the 1948 level was forecast for these industries during the first half of 1949. Heavy industry for the most part was very active; a slight amount of additional hiring occurred in February.

Food industries, particularly meat products, continued seasonally slack, and a few lay-offs took place during February. Shipbuilding during the month showed both a seasonal and cyclical decline. Employment in sawmills and other lumber products industries continued to fall; export markets were still disrupted because of dollar shortages.

The levelling off in the cost of living, accompanied by continued advances in

hourly earnings, enabled real weekly wages in the manufacturing industry to show steady gains during the last four months of 1948. At January 1, 1949, the preliminary index of real wages (1946=100) stood at 107.6.

Unemployment was seasonally high in the *construction* industry during February. Extreme weather conditions in British Columbia and the Prairie provinces, especially, had curtailed outside work this year. Total unplaced construction workers registered at employment offices at the beginning of February had risen to 27,000 skilled and semi-skilled and 16,000 unskilled. The new construction season will open, however, as weather conditions improve and frost leaves the ground.

A heavy construction program was being planned for the summer. Contracts awarded were holding up very well for the season, amounting to \$19 million in value during February. This represented an increase of 27 per cent over the 1948 comparative total. The carry-over of residential building exceeded that of the previous year, with 56,500 dwelling units under construction at the beginning of 1949 as compared with 42,200 one year before. Less industrial building was anticipated in 1949, but institutional, commercial, and highway construction were expected to exceed their previous high levels.

Sales were seasonally low in *trade* establishments during February. Winter weather conditions discouraged shopping, especially in the Prairie provinces and British Columbia. Purchasing power had also fallen because of increased unemployment. This was counteracted to some extent by stock-clearing sales in many lines. Employers were placing greater emphasis on promotional work and Executive and Professional offices of the Employment Service reported that qualified salesmen were in increasing demand.

For the time of year, dollar value of sales compared favourably with 1948. A report on department store sales for February indicated that sales were 10 per cent above the previous year's level. Much, if not all, of this gain was accounted for by price increases.

More workers were available for employment in the *service* industries this year than at any time in the past seven years. Most hotels and restaurants throughout Canada reported adequate staffs during February. Replacement needs were fairly numerous during the month but sufficient help was available to meet requirements. Employers

were, however, more selective in their hiring and inexperienced help was difficult to place.

The first noticeable easing of demand for domestics since the early years of the war appeared this winter. Many cities reported the supply of day workers for housework now exceeded demand. Many married women had currently entered this field of work because of high living costs. Domestics for permanent work were still needed although, even here, openings at the prevailing wages were fewer. Since the beginning of the group movement of immigrants, approximately 6,400 Displaced Persons had been absorbed into domestic work.

Regional Analysis

Employment operations in the *Maritime* region were generally quiet during February but plans for increased activity were taking shape. Construction work during the month was confined chiefly to completions and interior finishing but mild weather had enabled good progress to be made. The current high level of contracts awarded assured a heavy building program for this year.

Employment changes in manufacturing were diversified during February. Ship repair yards were active and several new contracts were anticipated shortly. Heavy iron manufacturing plants were busy, although a temporary lay-off occurred in the main steel plant. Steady operations were reported in textile mills and shoe factories.

Coal mines in most areas were working steadily but because of the decline in orders, hours of work may be reduced accordingly. Unions and operators had agreed to an extension of the existing collective agreement until points of dissension on the new contract could be settled. Logging operations were at a standstill in most areas until spring drives began, and many woodsmen were temporarily unemployed. After the spring drives, any labour surplus in logging will be absorbed into sawmill employment.

Seasonal inactivity continued in the *Quebec* region during February. General unemployment showed no appreciable gain during February, although a strike in the asbestos mines temporarily increased the number of jobless by 5,000. Construction was at its lowest level, but hiring was expected to begin shortly.

Manufacturing employment was stable, and no change was expected throughout March. Several plants, however, had laid

off workers temporarily to adjust production schedules to changing market conditions. More cautious buying was in evidence and manufacturers reported the need for greater sales efforts. Clothing manufacturers were busy and good spring bookings were reported. Pulp and paper mill employment continued at a high level. Operations at tanneries and shoe manufacturers were still well below capacity, however, and furniture factories felt the effects of some slackening of demand.

In the logging industry, 85 per cent of hauling was completed by the end of February, despite the scarcity of snow for roads in southern areas. A shortage of water for the river drives may develop because of this year's comparatively light snowfalls and, as a result, drives may be shorter and more concentrated, with more than the usual number of workers employed.

The *Ontario* region was the first of the five regions to indicate improved employment conditions this year. By mid-February, seasonal unemployment had begun to decline. Industrial firms were taking on staff, but most hiring during February consisted of re-calling of staff laid off in December and January. Mild weather had been particularly beneficial to general outside work, although the usual amount of snow removal jobs had not materialized this year.

Continued mild weather had created an earlier than usual interest in spring help for farming operations. A lively demand existed for Displaced Persons and Dutch farmers. Labour shortages were again foreseen for the coming season, particularly in view of the many contracts of Displaced Persons expiring this spring or early summer.

Greater activity was evident in the manufacturing industry during February. Most of the automobile workers in Oshawa were now back at work while re-hiring was under way in Windsor. A slight amount of hiring was undertaken by heavy industry during February, but steel shortages prevented expansion in some firms. Employers were increasingly selective and continued to weed out inefficient staff. Radio manufacturing had picked up; a few workers were taken on during the month and further expansion was being contemplated.

Winter weather still prevailed in the *Prairie* region during February but the unemployment peak appeared to have been passed by the end of the month. Many loggers will be released during March when hauling operations will near comple-

tion but few will reach the labour market; most workers will return immediately to their usual summer jobs.

Agriculture was quiet during February but advance orders for spring help were being placed at employment offices. No serious shortage of farm help was expected in the 1949 season. Farm machinery was considerably more plentiful this year and the trend toward greater mechanization and less labour was expected to continue.

An active prospecting season, to begin shortly after the spring breakup, was now in preparation. Iron mines were working steadily throughout the winter with skilled help still in demand; additional workers will be required as soon as present plans for exploration work in the area get under way. Large stockpiles of ore had accumulated and shipment will begin as navigation re-opens on the Great Lakes.

The employment situation in the *Pacific* region began to improve toward the end of February, as weather became milder and the supply of hydro power returned to normal. Workers were being re-hired and the labour surplus had begun to decline. Nevertheless, the number unemployed was still well above the previous year's level.

As warm weather and rain melted the heavy snow, logging crews were steadily recalled. Nearly all major operations were expected to be active in March. Declines in sawmill production during the severe winter spell and prospects of higher prices in the United States market had tended to stabilize lumber prices; accordingly sawmill activity had begun to pick up. The shingle industry also showed signs of recovery.

Construction was at a standstill in the first part of February because of cold weather and the accumulation of snow. Re-employment was beginning at the end of the month and the surplus of construction workers will rapidly disappear if good weather continues.

Employment Service Activities

By the latter part of February, it was apparent in Employment Service operations that the seasonal low in employment had been passed. The break started about the middle of February, when unfilled vacancies first began to rise. Two weeks later, the number of unplaced applicants dropped by 3,000. Recovery started in the industrial centres and spread to areas favoured with milder weather. By the last week in February, many towns and cities throughout Canada had reached their seasonal turning-point.

At the low of seasonal activity (February 24), 212,000 men and 53,000 women were registered for work at employment offices. In 1948 at that time, 156,000 men and 45,000 women were unplaced, indicating an overall increase of 64,000 during the year. This rise concurred with a jump in claims for unemployment insurance. In fact, applicants not claiming unemployment insurance, were fewer in number than in 1948 and currently accounted for only 23 per cent of the unplaced. Unemployment insurance benefits were received by 211,000 persons during February as against 138,000 in the same month of 1948. Greater activity in the unemployment insurance field was partially brought about by an increase in coverage; approximately 300,000 persons, or an additional 6 per cent of the labour force, were brought under the Unemployment Insurance Act in 1948. The number of persons who could qualify for benefits had greatly increased also, either because contributions had been built up or because they were now able to meet the other statutory requirements.

Placement operations at employment offices were exceptionally slack during February. Relatively few workers were laid off either for seasonal or other reasons, and immigration dropped. Registration of new applicants tapered off accordingly, and only 8,000 unplaced applicants were added during February, as against 70,000 in January. Conditions characteristic of an unfavourable labour market prevailed during most of the month: job openings narrowed down largely to those for skilled tradesmen; surpluses of workers grew, especially among the unskilled and semi-skilled; youths and older workers were particularly difficult to place; employers specified single women only; hiring qualifications regarding experience and education became more stringent; labour turnover declined.

It might be of interest to point out that employment changes among women workers did not always follow the general pattern. For example, the seasonal influx was considerably smaller among women workers, both numerically and proportionately. Also, an appreciably smaller proportion of unplaced women were insured, claiming, or receiving benefits. Another distinct characteristic of the female employment market was the shortage of workers which still existed in many fields. Stenographers and domestics, as well as many professional women for nursing, dietetics, and teaching were needed in almost every city across Canada.

Executive and Professional offices, however, were busy at this time with the work of finding jobs for university students who will be graduating or seeking summer jobs when the school year ends. A peak of 15,000 persons were expected to graduate from Canadian universities this year. In addition, probably 35,000 students will be looking for summer work. Already many had arranged for their future employment, either through the Employment Service or on their own.

Through letters sent to prospective employers, the Employment Service had uncovered 10,000 jobs (3,000 for graduates and 7,000 for under-graduates) by the middle of February; already most of these openings have been filled. Another 6,500

jobs were available in the Civil Service and the Armed Services. Local employment offices were to join the Executive and Professional offices in the job of personally contacting approximately 8,000 employers during March.

Placement work in this field to date appeared to be slightly more advanced than at the same time in 1948. This was partially due to improved organization of the campaign, although it also reflected the favourable response of employers this year. The job outlook for most graduates this year appeared good although temporary difficulties may arise in placing the large number of graduates in the Prairies and Maritimes, and those from the faculty of agriculture.

Unemployment in Canada as Reported by Trade Unions, 1948

Average unemployment in trade unions in 1948 rose to 2.2 per cent from 1.3 per cent in the previous year. The latest percentage was the highest since the 2.2 recorded in 1942.

The yearly average was obtained from quarterly reports received by the Department of Labour from local trade union branches throughout the country. These reports show the number of members in good standing, excluding retired or pensioned members, and the number of members totally unemployed at the end of each quarter. A person is recorded as unemployed only when he is idle because

of economic causes. Union members idle because of illness, a strike or a lockout, are not considered as unemployed. Reviews of trade union unemployment at the end of each quarter have appeared in the *LABOUR GAZETTE* for March, June, September and December respectively. The statement for the last quarter of 1948, with comparative figures for earlier years, was included in the March, 1949, issue.

During 1948, quarterly reports were received from an average of 2,558 locals with an average combined membership of 512,925. In the previous year an average of 2,476 locals reported and the average combined membership was 474,663.

PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY INDUSTRIES

| | Logging | Mining | Manufacturing | Construction | Transportation | Communication | Trade | Service | All Industries |

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index declined from 159·6 to 159·5 between January 3 and February 1, 1949. A drop in the food index from 202·2 to 200·4 overbalanced increases for fuel and light, home furnishings and services, and miscellaneous items. Egg prices again moved sharply lower, while meats and shortening were also down. Citrus fruits advanced, with other foods showing little change. Firmness in coal and coke moved the fuel and light series up from 130·0 to 130·8. Home furnishings and services also gained 0·8 to 167·8. There was a rise in miscellaneous items from 126·6 to 128·1 as tobacco, cigars, and theatre admissions showed some increases. The clothing index dropped fractionally from 181·9 to 181·8. There was no February re-calculation of the rent index which remained at 121·7.

The February, 1949, cost-of-living index was 58·2 per cent above the August, 1939, level.

Cost of Living in Eight Cities

Regional city cost-of-living index changes between January and February, 1949, were divergent. At most centres food prices were lower, while in contrast miscellaneous items were higher, notably tobacco, cigars and theatre admissions. Home furnishings and services advanced moderately while clothing prices averaged lower in most cities. Fuel costs were up slightly in three centres. Composite city indexes were unchanged between January 3 and February 1 for Saint John at 156·2; Saskatoon at 162·0 and Vancouver at 160·8. Index declines included Toronto, down 0·3 to 154·7, Halifax 0·2 to 152·1 and Edmonton 0·1 to 154·4. Increases were noted for Winnipeg which rose 0·4 to 153·8, while the Montreal series gained 0·1 to 162·4.

Wholesale Prices, January, 1949

Wholesale prices recorded a further slight decline between December and January, the general index receding 0·2 to 159·3 (base 1926=100). Losses were confined to the animal, vegetable and wood products groups. A drop of 3·0 points to 173·0 in animal products reflected lower quotations for livestock, furs, fish and eggs. Vegetable products moved down 0·9 to 138·4 when recessions in barley, oats, vegetable oils and lemons outweighed moderate increases in potatoes. Similarly wood, wood products and paper weakened 0·9 to 191·3 due to an easier price tone for newsprint, wood pulp and cedar shingles. The remaining five component indexes recorded gains. Iron and its products rose 3·5 points to 170·6 supported by higher prices for rolling mill products, hardware and wire. In the non-ferrous series a gain of 2·5 to 166·0 was due to a firmer tone for lead, zinc and aluminium. Chemical products moved from 129·1 to 130·4 when higher prices for hydrochloric acid, soda ash, dyeing materials and shellac overbalanced declines in wood alcohol and tartaric acid. A gain of 0·7 to 162·7 in fibres, textiles and textile products reflected strength in cotton knit goods and worsted and woollen cloth. These outweighed weakness in jute bag prices. Higher prices for coal, salt, sulphur, lime and asbestos moved the non-metallic minerals group up 0·4 to 138·0.

Canadian farm product prices at wholesale declined again in January. Weakness was centred in animal products, a drop of 2·3 points to 184·0 in this series being due to an easier tone for livestock and eggs. Hides and skins were slightly firmer. Field products rose 0·3 to 116·8, when advances in potatoes more than offset lower quotations for onions and hay.

* See Tables F-1 to F-6.

COST OF LIVING AND WHOLESALE PRICES IN CANADA FROM JANUARY 1914 TO DATE

(Base 1935-39=100)

STRIKES AND LOCKOUTS*

Canada, February, 1949

The number of work stoppages arising from disputes between employers and workers during February, 1949, showed a decrease of one as compared with January, 1949, but the number of workers involved and the time loss increased sharply. However, the time lost in February, 1949, was only half that for February, 1948. Preliminary figures show nine strikes and lockouts in existence, involving 7,235 workers, with a time loss of 71,732 man-working days, as compared with 10 strikes in January, 1949, with 1,811 workers involved and a loss of 9,700 days. In February, 1948, there were 14 strikes, involving 11,058 workers, with a time loss of 140,130 days.

About 80 per cent of the time lost during February, 1949, was caused by a strike of some 4,550 asbestos miners and mill-workers in various centres in Quebec. Three strikes, involving knitting factory workers at Paris, Ont., rubber footwear factory workers at Kitchener, Ont., and chemical factory workers at Shawinigan Falls, P.Q., were responsible for 17 per cent of the strike idleness during the month.

For the first two months of this year, preliminary figures show 16 strikes and lockouts, involving 8,522 workers, with a time loss of 81,432 man-working days. For the similar period in 1948 there were 27 strikes, with 14,587 workers involved and a time loss of 275,965 days.

Based on the number of wage and salary workers in Canada the time lost in February, 1949, amounted to 0.09 per cent of

the estimated working time, as compared with 0.01 per cent in January, 1949; 0.17 per cent in February, 1948; 0.05 per cent for the first two months of 1949; and 0.17 per cent for the first two months of 1948.

Of the nine strikes recorded for February, 1949, three resulted in favour of the workers, two in favour of the employers, one was a compromise settlement and one was indefinite in result, work being resumed pending final settlement. At the end of the month two strikes were recorded as unterminated, namely: asbestos miners and mill-workers at Asbestos, Black Lake, Coleraine, and Thetford Mines, P.Q., and knitting factory workers at Paris, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C., on May 30, 1946; soft drink factory workers at Edmonton, Alta., December '1, 1947; printing pressmen at Toronto, Ont., December 15, 1947; costume jewellery factory workers at Toronto, Ont., April 29, 1948; coal miners, Edmonton district, Alta., January 13, 1948; and seamen, Great Lakes and St. Lawrence River, June 6, 1948.

* See Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. Statistics given in the annual review, issued as a supplement to the LABOUR GAZETTE for April, 1949, and in this article are taken, as far as is possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in December, 1948, was 90 and 17 were still in progress from the previous month, making a total of 107 during the month. In all stoppages of work in progress in the period there were 12,800 workers involved and a time loss of 30,000 working days was caused.

Of the 90 disputes leading to stoppages of work which began in December, six, directly involving 200 workers, arose out of demands for advances in wages, and 27, directly involving 2,900 workers, on other wage questions; five, directly involving 500 workers, on questions as to working hours; 19, directly involving 2,300 workers, on ques-

tions respecting the employment of particular classes or persons; 30, directly involving 1,900 workers, on other questions respecting working arrangements; and two, directly involving 600 workers, on questions of trade union principle. One stoppage, directly involving 100 workers, was in support of workers involved in another dispute.

The total number of stoppages of work due to industrial disputes in the United Kingdom, reported as having begun in 1948, was 1,758. The total number of workers involved in all stoppages in progress during the year (including those which began in 1947 and extended into 1948) was 423,000. The aggregate number of working days lost in 1948 through all stoppages in progress

during the year was approximately 1,944,000. The figures for 1948 are preliminary. This compares with 1,721 stoppages in 1947, involving 623,000 workers, with a loss of 2,433,000 working days.

United States

Preliminary figures for January, 1949, show 225 strikes and lockouts beginning in the month, in which 70,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 800,000 man-days. Corresponding figures for December, 1948, are 125 strikes and lockouts, involving 40,000 workers, with a time loss of 600,000 days.

FATAL INDUSTRIAL ACCIDENTS IN CANADA, 1948*

Industrial fatalities in Canada during the calendar year 1948, decreased to 1,350 from 1,475 in the previous year. The final figure for 1947 includes 35 not previously reported. The total number of fatal and non-fatal accidents reported by provincial Workmen's Compensation Boards increased from 371,245 in 1947 to 418,185 in 1948.

The accidents recorded are those occurring to persons gainfully employed, during the course of or arising from their employment. Also included are fatalities from industrial diseases reported by provincial Workmen's Compensation Boards. Reviews of industrial accidents appear in the *LABOUR GAZETTE* quarterly.

The annual totals were compiled from reports received from provincial Workmen's Compensation Boards, the Board of Transport Commissioners, and the Ontario Chief Factory Inspector. Also included were the reports submitted by *LABOUR GAZETTE* correspondents in several Canadian industrial centres.

Press reports served mainly to supplement official information and were included only after careful inquiry to avoid duplication. The record on accidents in agriculture was compiled from such reports. Although it is not known to what extent agricultural accidents are covered, the record is considered fairly complete.

Eighteen industrial accidents which caused the deaths of three or more persons in each case were reported to the Department in 1948. On February 28, the collision of a

snowplough and a yard engine at Hanna, Alberta, resulted in the deaths of an engineer, a snowplough foreman and four sectionmen. On February 7, the fishing boat *Amaryllis* foundered in a gale off Scarlet Point, British Columbia, with a loss of the Captain, the second engineer and the cook. On February 17, the fishing boat *Louis Todd* foundered in Wright Sound, British Columbia, as the result of a fire on board; the Captain and two crew members lost their lives.

Three miners were killed at Britannia, British Columbia, when a slab of rock fell on them while they were engaged in drilling operations on January 30. On February 18, two linemen and a clerk were killed when the truck in which they were riding was struck by a train at Crabtree Mills, Quebec. At Ashcroft, British Columbia, on February 23, a locomotive toppled over after hitting a rock slide; the engineer, the fireman and a trainman were killed.

On April 27 three men were suffocated by shifting clay in a sewer excavation at Mimico, Ontario. Three railwaymen were killed on May 26, at Lundbreck, Alberta, where due to a bridge wash-out, an engine crashed into a creek.

Five riggers were drowned on July 22 in the Ottawa River, Ontario, when a section of a bridge fell into the river. Three seamen shipping out from Quebec were drowned in France on July 24 when their boat was swamped.† On July 30, five men

† Accidents to seamen occurring outside of Canada are listed under the province from which craft were operated.

* See Tables H-1 to H-5.

were drowned at Cap aux Oies, Quebec, when their lifeboat sank. The capsizing of boats were responsible for the deaths of four fire fighters on August 8 in the Wanapitei River, Ontario, and the drowning of five woodsmen in Gibson's Lake, New Brunswick, on September 16.

On October 9, an engineer, fireman and trainman were killed at Mattawa, Ontario, when a coupling failed and cars ran down a grade striking the engine on a ballast train. Three seamen were drowned in British Columbia coastal waters on November 16, when their craft was shipwrecked. On December 1 three crew members of a fishing vessel were asphyxiated by the fumes of an auxiliary engine at Port Alberni, British Columbia. A train struck a truck at Laprairie, Quebec, on December 27 and three agricultural workers were killed.

Fatalities by Causes

Classification of accidents according to cause (Table H-1) indicates that the largest number, 397, came under the category of "moving trains, vehicles, etc." Automobiles and other power vehicles and implements caused 174 fatalities.

Industrial diseases strain, etc., were responsible for 156 of the 210 industrial deaths recorded in the group, "other causes". Falls of persons resulted in 221 fatalities while falling objects caused 214 of which 83 were in logging. Dangerous substances caused 157 deaths including 59 resulting from electrocution.

Fatalities by Provinces

The largest number of industrial fatalities in 1948 was recorded in Ontario with 488. Of these, 125 occurred in manufacturing, 86 in transportation and 72 in construction. In British Columbia 271 fatalities were recorded including 72 in logging and 52 in mining. The third largest number, 255, was that for Quebec.

Fatalities by Industries

Table H-4 includes an analysis of fatalities by industries and months and the number of fatalities in each industry expressed as a percentage of the grand total. The latest available census figures of persons employed in the various industries are also given, which although they are not, in any case, for the year under review, are included to provide an approximate indication of the relative frequency of accidents from industry to industry.

The highest percentage of the 1,350 industrial fatalities in 1948 was in manufacturing with 19.4; the percentage was 18.0 in the previous year. Transportation and public utilities accounted for 18.1 per cent in comparison to 19.6 in 1947.

The percentage in mining, non-ferrous smelting and quarrying rose to 14.1 from 12.9 per cent in 1947. In logging, the percentage decreased from 13.0 in 1947 to 12.0 in 1948 while in construction it increased from 11.5 to 12.8 in the same period.

SELECTED LIST OF PUBLICATIONS RECEIVED IN LIBRARY OF DEPARTMENT OF LABOUR, OTTAWA*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

NOTE.—Many of the statistical data in this table are included in the *Canadian Statistical Review* issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available. ⁽¹⁾ Labour Force survey figures given are as of November 20, 1948, November 8, 1947 and November 17, 1945. ⁽²⁾ Base 1926=100. ⁽³⁾ Figures are as at end of quarter ending Dec. 31, 1948, 1947, 1945, 1943 and 1939 respectively. ⁽⁴⁾ Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average for 1946=100. ⁽⁵⁾ First of month.

⁽⁶⁾ Base 1935-1939=100. ⁽⁷⁾ Figures are for four week periods. ⁽⁸⁾ Annual figures; monthly not available. ⁽⁹⁾ Year-end figures.

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners)

SOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5, and the statistics of weekly earnings are therefore slightly different.

| Week preceding | Average Hours Worked | | | Average Hourly Earnings | | |
|--------------------|----------------------|---------------|-------------------|-------------------------|---------------|-------------------|
| | All Manufactures | Durable Goods | Non-Durable Goods | All Manufactures | Durable Goods | Non-Durable Goods |
| *Jan. 1, 1945..... | no. | no. | no. | cts. | cts. | cts. |
| *Jan. 1, 1946..... | 39.6 | 39.7 | 39.5 | 70.0 | 77.1 | 60.9 |
| *Jan. 1, 1947..... | 38.1 | 37.5 | 38.7 | 67.9 | 74.7 | 61.7 |
| *Jan. 1, 1948..... | 38.1 | 38.0 | 38.1 | 76.3 | 83.3 | 69.4 |
| *Jan. 1, 1949..... | 38.3 | 38.5 | 38.1 | 86.6 | 92.9 | 80.0 |
| Feb. 1, 1948..... | 42.8 | 42.7 | 42.8 | 86.6 | 93.2 | 80.1 |
| Mar. 1, 1948..... | 43.2 | 43.4 | 43.0 | 88.0 | 95.0 | 80.8 |
| *Apr. 1, 1948..... | 41.6 | 41.8 | 41.4 | 89.0 | 95.6 | 82.1 |
| May 1, 1948..... | 43.1 | 43.4 | 42.7 | 89.4 | 96.2 | 82.4 |
| June 1, 1948..... | 41.7 | 41.6 | 41.7 | 91.4 | 98.4 | 84.4 |
| July 1, 1948..... | 42.0 | 42.3 | 41.6 | 92.3 | 99.2 | 85.2 |
| Aug. 1, 1948..... | 42.1 | 42.0 | 42.1 | 92.7 | 99.8 | 85.6 |
| Sept. 1, 1948..... | 41.7 | 42.0 | 41.5 | 93.4 | 100.9 | 85.8 |
| Oct. 1, 1948..... | 43.0 | 43.3 | 42.7 | 94.6 | 102.6 | 86.6 |
| Nov. 1, 1948..... | 43.1 | 43.2 | 43.1 | 95.5 | 103.4 | 87.6 |
| Dec. 1, 1948..... | 43.2 | 43.4 | 43.1 | 96.0 | 104.1 | 87.7 |
| Jan. 1, 1949..... | 40.6 | 41.0 | 40.2 | 97.2 | 104.7 | 89.4 |

* The averages at these dates were affected by loss of working time at the year-end holidays in the case of Jan. 1 and by the Easter Holidays in the case of Apr. 1, 1948.

TABLE C-7.—WEEKLY SALARIES AND WAGES IN MANUFACTURINGSOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*

| Week Preceding | All Manufactures (1) | | Durable Manufactured Goods | | Non-Durable Manufactured Goods | |
|--------------------|----------------------|----------|----------------------------|----------|--------------------------------|----------|

* Industries classed in the durable manufactured industries.

¹ Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.e. the latest figures are as follows: Nov. 1, 1948, 219-2; Dec. 1, 1948, 223-0; Jan. 1, 1949, 224-9; at Jan. 1, 1948 the index was 191-5

² Chiefly street and electric railways. For information respecting the sex distribution of the persons in recorded employment, see Table C-5.

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices, etc., occur from time to time.

(a) Rent figures are obtained by multiplying increases since June, 1941 by the average rental determined by the census of that date. The increases are based upon reports from real estate agents and periodic sample surveys which are now being conducted by direct interview.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

(c) Averages include prices for cuts with bone-in.

(d) Revised price.

| TOTAL..... | 64.1 | 132.6 | 160.6 | 88.0 | 100.8 | 51.0 | 64.3 | 72.8 | 114.9 | 132.7 | 149.3 | 147.1 | 149.9 | 148.9 | 148.2 |

The indexes for 1948 and January 1949—, are subject to revision.
(a) Index revised due to the inclusion of the additional payment of 20 cents per bushel to western producers for wheat sold to the Wheat Board, this payment was retroactive to August 1945.

(j) New series on June, 1947 base. (k) Without taxes. (l) Annual averages are on base July, 1914=100. (m) Average June-December.

G—Strikes and Lockouts

TABLE G-1.—STRIKES AND LOCKOUTS IN CANADA, JANUARY-FEBRUARY, 1948-1949†

| Date | Number of Strikes and Lockouts | | Number of Workers Involved | | Time Loss | |
|------------------------|--------------------------------|--------------|----------------------------|--------------|---------------------|------------------------------------|
| | Com-mencing During Month | In Existence | Com-mencing During Month | In Existence | In Man-Working Days | Per Cent of Estimated Working Time |
| 1949* | | | | | | |
| January..... | 10‡ | 10 | 1,811‡ | 1,811 | 9,700 | .01 |
| February..... | 6 | 9 | 6,711 | 7,235 | 71,732 | .09 |
| Cumulative totals..... | 16 | | 8,522 | | 81,432 | .05 |
| 1948 | | | | | | |
| January..... | 19‡ | 19 | 12,729‡ | 12,729 | 135,835 | .17 |
| February..... | 8 | 14 | 1,858 | 11,058 | 140,130 | .17 |
| Cumulative totals..... | 27 | | 14,587 | | 275,965 | .17 |

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1949 (¹)

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man-Working Days | Particulars(²) |
|--|-----------------|---------|-------------------------------|--|
| | Establishments | Workers | | |
| Strikes and Lockouts in Progress Prior to February, 1949 | | | | |
| MANUFACTURING— <i>Textiles, Clothing, etc.—</i> Woollen factory workers, Huntingdon, P.Q. | 1 | 189 | 800 | Commenced January 18; for a new agreement providing for increased wages; terminated February 5; negotiations; compromise. |
| Knitting factory workers, Paris, Ont. | 1 | 250 | 5,000 | Commenced January 18; for a union agreement providing for increased wages, reduced hours, union security, pay for eight statutory holidays, extension of vacation plan, etc; un-terminated. |
| Miscellaneous Wood Products— Wood heel factory workers, Montreal, P.Q. | 1 | 85 | 1,000 | Commenced November 19, 1948; because application for union recognition refused by Labour Relations Board as not representative of majority of employees; terminated February 18; return of workers and replacement; in favour of employer. |

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1949 ⁽¹⁾

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man- Working Days | Particulars(?) |
|---|---------------------|-----------|---|---|
| | Establish- ments | Workers | | |
| Strikes and Lockouts Commencing During February, 1949 | | | | |
| MINING— Asbestos miners, Norbestos, P.Q. | 1 | 108 | 540 | Commenced February 10; for dis- missal of three foremen; termi- nated February 15; conciliation, provincial; in favour of employer. |
| Asbestos miners, mill-work- ers, etc. Asbestos, Black Lake, Coleraine, Thetford Mines, P.Q. | 9 | (3) 4,550 | 57,000 | Commenced February 14; for a new agreement providing for increased wages, elimination of asbestos dust, welfare and pension plan, extension of vacations with pay, pay for nine statutory holidays, following refer- ence to provincial conciliation; unterminated. |
| MANUFACTURING— Rubber and Its Products— Rubber footwear factory workers, Kitchener, Ont. | 1 | 666 | 3,300 | Commenced February 17; protest against change in time standards and methods affecting one style of footwear; terminated February 23 (work resumed from February 24 to March 1); conciliation, provin- cial, and return of workers pending reference to grievance committee; indefinite. |
| Boots and Shoes (Leather)— Shoe factory workers, Quebec, P.Q. | 1 | (4) 16 | 50 | Commenced February 7; for im- plementation of award of arbi- tration board for increased wages, piece rates; terminated February 10; negotiations; in favour of workers. |
| Non-Metallic Minerals, Chemicals, etc.— Chemical factory workers, Shawinigan Falls, P.Q. | 1 | (5) 1,357 | 4,000 | Commenced February 10; for a greater increase in wages than recommended by majority report of arbitration board; terminated February 12; negotiations; in fa- vour of workers. |
| CONSTRUCTION— Buildings and Structures— Building trades workers, Toronto, Ont. | 1 | (6) 14 | 42 | Commenced February 16; protest against employment of plumbers of another union on installation of refrigeration equipment; termi- nated February 18; negotiations; in favour of workers. |

⁽¹⁾ Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

⁽²⁾ In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

⁽³⁾ 820 indirectly affected; ⁽⁴⁾ 600 indirectly affected; ⁽⁵⁾ 215 indirectly affected; ⁽⁶⁾ 100 indirectly affected.

STRIKES AND LOCKOUTS IN CANADA, 1948

A marked improvement in industrial relations, as compared with the two preceding years, was shown during 1948 by statistics of disputes between workers and employers which resulted in work stoppages (strikes and lockouts). During 1948, the loss of time due to strikes and lockouts was little more than one-third of the loss in 1947 and one-fifth of that in 1946, the peak year. The number of strikes and lockouts in 1948 and the number of workers involved were the lowest recorded for any year since 1939.

In 1948 about 60 per cent of the idleness resulted from three strikes, involving coal miners in Alberta and British Columbia, automotive parts factory workers at St. Catharines, Ont., and furniture factory workers in various centres in Quebec. About 12 per cent of the total time lost during the year was caused by five prolonged strikes in the textile and clothing industry in various localities in Quebec.

During the year there were 154 strikes and lockouts in existence, as compared with 236 in 1947, and 228 in 1946. In 1948, 42,820 workers were involved in strikes, 104,120 in 1947, and 139,474 in 1946. The time loss in 1948 amounted to 886,000 man-working days, as compared with 2,400,000 in 1947 and 4,500,000 days in 1946.

Based on the number of wage and salary workers in Canada, the total amount of time lost was about one-tenth of one per cent of the estimated working time. In 1947, it was about one-quarter of one per cent, and in 1946, one-half of one per cent. The total time lost in 1948 was equivalent to an average loss for each wage and salary worker in Canada of about one-quarter of a day, three-quarters of a day in 1947, and one and one-half days in 1946. The average loss of time for each worker involved in stoppages in 1948 was about 21 days, as compared with 23 days in 1947, 32 days in 1946, 15 days in 1945, less than eight days in each of the preceding seven years, and 41 days in 1925, the highest on record.

Analysis of Statistics, 1948

The demand for higher wages, to offset increases in the cost of living, was the central issue in two-thirds of the strikes during the year, causing about 85 per cent of the total time loss. In 1947, about 90 per cent of the time loss resulted from disputes over wage increases. Such demands were often linked with various questions involving unionism, working conditions, etc. However, since 1945, when most of the

strike idleness resulted from questions involving unionism, the question of union security has not been a major issue. There were no sympathetic strikes recorded during 1948. The great variety and complexity of the causes leading to strikes and lockouts present difficulties in classification for statistical purposes as there are usually several points in dispute in each case.

Of the 154 strikes and lockouts during the year, about one-fifth were settled in favour of the workers, and one-quarter in favour of the employers, while about 40 per cent resulted in a compromise or partial gain for the workers, about the same proportion as last year. Most of the important strikes were in this latter group, involving about 60 per cent of the total workers and over 70 per cent of the time loss.

In the manufacturing group of industries employment is greater than in any other industry. In recent years the time loss has been greater in this group than in all others combined, the year 1947 being an exception, with the greatest loss in the mining group. There were only two important strikes in the coal mining industry during 1948, and nine lesser stoppages. A strike of coal miners in western Canada, which commenced on January 13, 1948, involved some 7,000 miners in Alberta and 2,000 in British Columbia. Work was resumed at the majority of mines by the end of February and at others at later dates. In some cases settlement was not arrived at until the end of July. By the end of the year the strike had not been declared terminated as no

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBER OF WORKERS INVOLVED EACH YEAR 1914—1948

LOSS IN MAN-WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1914-1948

agreement had been reached at three mines in the Edmonton district. Employment conditions were considered to be no longer affected by the end of July, all miners having secured other jobs pending final settlement. This strike accounted for more than 30 per cent of the total time lost during the year. The time loss in the manufacturing group was 55 per cent of the 1948 total; mining (all), 35 per cent; con-

struction, 4.5 per cent; transportation, 3.0 per cent; logging, 1.1 per cent; service, 1.0 per cent; trade, 0.3 per cent; and finance, 0.2 per cent. More than half the time loss in manufacturing was in metal products and about one-quarter in textiles, clothing, etc.

Settlement of 60 of the 154 strikes in 1948 was brought about by direct negotiations. Negotiations played an important part in

* In this table figures for strikes and lockouts extending over the end of the year are counted more than once.

the settlement of differences in many other cases, following reference to conciliation boards, labour courts, etc. Provincial conciliation, assisted by civic conciliation in three cases, effected settlement in 34 strikes; 11 strikes were referred to labour boards, commissioners, etc.; seven were settled by arbitration; and 29 by return of workers.

More than 50 per cent of the strikes in 1948 involved fewer than 100 workers in each case. These caused less than four per cent of the total time loss. Ten strikes, involving more than 1,000 workers in each case, caused more than 60 per cent of the total time loss.

The greatest proportion of strike idleness is usually caused by a few prolonged

TABLE II.—NUMBER OF STRIKES AND LOCKOUTS IN CANADA BY INDUSTRIES, 1901-1948*

* In this table, figures for strikes and lockouts extending over the end of year are counted more than once.

† Two groups in which few strikes occurred are not shown in this table; they are: Finance—1929, one strike; 1942, one strike; 1943, one strike; Miscellaneous—1907, one strike; 1918, 2 strikes; 1919, 14 strikes, (general strike); 1920, one strike.

‡ In this table the manufacturing group now includes shipbuilding since 1901; prior to 1942 shipbuilding had been in the construction group.

§ In 1943 two strikes involved workers in five industries; in 1946, one strike involved workers in two industries.

strikes. This year, 13 strikes which lasted more than 50 days caused about 75 per cent of the total loss. About 75 per cent of the strikes were settled within 25 days. These involved 56 per cent of the workers, but, being of relatively short duration, caused less than 15 per cent of the time loss.

At the end of the year five strikes were recorded as unterminated, namely: strip

coal miners in the Bienfait-Estevan field, Sask.; textile factory workers at St. Johns, P.Q.; electricians, helpers and apprentices at Victoria, B.C.; cleaners and dyers at Vancouver, B.C.; and wood heel factory workers at Montreal, P.Q. Settlement of the first four strikes above-mentioned was reached early in January, 1949, and of the last-mentioned about the middle of February, 1949.

TABLE III.—WORKERS INVOLVED IN STRIKES AND LOCKOUTS IN CANADA BY INDUSTRIES, 1901-1948*

| Total | 6,522 | 57,370 | 44,233 | 625,875 | 50,481 | 999,544 | 171,885 | 177,437 | 9,226 | 40,611 | 2,228,210 |

* In this table figures for strikes and lockouts extending over the end of the year are counted more than once.

† Two groups in which few strikes occurred are not shown in this table; they are: Finance—1929, 11 workers; 1942, 224 workers; 1948, 110 workers; Miscellaneous—1907, 6 workers; 1918, 157 workers; 1919, 44,399 workers (general strike); 1920, 119 workers.

‡ In this table the manufacturing group now includes shipbuilding since 1901; prior to 1942 shipbuilding had been in the construction group.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in Canada, publishing in the LABOUR GAZETTE each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each strike. Early in each year a review of the previous year has been given, including statistical tables analysing the data, and

since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the LABOUR GAZETTE are necessarily of a preliminary nature, the annual review constitutes the revised record for the year.

The annual review for 1930, appearing in the LABOUR GAZETTE, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries

TABLE IV.—TIME LOSS IN MAN-WORKING DAYS IN STRIKES AND LOCKOUTS IN CANADA BY INDUSTRIES 1901-1948

| Year | Industries† | | | | | | | | | |
|---------|------------------|--------------|----------------------------|--------------|-----------|---------------------|--------------------|---|--------|------------|

| | | | | | | | | | | 37,981,125 |

† Two groups in which few strikes occurred are not shown in this table; they are: Finance—1929, 150 days; 1942, 1,100 days; 1948, 1,535 days; Miscellaneous—1907, 6 days; 1918, 522 days; 1919, 1,033,770 days (general strike); 1920, 4,570 days.

‡ In this table the manufacturing group now includes shipbuilding since 1901; prior to 1942 shipbuilding had been in the construction group.

adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were made.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. In this

discussion the word "strikes" is frequently used for convenience in place of "strikes and lockouts".

A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting one working day or more. Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. A separate record of such strikes involving less than 10 days' time loss is maintained in the Department.

(Continued on page 31)

TABLE V.—STRIKES AND LOCKOUTS, 1948, BY INDUSTRIES

| Industry | Strikes and Lockouts | | Workers Involved | | Time Loss | |
|--|----------------------|-------------------|------------------|-------------------|------------------|-------------------|
| | Number | Per Cent of Total | Number | Per Cent of Total | Man-working Days | Per Cent of Total |

| Closed shop, union shop, maintenance of membership, check-off, etc..... | 14 | 2,644 | 88,783 | 7 | 512 | 10,966 | 1 | 21 | 415 | 10 | 2,138 | 27,705 | 66 | 24,372 | 523,364 |
| Increase in wages and other changes (3)..... | | | | | | | | | | | | | | | |
| Decrease in wages and other changes (4)..... | | | | | | | | | | | | | | | |
| Employment of workers for union activity or union jurisdiction (5)..... | | | | 4 | 346 | 10,235 | | | | 2 | 423 | 37,546 | 6 | 769 | 47,781 |
| Discharge of workers for union activity or union jurisdiction (5)..... | | | | | | | | | | 1 | 207 | 14,000 | 1 | 207 | 14,000 |
| Other union questions (6)..... | | | | | | | | | | | | | | | |
| Discharge of workers (1) (2) | 2 | 634 | 830 | 7 | 257 | 2,661 | 2 | 60 | 388 | | | | 11 | 951 | 3,269 |
| Employment of particular persons (4) | | | | 1 | 281 | 210 | | | | | | | 1 | 281 | 210 |
| Sympathy | | | | | | | | | | | | | | | |
| Unclassified | 1 | 1,000 | 1,000 | 1 | 200 | 50 | | | | | | | 2 | 1,200 | 1,050 |
| Total (2) | 32 | 7,114 | 105,699 | 39 | 6,231 | 35,827 | 62 | 25,904 | 642,036 | 21 | 3,571 | 102,231 | 154 | 42,820 | 885,793 |

(1) The figures for the group "Increase in wages and other changes" under "Union Questions—Collective Agreements" are included in these totals and are therefore shown twice in the table but counted only once in the final total, see footnote 2; in addition to increase in wages, "other changes" may include union security, reduced hours, changes in working conditions, vacations with pay, (2) These totals are not the sum of the above group totals, see footnote 1.
(3) These figures are not the sum of the above group totals, see footnote 1.
(4) Union jurisdiction refers to disputes between unions as to the character or class of work which their respective members perform, not to disputes re bargaining agency.
(5) Other than in connection with union questions.
(6) Including suspension and refusal to reinstate
(7) Inter-union dispute.

TABLE VII.—STRIKES AND LOCKOUTS, 1948, BY INDUSTRIES AND METHODS OF SETTLEMENT

| Industry | Negotiations between Parties | | Conciliation or Mediation | | Reference to Labour Boards, Commissioners, etc. | | Arbitration | | Return of Workers | | Replacement of Workers | | Indefinite or Unterminated | | Total | |

(1) Textiles, clothing, etc.; fur, leather and other animal products; boots and shoes (leather).

(2) Conciliation, provincial in 31 cases; provincial and civic in 2 cases; civic in one case; followed by negotiations in 12 cases.

TABLE VIII.—STRIKES AND LOCKOUTS, 1948, BY NUMBER OF WORKERS INVOLVED

| Number of Workers Involved | Strikes and Lockouts | | Workers Involved | | Time Loss | |
|----------------------------|----------------------|-------------------|------------------|-------------------|------------------|-------------------|
| | Number | Per Cent of Total | Number | Per Cent of Total | Man-Working Days | Per Cent of Total |
| Under 10..... | 7 | 4.5 | 51 | .1 | 314 | .0 |
| 10 and under 50..... | 52 | 33.8 | 1,491 | 3.5 | 15,030 | 1.7 |
| 50 and under 100..... | 22 | 14.3 | 1,489 | 3.5 | 15,005 | 1.7 |
| 100 and under 500..... | 55 | 35.7 | 11,665 | 27.2 | 263,544 | 29.8 |
| 500 and under 1,000..... | 8 | 5.2 | 5,302 | 12.4 | 47,650 | 5.4 |
| 1,000 and over..... | 10 | 6.5 | 22,822 | 53.3 | 544,250 | 61.4 |
| Total..... | 154 | 100.0 | 42,820 | 100.0 | 885,793 | 100.0 |

TABLE IX.—STRIKES AND LOCKOUTS, 1948, BY TIME LOSS

| Number of Man-Working Days Lost | Strikes and Lockouts | | Workers Involved | | Time Loss | |
|---------------------------------|----------------------|-------------------|------------------|-------------------|------------------|-------------------|
| | Number | Per Cent of Total | Number | Per Cent of Total | Man-Working Days | Per Cent of Total |
| Under 100..... | 38 | 24.7 | 1,803 | 4.2 | 1,918 | .2 |
| 100 and under 500..... | 37 | 24.0 | 4,716 | 11.0 | 8,254 | .9 |
| 500 and under 1,000..... | 23 | 14.9 | 3,153 | 7.4 | 14,526 | 1.6 |
| 1,000 and under 10,000..... | 43 | 27.9 | 16,301 | 38.1 | 143,295 | 16.2 |
| 10,000 and under 50,000..... | 10 | 6.5 | 4,108 | 9.6 | 190,800 | 21.6 |
| 50,000 and over..... | 3 | 2.0 | 12,739 | 29.7 | 527,000 | 59.5 |
| Total..... | 154 | 100.0 | 42,820 | 100.0 | 885,793 | 100.0 |

TABLE X.—STRIKES AND LOCKOUTS, 1948, BY DURATION

| Period of Duration | Strikes and Lockouts | | Workers Involved | | Time Loss | |
|--|----------------------|-------------------|------------------|-------------------|------------------|-------------------|
| | Number | Per Cent of Total | Number | Per Cent of Total | Man-Working Days | Per Cent of Total |
| Under 5 days..... | 65 | 42.2 | 15,841 | 37.0 | 23,716 | 2.7 |
| 5 days and under 10..... | 16 | 10.4 | 2,819 | 6.6 | 16,566 | 1.9 |
| 10 days and under 15..... | 16 | 10.4 | 2,724 | 6.4 | 30,210 | 3.4 |
| 15 days and under 20..... | 7 | 4.5 | 516 | 1.2 | 8,455 | 1.0 |
| 20 days and under 25..... | 13 | 8.4 | 2,215 | 5.2 | 45,920 | 5.2 |
| 25 days and under 50..... | 12 | 7.8 | 1,351 | 3.1 | 35,891 | 4.0 |
| 50 days and under 100..... | 10 | 6.5 | 5,715 | 13.3 | 336,825 | 38.0 |
| 100 days and over..... | 3 | 2.0 | 9,661 | 22.6 | 327,000 | 36.9 |
| Unterminated or carried over from previous year..... | 12 | 7.8 | 1,978 | 4.6 | 61,210 | 6.9 |
| Total..... | 154 | 100.0 | 42,820 | 100.0 | 885,793 | 100.0 |

TABLE XI.—STRIKES AND LOCKOUTS, 1948, BY PROVINCES

| Province | Strikes and Lockouts | | Workers Involved | | Time Loss | |
|---------------------------|----------------------|-------------------|------------------|-------------------|------------------|-------------------|
| | Number | Per Cent of Total | Number | Per Cent of Total | Man-Working Days | Per Cent of Total |
| Nova Scotia..... | 15 | 9.7 | 6,859 | 16.0 | 10,204 | 1.1 |
| Prince Edward Island..... | | | | | | |
| New Brunswick..... | 8 | 5.2 | 517 | 1.2 | 7,740 | .9 |
| Quebec..... | 31 | 20.1 | 8,652 | 20.2 | 233,316 | 26.3 |
| Ontario..... | 68 | 44.2 | 13,727 | 32.1 | 282,580 | 31.9 |
| Manitoba..... | 2 | 1.3 | 222 | .5 | 2,550 | .3 |
| Saskatchewan..... | 9 | 5.8 | 598 | 1.4 | 10,780 | 1.2 |
| Alberta..... | 5 | 3.3 | 146 | .3 | 1,573 | .2 |
| British Columbia..... | 10 | 6.5 | 2,165 | 5.1 | 21,060 | 2.4 |
| Interprovincial*..... | 6 | 3.9 | 9,934 | 23.2 | 315,990 | 35.7 |
| Total..... | 154 | 100.0 | 42,820 | 100.0 | 885,793 | 100.0 |

* Nova Scotia, 3 strikes involved 216 workers, with a time loss of 2,815 days; New Brunswick, 1 strike, 25 workers, 250 days; Quebec, 3 strikes, 217 workers, 4,725 days; Ontario, 2 strikes, 277 workers, 15,640 days; Alberta, 1 strike, 7,000 workers, 224,000 days; British Columbia, 3 strikes, 2,199 workers, 68,560 days. The figures for seaman's strikes included in this group are estimates only.

TABLE XII.—STRIKES AND LOCKOUTS, 1935-1948, BY MONTHS

| Month | Number of Strikes and Lockouts Beginning in Month | | | | | | | | | | |

† Number of employers or establishments.

‡ Employment conditions no longer affected.

§ In most cases the figures for strikes involving ships' personnel are estimates only, as it is difficult to secure precise details due to the nature of the industry.

¶ During the year the total time loss in all strikes listed due to workers indirectly affected, that is workers in the plant made idle because of the strike, amounted to about 24,000 days.

* Workers in other plants who may have been indirectly affected are not included. The following list shows the number of workers indirectly affected in each case.

| | | | | | | | |
|--------|-------|---------|-----|---------|----------|---------|-----|
| 1..... | 571 | 7..... | 900 | 13..... | 30..... | 19..... | 300 |
| 2..... | 140 | 8..... | 50 | 14..... | 45..... | 20..... | 25 |
| 3..... | 150 | 9..... | 200 | 15..... | 213..... | 21..... | 47 |
| 4..... | 760 | 10..... | 200 | 16..... | 325..... | 22..... | 13 |
| 5..... | 680 | 11..... | 102 | 17..... | 60..... | 23..... | 42 |
| 6..... | 1,232 | 12..... | 61 | 18..... | 100..... | | |

During 1948 there were three such strikes, involving 81 workers and causing a time loss of 16 man-days. In 1947, nine were recorded, involving 163 workers, with a time loss of 38 days.

In tables I and XIII the number of employers involved is given. In strikes which involve large numbers of shops or factories, such as clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, etc., only the approximate number of employers is usually reported.

The figures in this report are inclusive of all strikes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is not always possible to secure exact information but the estimates made in such cases are the result of painstaking methods in the collection of data, and it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number of working days during which each strike

lasted by the number of employees directly involved from time to time, so far as known. The number of employees recorded for each strike is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information was available, the numbers indirectly affected, if important, have been shown in footnotes to the table listing in detail the strikes and lockouts during the year. The workers indirectly affected in each strike are those in the establishment who are unable to continue work because of the stoppage but not participating in the strike. Data as to workers or idleness in other plants which may have been indirectly affected are not included in any of the statistics owing to the difficulty of securing exact information.

Charts

The accompanying charts show the results of strikes according to the number of workers involved and the time loss in man-working days by groups of industries each year, for the period 1914 to 1948.

Canada and Other Countries

Information is given in the accompanying tables as to industrial disputes resulting in work stoppages (strikes and lockouts) in certain countries since 1919, including Canada, showing the number of strikes and lockouts, the number of workers involved and the time loss in man-working days. The last extensive review of strikes and lockouts in Canada and 31 other countries was given in the *LABOUR GAZETTE* for March, 1940, p. 234. During the war years, and the dislocation following the war, statistics for many countries were not available and our yearly strike review since 1940 has been confined to seven countries, see the Supplement to the *LABOUR GAZETTE*, April, 1948, p. 32. Throughout the year figures for the different countries are given in the monthly articles in the *LABOUR GAZETTE*, as they are received in the Department. The review for this year includes data for such other countries as have resumed publication of statistical tables on strikes and lockouts and for which information has been received in the Department.

In the different countries variations occur in the definition of strikes and lockouts and in the methods of compilation of statistics. In nearly all countries no distinction is made between strikes and lockouts but in a few

cases the figures are for strikes only. In some cases the number of strikes and lockouts shown for the year is the number commencing during the year and in other cases it is the number in existence during the year, including those carried over from the previous year.

The figures published by some countries as to the number of workers involved show not only the number of workers directly involved but also the number of those indirectly affected, that is thrown out of work by strikes and lockouts to which they were not parties, but exact information on this point is not always given. In the tables herewith, the column showing the number of workers involved includes figures for the numbers directly involved or the total number directly and indirectly involved, according to the method adopted by the country concerned. For these reasons the figures for strikes and lockouts for the various countries are not exactly comparable.

Footnotes to the tables indicate the nature of the statistics with reference to the above points.

Many countries publish statistics dealing with disputes resulting in work stoppages

only once each year or even less frequently, the figures being issued in some cases after an interval of great length. Most countries revise their figures when additional facts are brought to light, even though such revisions may necessitate changes in

statistics published a considerable time previously. In nearly all cases statistics dealing with strikes and lockouts in other countries published in the LABOUR GAZETTE are obtained from official publications of the countries concerned.

(¹) Strikes and lockouts in existence in the period.

(²) Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused.

(³) Directly involved only. In 1948, time loss due to workers indirectly affected, that is workers in the plant made idle because of the strike, amounted to about 24,600 days. Workers and idleness in other plants which may have been indirectly affected are not included in any of the statistics.

(1) Work stoppages due to labour-management disputes beginning in the period.

(2) Work stoppages due to labour-management disputes which involve as many as six workers and last as long as a full day or shift are included.

(3) All workers in the plant made idle because of the dispute, but not workers or idleness in other plants indirectly affected, are included.

(4) Preliminary figures.

Number 5

May, 1949

The Labour Month in Brief

Aided by favourable weather conditions, employment improved rapidly during March and April. The average of wages and salaries in industry moved to a new record level at March 1, while the cost-of-living index continued stable. There was an increase in lost time from industrial disputes during March, largely as a result of strikes of asbestos workers and seamen.

Employment

Throughout the winter, industrial employment in Canada continued at a higher level than in the winter of 1948. At March 1 the Dominion Bureau of Statistics employment index, while below the record peak reached last December, was the highest ever registered for the time of year.

Unemployment, however, was also higher than in the previous year. The number of unplaced applicants registered at employment offices reached a peak of 265,000 late in February, which was 64,000 more than the highest point of 1948. With the onset

of spring this difference was sharply reduced; by April 28, when unplaced applicants totalled 204,000, the excess over the corresponding period in 1948 had dropped to 39,000.

It appeared that much of the winter unemployment was the result of unusually unfavourable weather conditions. On the other hand, the tendency towards seasonal variations in employment, which had been a feature of the pre-war Canadian economy, but which had lessened during the war and immediate post-war years, was again becoming marked.

Another factor affecting the generally sound employment situation, was the approach to more competitive business conditions, which was making some employers more cautious about enlarging their staffs; employment offices reported a growing insistence on relatively high qualifications for new employees. It was also indicated that absenteeism and labour turnover had decreased.

NUMBER OF HOUSES COMPLETED IN CANADA

By Month, Jan., 1948-Feb., 1949

Employers still appeared to view the situation with optimism, however. Industrial construction contracts awarded during the first quarter of 1949 exceeded those for all previous quarterly periods since 1939. Reports received by the Department of Labour on plant expansion in manufacturing also indicated a high level of activity and already more than 350 employers had signified their intention of expanding plant facilities during 1949.

Industrial Relations

The month of March was marked by strikes of seamen employed aboard East Coast deepsea dry cargo and passenger vessels. Otherwise, labour relations were harmonious in industries coming under Dominion jurisdiction, agreements being reached in Northwest Territories gold-mining operations and, with respect to officer personnel, by the principal coastal shipping companies on the West Coast.

In the Province of Quebec, a strike of 4,650 asbestos miners and mill-workers in various centres, which began in February, was still unteminated at the end of April. This strike caused 90 per cent of the strike idleness during the month of March.

For the first three months of this year, preliminary figures show 24 strikes and lock-outs, involving 9,750 workers, with a time loss of 217,157 days. For the similar period in 1948 there were 36 strikes, with 15,947 workers involved and a time loss of 333,098 days.

Based on the number of wage and salary workers in Canada, the time lost in March, 1949, amounted to 0.17 per cent of the estimated working time.

Cost of Living

Reversing slightly the downtrend of the two preceding months, Canada's official cost-of-living index moved up one-tenth of a point between March 1 and April 1, from 159.2 to 159.3. At this figure, it was 7.7 points above April 1 last year and three-tenths of a point below the peak level of 159.6 which has been touched three times—at the first of October and November last year and January this year. During the six months since reaching 159.6, the index has kept within seven-tenths of a point of that level.

The increase during the month was due to small advances in clothing, home furnishings and services, rents and the miscellaneous group, which offset a further drop in foods.

The food index declined in the period from 199.1 to 198.5, a substantial drop in the price of butter and small decreases in

lard and shortening over-balancing increases in beef, pork, milk, bread and flour.

Earnings

Average hourly earnings of hourly-rated personnel employed in manufacturing did not change between January 1 and February 1, 1949, remaining at 97.2 cents. This was the first time in a year that the movement had not been upward. At February 1 last year the hourly earnings had also maintained the January 1 level of 86.6 cents.

The accompanying chart of Real Weekly Earnings in Manufacturing shows a decline at February 1. This was caused by a reduction in average weekly working hours from the estimated figure of 43.2 for the week ending January 1 (adjusted for holidays) to 42.9, resulting in a reduction in average weekly earnings even though hourly earnings did not decline. Preliminary figures indicated a slight rise in average weekly earnings at March 1. For the eight leading industries, the figure for the week ending March 1 was \$43.17, the highest on record for the time of year.

Retail Sales

Dollar volume of retail sales in Canada has more than doubled during the last seven years, all regions of the country sharing in this general expansion—although trends have not been uniformly parallel—and all trades showing gains of substantial but varying proportions.

According to estimates by the Dominion Bureau of Statistics, consumer expenditures in Canadian retail stores in 1948 reached a total of \$7,276,400,000. This compares with \$3,436,800,000 in 1941, when the last complete measurement of Canada's retail business was made in the Decennial Census.

During the first two months of this year, sales amounted to \$960,270,000 as compared with \$935,530,000 in the same period of 1948, an increase of 2.6 per cent.

Foreign Trade

Canada's total foreign trade in February rose five per cent in value to \$413,100,000 from \$392,500,000 in the corresponding month last year. Imports for consumption were up 13 per cent, while domestic merchandise exports were down 1.6 per cent.

As a result of the increase in the value of imports and the slight falling-off in exports, Canada's overall favourable balance of trade with all countries in February was down to \$1,200,000 from \$28,100,000 a year ago. For the two months the credit balance was \$16,400,000 compared with \$61,100,000 a year earlier.

NOTES OF CURRENT INTEREST

Wage index higher in 1948 The preliminary index of wage rates calculated by the Research and Statistics Branch of the Department of Labour for 1948 was 196·3.

This is an increase of 13 per cent over 1947 and 96 per cent over the 1939 level.

Increases over 1947 in the main industrial divisions ranged from 7·4 per cent in Service (laundries) to 17·4 per cent in the Transportation and Communication group; the increase of 17 cents per hour received by the railway employees was the dominating influence on the movement of this latter group. In Manufacturing, the increase was 12·6 per cent.

The following table shows, for the six principal industrial divisions and the general average, index numbers for 1947 and 1948 with percentage increases. The index is on the base of rates in 1939 as 100.

| General Average | 1947 | 1948 (preliminary) | Percentage Increase 1948 over 1947 |
|----------------------------------|-------|--------------------|------------------------------------|
| Logging | 173·7 | 196·3 | 13·0 |
| Mining | 195·1 | 218·8 | 12·1 |
| Manufacturing | 161·7 | 182·1 | 12·6 |
| Construction | 183·3 | 206·4 | 12·6 |
| Transportation and Communication | 155·0 | 176·3 | 13·7 |
| Service | 149·3 | 175·3 | 17·4 |
| | 170·5 | 183·2 | 7·4 |

The data apply to the pay period preceding October 1 in each year except in the case of logging, Eastern Canada, where the date is February 1 in both years, and construction, where the date is July 1 in 1947.

Amendments to Industrial Relations Act not passed Three Bills to amend the Industrial Relations and Disputes Investigation Act were introduced in the House of Commons by CCF members during the Session which ended in April, but were not passed.

Bill 19, introduced by Mr. Arthur Williams (Ontario) was intended to provide for the revocable voluntary check-off of union dues. The Bill would have required an employer to grant this form of check-off upon request by a certified union.

Bill 20, introduced by Mr. Clarence Gillis (Cape Breton South) was intended to fix responsibility for enforcing the Act with the Labour Relations Board.

The third proposed amendment, Bill 21, was introduced by Mr. Stanley Knowles

(Winnipeg North Centre). Its purpose was to change the definition of "employee". At present the definition does not include: *"a manager or superintendent, or any other person who, in the opinion of the Board, exercises management functions or is employed in a confidential capacity in matters relating to labour relations."* Mr. Knowles' amendment would have eliminated the words printed in italics.

Italian free trade unionists welcomed by Minister Hon. Humphrey Mitchell, Minister of Labour, on behalf of the Federal Government on April 4 welcomed a delegation, representing the free trade unionists of Italy.

The delegation comprised Hon. Uulio Pastore, Mr. Giovanni Canini, Mr. Claudio Rocchi, who were accompanied by Lt.-Col.

| 1947 | 1948 (preliminary) | Percentage Increase 1948 over 1947 |

| 149·3 | 175·3 | 17·4 |
| 170·5 | 183·2 | 7·4 |

Thomas Lane, United States Labour Attaché at the United States Embassy in Rome.

Escorted by His Excellency, Mario Di Stefano, Italian Ambassador to Canada, the delegation held a long conference with the Minister in his office during the forenoon and subsequently were entertained at luncheon in the Parliamentary restaurant at which other guests were Hon. Laurence Steinhardt, United States Ambassador to Canada, Hon. Lionel Chevrier, Minister of Transport, members of Parliament and officials of the Department of Labour and other government departments.

In the course of his address of welcome, Mr. Mitchell paid high tribute to the contribution which the Italian people had made in the development of Canada, both those who had come here from Italy and settled and their descendants. Speeches were made by Hon. Mr. Pastore, Hon. Mr. Steinhardt and the Italian Ambassador. The keynote of the speech of Mr. Pastore was that the free trade unionists of Italy were determined to fight without faltering against Communism.

**CCL acts
against two
affiliates**

Action against two of its affiliated unions was taken late in March by the Executive Council of the Canadian Congress of Labour. The unions concerned were the International Union of Mine, Mill and Smelter Workers and the United Electrical, Radio and Machine Workers.

According to a statement issued by the Congress, the International Union of Mine, Mill and Smelter Workers was suspended indefinitely from the Congress on March 24 on the ground that it had refused to comply with majority decisions of the Congress and had vilified and deliberately attacked the Congress and its leadership.

This union had been suspended a few months earlier, but had subsequently been reinstated (L.G., Dec., 1948, pp. 1348, 1358).

"In January, 1949," according to the statement, "the Congress, acting on the repeated requests of workers in the Timmins and Port Colborne, Ontario, areas, undertook to organize workers who the Mine-Mill then claimed to represent. The workers in their constant petitions to the Congress had said that they were not satisfied with Mine-Mill and wanted representation through the Congress to provide them with collective bargaining representation. The records showed that the Congress had repeatedly offered to assist the International Union of Mine, Mill and Smelter Workers in its organizational efforts, but this offer had been repeatedly rejected. The Congress had requested Mine-Mill to withdraw in favour of a Congress organizational campaign. The IUMMSW had defied this majority decision of the CCL Executive and had proceeded to launch a vicious campaign of vilification and name-calling while the Congress undertook an active campaign to organize the workers in the areas concerned."

The Executive Council of the Congress, at the same meeting, excluded the United Electrical, Radio and Machine Workers from participation in Council meetings as a result of complaints made by the Ontario Federation of Labour.

The Federation based its complaint on an editorial appearing in the *UE News*, the official publication of the United Electrical Workers, which charged officers of the Federation with "union splitting, war mongering and using Hitler-like tactics."

The Federation, in its communication to the Council, charged the United Electrical Workers with a deliberate attempt to destroy the Federation. The suspension of representation on the Council was made pending an official investigation.

**Leaders of
CCL issue
statement on
Communism**

On April 5, A. R. Mosher, President, and Pat Conroy, Secretary-Treasurer of the Canadian Congress of Labour issued the following statement dealing with Communism in trade unions and the political rights of Congress members.

The Congress has, and will continue to take definite action to combat the Communist menace which is attempting to spread its poison throughout the national life of our country.

The time has come in the labour movement, and in other organizations, for Communist groups to be forced into an isolated position. There, under the spotlight of public opinion and deprived of the shadows of decent organizations in which they now attempt to hide, their ulterior purposes will be clearly revealed. This isolation will put an end to the insidious penetration of the Communist germ into the bloodstream of our political, economic, religious and social life.

There are within the ranks of our Congress a few unions under Communist leadership. Recently the Congress, by a decision of its Executive Council, found it necessary to take definite action against some of those unions. This action has not been taken because of the political views of those affected. It has been taken because the action of those concerned is considered, by an overwhelming majority of those democratically elected to conduct the affairs of the Canadian Congress of Labour, to be contrary to the interests of the Congress and of organized labour in general, and furthermore a menace to the nation.

The Congress recognizes and will defend the right of every individual to his political views. The fact that the Congress has, since 1943, recognized the CCF as the political arm of Labour is in no way an infringement of that right. Every member of every union in the CCL is, and always has been, free to use his franchise as he personally sees fit. That is a democratic right which the Congress proposes to protect on behalf of its membership. Any who suggest that the CCF in any way directs the policies of the CCL are merely echoing the Communist line as laid down for the Labour-Progressive Party by Tim Buck at Toronto on February 5.

Protection of the rights of any minority is, always has been, and will continue to be fundamental to labour. The fact that these rights exist gives no person or group the privilege of attempting to completely destroy the rights which the majority also enjoys. Those who follow slavishly the Communist Party line are a small minority within the Canadian Congress of Labour.

We are well aware that the vast majority of members in the unions that are sometimes considered Communist are not themselves either members nor supporters of the Communist Party. We are also well aware that they are Canadians whose first loyalty is to Canada and who would subscribe to the interests of Canada rather than the interests of Soviet Russia, should the need for such a decision arise.

The few who consistently place the interests of Soviet Russia above the interests of our own country have in some instances manoeuvred themselves into a position of

authority within their union. These people have repeatedly, and more frequently in recent months, refused to accept decisions democratically made by representatives of a very large majority of the CCL membership. At the same time they have launched, within their own organizations and publicly, so far as they have been able to attract attention, a deliberate and vicious campaign designed to destroy all those who refuse to follow the dictates of the Communist conspiracy.

It has long been a fundamental tactic of the Communist Party that should it find itself unable to control, it will attempt to destroy. It is our firm intention that such an effort shall not succeed so far as labour in Canada, as represented by our organization, is concerned.

Within our ranks and from other sources there is not and never has been any opposition to constructive criticism. We do not, however, propose to harbour within our house guests who deliberately attempt to poison the members of our family.

Any person or group who, in this time of crisis, provides a cloak of respectability for such people is harbouring in our midst potential traitors.

The Canadian Congress of Labour has proven its leadership of Canadian labour. We propose to continue to provide that leadership. Canadian labour has found its strength, as has labour in other countries, in unity of purpose and program. We are too well aware that in Fascist and Communist countries Labour has become a mere puppet of the state and free trade unions have ceased to exist. We do not intend that Canadian workers shall suffer that fate.

Withdrawal of CCL from world labour body The Executive Council of the Canadian Congress of Labour announced on March 24 its decision that the Congress should withdraw from the World Federation of Trade Unions.

At its January meeting the Council had strongly criticized the WFTU as a "political agency" whose "chief function is to operate as a sounding-board for Russian political policies" (L.G., March, 1949, p. 251). On January 19, the CIO in the United States and the British Trades Union Congress, as well as the Dutch central labour organization, had announced their withdrawal from the Federation.

Jobs being sought for tuberculous veterans There is a body of Canadian war veterans whose problem of rehabilitation, as it applies to finding suitable employment, has only recently become acute, and

of whom the general public has heard little. These are the veterans who came out of the wartime Armed Forces suffering from tuberculosis and other respiratory diseases.

There are about 8,000 men and women in this category—about 5,000 of whom are still in hospital or convalescing and yet to enter the labour market.

These young men and women are at a disadvantage for two reasons.

First, they have lost much of the initial advantage which would have been theirs had they been able to seek employment in the months immediately following the war, for veterans' rehabilitation is no longer in the public eye to the same extent as during the first months of demobilization, and the number and variety of actual job openings have naturally decreased markedly with the completion of the redistribution of manpower arising out of post-war reconversion.

Secondly, they must fight a general but completely erroneous prejudice that springs from a lack of knowledge of the nature of their illness, since many believe that these people who have suffered from tuberculosis are a potential source of infection for their fellow-workers. There is also a belief that a man or woman who has recovered from tuberculosis is physically limited to a few restricted types of employment.

According to the best authority, these beliefs are quite without foundation. There is no public health hazard to be feared from the veteran whose tuberculosis has healed, and all those veterans are healed who are referred by the Department of Veterans Affairs to the National Employment Service for employment. Their condition is non-infectious.

There are actually very few fields of employment which the veteran with "healed tuberculosis" cannot enter, and these fields do not include the more common types of jobs. No individual worker can satisfy the requirements for every job—he is barred from many by a lack of the necessary skill or experience. The ex-tuberculous veteran is no different. There are certain jobs he cannot take, but he can be selected for employment by normal standards, having due regard for such factors as his qualifications, employment history and appearance. However, to ensure that these veterans will not be placed in those positions which are unsuitable for them, their placement is handled by the Special Placements Division of the National Employment Service, which works very closely with the Department of Veterans Affairs.

Treated on this basis, these men and women are available to the great majority of employers.

The only types of work for which the tuberculous veteran should not be employed are the following:—

1. Jobs where he will be exposed to inorganic dust, such as silica dust in any form or jobs where he has to face a heavy concentration of organic dust, noxious odours or fumes which would be disagreeable to anyone regardless of his medical history.
2. Unusually heavy manual labour.
3. Jobs where the worker has sudden temperature changes or excess humidity to contend with.
4. Jobs where regular hours are not possible.

The veteran who has been discharged from hospital after treatment for tuberculosis is probably a safer employee from the health standpoint than one engaged in the ordinary way without a medical examination. Such people may have tuberculosis or some other communicable disease in an active state without being aware of it, while ex-tuberculosis patients are followed up very carefully by the public health authorities, and at the first sign of a relapse they are again placed under treatment.

Proper placement of these veterans is important, since it reduces the relapse rate to the point where absenteeism and labour turnover are no higher among these people than among other employees.

In the last ten years, at least 40,000 patients from Canadian sanatoria have returned to normal occupations, and the relapse rate has not been high. These people have shown that under normal working conditions they made excellent employees.

Prosecution of alleged combine of bread-bakers

The Minister of Justice informed the House of Commons on March 11 that instructions had been given to Crown counsel to undertake prosecution of an alleged combine in the bread-baking industry in the provinces of Saskatchewan, Alberta and British Columbia. The Minister had announced in January that Mr. C. S. Blanchard, K.C., of Calgary, had been appointed to review the evidence obtained in the inquiry under the Combines Investigation Act conducted by Mr. H. Carl Goldenberg, Montreal barrister, acting as special commissioner, and to give advice as to the course of action he considered justified. The report of the special commissioner, which contained the conclusion that five bread-baking companies and two

bakers' associations were parties to an alleged combine, was made public in December (L.G., Jan., 1949, pp. 31-4).

Acquittal of dental supplies companies upheld

In a decision delivered on February 28 the Ontario Court of Appeal dismissed, on technical grounds, the appeal by the Crown against the acquittal of eighteen companies who had been charged with unlawfully conspiring to unduly prevent or lessen competition in trade in dental supplies, contrary to Section 498 of the Criminal Code. At the conclusion of the trial on March 18, 1948, Mr. Justice Barlow of the Supreme Court of Ontario had directed the jury to bring in a verdict of not guilty after ruling that the substantial volume of documents which were relied upon as evidence by the Crown had not been sufficiently authenticated.

The Crown's case was based on the fact that documents had been obtained from possession of the accused companies and that if admitted as evidence all matters necessary to justify a conviction, such as the nature of the alleged illegal agreements, the authority of officers and employees to enter into these alleged agreements on behalf of their respective companies and control by the companies of the trade, were fully established by the contents of the documents themselves.

In upholding the ruling of the trial judge, Chief Justice Robertson, who delivered the judgment of the Court of Appeal, said that the criminal acts charged must be brought home to the companies and that the proof required in the case of a company differs somewhat from that required in the case of an individual. In explaining this he held that mere possession of documents by a company to the extent that the documents were on its premises or even in its files might not, without additional proof, afford grounds for an inference that their contents had come to the knowledge of some one having authority from the company to deal with the matters to which the documents related. The Chief Justice went on to say that one objection common to all the letters was the absence of evidence that the writing of them was authorized by any of the accused companies or that anyone having authority to bind the company had any knowledge of the sending of any of the letters or of their receipt or of their contents.

The Minister of Justice in reply to a question in the House of Commons on March 11 indicated that consideration is being given to the effects of the judgment

by officials of the Department and Crown counsel in the case (L.G., Sept., 1947, pp. 1264-5; March, 1948, p. 138; May, 1948, pp. 416-7).

Counselling of older unemployed workers in Ontario

It is now generally accepted that a youth on the threshold of his career and with no work experience needs guidance in his choice of an occupation if he is to relate his training, ability and interests to the occupational field.

Only recently, however, has it been considered that possibly guidance is just as necessary to the job applicant at the other end of the age-scale—the unemployed worker in the over-45 age group.

The National Employment Service, concerned with the problem of these older workers in the post-war years, carried on an active educational program addressed mainly to potential employers. However, in 1947, realizing that many of the unemployed workers in the over-45 age group might be as much in need of counselling as any employer with an older-worker prejudice, the National Employment Service authorized a survey of these workers. This survey, carried out in the Ontario Region, revealed that older workers made up a fairly constant proportion (from one-third to one-half) of all those registered for employment, while job orders for this age group were almost non-existent.

It also revealed that among the older unemployed workers in every locality there were those who, if they were to obtain suitable employment, would have to readjust their thinking. These were the older job applicants who were inclined, for a variety of reasons, to consider their employment field restricted to a certain type of job or to employment in a specific industry, while the facts of their cases suggested that they should seek other jobs, employment in other fields. They either did not recognize the fact or were reluctant to face the idea of change, reluctant to experiment along new lines. Also, the rebuffs and discouragement they met in their search for employment tended to destroy their self-confidence by building up their feeling of being unwanted.

It was therefore recommended that an experimental adult counselling service be set up and early in 1948 the Ontario Regional Office of the Unemployment Insurance Commission did inaugurate such an experimental service in Toronto.

In its first year of operation, the Counselling Service interviewed 1,138 persons, who had been unemployed for periods

ranging from two weeks to two years. Of the total, 630 secured employment after counselling, of whom 426 found jobs through their own efforts. Of those finding jobs, 266 were in the 45 to 59 age group and 299 were over sixty years of age.

When one of these men or women makes an appointment with the Counselling Service, he is interviewed as often and for as long a time as may be necessary to learn his background—his experience, education, hobbies and interests. If necessary, a report on his health is secured from his doctor. He is encouraged to think of new employment possibilities for himself, and he and the counsellor together draw up a list of jobs in which he has a good chance of success.

In a surprising number of cases, the discovery of these possibilities has been enough to stimulate the man to find a position for himself. In the other cases, since the Counselling Unit does not make placements, the man is referred to the Local National Employment Service Office. Here a liaison officer puts him in touch with job openings specially selected from the employment files as being suitable for his age group.

The men and women interviewed by the counselling service had many of the qualities which make a desirable employee. There were a notably stable group—982 had remained with one employer for at least five years, while many had records of twenty and thirty years of continuous employment. Contrary to popular opinion, the great majority were in good health, 642 giving their health as "excellent" or "good" and 441 as "fair", while only 55 considered themselves to be in poor health. More than half of those interviewed had attended secondary schools, and 109 of the number had studied at university.

Only six persons were found to be unemployable. All the others were discovered to be suitable for at least one occupation, and in most cases for more than one—183 were recommended for two jobs, 372 for three and 338 for four, while two persons were found to have opportunities in eight types of employment.

U.S.A. and Canada form industrial mobilization committee

The Department of External Affairs announced on April 12 the formation of a Joint United States-Canada Industrial Mobilization Committee by an exchange of notes between the two Governments in Ottawa, following a series of discussions that began last June.

The agreement recognizes the mutual interests and complementary characteristics of the resources of the two countries. It will be the function of the new Committee to exchange information and co-ordinate the views of the two Governments in connection with planning for industrial mobilization in the event of an emergency. The new Committee is further charged with co-operation with the existing United States-Canada Permanent Joint Board on Defence, established in 1940 by the late President Roosevelt and the Rt. Hon. W. L. Mackenzie King, then Prime Minister of Canada.

The Committee consists of the following:—

For the United States: Dr. John R. Steelman, Acting Chairman, National Security Resources Board; Mr. Donald F. Carpenter, Chairman, Munitions Board.

For Canada: Mr. Harry J. Carmichael, Chairman, Industrial Defence Board; Mr. S. D. Pierce, Associate Deputy Minister, Department of Trade and Commerce.

Co-operative Union of Canada active forty years In March, 1909, four men representing four Ontario co-operatives, met in Hamilton and organized "a union to be known as the Co-operative Union of Canada", with power to add to their number.

The extent to which this power to add to their number has been exercised was indicated by reports of the directors presented to the 200 delegates that attended the congress of the Union in Winnipeg, early in March. From the four original member associations in 1909, the number had grown to 922 by the end of 1948. The increase during 1948 alone was over 200.

Membership of co-operatives affiliated with the Co-operative Union at the end of 1948 was reported as being 628,745, an increase of over 50,000 from 1947. The Union owns its own wholesales and factories and has become an important factor in the fields of production and distribution throughout Canada.

In 1948, the total business done by the member groups amounted to \$472,954,035, an increase of more than \$54,000,000 over the preceding year. About 75 per cent of this business was reported to represent products marketed by the producer co-operatives, including the grain and live-stock pools. However, the merchandising associations outnumber the marketing associations about four to one. They engage in the distribution of food products, cloth-

ing, petroleum products, feed and fertilizers, fuel and building materials, etc.

Besides the marketing and merchandising affiliates, the union has some 20 service co-operatives, which function in such fields as housing, transportation, garage services, funeral services, medical services, cold storage and printing.

Co-ops urge amendments to Income Tax Act

A delegation of co-operative officials representing the Co-operative Union of Canada and Le Conseil Canadien de la Coopération met the Dominion Cabinet on April 4 and urged amendments to the Income Tax Act and the National Housing Act. Headed by A. W. Friesen, President of the Co-operative Union, the group also requested the enactment of a Dominion Co-operative Act to provide for the incorporation of co-operatives operating across provincial boundaries.

The submission urged that income of co-operatives be tax exempt provided that: (a) each member has only one vote; (b) the entire net surplus from member business (after necessary reserves) is allocated to members in proportion to patronage; (c) such amounts, if income, are taxable in the members' hands; (d) only a moderate rate of interest is paid on share capital; (e) income tax is paid on surpluses arising from non-member business and not returned to non-members.

After reiterating their stand of other years that the "3 per cent clause" discriminates against small co-operatives, the delegation gave statistics to show that the inconvenience caused both co-operative and governmental officials because of the "3 per cent clause" is out of all proportion to the amount of revenue collected. It was argued further that the clause destroys the fundamental non-profit feature of co-operative trading. (This clause requires co-operatives to pay income tax on a minimum income based on 3 per cent of the capital employed in the business.)

The brief also complained that failure to permit co-operatives to set aside necessary tax free reserves, as recommended by the Royal Commission on Co-operatives, was retarding the growth of the co-operative movement. The present requirement that co-operatives pay income tax on the instalment basis met with criticism because of the "impossibility" of estimating taxable income until after the deduction of patronage dividends.

In connection with the filing of tax returns it was requested that Section 40

of the Income Tax Act be amended to relieve the tax exempt credit unions and co-operatives from filing with the Revenue Department the complicated forms now in use. This would remove a large and unnecessary burden from hundreds of officers working on a purely voluntary basis.

Citing the fact that several co-operatives now serving more than one province find the Dominion Companies Act "inadequate" to their needs, the submission urged that suitable federal co-operative legislation be enacted this year.

After reminding the Ministers of a previous request that the National Housing Act be changed to provide 3 per cent loans for co-operative housing projects, the delegation strongly urged that such loans now be made available. The dire need of additional housing in Canada and the highly successful co-operative housing ventures in Scandinavia were put forward as arguments in favour of this demand.

Following Mr. Friesen's presentation, Mr. Léo Bérubé, Secretary of Le Conseil Canadien de la Coopération, briefly addressed the Prime Minister and stated that all French-speaking co-operators strongly endorsed the requests made in the brief.

Closely associated with Messrs. Friesen and Bérubé in the preparation and presentation of the brief were Senator Cyrille Vaillancourt, Manager of La Fédération des Caisses Populaires de Québec, and C. Gordon Smith, Canadian representative of CUNA. Also present were J. T. McDonald, Vice-President of the Co-operative Union of Canada; H. H. Hannam, President of the Canadian Federation of Agriculture; W. B. Francis, K.C., Solicitor for the Union; Raymond Houde, Head of the Income Tax Service of La Co-opérative Fédérée de Québec; François Jobin, Solicitor for Le Conseil; A. B. MacDonald, General Secretary, and Breen Melvin, Research Secretary, of the Co-operative Union.

Prime Minister St. Laurent was attended by: Hon. C. D. Howe, Hon. J. J. McCann, Hon. J. G. Gardiner, Hon. Lionel Chevrier, Hon. Paul Martin, Senator Wishart Robertson, Hon. Milton F. Gregg, Hon. Stuart Garson, and Hon. R. H. Winters.

Removal of restrictions on persons of Japanese origin

At April 1, 1949, the last federal restrictions were revoked for persons of Japanese origin who were evacuated from the Pacific coast soon after Pearl Harbor as a war emergency measure.

The Japanese are now free to travel, reside and work anywhere in British

Columbia, as in the rest of Canada, like any other citizens. According to reports, very few of the 14,500 Japanese now living in provinces east of the Rockies desire to return to their former homes on the West Coast.

Manitoba CMA makes legislative proposals

Recommendations relative to legislation affecting industry in Manitoba were presented to Premier D. L. Campbell and members of his Cabinet by the Special

Legislation Committee of the Manitoba Branch of the Canadian Manufacturers' Association, on January 21, according to a report in *Industrial Canada* for February.

Inasmuch as the Manitoba Labour Relations Act had been in force less than a year, the Committee felt that any amendments should be deferred. If, however, the Government had decided to review the Act at the 1949 session of the Legislature, the Committee suggested (1) clarification of the definition of "employee", so that there could be no doubt as to what employees should be included in any group eligible for collective bargaining; (2) widening of the definition of the word "strike" to include "slowdown"; (3) the use of the term "employees' organization" as well as the words "trade union", in order "to express better the intention of the Act"; (4) that employees be not permitted to use the employer's premises at any time for organizing purposes without the employer's consent; (5) that during any strike or threat of a strike "the (Labour Relations) Board on its own initiative, or on the request of either party affected, may take a secret vote of the employees"; (6) that all propaganda material distributed among employees should include the date of issue and the names of the persons responsible for its production; (7) "that the benefits of the Act should not be extended to organizations whose officers have not filed an affidavit with the Board that they are not members of, or affiliated with, the Communist party."

With respect to minimum wage laws, it was stated that they were designed to provide a "floor", not a fair wage; that when they "got out of line to any degree" they narrowed the margin between the minimum wage and a fair wage for skilled workers. "This", it was asserted, "would penalize skill." It was further recommended that if increases were granted (in minimum wages) "they should be kept within modest limits."

Referring to the Workmen's Compensation Act, it was urged that there be no

increase in benefits under the Act and that no amendments extending the basis of the Act should be considered.

Union security in Quebec

An article in the January issue of the *Industrial Relations Bulletin*, published by Laval University, gives statistics as to the extent of union security provisions in collective agreements in the Province of Quebec, as of September, 1948.

Analysis of collective agreements regulating labour relations in 1,823 industrial and commercial establishments in Quebec indicated that in 90.03 per cent of the cases (1,647 establishments) the employers and unions had agreed upon some form of security provisions.

Of these, 77.5 per cent (1,415 cases) contained "affiliation" provisions (closed shop, union shop, preferential shop, maintenance of membership) while 38.4 per cent (701 cases) provided for the check-off or Rand formula.

Industrial Relations conference at University of Montreal

Featuring addresses by three eminent authorities in the field of labour relations, a one-day conference on "The Economic Aspects of Industrial Relations" was held at the University of Montreal on March 14. Sponsored by the Industrial Relations Section of the University, the conference was attended by one hundred delegates from representative industries, trade union groups, and universities, as well as officials from provincial and federal Departments of Labour.

Dr. Sumner H. Slichter, Lamont Professor, Harvard University, speaking on the "Effect of Collective Bargaining on Production", said that while collective bargaining affects production in many ways, some favourable and some unfavourable, its net effect was not very great. One of the most important of the favourable results was the tendency of collective bargaining to speed up the rate of technological change. The pressure for wage increases has influenced management to try to increase man-hour output. Another favourable effect was seen in the tendency for limitation of production to disappear under most piece-work systems after a trade union entered the picture. Fear of arbitrary rate cutting was eliminated and production increased. One of the adverse effects of collective bargaining was the "make work" policy adopted by some trade unions. There was surprisingly little of this, most unions avoiding it because such rules appeal to and benefit only a part of the union membership.

Speaking on "Is Compulsory Arbitration of Wages Inevitable?", Dr. A. H. Frey, University of Pennsylvania Law School, stated that organization of trade unions was axiomatic because of the necessity to correct the collective bargaining position of the workers vis-à-vis employers. Compulsory arbitration was not in the interest of the employer, labour, or the public in a peacetime economy under a system of free enterprise. In voluntary arbitration lay the major hope of preserving collective bargaining in industrial relations. Arbitration should not be employed in contract negotiations because there is no term of references, no standard by which an issue can be decided. This does not apply to interpretation of a contract already in effect and it is in this field that voluntary arbitration should be adopted and extended. The speaker warned against the dangers inherent in passing laws prohibiting strikes. Flexibility, not rigidity, should be the cardinal feature of any strike legislation.

On the subject "Management Rights—What Changes are Occurring?", Douglas V. Brown, Professor of Industrial Management, Massachusetts Institute of Technology, said that in many cases property rights which management claimed as theirs would be more correctly described as ownership rights. A better approach to the question was to state that management has certain functions to perform and that it has certain rights to perform those functions. Decent industrial relations could not be built on the basis of insistence on abstract rights. Far better results are to be obtained by fostering participation of the workers. Stable industrial relations can be attained only when both management and union agree to discuss all questions of common interest to them.

At the closing dinner, Dr. Sidney Smith, President of the University of Toronto, said that the main concern of universities in the field of industrial relations should be the causes of industrial unrest and the abiding bases for industrial concord. The speaker said the field was one of contention, sometimes bitter, and universities which sought to avoid bothersome, embarrassing, and even vexatious issues, should keep out of it. On the other hand, he stated, that if universities are true to their obligations to work for the welfare of society they cannot stand aside in any "holier-than-thou" attitude. They must offer their resources to industry, not for the sake of management, or for the sake of unions, or for the sake of any particular industry, but always for the sake of society.

**Publication
of 1949
edition of
handbook
"Canada"**

Publication is announced of the 1949 edition of the *Official Handbook "Canada"*. Initiated 19 years ago to supplement the field of the *Canada Year Book*, it is especially

designed for ready use by business men, teachers, students, lecturers, and all those interested in the progress of Canada. Conveniently pocket-sized, it contains up-to-date official information on all phases of the country's economic organization.

Containing over 280 pages of text, more than 150 illustrations, including eight pages of coloured reproduction, 100 statistical tables, as well as diagrams, charts and lithographed maps, this nineteenth edition is attractive and readable. The frontispiece marks the decision of Newfoundland to enter the Canadian Confederation.

Special articles in this edition deal with "Canadian Petroleum Production and Outlook", "Citizenship and Canadian Unity", and "Canada's Interest in the Alaskan Fur Seal". The chapter material covers population and vital statistics, education, science and culture, public health and welfare services, veterans affairs, national income, agriculture, forestry, fisheries, furs, mines and minerals, water power, manufactures, transportation and communication, domestic trade, prices and price control, cost of living, foreign trade, international payments, construction, labour, banking and insurance, climatic data, and national parks of Canada.

The handbook is available at a price of 25 cents from the King's Printer, Ottawa.

**Training
of inmates
of penal
institutions
in Ontario**

Rapid development of the program inaugurated some two years ago, by the Ontario Department of Reform Institutions was announced in the Annual Report of the Department for the fiscal year ending March 31, 1948. Part I of the report covers the work done under the program in connection with reformatories, industrial farms and common gaols, while Part II is devoted to the work of the training schools. An excellent series of half-tone illustrations in both parts of the report visualizes some of the reformatory techniques being followed in the several institutions.

The program, already widely known as the "Ontario plan of reformatory treatment," includes replacement of common gaols by modern industrial farms; rapid expansion of the academic study programs in the reformatories and industrial farms to

the effective limit; provision for formal vocational training in conjunction with industrial and other work; and systematic and intensive efforts by carefully selected personnel to rehabilitate ex-prisoners.

The development of the program has been handicapped because of the scarcity and high cost of goods and materials for the construction and maintenance of the additional institutions required. Lack of sufficient new personnel also presented a serious difficulty. To meet the need for new construction for the time being, temporary buildings were provided for certain classes or types of prisoners. This released space in the permanent institutions already operating, and made it possible to correct a tendency to overcrowding in some institutions.

Proper staffing presented another type of handicap. Sufficient new personnel, having the essential qualifications, were not always available. A nucleus of experienced officers were promoted to "the important responsibility of developing the new institutions." Although this meant spreading "experienced staffs thinner," the report states that much has been done already in formal and practical staff training courses and it was expected that these new officers will give increasingly good service as they gain in experience.

**Distribution
of industry
in Britain**

The results of the Government's distribution of industry policy after three years of operation are reviewed by the Board of Trade in a White Paper, *Distribution of Industry* (Cmd. 7540), published last October.

The Distribution of Industry Act defines certain areas as "Development Areas", within which Government funds may be used for building factories for letting to private firms, for loans towards the cost of privately built factories, and for loans towards the establishment of approved new industries (L.G., June, 1945, pp. 812-13). The six areas scheduled by the Act experienced severe unemployment during the inter-war years. In those areas taken as a whole, unemployment averaged 38 per cent of insured workers in 1932 when the national average was 19 per cent, and even in 1939, when rearmament had put thousands of people back to work, unemployment was 13 per cent against a national average of 7 per cent.

"The situation in the Development Areas has changed for the better, both absolutely and relatively to the country at large," the report states. Not only is unemployment much smaller than shortly before the war,

but employment is much greater. Out of an estimated net increase of 250,000 new jobs between mid-1939 and mid-1948, roughly 105,000 are attributed by the Board to industrial developments introduced into the areas.

By June, 1948, 443 factories had been completed. At that time they were employing less than half their peak labour force. There were 740 others planned, of which 530 were under construction. These 1,183 projects were expected to employ 185,000 workpeople. Up to the end of August, £25 million had been provided for the purchase of land and the construction and conversion of factories since the war, and the ultimate cost of the present plans will be about £38 million.

Up to September 15 the Treasury had contracted to make loans to 19 companies amounting to £1,359,200. Some 159 acres of land had been cleared for industrial use by June, and grants had been made to local authorities to clear another 144 acres of amenity sites. To improve basic services, grants and loans amounting to about £9 million had been agreed to. Nearly 3,000 houses for key-workers had been sponsored.

Provision is also made under the scheme for persons suffering in various degrees from physical disability. Ten standard factories, known as "Grenfell factories", were being built in the South Wales area, to be rented to firms undertaking to employ men suffering from pneumoconiosis or other partial disablement to a number equal to at least 50 per cent of their labour force. Such firms will receive a rebate of half the normal rent. In addition, some 5,000 to 7,000 men whose disability is too serious to permit them to enter normal employment will be provided employment in what are called "Remploi factories" (L.G., Jan., 1947, p. 7).

It is pointed out that although the dependence of the development areas on capital goods industries has been somewhat diminished, the percentage of the insured population still engaged in them exceeds that for the country generally. Some of the new consumption goods industries have experienced troubles in recent months because the demand for their goods has fallen below the level of supply and they have had to discharge part of their labour force. "The creation of a sufficiently diversified economic structure is bound to be a slow process," the Board comments.

On the negative side, Government policy has been to limit industrial expansion of the "congested" areas, notably Greater London and Greater Birmingham. Since

the war, Greater London and the whole of the Midlands have had about 19 per cent of new industrial development, compared with 57 per cent between 1932 and 1938.

40-hour week for non-operating employees of U.S. railways

The 40-hour week is to be introduced next September 1 for employees of United States railways engaged in non-operating trades, as a result of an agreement reached in March between representatives of the railways and sixteen unions.

The 1,000,000 workers affected will receive the same pay for 40 hours that they now receive for 48, and will also receive an increase of 7 cents an hour retroactive to October 16, 1948.

The settlement was identical with the recommendations of a fact-finding board appointed under the Railway Labour Act.

According to the *New York Times* the agreement will provide Saturdays and Sundays off for about 500,000 workers, two consecutive days off on a staggered basis throughout the week for another 450,000 and either "accumulated" or split days off for less than 50,000. On the accumulated basis the worker would have Sunday off and accumulate rest days to be taken all together.

The agreement provides for overtime pay at time and a half for any work "outside of or in excess of" the five-day, forty-hour week.

The sixteen unions covered by the settlement are:—

International Association of Machinists, International Brotherhood of Boilermakers, International Brotherhood of Blacksmiths, Sheetmetal Workers International Association, International Brotherhood of Electrical Workers, Brotherhood of Railway Carmen, International Brotherhood of Firemen, Oilers and Helpers (these seven known as the shop crafts), Brotherhood of Maintenance-of-Way Employees, Brotherhood of Railroad Signalmen, Order of Railway Telegraphers, Brotherhood of Railway and Steamship Clerks, Railroad Yardmasters of America, National Organization of Masters, Mates and Pilots, National Marine Engineer Beneficial Association, International Longshoremen's Association, Hotel and Restaurant Employees and Bartenders.

All the unions are affiliated with the American Federation of Labour except the Machinists, who are unaffiliated, and the Marine Engineers, who are affiliated with the Congress of Industrial Organizations.

Excepted from the 40-hour week are about 4,000 yardmasters, who will continue on the 48-hour week but will get a wage increase of 10 cents an hour retroactive to October 16. Also excepted are some 30,000 employees now on a seven-day week who will go on a six-day week September 1 without loss of pay. About half of these are dining car employees.

\$3,500,000 union health centre opened in New York

Leading figures in Government, labour, medicine and public life joined with the president of the International Ladies' Garment Workers Union (AFL) in ceremonies marking the completion of a \$3,500,000 expansion program at the Union Health Centre in New York City, on February 19, and the re-dedication of the institution.

The occasion also marked the 35th anniversary of the founding of the first centre by the ILGWU, and 35 years of organized medical care for its membership.

The centre, which began with one physician and one room, now occupies six floors in the union-owned twenty-six story building on Seventh Avenue and, according to press reports, is "generally credited with being the largest clinic for diagnosis and ambulatory care in the country." On its staff are 148 physicians, 33 nurses, 27 technicians, 45 registrars, 5 pharmacists, and 150 clerical and maintenance employees.

The centre last year provided free to its members more than 410,000 medical services through 23 clinics, 7 diagnostic and therapeutic services, and five special departments. Medical services average 1,300 daily but as many as 10,000 have been recorded in a single day. Equipment includes the most modern approved by the medical profession.

Preventive medicine is an objective of the centre, and a special program of lay health education, a nutritional clinic, and a social welfare service, has been set up for its realization.

Economic and Social Council debates labour rights

Early in March the subjects of forced labour and trade union rights were debated by the Economic and Social Council of the United Nations.

A resolution on forced labour was introduced by the United States. It requests that a study of the subject be made by the International Labour Organization. In addition it requires the United Nations to ask all governments whether they will co-operate in an impartial inquiry into the extent of forced labour within their borders.

The resolution, which originated from a memorandum submitted by the American Federation of Labour, was adopted 14 votes to 3 with one abstention. Russia, White Russia, and Poland voted against the proposal, while Peru abstained.

Later the Council considered a memorandum from the World Federation of Trade Unions accusing a number of countries of violation of trade union rights (Argentina, Brazil, Burma, Chile, Cuba, Egypt, Greece, India, Iran, Lebanon, Portugal, Spain and South Africa).

The USSR moved that the Council recognize the WFTU charges, and request those countries listed which are members of the United Nations to report back on the measures taken to implement trade union rights.

A contrary resolution by New Zealand was adopted 14 votes to 3, the voting alignment being the same as in the resolution on forced labour. This resolution referred the matter to the ILO, which has already taken action on trade union rights (L.G., Sept., 1948, p. 974) and is continuing its work on the matter.

(Canada is not at present a member of the Economic and Social Council, membership on which rotates among the member states.)

Meeting of international trade union secretariats

Representatives of seventeen international trade secretariats met at Bournemouth, England early in March, under the chairmanship of J. H. Oldenbroek, Holland, secretary of the International Transport Workers' Federation.

The trade secretariats are groups of trade unions which cover the same industries in different countries.

Negotiations for their affiliation with the World Federation of Trade Unions broke down last year, and one of the problems considered by the Bournemouth meeting was the possible relationship between the secretariats and whatever new international federation of trade unions may be set up as a result of the withdrawal of British, American and other labour bodies from the WFTU.

The meeting appointed a continuing committee consisting of: J. H. Oldenbroek, Holland (International Transport Workers), Martin C. Bolle, Holland (Civil Servants and Public Employees), K. Ilg, Switzerland (Metal Workers), F. Gmur, Switzerland (Postal Workers), R. Coppock (Building Workers), Mark Hewitson, M.P. (Factory Workers), Dame Anne Loughlin

(Clothing Workers), J. Scott (Textile Workers), and James Young (Commercial and Clerical Employees).

Mr. Hewitson was named as chairman of the committee, which will have power to co-opt a tenth member from the Miners' International, which did not attend the Bournemouth meeting.

The London *Times* quotes Mr. Oldenbroek as saying that the committee will not only collect data about the secretariats, co-ordinate their activities, and present them in any discussions that may take place about a new international, but also co-ordinate their relations with the ILO and promote a more active contribution to the European Recovery Program. Though it is emphasized that this is in no sense a new international, it is inevitable that it will tend to take on some of the functions that might be performed by an international until a new world organization is established by the national trade union centres.

A "fierce onslaught" against the trade secretariats was to be expected from the WFTU, said Mr. Oldenbroek.

"It is highly desirable," he continued, "that the trade unions and their members in all countries should be fully enlightened on the subject. I will even go so far as to say that it is not enough to explain our position to our own members and to organizations with which we are on friendly terms—we have also a duty to inform the peoples of those countries in which the free press and the right of free expression have been extinguished, and where people hear nothing but cooked-up stories, twisted arguments, and distorted facts."

It was decided that the continuing committee should go into the question of giving practical help to the German trade unions, some of which are being taken in by the various secretariats.

The meeting recommended each secretariat to advise its affiliated unions against taking part in any conference convened by the WFTU.

Fatigue in cotton textile mills in India

A recent issue of the *Indian Labour Gazette* describes an investigation recently conducted in one of the cotton mills in Kanpur under the guidance of Prof. Kali Prasad to study the sources of fatigue and for determining the most suitable conditions of work and efficiency. The investigation was con-

finied to the spinning section of the mill. The following are the tentative conclusions reached:—

(1) It was found that the efficiency and output were lower in the first hour of the shift but later there was warming up and the performance was better.

(2) As compared with the morning and day shifts, there is a steep rise in output in the first spell of the night shift. This, however, is soon counterbalanced by a comparatively poorer rate of output in the second spell (2:30 to 6:30 a.m.).

(3) The point of maximum efficiency is reached in the second and third hours of work in all shifts.

(4) The efficiency of the worker is found to be better by about 7.5 per cent in winter months as compared to summer.

(5) In the opinion of the investigators, distance from the workers' dwellings to the place of work is a significant cause of the early onset of fatigue.

Profit sharing decree in Colombia

A Colombian decree of July 19, 1948, provides for profit sharing by workers, according to the February 15 issue of *Industry and Labour*, published by the International Labour Office.

The Decree applies to commercial establishments with a capital of 100,000 pesos or over (a peso equals approximately U.S. \$0.57) that permanently employ more than 20 workers; to industrial establishments with a capital of 100,000 pesos or over employing more than 30 workers; to agricultural and forestry undertakings with a capital of 200,000 pesos or over employing more than 30 workers, and to stock-raising farms with a capital of 200,000 pesos or over employing more than 20 workers.

A share of profits is to be distributed to all workers in the above establishments, that is, to all persons who have a contract of employment as defined by the relevant legislation. Partners who render personal services in the undertaking are also entitled to a share of the profits as if they were employed persons.

A share of profits is to be paid only to workers whose contract of employment covers the whole of the financial year to which the profits relate, but a worker who leaves voluntarily or who is dismissed may, if he has been employed for at least six months in the undertaking, receive a share of the profits proportionate to his period of employment unless he was dismissed for serious misconduct or other just cause.

The share of profits to be distributed among the workers is determined by the following scale:—

5 per cent of the amount by which profits exceed 12 per cent but do not exceed 15 per cent;

8 per cent of the amount by which profits exceed 15 per cent but do not exceed 18 per cent;

12 per cent of the amount by which profits exceed 18 per cent but do not exceed 25 per cent;

15 per cent of the amount by which profits exceed 25 per cent but do not exceed 35 per cent;

20 per cent of the amount by which profits exceed 35 per cent.

The participation of each worker in the profits to be distributed is determined in accordance with a point system based on the following factors: (a) wage or salary paid; (b) family responsibilities; (c) seniority; (d) regularity of attendance; (e) efficiency and honesty.

The individual share is proportionate to the number of points earned.

The share of any individual worker may not exceed half the wages or salary due to him for the financial year in question. Any excess is to be paid to the Colombian Social Security Institute, which will use the proceeds for the organization and maintenance of social security.

Only half the worker's share may be paid directly to him in cash.

The balance is to be paid into a bank or agency to be determined by the Government and will earn interest. Withdrawals of these deposits will only be permitted for the purchase of the worker's home or re-payment of mortgages; or in the event of unemployment, at the rate of not more than half the wages or salary earned in the last month of employment; or in the case of domestic trouble or for urgent family expenses.

The share of profits available for distribution is to be determined 90 days after the balancing of accounts and the settlement of income tax. Payments are to be made quarterly; the first will be made 90 days after the closing of accounts, or, except in the case of limited liability companies, after the payment of income tax.

The right to share in the profits does not give the worker the right to intervene in the management of the undertaking or to inspect its accounts. The examination of the accounts required for the purposes of the Decree devolves upon the State alone.

The payment of shares in profits will begin on January 1, 1950.

Plans to form new world labour federation Plans for a new world labour federation will be discussed at a preliminary meeting to be held at Geneva, Switzerland, on June 25 and 26, according to a New York *Times* despatch.

The meeting was decided on at a conference held in Washington recently between representatives of the British Trades Union Congress, the CIO and the American Federation of Labour.

The British TUC and the CIO withdrew earlier this year from the World Federation of Trade Unions (L.G., March, 1949, p. 251). The AFL had always refused to participate in the work of this Federation.

Invitations to attend the Geneva meeting have been sent to central labour organizations in other countries.

Geneva has been chosen as a meeting place because delegates from many nations will be attending the 32nd Session of the International Labour Conference which opens there on June 8.

An important feature of the Washington meeting was the willingness of the AFL and CIO to co-operate in forming the new organization. Later press despatches referred to the improved possibilities of unity talks between the two organizations as a result.

STATUTORY HOLIDAYS IN MANUFACTURING INDUSTRIES OCTOBER, 1947

All but three per cent of the manufacturing establishments, which employed two per cent of the workers, observed from one to 15 holidays, with one-third of both establishments and workers observing eight. Thirty-four per cent of the workers, employed in 42 per cent of the establishments, were not paid for any holidays observed. More than half the workers received pay for three to eight holidays and five per cent were in establishments paying for nine or more.

This study was prepared in the Research and Statistics Branch, Department of Labour, and is the second of a series of three dealing with working conditions in the manufacturing industries. Vacations with pay was dealt with in the previous issue of the *LABOUR GAZETTE* and a study on hours of work will be published in next month's issue.

As in last month's article on vacations with pay, the information for the present article on statutory holidays in manufacturing industries was compiled from replies to a general questionnaire on working conditions, sent to employers across Canada as part of the Department's annual wage survey covering the last pay period preceding October 1, 1947.

Returns from 4,339 establishments* employing 576,477 workers, exclusive of office staffs were used. This coverage was nearly two-thirds of the total number of wage-earners employed in manufacturing in 1947 and is believed to be representative of the industry as a whole.

The distribution by area was as follows:—

| | Estab- lishments | Workers |
|-------------------------|---------------------|----------------|
| Maritime Provinces | 281 | 31,266 |
| Quebec | 1,086 | 177,793 |
| Ontario | 1,941 | 285,921 |
| Manitoba | 187 | 16,724 |
| Saskatchewan | 136 | 5,505 |
| Alberta | 204 | 10,721 |
| British Columbia | 504 | 48,547 |
| Canada | 4,339 | 576,477 |

* See April *LABOUR GAZETTE*, page 407, for details of breakdown of establishments and workers in the various groups and sub-groups of industries.

Legislation on Public Holidays

Public holidays for factory workers have been provided by statute or by statutory authority in recent years in all the provinces but Ontario, New Brunswick and Prince Edward Island.

British Columbia and Manitoba factories must be closed on public holidays, unless permission is given for employment.

"Public holiday" in British Columbia, for this purpose, includes: Christmas, New Year's Day, Victoria Day, Dominion Day, Labour Day, Remembrance Day and any day declared to be a public holiday by Proclamation; also, in factories, either Good Friday or Easter Monday at the option of the employer.

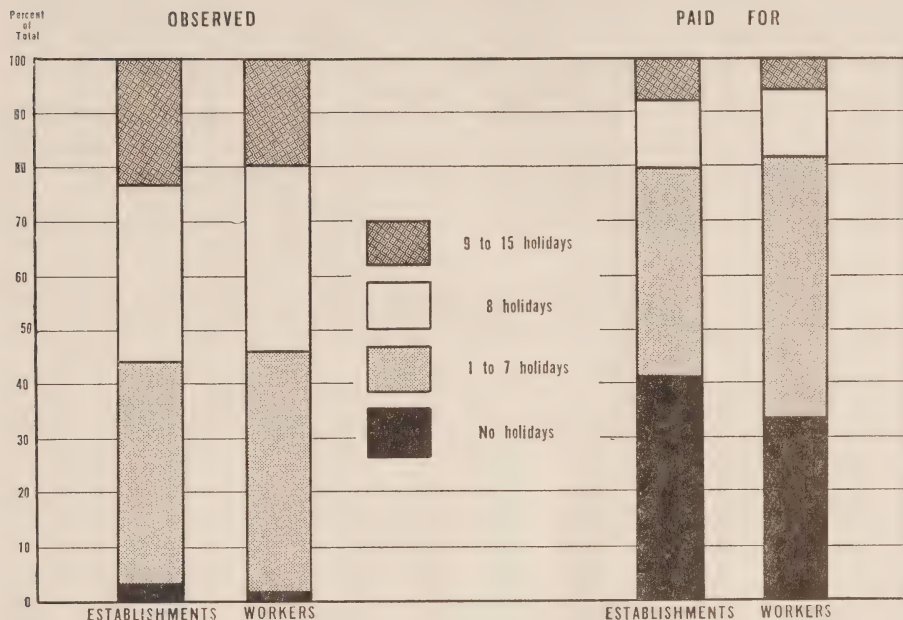

In Manitoba, the same days are "holidays", Good Friday being mandatory, and the King's Birthday specified in the Act.

Wages in relation to public holidays are dealt with under minimum wage laws in Alberta, Manitoba, Nova Scotia, Quebec and Saskatchewan.

Nova Scotia prohibits any deduction from the minimum weekly wage for women on account of a holiday. Alberta forbids any deduction for time not worked on a holiday when the employer's place of business is closed. In any minimum wage order the Board may provide that for work done on a holiday the overtime rate must be paid.

Manitoba requires payment of wages to women in factories for 8 holidays: New Year's Day, Good Friday, May 24, Dominion Day, Labour Day, Thanksgiving Day, Remembrance Day and Christmas Day. Permits are required for work in factories on these days, and a woman who works must be granted within six months a day's holiday with pay at the regular rate.

STATUTORY HOLIDAYS OBSERVED AND PAID FOR IN MANUFACTURING INDUSTRIES IN CANADA, 1947

**TABLE I.—STATUTORY HOLIDAYS OBSERVED AND PAID FOR IN
MANUFACTURING INDUSTRIES IN CANADA, 1947**

(Expressed in percentages of total establishments and workers covered in survey)

| Number of Statutory Holidays | By ESTABLISHMENTS | | By WORKERS | |
|---------------------------------|-------------------|--------------|--------------|--------------|
| | Observed | Paid for | Observed | Paid for |
| 1 day..... | .4 | 3.2 | .2 | 1.6 |
| 2 days..... | 2.1 | 5.4 | .8 | 4.0 |
| 3 "..... | 2.1 | 7.8 | 1.3 | 11.9 |
| 4 "..... | 3.2 | 4.2 | 6.5 | 10.6 |
| 5 "..... | 4.7 | 3.2 | 3.0 | 2.5 |
| 6 "..... | 12.6 | 7.8 | 16.4 | 11.3 |
| 7 "..... | 16.3 | 6.1 | 16.0 | 5.4 |
| 8 "..... | 31.6 | 12.9 | 33.8 | 13.8 |
| 9 "..... | 10.8 | 3.0 | 11.0 | 3.0 |
| 10 "..... | 7.9 | 2.8 | 5.1 | 1.1 |
| 11 to 13 "..... | 4.2 | 1.6 | 3.6 | .9 |
| 14 and 15 "..... | 1.1 | .2 | .6 | .2 |
| Total, 1 to 15 days..... | 97.0 | 58.2 | 98.3 | 66.3 |
| No holidays..... | 3.0 | 41.8 | 1.7 | 33.7 |
| Total..... | 100.0 | 100.0 | 100.0 | 100.0 |

Saskatchewan provides for the same 8 holidays in certain cases. Employees in all workplaces in cities, and those in factories, in towns and villages to which the Wage Orders apply who work at least 32 hours in a week in which a holiday occurs (36 hours in other workplaces in the eight larger towns and in the 49 smaller places) must be paid one day's wages at the regular rate for the holiday. For work done on a holiday, 2½ times a day's wages must be paid any factory workers. Workers

employed less than 32 hours weekly, or less than 36, as the case may be, must be paid for the holiday the proportion of a day's wages that the number of hours worked bears to 32 or 36, and for work on a holiday are to be remunerated in the same way as full-time workers.

Quebec General Minimum Wage Order 4 has no provision for public holidays but some special Orders require holidays to be observed or a punitive rate paid, e.g., cotton textiles, 4 legal holidays or payment

TABLE 2.—STATUTORY HOLIDAYS IN MANUFACTURING

| Number of Statutory Holidays | Observed | | | | | | | |
|------------------------------|-----------------------|---------|---------|----------|-------------------|---------|---------------------|---------|

| Total Workers..... | 31,266 | 177,793 | 285,921 | 16,724 | 5,505 | 10,721 | 48,547 | 576,477 |

at 1- $\frac{1}{10}$ the rate, and silk textiles, 6 holidays, but time lost for the observance of holidays (except Christmas and New Year's) may be made up by working at regular rates on the two Saturday mornings either before or after such holiday.

Public Holidays Observed and Paid for

Although 97 per cent of the establishments covered in the survey, employing 98 per cent of the workers, reported observing from one to 15 statutory holidays, a total

of 42 per cent did not pay their plant workers for any public holidays given if work were not performed which meant that thirty-four per cent of the workers received no pay for holidays observed. Nearly 85 per cent of the plants, employing about 87 per cent of the workers, observed six or more statutory holidays.

Approximately one-third of the establishments and workers observed eight statutory holidays, although only 13 per cent of the establishments, employing 14 per cent of the workers, paid for this number of holidays.

INDUSTRIES, BY PROVINCE OR REGION, 1947

| Number of Statutory Holidays | Paid For | | | | | | | |

In Ontario and the Prairie Provinces, the largest single group, both from the standpoint of establishments and workers, observed eight statutory holidays (Table 2). In British Columbia, an additional holiday was more common. In the Maritime Provinces, although the largest single group of establishments reported observing eight holidays, there were more workers observing six and in Quebec, the largest single group of establishments observed seven although on the basis of workers, eight holidays were more common.

In all provinces but Saskatchewan and Alberta, the largest single group of establishments in each area reported not paying for statutory holidays and in these two provinces payment for eight statutory holidays was common, with 45 per cent of the workers in establishments in the Prairie Provinces reporting payment for eight statutory holidays. In Ontario, about one-third of the establishments, employing about the same proportion of workers, paid for six to eight days and in Quebec, 17 per cent of the establishments, employing one-

quarter of the workers, paid for these same holidays with another 15 per cent of the workers receiving pay for three days.

Industries Observing and
Paying for Public Holidays

The most common number of holidays reported observed in most of the industries (Table 3) was eight with approximately one-third of both establishments and workers on this plan, as pointed out

previously. On the basis of number of establishments, Pulp and Paper, Fur and Its Products and Electric Current Production and Distribution are the exceptions to this rule, with the largest single group in the Pulp and Paper Industry observing four holidays; in Fur and Its Products, seven; and in Electric Current Production and Distribution, ten.

On the basis of the number of workers, the largest single group in each of five industries were in establishments observing

more or less than eight holidays. In the Pulp and Paper Industry, the largest single group observed four days; in Clothing, six; in Fur and Its Products, seven; in Electric Current Production and Distribution as well as Chemical Products, nine; and in Tobacco Products, eleven.

In each of nine of the 17 major groups of industries covered in the survey, the largest single group of establishments reported not paying for statutory holidays

(Table 4). These nine industries employed 72 per cent of the total number of workers and included over one-third of the total number of establishments in manufacturing which did not pay for statutory holidays.

The largest single group of establishments in three of the remaining industries, namely Pulp and Its Products, Printing and Publishing, and Chemical Products (Acids, Alkalis and Salts) reported paying for three statutory holidays. In Rubber and Its

Products and Breweries, the most common was six; in Fur and Its Products, seven; in Edible Animal Products, eight; and in Electrical Current Production and Distribution, ten.

Although one-third of the workers included in the survey did not receive pay for any statutory holidays, the largest single group of workers in each of nine of the industries received pay for three to nine days. In Pulp and Paper, 63 per cent were

paid for three; 40 per cent of the total number of workers in the Rubber, Tobacco and Brewery Products Industries received pay for six days; in Fur and Its Products, 23 per cent were paid for seven days; 48 per cent of the total number of workers in Printing and Publishing, Electrical Products and Edible Animal Products were paid for eight; and 45 per cent of the workers in Electric Current Production and Distribution received pay for nine holidays.

VOCATIONAL GUIDANCE IN CANADA

Vocational guidance is a means of helping the individual to discover the kind of job for which he is best qualified by aptitude, interest or special skill. In Canada vocational guidance is still in a relatively early stage, but has been developing rapidly during the last few years. In part it is growing out of the work of provincial education departments, and in part from the work of the Special Placements Division of the National Employment Service. The greatest strides are being made through co-operative community efforts as a part of local employment organization.

Every year some 150,000 young Canadians search for openings in the 20,000 or more different types of vocations that make up Canada's occupation pattern.¹ These young people must decide at once what vocation they shall follow, and yet comparatively few of them know what they want to do or what they are capable of doing well. Their greatest need at this time is for adequate occupational information and proper guidance which will help them in choosing the vocation best suited to their capacities and abilities, and lead to their satisfactory adjustment in the economic and social life of the community.

Too often, young people have accepted the first job that offered or have seized upon the best paying job of the moment, only to find later that they are in dead-end jobs, or that they are not happy in their work. As a result of this vocational maladjustment, many acquire a feeling of frustration and move about from job to job in quest of one that will provide some measure of satisfaction.

Many older persons need vocational guidance—persons with limited or no work experience, persons forced by altered employment conditions to change their occupations, the long-unemployed, and those with special needs, such as disabled persons and immigrants to Canada.

The effect upon the individual of mis-placement in work cannot be over-emphasized. Excessive fatigue, irritation, and even complete loss of emotional balance may result from the attempt on the part of a worker to continue in a job for which he is not adapted. Such effects are not only evident in contacts with

fellow-workers and supervisors, but they may be carried into the home. The worker in the wrong job suffers not only from difficulties in social adjustment, he suffers also from reduced earnings, from the probability of increased accidents, and from many other similarly direct handicaps, leading to the creation of a vicious circle of "misfortunes" from which he cannot extricate himself. The individual loses his jobs; he is crushed by the wheels of social life; he is discouraged and embittered; and he becomes a burden and a danger to the social body, which in the long run pays a heavy penalty for the failure to tackle systematically the fundamental problem of vocational placement.

At this point, it should be explained what is understood by the term "vocational guidance". The definition accepted by the National Employment Service is:—

the assistance given any individual to choose, enter upon, and progress in a given occupation, in keeping with his or her individual aptitudes, interests, and special skills, and in the light of the requirements and opportunities of the employment market, in order to ensure the maximum personal adjustment to the world of work.

In its fullest sense, vocational guidance as a process involves many fields of activity. It extends into the family and into the school; it draws upon medical and psychological science; it is a functional part of employment service activities, and is complementary to any program of vocational training; it requires the collaboration

Major A. E. Wood, who prepared this article, is Head of Vocational Guidance and Vocational Training, National Employment Service of Canada.

¹ Canadian Census Occupational Data for Counsellors, Education Bulletin No. 1, 1947, Dominion Bureau of Statistics.

of social workers and agencies, and of numerous other community organizations; it extends into industry itself, thus demanding the co-operation and understanding of management and labour. At a minimum, it includes the many activities involved in making an inventory or analysis of individual characteristics and of the requirements of the various jobs, in supplying comprehensive information about employment and training opportunities and careers in the different occupations and fields of work, and in counselling the individual and otherwise advising and aiding him to make his vocational decision and plans on the basis of this information.

It is generally recognized that the procedures being used in vocational guidance are still largely at the experimental stage. An attempt to draw up a set of standards and general principles which could gain international acceptance is currently being made by the International Labour Organization.

Vocational Guidance appeared for the first time as a separate item on the agenda of the International Labour Conference at the 31st Session, held at San Francisco in June, 1948.² It will receive further discussion at the 32nd Session of the Conference at Geneva in June of this year.

At San Francisco, the following general considerations emerged from the deliberations: (1) the present techniques and methods used in vocational guidance are accepted as largely experimental; (2) vocational guidance is a continuous process, starting during schooling, and the fundamental principles are the same irrespective of the age of the individual being assisted; (3) appropriate vocational guidance services should be available for those who wish to use them, on the basis of complete freedom for applicants to determine their own course of action; and (4) a set of standards and general principles in relation to vocational guidance, internationally accepted, would be useful to guide member countries in their development of such services.

The standards and principles tentatively accepted at San Francisco are in accord with those now being developed in Canada. They prescribe that vocational guidance policy and program should be determined through the co-operative efforts of the organizations and services concerned with

young persons in the transition from school to work. During the period of general education, occupational and industrial information should be provided, and there should be supervised visits to work-places. As the young person's education progresses, he should be aided in discovering his aptitudes, qualifications and interests. At the time of leaving school or entering employment, he should be given a personal interview designed to ensure the most complete analysis possible of his ability in relation to occupational opportunities and requirements. A record of his scholastic progress should be available, a medical examination should be made, and psychological and aptitude tests should be given if required.

The question arises as to where to look for vocational guidance in Canada. Obviously no one organization can be responsible for so many different activities.

The Special Placements Division of the National Employment Service of the Unemployment Insurance Commission is particularly active in the field of vocational guidance, especially as it affects the young first-jobber or the person entering the labour market for the first time. Youth Centres—employment offices exclusively for young people—have been established in a few of the largest cities.

Educational authorities are recognizing vocational guidance as a major responsibility, and guidance programs have been developed in many of the schools. No other agency can render this service more effectively than the school staff, who know each student's ability, aptitudes and interests.

Vocational Guidance in the Schools

There have been recent indications on the part of educational leaders in Canada, many of whom are directors of vocational guidance in provincial education departments, of an awakened interest in guidance broadly conceived to include the whole life of the pupil. The secondary schools can be expected to play their part in any planned program of vocational counselling. No doubt they will feel that their first responsibility is to their own senior and graduating students, who will need all the help they can get, but many will wish to extend their services to young people already out of school. Many of the young ex-service men and women are known to the school staffs, and their school achievement and personal background should be a matter of record.

² *Vocational Guidance, Report V (1), 31st Session of the International Labour Conference.* International Labour Office, Geneva.

Report of the Canadian Government Delegates to the 31st Session of the International Labour Conference. Department of Labour, Ottawa.

While it might fairly be said that up to this time our schools have not fully realized and assumed their responsibilities, either as guidance or adult education agencies, the present trend is encouraging and will, it may be assumed, shortly influence practice in many Canadian schools.

The opinion has been expressed that Canadian schools are handicapped in their vocational guidance program by the following factors:—

(1) Lack of trained personnel—only a limited number of teachers, principals, inspectors and superintendents have sufficient training in tests, measurements, the technique of counselling, and in psychology generally, to do more than indifferent work in this field; (2) The large number of rural schools, in which teachers change from year to year, and where, as a consequence, it is difficult to carry out any consistent policy of guidance even if the personnel were trained to do so; (3) The lack of provision by school boards for definite periods in the school timetable for guidance and counselling activities, it often being expected that these services will be carried on in spare periods or after hours; (4) The lack of necessary equipment and facilities for guidance, such as tests, counselling rooms, libraries, etc.; (5) Lack of understanding on the part of the public of the nature and importance of guidance.

Provincial Guidance Programs

An examination of the vocational guidance programs already established in the various provinces gives some indication of what educational authorities are attempting in this field.

British Columbia: This province has been a pioneer in the field of vocational guidance. As early as 1927, official sanction was given to work in guidance and to the appointment of vocational counsellors in the program of studies issued by the provincial Department of Education, on the occasion of the inauguration of junior high schools. Definite provision in the curriculum for guidance was made in 1937, when one period per week for group work was prescribed, and detailed plans for individual counselling and guidance records were outlined. The program of studies gave in detail, in one hundred and ten pages, the topics to be discussed during the weekly periods, and planned for a guidance system which would extend over the six years of secondary schooling.

A special feature of British Columbia's organization is the close relation maintained between guidance and all co-curricular activities.

The program of studies states, "The aim and object of this guidance program may be expressed in the words 'purposeful living'. Purposeful living is intended to include happiness, service in the community, correct attitudes in group relationships, orientation according to ability and aptitudes in the school program, and exploration of occupational fields. It includes also the conscious realization of the need for fruitful use of leisure time." This statement is representative of the broad point of view on Canadian guidance. A provincial director of guidance was appointed in British Columbia in August, 1944. Previously, a provincial division of tests and measurements had been organized in 1938.

The city of Victoria, in 1941, established a placement department which was primarily concerned with occupational counselling and job placement. In 1943, all the guidance services of the city were placed under a director of guidance and placement. A department of child study was organized in 1941. In the city of Vancouver, there were early attempts to solve the problem of vocational guidance. A Director of the Bureau of Tests and Measurements was appointed in 1927. Previously, there had been appointed at various times officials in charge of pupil adjustment and pre-vocational classes.

Alberta: The provincial program has for some time included social studies on vocations and guidance. Recently, the Department of Education decided to take steps to revise its curriculum in guidance and make the program compulsory for every intermediate and high school in the province. Several of the local communities have been working on guidance for some time. The School Board of the city of Calgary, in 1942, brought in a special lecturer from the United States to conduct a summer course in vocational guidance for its teachers. Summer courses have also been given at the provincial summer schools. With the recent appointment in 1948 of a Supervisor of Guidance under the Department of Education, Alberta is moving from the sporadic and casual handling of guidance toward a planned and integrated program.

Saskatchewan: Guidance received official recognition in 1944, when the Department of Education created a new branch under a Director of Guidance. The first guidance classes in Saskatchewan were organized in the city of Saskatoon in 1937. At first these were confined to classes in personal

and social guidance in Grades IX and X in one high school. In 1943, the High School Board instituted a program of guidance in all the high schools. The cities of Regina and Moose Jaw have also inaugurated vocational guidance in their high schools. Outside the larger cities, guidance is somewhat sporadic in character, depending on the interest and training of individual teachers. Considerable stimulation to the development of guidance has come from the College of Education of the University of Saskatchewan. In 1940, a summer course in vocational guidance at the graduate level was offered. Guidance has been stressed in a number of other courses, with the broad point of view being taken.

Manitoba: A Guidance Bureau was established in 1938 by the Department of Education, to provide occupational information and encourage individual counselling, as well as to promote study groups for the introduction of guidance techniques in the schools. As a result of this stimulation, a number of principals, teachers and school boards have interested themselves in studying and inaugurating guidance work. A joint committee of teachers from the city of Winnipeg and suburban areas has presented a report suggesting a program of guidance in junior and senior high schools. In some centres outside of the city of Winnipeg, preliminary work in guidance has already been undertaken and groups of teachers are studying the program. In Winnipeg, a start has been made in guidance and counselling in junior and senior high schools, but it has not yet developed into a comprehensive and well-integrated plan.

Ontario: Stimulus in this Province came from the formation of the Ontario Vocational Guidance Association in January, 1935. This Association, composed of approximately one hundred individuals interested in many phases of guidance, has been a positive force in stimulating the study and development of vocational guidance not only in Ontario but throughout Canada. The cities of London and Hamilton, and a number of other centres, established guidance departments in their schools. The result of these early experiments was the appointment of a provincial Director of Guidance. Beginning in 1944, there has been a rapid growth in the number of communities carrying on guidance programs. In 1943, a vocational guidance centre for the distribution of tests and other guidance material was established by the National Committee for Mental Hygiene (Canada). This centre has been

taken over by the Ontario College of Education and functions in close co-operation with its bureau of educational research. Vocational guidance in Ontario has been further advanced by special work done by the YMCA, industrial concerns, and the departments of psychology and education in the universities of the Province.

Quebec: Protestant and Roman Catholic schools are separately administered. Guidance has been stimulated, rather than directed, by the central authorities. The school board of the city of Westmount has been a pioneer in this field and has had a director of guidance for some years. In 1944, the National Breweries, together with the Department of Psychiatry at McGill University, sponsored a series of lectures on "Human Behaviour in Relation to Industry" and another series in 1945. The Psychological Association of Quebec has established a section of vocational guidance, and the French Vocational Guidance Association and the Federation of Jewish Philanthropies have also interested themselves in this subject. At present, guidance is being promoted by the National Employment Service, progressive individuals, professional associations, and school boards, rather than actively by the central authorities.

New Brunswick: The Saint John Vocational School now has a vocational guidance officer. Eight high schools give guidance in an informal and incidental manner. Some guidance is also given by the Director of Vocational Education and his officials. In general, the work is not as yet centrally promoted and directed by the provincial Department of Education.

Nova Scotia: Development of vocational guidance has taken place chiefly in the last eight years, and has taken the course of local and individual interest, followed by official action. Courses in vocational guidance were offered at the Nova Scotia summer school for the last two or three summer sessions preceding the war. In 1941, the provincial Department of Education began a series of weekly radio broadcasts on vocational guidance and, in 1942, the first local director of vocational guidance was appointed for the city of Halifax schools. In 1943, a provincial director of educational and vocational guidance was appointed. The approach is to interest communities in occupational guidance first, and then to broaden the concept to include personal and social guidance. In addition to the stimulation to guidance provided by the provincial director, leadership has also been given by members of the staff of the

Nova Scotia Technical College and other professional educators. A Director of Guidance for Sydney Schools, in Cape Breton Island, has recently been appointed.

Prince Edward Island: Vocational guidance in this Province is just coming into being. Prince of Wales College, which serves as the higher secondary school, is now engaged in developing a guidance program under a staff member who has been trained in the United States.

Newfoundland: The denominational educational system has not yet developed a formal program of vocational guidance.

National Employment Service

Intensive vocational guidance, which involves dealing with a variety of personality problems, is increasingly becoming the responsibility of the Government Employment office, which has as its specific task the bringing together of worker and employer. This practical assistance is part of the total guidance process, and one which people need and welcome, especially young people as they reach the point of actually seeking work.

Appreciating how bewildering to a young person of high school age the search for the first full-time job can be, the National Employment Service since its inauguration in 1941 has proceeded to develop a youth placement and vocational guidance system, calling for close co-operation between the local employment office and the youth-serving agencies of the community.

For purposes of placement the National Employment Service defines a youth as a person over the school-leaving age set by the province and under 21 years of age. However, older applicants may be included in this category if they are without work experience.

To place young persons in the right jobs involves a complete follow-through for every applicant—provision of all the facts about specific jobs, an appraisal of these facts in relation to his qualifications, arrangements for interviews with employers, and when the young applicant secures a job, a check-up to determine whether or not he has been satisfactorily placed.

The introduction of these "first-jobbers" to employment involves a particular approach and special efforts by employment officials not usually required for older and more employment-wise applicants. As a result, the placement of youthful applicants, or "first-jobbers", was made the responsibility of the Special Placements Division of the Employment Service. Special officers, particularly qualified and experienced to

assist youth in matters of employment, were appointed in 1943 to local employment offices to form Youth Placement Sections in the twenty largest towns and cities across the country. At the same time, all local employment offices were so organized as to be able to give special attention to youth placements.

As in the case of all applicants for employment, a comprehensive record of the youthful job applicant is necessary. Actually there is need for a more comprehensive case history of the first-jobbers, since in most cases a certain amount of vocational guidance is required in addition to the need for particular emphasis on selective placement (matching the applicant with registered employment vacancies). At the same time, the job of gathering the case history of the young applicant is made more difficult, especially in the larger centres, through the fact that he has not been previously employed. For information as to the character, interests, training skills and experience of young job applicants, the Employment Service has turned to the local educational authorities, church groups, recreational associations, sporting and social clubs, parent-teacher organizations, social service agencies and even the juvenile court.

Occupational Information: Of assistance to teachers, counsellors and others engaged in guidance work, is the occupational information program being carried on by the Department of Labour.

This program includes occupational monographs, primarily for the use of those engaged in guidance work, and pamphlets designed for the use of young people and others interested in learning about particular lines of work. Professions in natural science and engineering are dealt with in individual monographs incorporated in one book for the use of both counsellors and secondary school students.

Labour and Management

Two groups which must be considered in any program of vocational guidance are organized labour and management. Bearing in mind the concept of vocational guidance as accepted by the public and by the government, and that the objective of a vocational guidance program is to place individuals in the world of work in keeping with the terms stated in the definition, it is obviously logical that in the development of any community vocational guidance program, those persons who are already working should be consulted. Organized labour has a wealth of information at its

disposal. The employer can give valuable assistance to those communities engaged in a vocational guidance program in the way of making available information concerning job specifications, studies, conditions of work, occupational requirements, and all the variety of detail relating to his own particular business or industry.

A number of larger firms now give aptitude tests to prospective employees, thus utilizing for their special purposes one of the tools of vocational guidance. Other employers have come to look upon a community vocational guidance program as insurance against a continual influx of unsatisfactory employees. Still others, and regrettably there are many, have not yet interested themselves in the program.

Community Planning

From the list of agencies described, it is clear that the means of providing occupational counselling are available in the larger centres, and to a degree in smaller communities. The danger, indeed, is that in some cases the individual may be lost in a maze of conflicting advice.

The setting-up of a council, or committee of an existing council, in each community, whose purpose it would be to plan and co-ordinate an adequate occupational adjustment program, would seem to be the most effective way of dealing with the problem. On such a council or committee, all the major agencies capable of rendering useful service in this field should be represented. They would include the local employment office, schools, employers, labour, youth organizations, social agencies, the public library, and certainly some young people. The main responsibilities of such a council should be to clarify the division of functions in the field, to provide means for pooling information regarding individuals, and for the referral of cases, and the bringing to light of limitations and gaps in available services.

Already, through the efforts of the Youth Employment Section of local employment offices, Youth Guidance Councils have been set up in many centres throughout Canada, to co-ordinate the work of the local employ-

ment office with that of schools and other agencies. The membership of the Councils is drawn from the various youth-serving agencies, and youth itself is always represented.

A function of these councils is the development of cumulative records for the youth of their communities. Information concerning school reports, vocational and avocational interests, health, personality ratings, etc., is recorded, and is eventually passed on to the National Employment Service to assist in the placing of young persons in the jobs for which they are best fitted.

A further responsibility of the Youth Guidance Councils is that of interesting employers in the special needs of young people, and ascertaining from the employers the qualities they expect a prospective employee to possess.

It is important that provision should be made for the training of counsellors, and this task might well be the responsibility of the councils. In co-operation with universities, industrial personnel departments, and social agencies which have specialized in this field, it is possible to conduct institutes and short-term training courses that will introduce persons seeking training to modern scientific methods of testing and interviewing.

Another function is to carry out, in conjunction with the Employment Service, occupational surveys within the community to find out the number of persons in need of placement during a specified period, the nature and extent of employment opportunities, and the types of training and other vocational services available or lacking. Such data are essential to adequate planning.

The need for the services provided by Youth Guidance Councils has been felt for a long time by youth and adults alike, and will continue in these fast-moving days of changing market conditions and technological advances.

The National Employment Service will continue to encourage the satisfaction of this need through co-operative effort in the communities of Canada.

LEGISLATIVE PROPOSALS OF LABOUR ORGANIZATIONS

Similar principles in regard to labour legislation and economic policy were stressed by Canada's major labour organizations in their annual presentations to the Dominion Cabinet late in March, but the proposals differed in detail and in emphasis.

Broader social security legislation, measures to keep down prices, and Government support of low-cost housing were sought by all four delegations, representing the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Railway Transportation Brotherhoods.

The CCL submitted detailed proposals for amending the Industrial Relations and Disputes Investigation Act; but the comments of the TLC on this legislation were mainly that its coverage should be extended.

The CCCL devoted a major part of its brief to a request for the setting up of price arbitration boards. The brief of the Railway Brotherhoods dealt mainly with matters of specific concern to railway employees.

Trades and Labour Congress of Canada

Headed by President Percy Bengough, a large delegation from the Trades and Labour Congress of Canada presented to Prime Minister St. Laurent and members of the Federal Cabinet on March 24, a memorandum on legislation of interest to the Congress and its members.

In addition to President Bengough, the following Executive officers of the TLC were present: Vice-Presidents J. A. Whitebone, J. E. Beaudoin, W. Jenoves, C. E. Berg, Birt Showler and Frank Hall; Secretary-Treasurer, J. W. Buckley and Executive Secretary, A. E. Hemming.

Accompanying the Prime Minister were the following members of the Cabinet: Hon. Humphrey Mitchell, Minister of Labour; Hon. J. A. MacKinnon, Minister of Mines and Resources; Rt. Hon. C. D. Howe, Minister of Trade and Commerce; Hon. L. Chevrier, Minister of Transport; Hon. M. F. Gregg, Minister of Veterans Affairs; Hon. R. H. Winters, Minister of Reconstruction and Supply; Hon. Brooke Claxton, Minister of National Defence; Hon. A. Fournier, Minister of Public Works; Hon. Colin Gibson, Secretary of State; Hon. D. C. Abbott, Minister of Finance and Hon. Paul Martin, Minister of National Health and Welfare.

Before proceeding with the reading of the memorandum, Mr. Bengough congratulated the Prime Minister and the newer members of the Cabinet upon their elevation to high offices of State and expressed the hope that the harmonious relations which had existed

between the Congress and the Government in the past would continue. He commended the Government for its conduct of international affairs, notably the support given the United Nations Organization and the International Labour Office.

On the other hand, he stated that the TLC was unable to extend similar commendation to the Government for its activities in the national field. "The fear of unemployment and illness has again reared its ugly head among our people," and "old age pensioners are still required to live in a state of penury," he declared.

Referring briefly to the constitutional difficulties in the way of enacting uniform labour and social legislation, Mr. Bengough said he was not prepared to admit that the Constitution could not be amended "in line with present day needs and progress, while still protecting the rights of minority groups and specific geographical areas." Accordingly, the following requests were submitted for the consideration of the Government.

Social Security Act

The Government was urged to enact "at this session of Parliament an all embracing Social Security Act, on a contributory basis, for all citizens of Canada regardless of income," which would include health insurance, old age pensions, mothers' and widows' allowances and an amended Unemployment Insurance Act.

Health Insurance.—While commending the Government for making available to the provinces some \$30,000,000 for the extension of health facilities, it was contended that these grants “do not directly benefit the vast majority of our people who, in the event of illness, are required to pay prohibitively high medical and hospitalization fees.” It was declared that the financial success achieved by the many private plans of prepaid hospitalization and medical services for “relatively limited contributions” provided proof that a National plan of health insurance was practicable. The Government was, therefore, called upon “to establish a comprehensive National Health Insurance Act embodying accident and hospitalization benefits and medical, surgical and dental benefits.”

At this juncture, Mr. Bengough referred to the success of the British plan.

Old Age Pensions.—It was held that the “puny improvements” made in recent years in the amount of old age pensions were not a proper settlement of the problem, and consequently, “such pensions should be brought within the provisions of an all-embracing Social Security Act.”

The brief emphasized strongly “the desperate plight” of elderly citizens “who are dependent on the niggardly old age pensions.” The Government was urged to provide at once substantially larger payments to all aged and blind pensioners and that such pensions be made available without the means’ test.

As an addition to the brief, Mr. Bengough requested the reduction of the qualifying age to 60 years.

Mothers’ and Widows’ Allowances.—In view of the present high cost of living, mothers’ and widows’ allowances should be given an upward revision, under any national social security scheme, the brief declared.

Unemployment Insurance.—The brief approved amendments that had been made in the Unemployment Insurance Act, but further improvements were asked for. In particular, it was requested that benefit be paid in respect of dependent persons irrespective of whether or not they shared the same domicile as the unemployed insured worker.

Then too, “because of the hardships experienced in regard to holidays, it was suggested that subsection (c) of Section 29 of the Act be repealed. This subsection provides that “an insured person shall be deemed not to be unemployed on any day

that is recognized as a holiday for his grade, class or shift in the occupation, or at the factory, workshop, or other premises at which he is employed unless otherwise prescribed.”

It was asked, further that the scope of the Act be extended to cover all workers regardless of income or type of employment; also that benefit be increased in line with the increased cost of living; and further that once a claim has been established, the claimant should be “entitled to draw benefit at any time thereafter until all contributions to the claimant’s credit are exhausted.”

Mr. Bengough intimated further that there was a problem in seasonal work which he would like to take up with the Government at a later date.

Price Control

Reference was made in the brief to representations made by the TLC to the Prices Commission in December, 1948, in which reasons were given for requesting the enactment of legislation to establish the following: (1) reinstitute the policy of granting subsidies on basic food commodities and enforce a reduction in consumer prices; (2) reimpose the 100 per cent excess profits tax to meet the cost of subsidies and to eliminate profiteering; (3) establish a Price Control Board upon which labour would be represented, to review all applications for price increases.

It was also asked that all price increases put into effect in 1948 be reviewed.

Mr. Bengough added that “we are not in favour of the removal of subsidies and in many cases would like to see them continued.”

Taxation

The brief was in full accord with the principle of direct taxation on income “as the fairest form of taxation.” However, the justification for taxing those in the lower income brackets was questioned and the reductions in corporation income and excess profits taxes were criticized adversely. The Government was requested to raise the exemption on income taxes to \$2,400 a year for married persons and \$1,200 a year for single persons, that the exemption for each child be \$400 and that no portion of family allowances be taxable. Former requests that all sales taxes be removed were re-affirmed.

Cost of Living Index

The brief held that the present cost-of-living index did not “represent the buying habits of the majority of our people” and

recommended that a revision of the index be considered in order to restore public confidence in it.

Housing

The Dominion Government was asked to undertake in co-operation with the provincial and municipal governments, "a nation-wide low rental home-building program, financed by national credit, and designed to house, under decent conditions, ex-service personnel and those in low income brackets who cannot afford the high building costs of today."

National Labour Code

It was claimed that the Industrial Relations and Disputes Investigation Act, 1948, was "too limited in its scope to meet present-day needs." It was urged, therefore, that the provisions of the Act be extended to cover all government and municipal employees both in the Civil Service and those on hourly rates of pay.

Legislation was requested to prohibit the use of injunctions in labour disputes until both disputants have been given an opportunity to state their sides of the case.

Commenting on the enactment by provincial governments of "most discriminating laws directed against organized labour," the federal government was reproved for failure to disallow "such unjust laws."

Employment

The federal Department of Labour was commended for "doing a creditable job" in its campaign to encourage the employment of workers who are over 40 years of age. The brief held that "a major factor in the resistance of industrial and commercial enterprise to the hiring of persons over 40 years of age is the establishment of private pension plans in many industries." It was asserted that this condition provided further argument for the establishment of a nation-wide social security plan, to which the government, employers and workers would contribute.

Immigration

The brief favoured "a sound immigration policy" which should be controlled entirely by the federal Department of Labour. Inasmuch as "immigration to Canada will need to continue for many years," it was recommended that an Immigration Commission be established, with equal representation by government, labour and management, "to advise on, negotiate and administer all matters dealing with immigration."

Other Recommendations

Among other recommendations and suggestions made in the brief were the following:—

(1) the Government was requested to establish the 40-hour week for all employees in undertakings coming under government jurisdiction and that all such employees be granted the right to organize and bargain collectively;

(2) support was extended to the request of the Canadian Teachers' Federation for federal aid to education on a per capita basis;

(3) the Government was urged to consider setting up a board or commission to co-operate with the Department of the Secretary of State in formulating a program of education on Canadian citizenship, to the end that racial and religious discrimination might be overcome;

(4) that enactment by Parliament of a Canadian Bill of Rights to assure to every Canadian "freedom of speech, freedom of assembly and association, freedom of worship, freedom of the press, freedom from arbitrary arrest and detention and equal opportunity to all, regardless of race, national origin, colour or creed;"

(5) the setting up of a Parliamentary committee to study the sections of the Canada Shipping Act affecting labour, "with a view to introducing amendments to bring such sections in line with Canadian requirements and practices;"

(6) the building of more ships in Canadian yards for Canada's merchant marine was strongly urged, "and also that all ships of Canadian registry be operated by Canadian officers and seamen at wages, and under working conditions, in accord with Canadian standards;

(7) that "practical means be found, not only to maintain, but to increase Canada's foreign trade;"

(8) that the Canadian Broadcasting Corporation be maintained as a government-owned utility, with full control in the issuing of licences for the operation of all Canadian broadcasting stations;

(9) that legislation be enacted to require "all railways in Canada to provide suitable car shops at car repair points;"

(10) that the Government make "a true and fair valuation" of the duties performed by postal workers, including overtime, double time and work on Sundays and statutory holidays, as requested by the Canadian Postal Employees' Association;

(11) that steel production mills be established in Canada to meet more adequately the needs of the construction industry and to offset the shortage of skelp required in the manufacture of steel piping;

(12) that the franchise be extended to all Canadian citizens over the age of 18 years.

Prime Minister's Reply

In his reply, the Prime Minister, Rt. Hon. Louis St. Laurent, expressed his appreciation of the attitude of the Congress in its approach to the problems set forth in the brief. "I know the submission is an honest approach toward solutions that would work for the benefit of all Canadian citizens and not as a privilege for a special class, and I know you feel we are as objective in our attitude on behalf of the Canadian people as are the members of the Congress," stated the Prime Minister.

Referring to such matters as would entail amendments to the British North America Act, the Prime Minister pointed out that under changing world conditions "some shift is inevitable," yet such things must be done "with the approval of an overwhelming majority of Canadians," otherwise dissension and controversy would defeat the objectives sought. In this connection he lauded the efforts of the Congress and other bodies "in conditioning public opinion toward these objectives."

The Prime Minister noted the general acceptance of the Unemployment Insurance Act. "The large majority of Canadians are satisfied that it has been a good thing for Canada" and he thought that this trend of thought will permit more things being done on a national scale. He urged the delegation "to continue to preach the doctrine that these are not nine or ten separate nations here, loosely associated, but that we are all one nation looking towards the same objectives."

Referring to the contributory feature of unemployment insurance, he told the delegation he was not sure "we had reached the point of universal acceptance of contributions for other forms of social security. There is progress being made but we may have to take it in steps and not in one sweep. More and more people in Canada realize that these social security services must be paid for." He favoured the contributory system.

He pointed to private sickness insurance schemes as conditioning public opinion to the desirability of such a system on a national scale. "Last year," observed the Prime Minister, "we thought that our introduction of health grants would help to further stimulate development of medical training." He pointed out that there was no shortage of doctors but of medical aids.

Of the proposed national health plan, he declared he knew of no hospital beds that were unfilled. In view of this, legislation

giving the right to hospital care to all who needed it would be "putting the cart before the horse."

The Federal Government's national health plan grants were designed to provide hospital accommodation. When the hospitals and doctors were available, legislation such as the Congress asked would come "almost automatically."

In answer to the Congress' requests for a Dominion Government sponsored low-rental housing program, he said he was impressed with the Regent Park project in Toronto. He believed that housing schemes must be initiated and administered by the people in the locality where they originated.

On taxation, the Prime Minister considered that "the Government had done its best on the budget." It may be demonstrated "that we can still do more, but we have given an earnest of our desire to distribute taxation as fairly as possible."

Referring to the section of the brief dealing with "restrictive provincial labour legislation" (obviously a reference to the Prince Edward Island Bill, later withdrawn) wherein the Government was criticized for not "immediately disallowing such unjust laws against labour" with the same "expeditiousness" had such been "against finance and industry," the Prime Minister, chiding, said:—

"I hope you really do not mean that. We make mistakes but we are as mindful of the interests of labour as of finance and industry."

Referring to the Canadian Broadcasting Corporation, he declared that "no one here is disposed to turn over this vital asset to private interests."

Minister of Labour's Reply

Hon. Humphrey Mitchell, Minister of Labour, told the delegation he thought the boom would continue and stated "the only countries that have produced a surplus is where free enterprise exists. The indications are that production for this year would be higher than in 1948."

The Minister continued that good judgment had been used in the establishment of unemployment insurance, and this had been demonstrated on the West coast this year where unusual weather conditions had had an adverse affect on employment.

Stating that much of the content of the brief dealt with provincial matters, the Minister pointed out that the line of demarcation between federal and provincial jurisdiction was a factor that must always

be considered. "Even Governments had their jurisdictional disputes," he quipped, and in this respect he referred to the recent referendum in Australia on this matter as well as the interjection of the constitutional issue in the Canadian House of Commons.

However, as a result of his observations while in Europe last year, he was convinced "we are one of the most united countries in the world and that progress in the things that labour advocates could only be brought about in an orderly manner."

"There is greater achievement possible in quiet negotiations around a conference table," he declared, referring to last year's railway dispute as a case in point. He recalled his experience as chairman of the National War Labour Board, which gave him a broad picture of the benefits of negotiation procedures. "In that we probably planned better than we knew," he observed.

Canadian Congress of Labour

A delegation from the Canadian Congress of Labour made its legislative proposals to the Government of Canada, on Friday, March 25. Receiving the delegation were the Rt. Hon. Louis S. St. Laurent, K.C., Prime Minister, the Hon. Humphrey Mitchell, Minister of Labour, and the following members of the Cabinet: the Rt. Hon. C. D. Howe, Minister of Trade and Commerce; the Hon. James A. MacKinnon, Minister of Mines and Resources; the Hon. Colin Gibson, Secretary of State; the Hon. Ernest Bertrand, K.C., Postmaster General; the Hon. Brooke Claxton, K.C., Minister of National Defence; the Hon. Lionel Chevrier, K.C., Minister of Transport; the Hon. D. C. Abbott, K.C., Minister of Finance; the Hon. James J. McCann, Minister of National Revenue; the Hon. Milton F. Gregg, V.C., Minister of Veterans Affairs; and the Hon. R. H. Winters, Minister of Reconstruction. Mr. Paul Emile Côté, M.P., Parliamentary Assistant to the Minister of Labour, and Mr. T. Reid, M.P., Parliamentary Assistant to the Minister of National Health and Welfare, were also present.

The Congress delegation was headed by Messrs. A. R. Mosher, President, and Pat Conroy, Secretary-Treasurer. Mr. Mosher opened the presentation by congratulating Mr. St. Laurent on his appointment as Prime Minister.

He considered the Trades and Labour Congress "had used good judgment in advocating the form of legislation we have at the moment," and he noted that the labour organizations had increased their membership which was an indication of good sense in the degree of co-operation between employers and employees.

He declared that labour organizations can do what no political party could do in conditioning the thinking of the people of this country. As indicative of this, he instanced the enactment of unemployment insurance, workmen's compensation and family allowances.

"I do not know of a better country than Canada and it is significant that almost everybody wants to come to North America," he said. He contrasted the experience of those who had lived under a dictatorship with those in this country who seemed to have other ideas of democratic freedom and allegiance.

The Brief, which was read by Mr. Conroy, emphasized, in particular, the subjects of housing, inflation and deflation, labour relations legislation and taxation.

External Affairs

In its Memorandum, the Congress expressed full approval of Canada's foreign policy. Re-affirming its belief that "the greatest hope for world peace and security is to be found in the United Nations," the Congress recognized, however, that to give "adequate assurance of protection against totalitarian aggression," regional pacts, as provided for in the United Nations Charter, were essential. Accordingly, the Congress expressed full approval of the North Atlantic Pact.

The Congress approved of the Government's efforts to promote trade with other countries, and expressed the hope that "with the lessening of the need for the restriction of trade with the United States, it will be possible to put into effect the Geneva trade treaties of 1947."

Inflation and Deflation

The Memorandum strongly criticized the Government's policy of removing price controls. It stated that the rising cost of living had led to demands for wage increases; and that these had usually lagged behind price increases, but were made an excuse for still further increases in prices.

Continuing, the Brief stated that although there were some indications that the peak of prices had been reached, nevertheless there were still possibilities of renewed inflationary pressures. The Brief therefore urged the use of price controls, subsidies, excess profits tax, and higher corporation income tax, to "maintain and strengthen our defences against inflation." It opposed devaluation of the Canadian dollar.

Referring to "widespread nervousness" about business conditions, especially in the United States, the Brief noted that any depression there was bound to have adverse effects in Canada. "Unemployment is already serious in British Columbia and the Maritime Provinces. We must therefore maintain and strengthen our defences also against deflation, by public investment and social security programs."

National Labour Code

The Congress renewed the opposition it has continuously expressed to the Industrial Relations and Disputes Investigation Act, adopted at the last session of Parliament. Among the features of the Act to which specific objection was taken were the following:—

- The cumbrous method of enforcement;

- The inadequacy of the penalties imposed on employers who refuse to bargain collectively;

- The involvement of unions in interminable and costly legal proceedings, and the danger of virtual nullification of the Act by judges with little or no acquaintance with industrial relations;

- The undermining of the authority of certified unions by permitting an employee to present his personal grievances to the employer over the head of the union;

- The vesting of authority in the hands of the Minister rather than the Board with respect to prosecution;

- The obscurity with regard to whether or not the Board's decision is final and binding, or subject to review by a magistrate, judge or court;

- The invitation to employers to evade the law by invoking the Board's right to revoke certification if it considers the union has lost its majority;

- The failure to prohibit industrial espionage systems or threats by an employer to shut down or remove his plant during a dispute.

The Congress also urged provision for a voluntary revocable check-off, as had been recommended by the House of Commons Industrial Relations Committee, and the barring of lawyers from conciliation board proceedings without the consent of the parties to a dispute and the Board itself.

The Brief stated further that the opportunity had been neglected of extending the scope of the Act so as to secure "a large measure of nation-wide uniformity in labour relations legislation." This could have been done, the Brief suggested, by several methods: "(a) by the inclusion of a section like Section 3 (c) of the Industrial Disputes Investigation Act, empowering the Governor in Council to bring provincial industries under national legislation in cases of national emergency; (b) by amendment of the British North America Act; (c) by using Section 94 of the British North America Act, which could establish uniformity for all the provinces except Quebec, without amending the Constitution. A further method would be to declare the plants of industries of national importance 'works for the general advantage of Canada,' as was done with grain elevators and with the Flin Flon mines.

"Instead of attempting any of these methods," the Brief continued, "the Government simply handed back jurisdiction to the provinces, dropping even the emergency powers which the old Act had given it. The result is that we now have seven different systems of collective bargaining legislation. Ontario, Nova Scotia and Manitoba have adopted substantially the Dominion Act, and New Brunswick has announced its intention of doing so. But Quebec, Prince Edward Island, Saskatchewan, Alberta and British Columbia all have their own Acts, differing widely from each other and from the Dominion-Ontario-Nova Scotia-Manitoba system; and the three chief industrial provinces are under three very different systems.

"This has two very bad results. In the first place, it leaves the National Government virtually helpless to deal with disputes in industries whose smooth functioning may be vital to the national economy. Second, the 'cooling off' periods before a strike can legally be called are so different that calling a legal strike in a nation-wide industry becomes a problem in higher mathematics. The Congress is not advocating strikes, which it regards as a last resort. But it believes that the right to strike is an essential democratic right, and that the present Balkanization of labour relations law constitutes a serious invasion of that right. Canadian workers ought not to be faced with the choice of breaking the law or having their traditional last weapon of self-defence torn from their hands by legal technicalities."

Social Security

The Brief approved of the national health measures which had been undertaken by the Government, and expressed the hope that this program would provide a basis for a national health insurance scheme.

It urged also the adoption of "a national social security program covering the whole field of health, invalidity, old age pensions, etc., in accordance with the principles of the British system of social security."

The question of pensions was declared to be particularly urgent. "Only a minority of workers are now covered by pension plans of any kind, and most of these plans are altogether inadequate for health and decency."

The Government was urged to enact legislation on this question at the present session of Parliament.

Amendment of the British North America Act

Recognizing that a number of its recommendations would require, for their full effectiveness, the amendment of the BNA Act, the Brief urged that an amendment be obtained so as to "bring within the jurisdiction of the Federal Government all matters which are of common interest to the Canadian people."

Housing

The Brief charged that "in spite of all the building that has taken place since the war, we have not only not overtaken the shortage, but we have failed to keep pace with the current annual increase in the number of families. In other words, the shortage is getting worse." It was asserted that low income families were the hardest hit by this situation.

Accordingly the Congress urged a large scale program of subsidized housing. It was emphasized that there was no suggestion that the Dominion Government "should become the landlord of the low-income families. Municipal housing authorities would be the landlords. There would be direct local responsibility for administration. But the Dominion would have to provide subsidies for suitable agreed projects."

The Memorandum approved "what the Government has done in housing so far," but urged "bold leadership, not simply willingness to consider proposals from provinces and municipalities."

Taxation

Expressing sympathy with the Government's policy of cyclical budgeting, involv-

ing the necessity for surpluses in periods of full employment, the Congress nevertheless contended that "the necessary revenue could be obtained by the restoration of the excess profits tax and high corporation income taxes, and that the burden of high prices on low-income families could be relieved by reducing sales and excise taxes and raising the exemptions for personal income tax, coupling this with maintenance of price controls."

The Brief approved the reductions in workers' taxes in the recent budget, but expressed the view "that the personal income tax exemption should have been raised to \$1,500 for single persons and \$2,500 for married persons, with \$500 for each dependent child."

Representation of Labour

The appointment of labour representatives on the Canadian Maritime Commission was approved.

In regard to the appointment of workers' delegates and advisers to International Labour Conferences, the Brief made the following statement: "The Congress has repeatedly urged that the Government follow in this respect the procedure laid down for the appointment of workers' delegates, which should be made in agreement with the representative bodies of organized labour in Canada. Representations made directly to the Minister of Labour have also been ineffective up to the present time, with the result that the Congress has had no alternative but to inform the Department that it will not nominate a technical adviser to the workers' delegate at the 32nd Session of the International Labour Conference, to be held in Geneva in June of this year."

Unemployment Insurance

Recent amendments to the Unemployment Insurance Act were "noted with pleasure" by the Congress. A number of further amendments were requested as follows: "the inclusion of employees of institutions, such as hospitals and similar establishments, as well as seasonal employees; the reduction or elimination of the nine-day waiting period at the beginning of a benefit year; the elimination of non-compensable days; an increase in the permissible spare-time earnings from \$1.50 to at least \$2 per day, and an increase in the scale of benefits generally to compensate for increases in the cost of living. Further, the Congress requests that workers be given unemployment benefits for the

second week of vacations when the plant in which they are ordinarily employed is closed down."

The Brief also requested that additional publicity be given in regard to workers' rights and obligations with respect to unemployment insurance.

Employment

Declaring that unemployment was increasing, the Brief urged immediate implementation of a program of public works to "absorb the slack" in employment. The Brief also called on the Government to "set an example to industry" by accepting into employment persons over 40 years of age.

Immigration

Reiterating its previous stand in favour of "a generous immigration program and policy," the Congress recommended: (1) that employment conditions of immigrants be not less than those in effect for other Canadians; (2) that the immigration policy of the Federal Government be administered by one department; (3) that organized labour be adequately represented on the federal bodies having jurisdiction over the choice and placement of prospective immigrants.

Other Recommendations

The Congress recommended the continuation of the Government's work in promoting union-management production committees on the widest possible scale.

It urged a policy of federal assistance to the provinces in order to "equalize and extend educational opportunities throughout the Dominion." It particularly asked for support to the Canadian Association for Adult Education.

It was asked that both the steel and packing-house industries be declared "works for the general advantage of Canada, thus bringing them under the Industrial Relations and Disputes Investigation Act." In order to increase steel production, it was recommended that the Government ascertain the potential requirements of the nation and establish publicly-owned facilities if necessary. The Congress repeated an earlier request that the Government establish a national council for the steel industry, on which labour, management and the Government would be represented, and which would "promote the development of the resources and manufacturing facilities of the industry."

Among the practical steps which might be taken to promote racial and religious

tolerance, the Congress asked for the "adoption of a Bill of Rights, greater emphasis upon the duties and responsibilities of citizenship, and the use of films and other methods of spreading among the people generally a realization of the contribution which is being made to the life of the nation by minority groups."

Other recommendations were as follows:—

- (1) The establishment of a guaranteed minimum annual wage of \$2,000 per year;
- (2) Increase in the pension rates of all pensioners in line with the increase in the cost of living;
- (3) The increase of old age pensions to \$60 per month without a means test, and the reduction of the eligible age from 70 to 60 years;
- (4) The expansion of Canada's ship-building industry, and preference to vessels built and registered in Canada in granting subsidies, mail contracts, etc.;
- (5) The establishment of a national fuel policy;
- (6) The building of a permanent crossing at the Strait of Canso;
- (7) The establishment of a railway rate-structure, which will eliminate discrimination against any part of the country and be fair and equitable to all forms of transport, and which will permit railway employees to obtain a reasonable living wage;
- (8) Extension of the franchise to all persons 18 years of age or older, who are otherwise eligible to vote;
- (9) The enactment of legislation outlawing injunctions obtained for the purpose of preventing peaceful picketing;
- (10) The awarding of Government contracts on the basis of a fair list showing employers in each trade and industry who pay union rates of wages and operate under union working conditions.

Rt. Hon. Louis S. St. Laurent

In replying to the presentation, the Prime Minister, Rt. Hon. Louis S. St. Laurent, made reference first to a suggestion in the Memorandum that past recommendations of the Congress had not been as effective as had been wished, and that there was "a widespread feeling among the workers represented by this delegation that such meetings are annual pilgrimages that do not produce any worthwhile practical results."

Mr. St. Laurent remarked that the Congress was "too modest" in intimating that no worthwhile results had been achieved. There had been important modifications in labour legislation since these annual presentations had commenced, and much of the credit was due to labour.

It was public opinion which determined what policies should be implemented. He noted particularly the paragraphs in the

Brief relating to External Affairs and declared that these represented the feeling throughout the country and reflected the educational work that "you and we have been doing." Labour's recommendations, he continued, are not ignored even if they can not always be implemented, but are carefully considered as setting forth the views of a responsible body of Canadian citizens as to what would benefit the whole community.

Dealing with the request that price controls and subsidies be re-established, he said that such measures could not be effective unless wages and salaries were also controlled. This would not be desirable in peacetime; such matters were better left to collective bargaining, and it would be unfortunate to make such a permanent departure from the Canadian way of living. There were circumstances when the State required rigid control of the economy but this should only be resorted to in time of crisis.

Dealing with the British North America Act he noted that this had been written 80 years ago, and said that it was quite possible that certain matters assigned to the provinces should now be handled on a national basis. Education was needed to produce the mental atmosphere that would make amendments acceptable to the Canadian people. The amendment of the British North America Act which had been necessary to provide for national unemployment insurance legislation had come when most people were ready for it. "We are not centralizers, taking away from the provinces," he declared, "but when problems become a national responsibility we will not shirk in dealing with them." Emphasizing the necessity for favourable public opinion, he declared unemployment insurance to be a model of how proper centralization can work for the benefit of the whole community. In regard to other social security measures, he said, "we must make haste at a pace that will not evoke opposition."

Dealing with housing he intimated that changes in legislation might be necessary, but pointed to the Regent Park Development in Toronto as an example of what might be done under the existing slum clearance provisions of the National Housing Act. He hoped that the success of this development would encourage other communities to co-operate and to prepare schemes which would be welcomed by the Government.

Honourable Humphrey Mitchell

In his remarks to the delegation, the Minister of Labour, Hon. Humphrey Mitchell, congratulated them on the drafting of the Brief. The wide range of topics covered, he said, illustrated the broadening scope of the labour movement.

Referring to his own experiences in the labour movement, he said it was "a far cry since the days when we talked of going to the Government cap in hand." Canada had become a better country in which to live and most of the changes had resulted from the representations made by labour organizations.

Dealing with representation at International Labour Conferences, he said that this was a difficult problem that had given him considerable concern. In years past, the Trades and Labour Congress, which was the predominant labour organization of Canada at the time the ILO was founded, had named the official workers' delegate. In an endeavour to get a broad cross section of the whole labour movement, other labour organizations had been given representation by the naming of advisers. He added that it was unfortunate that there was not a single labour movement in Canada.

He described the Industrial Relations and Disputes Investigation Act as "a great step forward." Reminding the delegates that it had only been in effect since last September, he urged that it be given "a good trial."

He paid tribute to labour for its enlightened attitude towards immigration. Regarding unemployment he said that the post-war situation had never become as serious as had been predicted, and that in British Columbia the weather had been the principal cause of recent difficulties.

He concluded by complimenting the Congress on its constructive approach to international relations. He emphasized that Canada did not want war, but added that the "bogey" of war was being used by certain groups.

A. R. Mosher

Mr. Mosher expressed disappointment that a more favourable answer had not been given to the Congress representations in regard to the labour code and ILO representation.

He charged that there was lack of recognition that a crisis existed and again urged more social security "to strengthen democracy at home," the reimposition of price controls, and more housing, stating that "at least 75 per cent" of Canadians would support these policies.

Canadian and Catholic Confederation of Labour

Led by President Gérard Picard, a delegation from the Canadian and Catholic Confederation of Labour appeared before members of the Cabinet on March 25.

The delegation was received by the Prime Minister, Rt. Hon. Louis S. St. Laurent, the Hon. Humphrey Mitchell, Minister of Labour, the Hon. Ernest Bertrand, Postmaster General, the Hon. Joseph Jean, Solicitor-General, the Hon. Brooke Claxton, Minister of National Defence, and Paul Emile Côté, Parliamentary Assistant to the Minister of Labour.

In opening the presentation, Mr. Picard expressed his congratulations to Mr. St. Laurent upon his elevation to the office of Prime Minister. He said that in the past year the Confederation had enjoyed the full co-operation of the Prime Minister and the Ministers of the Crown.

The Memorandum, which was read by Mr. Jean Marchand, Secretary of the Confederation, emphasized the question of prices.

Arbitration of Prices

It was declared that the workers, "who are the first victims of any economic upheavals," were "anxious and worried about their ultimate destiny in this whirlpool caused by blind forces which they can neither measure nor control."

Urging more information for the workers on "what, up until now, has been presented to them as 'the mysteries of economic life,'" the Memorandum expressed the view that private enterprise would "sooner or later suffer the fate which it already has suffered in the majority of the countries of Europe, if it is not reformed to render it more human and to make it more in conformity with the common good of all. Pompous declarations in its favour will change nothing if, actually, it operates in contradiction with the interests of society. It must not be forgotten that the main purpose of economic life is not private enterprise but the maximum production and distribution of material goods. And private enterprise will only be able to survive in the proportion that it realizes such an objective.

"There is no harm in itself to the attempt to make a profit but such attempt must never come in conflict with the vital interests of the nation itself. Unjustified price increases, arbitrary limitations of production and unrestrained and unrestricted competition, all are so many abuses which

lead to economic anarchy and to the destruction of the system of free enterprise. Not only should these abuses not be committed but the people must be convinced that they are not being committed. So the people should have whatever means necessary to check on and verify this.

"Private enterprise must accept with good will the fundamental reforms which are imperative and necessary and which do not mean its destruction. . . ."

The Memorandum urged the establishment, through concurrent Dominion and provincial legislation, of price arbitration boards. It was suggested "that the Provinces and the Dominion should have their own courts which they would administer within their respective jurisdiction, and should agree on the establishment of a national court of appeal which could be the court of first instance in the case of enterprises, producers or distributors normally under federal jurisdiction."

All primary or basic producers, and all distributors of essential services to the nation, before increasing the prices of their products or services, would be required to submit to the price arbitration court having jurisdiction a request to that effect, and the grounds on which it is based. The recommendations of these courts would not be binding, but should the grounds invoked by the producer or distributor be found insufficient, the court's decision would be published unless the petitioner withdrew his application. No producer coming under the act would be permitted to increase his prices until one month had elapsed after the publication of the recommendation of the arbitration court.

The courts would have "all the powers of royal inquiry commissions," and would "inquire into all spheres of economic life in order to discover abuses in the prices field and to expose them to the public."

The courts would be composed of representatives of producers, labour organizations, co-operatives and the Government.

Prices and Wages

The Confederation admitted that the argument would be raised that any form of price control must be accompanied by a control on wages.

In reply to this point, the Memorandum said:—

"It is obvious that Canadian wage-earners are not free to establish their own wages as they personally see fit. They are subject to the control of their respective

employer with the attitude of the latter being governed by certain economic factors such as labour market conditions, the actual cost of production, and profits, etc. One can say that, up to this particular point, wage-earners find themselves submitted to ordinary economic laws.

"But the State already long ago has realized that a certain supervision has to be exercised on wage-earners in their attempts to improve their material and social welfare. The State has noticed, for instance, that having recourse to strikes sometimes could compromise the common good of society as a whole. Those in authority, consequently, lost no time in taking the steps necessary to restrain the exercise of the right to strike. The State made it necessary for wage-earners first to submit their disputes to arbitration or conciliation boards, with the latter being called upon to make recommendations on the justification of their demands. Public opinion, by this means, is informed on the problems of wage-earners and can, and does, exercise pressure on the issue one way or the other.

"The CCCL is of the opinion that this supervision, which is exercised on the activities of wage-earners, also should be exercised on the producers of goods and on the distributors of services. Why should not such people, for instance, be obliged to submit to a tribunal their requests to be allowed to increase prices? The general public, assuredly, has just as much interest in the setting of prices as it has in the determining of wages."

Immigration

Dealing with immigration, the Confederation was of the opinion that there should be no question of immigration to Canada "until it is first assured that all Canadian citizens, able to work, actually have employment which enables them to live suitably and fittingly. Steps then should be taken to make sure that the increase of the population, by births, can be absorbed normally into our country's economic life. And consideration also should be given to the future of these new young Canadian citizens.

"Furthermore," the Memorandum continued, "even if circumstances make possible the elaboration of an immigration policy for Canada later on, the CCCL believes that such immigration should be limited and selective. . . . There is no doubt that the deplorable conditions in which certain populations are living show us that we should have humanitarian duties

towards them, and that we should either send them assistance or invite a certain number of them to come and settle down in our own country where they could make new homes for themselves. But, in the latter case, all such immigration should be selective."

Family Allowances

The Memorandum expressed "considerable enthusiasm" over the Government's plan to do away with the decreasing rate of family allowances for large families.

Beyond this, the CCCL believed that it would be advisable "to increase family allowances proportionately to the increase in the cost of living and to continue to pay allowances to children beyond the age of sixteen years when such children still are pursuing their studies."

Old Age Pensions

It was suggested that the amount of old age pensions be increased to \$50 a month and that the eligibility age be lowered to 65 years for men and to 60 years for women. This suggestion, it was stated, is in conformity with a recommendation made by the International Labour Office.

It was also asked that the full sum of the pension be left intact in cases where the annual income does not exceed \$500. "Furthermore, when a pensioner is receiving a pension of less than \$1,000 a year from a contributory pension fund, he or she should not be deprived of the advantages of the old age pension for this reason."

Mr. Marchand interjected the proposal that the old age pension be on a contributory basis, the Federal Government, employer and employee contributing. Under the present system, he said, the pensioner feels that he is receiving a "charity cheque."

Income Tax

In regard to income tax, the Memorandum asked for the extension of exemptions to \$1,500 for single persons, \$3,000 for married persons, and \$400 for each dependent, and suggested the re-imposition of the Excess Profits Tax to meet any shortage of revenue.

Mr. Marchand said, however, that the recent news of a reduction in income tax had been received with joy and relief by the workers, although it was felt that the Budget might bring price increases in some cases.

Other Recommendations

The Confederation asked for a policy requiring all Canadian shipping companies, along with those having vessels registered in Canada and sailing under the Canadian flag, to have their boats built and repaired in Canadian shipbuilding yards.

The Memorandum also asked for:—

An increase in French-Canadian representation in the Federal Civil Service;

Diplomatic relations with the Vatican;

An investigation into the leather industry;

A Canadian flag;

A Dominion-Provincial health insurance program;

Measures to make housing more accessible to citizens with low income.

(A brief on unemployment insurance was being submitted separately to the Unemployment Insurance Commission, the Confederation explained, outlining the organization's views on this subject.)

Reply of Mr. St. Laurent

Mr. St. Laurent thanked the Confederation and Mr. Picard for his kind words regarding his appointment to the high office of Prime Minister of Canada. He praised the constructive qualities of the Memorandum and the manner of its presentation.

Dealing with the Confederation's proposal for price arbitration courts, he noted that permanent Commissions already existed in some fields, such as railway and air transportation, and telephones and telegraphs. He also referred to the work of the

Combines Investigation Commission in investigating combines in certain industries. In regard to the general application of price tribunals, however, he had doubts as to whether public opinion would accept this idea.

In reply to the CCCL proposal on old age pensions, Mr. St. Laurent observed that a contributory social security plan would require an amendment to the British North America Act. People are fearful of many amendments to the Constitution, he said, but added that the Unemployment Insurance Act had necessitated an amendment, and that this had not harmed provincial autonomy. Amendments of this kind could be advantageous to all concerned, he believed.

In regard to representation at the Vatican, he thought that public opinion at the present time would interpret such an appointment as a religious move rather than a political one.

A national flag should be chosen only when there was complete unity on the subject, which did not exist at the present time.

In regard to housing, the Government was in favour of local initiative with the help of the Federal Government. The Federal and Ontario Governments had contributed jointly to help the removal of slums in Toronto; and it was desirable that such co-operation should occur elsewhere.

In closing, the Prime Minister announced that the Civil Service Commission had been instructed to find a suitable candidate for the position of Associate Editor (bilingual) to the *LABOUR GAZETTE*.

Railway Transportation Brotherhoods

The Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, representing 18 standard labour organizations, presented its annual brief on legislation to the Prime Minister and members of his Cabinet on March 24.

Prime Minister St. Laurent was accompanied by the following Ministers: Hon. Humphrey Mitchell, Minister of Labour; Hon. Colin Gibson, Secretary of State; Hon. Lionel Chevrier, Minister of Transport; Hon. Milton Gregg, Minister of Veterans Affairs; Hon. Paul Martin, Minister of Health and National Welfare; Hon. James A. MacKinnon, Minister of Mines and Resources; Hon. J. J. McCann, Minister of National Revenue; and Hon. Alphonse Fournier, Minister of Public Works.

The delegation from the Railroad Brotherhoods included: A. J. Kelly (Chairman), Brotherhood of Railroad Trainmen; J. B. Ward (Secretary), Brotherhood of Locomotive Engineers; W. H. Phillips (Vice-Chairman), Order of Railroad Telegraphers; J. G. McLean, Brotherhood of Locomotive Firemen and Enginemen; J. L. D. Ives, Order of Railway Conductors; and J. J. O'Grady, Brotherhood of Maintenance of Way Employees.

The Chairman of the delegation, Mr. Kelly, stated that while the Brotherhoods were concerned primarily with matters affecting transportation, they were also keenly interested in all phases of Canadian citizenship. The delegation was, he said, offering for the consideration of the Gov-

ernment "the collective views, of the large body of responsible citizens," members of the Brotherhoods and their families.

The Railway Act

Inasmuch as the Royal Commission on Transportation had been authorized to review and make representations with respect to railway transportation, the brief stated that the Brotherhoods planned to present their views to that body. Consequently reference to the Railway Act was confined to an appreciation of the consideration the Government had given to previous presentations of the Brotherhoods, especially with respect to the "Grade Crossing Fund" and the operation of the Hudson Bay Railway.

Customs Act

In view of the fact that warning signals and devices for use at railway crossings were imported from the United States, it was urged that such equipment should be admitted to Canada free of duty. These devices, it was asserted, had proven effective in reducing accident hazards, and if their importations free of duty was permitted, there would be an additional incentive to the railways to instal more of them, and the loss of customs revenue "would be but nominal."

International Highway Transport

For a number of years the Brotherhoods had in their annual presentations, drawn the attention of the Government to the privileges granted to United States trucking interests to move goods in bond by trucks on the highways between Niagara Falls and Windsor. During the war these trucking interests solicited the privilege as a war measure. Its continuance since the war had been urged by the same interests under the Geneva Trade Agreement. They had even suggested that United States approval to the granting of international water supply privileges for power purposes be made contingent upon the granting of these trucking rights. The Brief asked the Government to "use all appropriate means to protect the situation for our citizens."

St. Lawrence Waterways

It was contended in the brief that the value to Canada of the St. Lawrence waterway project was "theoretical, its cost very real, its need highly questionable, except for recently publicized ore traffic to benefit special interests, and its effect must be viewed with concern." The brief declared

the Brotherhoods' continued opposition to the entire project, but especially the proposal to include transportation facilities for ocean-going vessels, for the following reasons: "(1) It is not justified on the grounds of economic or national necessity; (2) the burden on Canadian taxpayers cannot be justified in the light of the very restricted special interests to be served and who would benefit."

Social Security

The Brief commended the Government for its interest in and study of social security plans to embrace the needs of less fortunate Canadian citizens. It was requested that in the development of any such plan, the pension rights of railway employees, built up by contributions over many years, be preserved. The brief asked that the Brotherhoods be given opportunities "to review any contemplated enactments" which the Government might have under consideration, in order that such representations might be made as may appear to be warranted.

Old Age Pensions

It was urged that "Dominion legislation be enacted—uniform in application—to provide a minimum monthly benefit of \$50 per month to Canadian citizens with reasonable resident qualifications, who have attained age 65, with the attending provisions that would recapture by taxation all such benefits paid which brought annual income in excess of \$3,000."

Medical Research and Health Services

While commending the Government for its promotion of services to reduce the incidence of tuberculosis, cancer and other common diseases, as well as preventive and curative measures, it was urged that a lead be given to co-ordinate further all authorities and facilities for preventive and curative treatment of disease.

It was also requested that steps be taken to correct faulty conditions in rest-houses, bunk-houses and boarding cars located on the property of railways operating under Dominion Charter.

Education

The opinion was expressed that the Federal Government "should recognize and accept a share of the responsibility for the education of our citizens and lend assistance where the need can be shown to be beyond the reasonable capacity of those on whom the burden now falls."

Income Tax

As in previous submissions of legislative proposals by the Brotherhoods, it was requested that the statutory exemptions (for income tax) be increased to \$1,200 for single persons and \$2,400 for those with dependents, also that an allowance of \$500 be made for each dependent.

Price Control

It was claimed that the enquiry by the Prices Commission concerning commodity prices had already revealed trade manipulations of prices which "caused a serious burden to the consumer." These revelations, it was asserted, presented "ample evidence of the need for authoritative price control in the essential articles contained in the household budget." Further, it was urged that "the cost of building materials and the home of the low- and average-wage-earner be subject to investigation."

Margarine

Discussing the production of margarine the conviction was expressed that "with proper supervision, inspection, distinctive marking to protect against fraud, our Canadian citizens should not be denied the choice to use it." However, it was emphasized that "its cost and sale price should be supervised and required to bear a reasonable relationship."

Immigration

Approval was expressed of a policy of selective immigration, but "a basic consideration should be qualifications for assimilation with Canadian citizenship."

Housing

While commending the action that had been taken to meet the demand for low-cost housing, it was felt that consideration might be given to assisting the building of "the average priced permanent homes, by control of allocation and price of materials necessary to the construction."

Radio Broadcasting

Previous recommendations supporting public ownership and Government control of radio broadcasting, under the trusteeship of the Canadian Broadcasting Corporation, were reaffirmed. It was urged further, that television "be controlled under the same policy (as that of radio) and in conformity with the provisions of the Canadian Broadcasting Act." If funds were required, the Brotherhoods favoured the granting of loans

to the CBC to encourage "the early institution and initial development of television in Canada."

Labour Representation on Public Bodies

The policy of granting labour representation on public bodies was commended, and it was suggested that the policy be extended to filling vacancies in the Senate.

Prime Minister's Comments

Prime Minister St. Laurent expressed his approval of the objective attitude taken by the Brotherhoods in the preparation and presentation of their legislative proposals. Consideration had been given to the interests, not only of labour, but of all Canadians. He thought it fortunate that responsible labour organizations were thus working for the general welfare of all the community.

The Government, he said, "leaves unions to themselves as much as possible, as they are responsible bodies" and could get better results without outside interference. Labour legislation was essential of course, but it should not be unduly arbitrary or restrictive.

Referring to the recent reductions in income taxation as set forth in the budget speech of the Minister of Finance, the Prime Minister felt that the Government had gone as far as conditions warranted. It tried to be fair and further experience might warrant other adjustments.

As to old age pensions, Mr. St. Laurent said that the problem was being studied constantly, especially on a contributory basis. He made reference to the constitutional difficulties to be overcome in connection with social security programs, as had been the case in connection with unemployment insurance. He thought the labour unions were performing a useful service in pressing for social security. Persistent pressure would help to create a public opinion that in time would enable the Government to consider the adoption of an all-embracing social security plan.

The Prime Minister expressed the opinion that the power development under consideration on the St. Lawrence river would probably be needed to meet the increasing demand for power. He felt that the generation of so much additional power, would result in important industrial expansion, which in turn would mean a large increase in business for the transportation companies.

Remarks by Minister of Labour

Hon. Humphrey Mitchell outlined the assistance to education given by the Dominion Government through the Training Branch of the Department of Labour. He pointed out that the provinces were watchful of their prerogatives, but there had been fruitful co-operation between them and the Dominion in such matters as youth

training, the rehabilitation training of veterans, apprenticeship training and the education of displaced persons in language and citizenship.

Referring to the demand for price controls, the Minister felt that this also required wage controls. Such controls were especially difficult to impose in times of peace, he said.

PROVINCIAL LABOUR ORGANIZATIONS

A number of provincial organizations affiliated with the Trades and Labour Congress of Canada and the Canadian Congress of Labour have recently submitted legislative proposals to the Governments of their respective Provinces.

Summaries of the proposals of several of these organizations were published in the March LABOUR GAZETTE. Reviewed below are the proposals of the British Columbia Federation of Labour (CCL); Nova Scotia Provincial Executive (TLC); Ontario Federation of Labour (CCL); Ontario Provincial Federation (TLC).

British Columbia Federation of Labour (CCL)

As a sequel to the annual convention of the British Columbia Federation of Labour (CCL) held in the autumn of 1948, the Executive of the Federation presented several legislative proposals to Premier Byron Johnson and members of his Cabinet at the end of February.

The Federation delegation was headed by William Stewart, President, Stewart Alsbury, First Vice-President, and George Home, Secretary-Treasurer.

Industrial Conciliation and Arbitration Act, 1947

This Act had been revised and amended at the 1948 session of the B.C. Legislature (L.G., Aug., 1948, p. 880).

The Federation criticized this Act as "the most unfavourable piece of legislation yet enacted by a B.C. Legislature." It called for twenty-two further amendments, the main purposes of which were to provide for: the elimination of company unions; a mandatory union shop; speed-up of conciliation proceedings; restrictions of the Labour Board's powers; and the elimination of the supervised strike vote and of unions as legal entities.

Hospital Act

The Executive commended the Government for having enacted the Hospital Act and expressed the opinion that it was "a step toward health insurance."

Several recommendations were suggested, among them that organized labour be given representation on the Advisory Council, and that all hospital authorities be compelled to provide without further delay, the necessary facilities to provide the services stipulated in the Act.

Workmen's Compensation Act

The following amendments to the Act were suggested:—

(1) that payments be increased to 100 per cent of earnings, with a minimum payment of \$25 per week;

(2) that pensions be adjusted upward to compensate for the increased cost of living;

(3) that minimum widows' pensions be set at \$100 per month;

(4) that pension awards to injured workmen who are forced as a result of injuries to take work at a lower rate of pay, should be at least equal to the loss in earning;

(5) that injured employees, when ordered by the doctor to return to work, be retained on the compensation payroll for at least two months, to enable them to readjust themselves to their jobs;

(6) that adjustments be made between an employer and the Workmen's Compensation Board to insure that injured employees, upon returning to work, should not receive less than if they had remained on compensation;

(7) that training, or refresher courses, should be set up by the Workmen's Compensation Board for employees recovering from injuries. It was claimed that, if such courses were provided, many cases would not require pensions;

(8) that it be made unlawful for an employee who works with tools, machinery or other equipment, or who works under conditions that are recognized as hazardous, to be without an assistant or helper;

(9) that an Appeal Board composed of neutral doctors be set up.

Old Age Pensions

The Executive urged the enactment of legislation at the present session of the Legislature, to increase old age pensions to \$60 per month.

Hours of Work and Minimum Wage Acts

It was recommended that the Hours of Work Act be amended to reduce the present 44-hour work week to 40 hours for all workers; also that the powers of the Board of Industrial Relations be restricted

in the matter of granting special permits to employers to work longer hours than those set as standard for industry.

It was urged that the basic minimum wage be set at 75 cents per hour.

Other Legislative Recommendations

Among other suggestions and recommendations made by the Executive were the following:—

(1) that the Annual Holidays Act be amended to provide workers with two weeks holidays with pay;

(2) that an order exempting employers in the fruit and vegetable industry from paying overtime until nine hours per day (54 hours per week) are worked, from June 1 to November 30, be revised, so that workers in that industry shall have the same protection as afforded the majority of factory workers;

(3) that the Government facilitate the sale of margarine in the province;

(4) that only financially solvent companies who are prepared to pay standard wages be licensed to establish secondary industries in the province;

(5) that the Provincial Government "play its full part" in a federal, provincial and municipal housing scheme to provide low-cost and low-rental housing;

(6) that the Provincial Government intensify its program for the construction of public works, to stimulate employment and to improve the living standards of all citizens;

(7) that the provincial three per cent sales tax be abolished;

(8) that automobile insurance be made compulsory at a minimum cost;

(9) that the British Columbia Legislature enact a "Bill of Rights" similar to the one now in force in Saskatchewan.

Nova Scotia Provincial Executive (TLC)

On March 14, the Nova Scotia Provincial Executive of the Trades and Labour Congress of Canada presented a memorandum of legislation to Premier Angus Macdonald and the following members of the Cabinet: Hon. L. D. Currie, Minister of Labour; Hon. M. A. Patterson, Minister of Mines; Hon. A. W. Mackenzie, Minister of Agriculture; Hon. M. D. Rawding, Minister of Highways; and Hon. G. Stevens, Minister without Portfolio.

Members of the Provincial Executive TLC who comprised the delegation were: George A. Smith, M.B.E., Chairman; J. E. Rafuse; A. W. Williston and J. M. Murray. In addition, a large number of representatives of international unions and Trades and Labour Councils were present.

Chairman G. A. Smith introduced the delegation in a brief address, following which the memorandum on legislation was presented by Aubrey Fox, A. D. Williston and James Murray.

Labour Code

It was requested that the Labour Code be amended so as to provide that labour organizations applying to the Labour Relations Board for certification be required to establish their status on *bona fide* trade unions. *Bona fide* trade unions were defined as "organizations chartered by a national or international body, or a local branch chartered by, and in good standing, with such an organization."

It was asked further, that the Act be amended so as to specify definite grounds upon which the Board may revoke the certification of a trade union, and that revocation be not allowed during negotiations, conciliation, or during the life of a collective bargaining agreement.

Other amendments urged for the Labour Code included: (1) that such bodies as the Power Commission, the Liquor Commission, "or any other public bodies of a like nature" be not excluded from the provisions of the Act; (2) that the Labour Relations Board be empowered to take such court action as may be necessary to insure the enforcement of an order of the Board, subject to the approval of the Minister of Labour; (3) that in any vote conducted by the Board, a majority of those voting should determine the outcome of the vote; (4) that fishermen be granted full collective bargaining rights; (5) that legislation be enacted, calling for a 40-hour work week; (6) that the minimum wage for the Province be set at 75 cents an hour; (7) that two weeks' vacation with pay be provided for all industrial workers in the Province; (8) that all employers in the Province be compelled to grant all their employees one day's rest, of at least 24 consecutive hours, in each seven-day period.

Inspection of Lumber Camps

The brief urged the enactment of legislation to provide the following regulations to govern the lumber industry: (1) that bunk-houses be constructed to house a maximum of 20 men and that the houses conform to the requirements of provincial health laws in the matter of ventilation, etc.; (2) that an inspector of lumber camps be appointed whose duty it would be to keep a close check on conditions in all bunk-houses, dining rooms, kitchens, kitchen utensils, etc., and that he be given power to enforce regulations providing for the comfort and health of the workers; (3) that cook houses be completely separate from bunk-houses; (4) that inspections be made at irregular unannounced intervals.

Apprenticeship Act

It was recommended that the Provincial Apprenticeship Act be amended to provide for the approval of all apprenticeship contracts by the certified bargaining agency in the establishment concerned before such contracts are submitted to the provincial Director of Apprenticeship for final ratification. It was suggested, also that the training of apprentices for cooks in the catering industry be provided for under the Act.

Labour, Factories and Industrial Standards Acts

The brief urged that the Nova Scotia Labour Act be rigidly enforced and that it be amended to include all employers of ten or more workers.

Amendments to the Factories Act were requested, so that the provisions designed to safeguard the health and safety of employees in foundries would be applicable to any factory, as defined by the Act.

It was suggested that the scope of the Industrial Standards Act be widened to cover all industries in Nova Scotia.

In connection with electric wiring installations, it was requested that qualified inspectors be appointed to examine both old and new installations; further, that legislation should be enacted placing the control of sales of all electrical supplies in the Province under the Power Commission and also, that all skilled workers be required to hold certificates of qualification issued under the authority of the Trade Standards Act.

Workmen's Compensation Act

The following amendments to the Workmen's Compensation Act were proposed: (1) that the certification of claims of workers suffering from silicosis be speeded up; (2) that a qualified, impartial medical man be brought in to investigate all unsettled cases at least once a year and that his decisions be final; (3) that a doctor attending injured workmen be given authority to call a nurse to assist, when he considers it necessary to do so; (4) that loss of time by a workman required to attend a compensation hearing be paid for by the Compensation Board; (5) that a disabled employee who, because of his injury, is unable to pay for hospitalization for himself and his family should be provided with such services free by the Compensation Board; (6) that the Workmen's Compensation Act, as well as other Acts pertaining to labour, together with amendments, be properly indexed and

printed annually; (7) that the duration of treatment for workers suffering from hernia caused by industrial accidents, be determined by the attending doctor, rather than for a fixed period of eight weeks; (8) that the Board be empowered to direct workmen, who have been on compensation, to suitable employment in the establishment where the accident occurred and that the employer be compelled to re-engage such workers in suitable capacities; (9) that a district compensation office be established at Sydney, Cape Breton; (10) that claimants receiving payment for permanent or partial disability, if they meet with further injuries, be paid in full for both injuries; (11) that compensation for temporary or permanent disability be 100 per cent of the earnings of the injured workman, to a maximum of \$3,000; further, in cases of permanent or partial disability resulting from an injury, compensation shall be 100 per cent of the difference in the earnings of the injured workman before and after the accident—payable for the lifetime of the workman; (12) that provision be made in the Act to have "objected claims" adjusted at the earliest possible date and, in any case, within 24 days after the lodging of the objections; (13) that in cases where a widow, or an invalided widower, is the sole dependent, a monthly allowance of \$65 shall be paid; (14) that payments of \$20 monthly be made for each child under 16 years (as well as allowing for a maximum of \$120 covering widow and children); (15) that where children are the sole dependents the established \$20 monthly for each child be maintained, but that the limitation of \$80 monthly be removed; (16) that all claims be adjusted on the basis of the present rate of compensation, along with re-adjustments of the present rate or wage classification for the particular individual or job; (17) that the minimum compensation be increased to \$18 per week; (18) that a workman be allowed to present a claim to the Board at a future date when conditions resulting from a reported accident make it necessary, and that separation of the workman from employment in the establishment in which the accident occurred shall not nullify such workman's rights; (19) that the Compensation Act be amended so that a fisherman's compensation for injuries shall be determined in the same manner and on a similar basis, as for workmen employed on shore; (20) that the phrase, "any disease peculiar to an industrial process" be included in the schedule in Section 85 of the Act.

Social Security

It was recommended (1) that old age pensions commence at 60 years of age; (2) that the only residential qualifications required be 15 years' residence in Canada; (3) that no deductions be made on account of other income; (4) that the present pensions be increased, "to enable pensioners to maintain themselves in decency and comfort;" (5) that the same pensions be payable to all blind persons; (6) that the practice of combining the Parents Maintenance Act with the Old Age Pensions Act be discontinued; (7) that pensioners be provided with free hospitalization and dental treatment; (8) that when an old age pensioner dies, his pension shall be continued to his widow.

Industrial Pensions

Contributory, three-way pension plans were requested for workers desiring to participate, such plans to provide monthly benefits of \$80 a month minimum, to \$100 a month maximum; all participating employees to be eligible for pensions on attaining the age of 60 years.

Other Recommendations

It was urged that (1) the Provincial Government, in co-operation with the municipalities, establish day nurseries for children whose parents are employed away from their homes; (2) that legislation similar to the Maternity Hospitalization Act of Alberta be enacted to provide free hospitalization for maternity patients; (3) that "a full system of health insurance" be set up immediately; (4) that steps be taken to enable citizens of the Province "to buy milk at a reasonable cost;" and that primary producers of milk be subsidized; (5) that the Poor Relief Act be repealed; (6) that the Provincial Government provide assistance to unemployed persons who have exhausted their unemployment benefits; (7) that the Children's Welfare Board be empowered to issue adoption papers covering children who are adopted in the Province; (8) that school text books and all essential school supplies should be made available free for all students up to, and including, grade 12; (9) that public liability insurance be made compulsory for motorists; (10) that trade unions and other organizations be permitted to operate clubs licensed to sell beer; (11) that heavy penalties be provided against persons or establishments guilty of racial discrimination; (12) that compensation for jury service be re-adjusted to be more in

conformity with present day conditions; (13) that town planning be promoted by providing technical assistance to municipalities and, if necessary, financial grants.

The brief declared that current unemployment conditions warranted the Government starting immediately a program of much needed public works, such as highways, bridges, low-cost housing and holiday

resorts. It was urged further, that the Federal Government be asked to enlarge its public works program in Nova Scotia, first of all, to provide low rental, subsidized housing, then railway and bridge construction, and the tunnel under Halifax harbour. It was also suggested that Federal assistance be sought for certain industrial and hydro developments, etc.

Ontario Federation of Labour (CCL)

Executive members of the Ontario Federation of Labour (CCL) presented a memorandum of legislative proposals to cabinet members of the Ontario Government on March 30. The Federation was represented by Joseph MacKenzie, President; S. S. Hughes and George Burt, Vice-Presidents; and W. F. C. Kidd, Secretary-Treasurer.

The memorandum presented the Federation's views on legislation that was of especial concern to labour, including the provincial labour code, the Industry and Labour Board, statutory holidays, vacations with pay, the 40-hour week, unemployment, and workmen's compensation. In addition, the Government was urged to take action towards solving the housing problem and to hasten hydro-electric development "to supply adequately all the power needs in this fast growing province."

Labour Code

The brief asserted that the new labour legislation in Ontario continued "a most discriminatory practice" in requiring that a bargaining unit should receive the support of 51 per cent of the eligible voters before application for certification could be made. It was alleged that under the new code all that an employer, who wants "effectively to stymie the union organization," has to do, "is make sure that the employee does not vote," as his failure to do so is, in effect, a vote against the union.

Another feature of the code to which objection was taken was the section defining "membership in good standing" in the union. It was claimed that this "constituted an interference with the internal policy of the union concerned." The claim was made that the union should have the sole right of determining the "good standing" of its members.

Further, the brief claimed that "when a union is given bargaining rights, those rights should remain intact until the union is successfully challenged by some other union group." This principle, it was held,

was completely defeated by the clause relating to revocation of certification. The brief also voiced strong opposition to permitting company unions to have the same status as *bona fide* trade unions.

Then too, the Federation considered it "a backward step" to take "applications for conciliation" and "leave to prosecute" out of the hands of the Ontario Labour Relations Board and transfer these duties to the Minister of Labour. It was asserted that "it should not be left to a political personage to rule on this matter of prosecutions."

The brief declared that "the present labour code, adopted *holus-bolus* from federal legislation, just does not fit into the complicated industrial set-up in Ontario." The Federation offered to submit a code that would meet labour's needs, or, alternatively, to give the cabinet "a complete critical analysis of the legislation, if we can have a guarantee that some amendments are contemplated by the Government."

Statutory Holidays and Vacations with Pay

The administration of the Hours of Work and Vacations with Pay Act by the Industry and Labour Board was criticized and specific instances were given where the Board's rulings were said to have run counter to labour's interpretation of the regulations. The brief renewed the demand of former years for a two weeks' vacation with pay for every worker in Ontario.

Forty-Hour Week

The Government was asked to investigate the forty-hour week with no reduction in take-home pay in order that workers may have more leisure time and that jobs may be divided more evenly.

Unemployment

It was stated that "unemployment has begun to make its appearance in some of the industrial sections of the province."

The Government was urged, therefore, to begin laying plans to counteract these conditions and to co-operate with the Federal Government in "launching a public works program capable of taking up slack in employment in private industry, as may appear."

Workmen's Compensation

It was urged that compensation rates should be increased to 100 per cent of the injured workman's wages and that waiting periods be abolished. If the Government would not "wipe out the waiting period, then management should be forced by law to pay for the injured employee's lost time," it was claimed.

In addition, it was suggested that workers earning up to \$3,500 should be covered by the Workmen's Compensation Act, and that where children of workmen killed in industrial accidents wish to continue their education up to and including university, death benefits should be continued even after the age of 18. It was suggested that the Government take steps to relieve an alleged acute shortage of physio-therapists and that the proper authorities be empowered to enforce safety rules and the removal of industrial hazards.

Housing

The Government was called upon "to inaugurate a low-rental housing project immediately," While it was considered to

be "up to the Government to take the lead in a housing project," it was felt that it might co-operate with municipal authorities. Further, it was suggested that the Municipal Act be amended so as to assist in the re-establishment of Municipal Housing Authorities to undertake the erection of low-rental dwellings. In addition, it was recommended that the Provincial Government "call on the Federal Government to enact legislation to provide for the erection of low-cost homes."

General Recommendations

Among other suggestions included in the brief it was requested (1) that assistance be provided for the establishment and maintenance of trades schools; (2) that the poll tax on single employed persons be abolished, or if this is not done, that those paying the tax should be allowed the municipal franchise; (3) that the Government exert careful supervision over the granting of exemptions under 48-hour-week legislation; (4) that civic employees be not excluded from the right to bargain collectively; (5) that the franchise in municipal elections be extended to all who are entitled to vote in provincial or federal elections; (6) that old age pensions be increased immediately and that free medical and hospital services be provided such pensioners; (7) that provincial police should not be used "to assist anti-union companies smash their employees' unions," when strikes are taking place.

Ontario Provincial Federation (TLC)

The Ontario Provincial Federation of the Trades and Labour Congress of Canada presented a memorandum of legislative proposals to Premier Thomas L. Kennedy and members of his Cabinet on March 14.

The following ministers accompanied the Premier: Hon. Leslie M. Blackwell, Attorney General; Hon. Charles Daley, Minister of Labour; Hon. Russell T. Kelley, Minister of Health; Hon. George H. Doucett, Minister of Highways and Public Works; Hon. Dana H. Porter, Minister of Education; Hon. George H. Dunbar, Minister of Municipal Affairs and Reform Institutions; Hon. William A. Goodfellow, Minister of Public Welfare; Hon. L. P. Cecile, Minister of Travel and Publicity; Hon. H. R. Scott, Minister of Lands and Forests; Hon. G. H. Challies and Hon. W. Griesinger, Ministers without Portfolio.

Officers of the Federation who were present at the meeting were: A. F. MacArthur, President; H. J. Green, A. W. Godfrey and B. A. H. Magnuson, Vice-presidents, and Hugh J. Sedgwick, Secretary-Treasurer. In addition to the officers, about 150 national and international union representatives were members of the delegation.

The delegation was introduced by William Jenoves, Vice-President of the Trades and Labour Congress of Canada and members of the Executive read the portions of the brief which had been assigned to them.

Labour Relations Act, 1948

Disappointment was expressed that the Labour Relations Act of 1948 followed so closely the Federal Industrial Relations and Disputes Investigation Act. It was felt

that, while portions of the Federal Act were fairly applicable in the national field of labour relations, they would, in the opinion of the Ontario Federation, cause a great deal of trouble when applied to purely provincial labour-management problems. Consequently, the following amendments to the provincial Act were requested:—

(1) the provision for revocation of certification should be deleted;

(2) the Ontario Labour Relations Board "should have the right to grant conciliation rather than the Minister of Labour;"

(3) prosecution cases should be handled by the Labour Relations Board rather than by the Minister of Labour;

(4) a clear definition of "company unions" should be given and such company unions should be eliminated from any and all forms of certification;

(5) the right should be granted to apply for certification and to obtain a vote when 25 per cent of the employees in the proposed bargaining unit authorize a *bona fide* union to make such application;

(6) a majority of eligible voters who actually vote should decide certification, and voters who abstain from voting should not be considered as having voted against a bargaining agent;

(7) a simple majority vote should be sufficient to decide the issues of a union shop and compulsory check-off of union dues;

(8) "unfair practices" should include threats of various kinds to "shut-down", "move plants" and "declare lockouts;" the use of industrial spies should be forbidden;

(9) automatic grievance procedure should go into effect upon certification to cover the period of negotiations, and the form of union security obtained by negotiation should remain in force until changed by mutual consent of the parties concerned;

(10) the Labour Relations Board should be provided with an adequate administrative staff so that procedure could be speeded up and unnecessary delays avoided;

(11) employees of municipal corporations, boards and commissions should be fully covered by the Act.

Health Insurance

The Federation urged that until a National Health Insurance Act has been passed, the Ontario Government should

enact provincial legislation to provide for hospitalization, medical, surgical, dental and optical care, together with financial assistance during periods of sickness and convalescence.

It was held that the Provincial Government should take steps to relieve the shortage of nurses, which, it was claimed, was becoming more acute. To relieve this condition it was suggested that student nurses should be given shorter courses, with clearer standardization of nursing duties, so that nurses could be relieved of much non-technical work. It was suggested that nurses also should receive sufficient remuneration to cover the cost of books and uniforms at least, and that they should be granted the right to take part in collective bargaining.

Reference was made to the inadequacy of the health service in Northern Ontario, and amendments were suggested to the Public Health Act of Ontario to provide (1) a special fund, raised by a levy on industry, for medical and hospital care in mining, lumbering and fishing industries in unorganized areas; (2) administration of this fund by a board upon which labour would be represented; (3) legislation for health protection that would tend to mitigate individual suffering and misfortune and foster some recognition of social responsibility for the health and well-being of the individual citizen.

It was urged that legislation be enacted that would require a compulsory medical examination of all food and beverage handlers every six months.

The delegation asked that steps be taken at once, by means of provincial subsidies, to restore the price of milk to that which prevailed during the war. In addition, it was requested that there be labour and consumer representation on the Milk Control Board of Ontario and that the Milk Control Act be amended so that such matters as the regulation and control of delivery routes and systems would be determined by collective bargaining between employers and the trade union of the employees' choice.

Old age Pensions

The Ontario Government was urged to conclude an agreement with the Dominion Government with a view to bringing about the following changes in the Old Age Pensions Act: (1) payment of pensions at 60 years of age to all male persons, the wives of pensioners to become pensionable at the same time, and all other female persons to become pensionable at the age

of 55 years; (2) the only residential qualification for pensions to be 15 years' residence in Canada; (3) no deductions to be made in pensions on account of other income; (4) pensions to be increased to \$60 a month, plus cost-of-living bonus; (5) payment of similar pensions to blind persons 18 years of age and over; (6) all totally disabled persons to be made pensionable; (7) the means test to be abolished; (8) the practice of combining the Old Age Pensions Act and the Parents' Maintenance Act to be discontinued; (9) the placing of liens on homes of pensioners to be discontinued.

Housing

The Federation urged that the Provincial Government embark immediately on a low-rental subsidized housing plan, and that the Government endorse the principle that rent controls be continued and that wartime rental ceilings be restored.

Hours of Work and Vacations With Pay

It was asserted that, technical improvements and development in industry having reduced progressively the number of workers needed for high production, "it has become necessary that working hours be reduced in order that additional jobs will be provided. . . ." The Federation, therefore, urged that the Hours of Work and Vacations with Pay Act be amended to provide:—

(1) a basic 40-hour work week without reduction in pay;

(2) time and one-half for overtime above 40 hours per week, except where agreements provide overtime pay after a regular work day;

(3) extension of the basic vacation period to two weeks in each year; pay to be based on weekly earnings with credits for any time lost through sickness, injury or lay-offs;

(4) various safeguards in regard to the vacation with pay stamp book where the stamp principle applies;

(5) provision for payment for statutory holidays when not worked and double-time pay when work is performed on such days;

(6) the split-shift principle to be abolished in all industries;

(7) extension of the Act to include domestic employees, agricultural workers, lumber camp workers, and municipal employees;

(8) the issuing of permits which allow female employees to work after midnight to be discontinued.

Workmen's Compensation Act

The following amendments to the Workmen's Compensation Act were requested:—

(1) "one hundred per cent compensation;"

(2) blanket coverage of all occupational diseases;

(3) payment of compensation from date of injury or disability, without a waiting period;

(4) supervision of preventive measures to be placed under the Workmen's Compensation Board;

(5) compensation to be based on the wages of the highest prevailing period between the time of the accident and the final settlement;

(6) investigation of cases and payments of compensation to be made as speedily as possible;

(7) increase in the scale of pay to widows and orphans and also for burial expenses;

(8) the maximum compensation to be raised from \$2,400 to \$3,600;

(9) sufferers from lung cancer in the gas industry to be made eligible for compensation.

Prices

While stating that it was not within the jurisdiction of the Ontario Government to provide legislation with respect to price control, the Federation placed itself on record as urging the following proposals and requested the assistance of the Ontario Government in implementing them:—

(1) the re-institution of the policy of granting subsidies on basic food commodities;

(2) the immediate re-imposition of the 100 per cent excess profits tax, to meet the cost of the subsidies and to eliminate profiteering;

(3) the establishment of a Price Control Board by the Federal Government, to which all applications for price increases would be made, the Board to review all 1948 increases and to have authority to force reductions in prices where the increased cost of basic foods and materials was proving detrimental to the health of all citizens, children in particular.

Bill of Rights

The Federation suggested that the Ontario Government enact a provincial Bill of Rights which would define and guarantee to individual citizens of the Province religious, political and trade union rights.

Protection for Home Owners

It was asserted that the shortage of housing in recent years had forced many workers and veterans to buy homes at inflationary prices, which would leave them in a weak financial position in the event of a business recession. The Federation asked that legislation be enacted to protect such workers and veterans from the loss of their properties to "financial corporations who might take advantage of depression periods. . . ."

Plumbers' Code

The Federation renewed its request to the Government that the proposed Ontario Provincial Plumbing Code be adopted at this year's session of the Legislature and that it be enforced immediately. It was urged further that laws and regulations should be provided to prevent any but qualified persons from installing steam and hot water heating systems and steam power plants.

Fair Wages

The Government was asked to include in all Government contracts a fair wage clause "with wage rates for each trade to be struck from the international trade union rates in the district from which the greatest supply of labour for that particular trade is drawn."

Civic Employees

The Federation asked that the Municipal Act be amended to give civic employees the right to sit and/or vote in the council of any municipality in Ontario.

Highway Freight Rates

To combat the cutting of highway freight rates, "which is prevalent through the Province," the Federation suggested that the Municipal Board be empowered to adjust and establish a fair and equitable rate for all highway carriers and that the Board's decisions should be final and binding on all concerned.

Home Work

It was asserted that a considerable volume of industrial work was being done in Ontario homes which conflicted with the

spirit of the Factory Inspection Act and which was detrimental to legitimate employers. It was stated also that minor children were being thus employed. The Government was urged to strengthen the Factory Inspection Act, so as "to prohibit the practice of contracting out work which is now being done in homes and cellars."

Hydro-Electric Power

The Federation was, it was stated, "very greatly concerned over the shortage of hydro power which has prevailed in recent months in Ontario." It was suggested that some of the problems could be solved if more attention was paid to the opinions of competent technical personnel and if promotions of personnel were based on merit, rather than political patronage.

The request was made that "the Ontario Government drop the proposed partial power project on the St. Lawrence river between Ontario and the State of New York in favour of immediate action on the joint international navigation and power project as outlined in the proposed agreement between the U.S.A. and Canada in 1941. . . ."

It was urged too, that immediate consideration be given to the purchase of private power developments in northern and northwestern Ontario and the development there of new power resources in co-operation with the municipalities concerned. This, it was claimed, would tend to promote industrial growth, extension of rural electrification and the supplying of adequate power to cost domestic consumers no more, and possibly less, than present rates.

The Federation was opposed to the taxation of Hydro and other public utilities and was strongly opposed to any proposed increase in the cost of power to the consumer, it was stated.

Police and Industrial Disputes

The Federation protested the use of police in industrial disputes and urged that the practice of employing private police and detective agencies by employers during industrial disputes be outlawed.

Unemployment

It was alleged that evidence was on the increase indicating that unemployment was on the increase in Ontario. As an example, specific mention was made of the employment situation in the forest industries in Northern Ontario. The Government was

urged to begin a public works program without delay, which would include the building of homes, clearing of slums, the building and repairing of highways, reforestation, etc.

Dominion-Provincial Relations

The opinion was expressed that a Dominion-wide scheme of social security could be put in effect "if all the provinces of Canada would co-operate with the Dominion Government in making the plan financially workable." The Ontario Government was, therefore, urged to "resume its negotiations with the Federal Government so that the very necessary social security program for Canada can be put into effect without further delay."

Minimum Wage Act

The Federation strongly urged the Government of Ontario to amend the Minimum Wage Act so as to bring the minimum rate of wages up to 75 cents an hour; also that the zoning system be abolished and the Province considered as a single unit.

Other Recommendations

Among other suggestions and recommendations made by the delegation were the following:—

that all *bona fide* citizens of Canada 18 years of age or over be granted the franchise in federal, provincial and municipal elections;

that, as a fire protection measure, sprinkler systems be installed "in all buildings, such as bunk-houses, apartments, hotels, auditoriums and other places where the public lives or assembles;"

that the Ontario Government set up a Board to revise and bring up to date the section of the Engineers' Act, relating to hoisting engineers and that a labour representative be placed on the Board;

that all insurance required by the Highway Act be supplied to the citizens of Ontario at cost by the Provincial Government;

that mandatory legislation be enacted to provide that fire fighters be granted (a) statutory holidays with pay; (b) a work week of not more than 48 hours; (c) superannuation security;

that a training school for fire fighters be established, "to be operated at the expense of, and under the direction of, the Ontario Legislature."

VIEWS OF CANADIAN CONGRESS OF LABOUR ON INJUNCTIONS IN LABOUR DISPUTES

In a brief presented to the Government of New Brunswick on March 15, the Canadian Congress of Labour urged limitations on the use of injunctions in labour disputes.

The issuance of court injunctions against employees and unions in labour disputes was the theme of a brief presented to the Government of New Brunswick by the Canadian Congress of Labour on March 15. The brief, presented by Pat Conroy, Secretary-Treasurer of CCL, and Angus McLeod, President of the New Brunswick Council of Labour (CCL), was designed to convince the Government of New Brunswick of the urgent necessity for "enacting amelioratory legislation."

Two specific amendments to New Brunswick law were suggested. In the first place it was urged that a section be added, either to the Labour Relations Act, 1945, or to the Judicature Act, which would read as follows:—

Notwithstanding anything contained in any other Act, no application for mandamus, or injunction may be made to

a court in connection with any dispute or difference between an employer or employers and his or their employees, except by or with the consent of the Labour Relations Board, evidenced by a certificate signed by or on behalf of the Chairman of the Board.

It was held that the inclusion of such a section in existing legislation would insure that the applicant, or applicants for an injunction were acting in good faith, a factor, it was claimed, that the Labour Relations Board was "best able to determine," as it would be familiar with all the antecedents in such cases. It was pointed out, too, that as the Labour Relations Board, "acting as it does in a spirit of compromise," could avoid much litigation, and prevent many abuses of court processes. Moreover, "there is precedent (Section 42 of the Labour Relations Act)

for obtaining the consent of the Labour Relations Board as a condition precedent to litigation" and the procedure "would not involve delay."

In the second place, the brief submitted that "in no case should an interim injunction in a labour dispute exceed two days." With that in view, it was suggested that the following section could be added either to the Labour Relations Act, 1945, or to the Judicature Act.

(1) In this section "labour dispute" shall mean any dispute or difference between an employer and one or more employees as to matters or things affecting or relating to work done or to be done by such employee or employees, or as to the privileges, rights, duties or condition of employment of such employee or employees;

(2) An *ex-parte* interim injunction to restrain any person from doing any act in connection with any labour dispute shall not be for a longer period than two days.

"Unless an effective legislative check is placed on the length of time of interim injunctions, the road is open to 'Government by injunction' in the hands of the judiciary," it was asserted.

Injunction Defined

The definition of an injunction as presented in the brief was quoted from "Halsbury's Laws of England" which states that an injunction is "a judicial process whereby a party is ordered to refrain from doing or to do a particular act or thing." It was pointed out that it was usually invoked by a person who feared or alleged that irreparable injury would be done to his property or belongings unless a restraining order was issued by the court. It was stated that in all cases the court may, within its discretion, upon the *ex-parte* application of the plaintiff, grant an interim or interlocutory injunction restraining the defendant from altering the existing state or condition pending the final disposition of the issue between the parties.

Limiting Use of Injunctions

It was the declared purpose of the brief to demonstrate that the use of the interim injunction in labour disputes "can be a vicious instrument of attack upon the life of a trade union; that it can be used, and has been used, in a manner which was never contemplated in law; that by the very nature of its alleged 'relief', it renders modern labour legislation in this province (New Brunswick) futile, meaningless and ineffectual."

The assertion was made that "invariably, the application (for an *ex-parte* interim injunction) is made when a strike is in existence, or is imminent." It was claimed further that, "generally speaking a judge knows nothing whatever about the conduct of the employer, or worse still, his knowledge may be slanted for or against the employer depending on the source of his information." Thus, an employer who chooses to take an unfair advantage has placed in his hands an instrument for breaking the morale of his employees and the union at a crucial moment in a labour dispute.

United States Experience

Attention was drawn to the abuse of the interim injunction in labour disputes in the United States twenty years ago, which led to the passage of the Norris-La Guardia Act in 1932. The reasons given by the Committee of Congress for recommending the passage of this legislation were included in the brief, as follows:—

This Bill is the so-called anti-injunction bill. It is the outgrowth of years of agitation in the Congress for restriction upon the powers of Federal Equity Courts in the issuance of injunctions in labour disputes. Hearings have been held by Congressional committees over a period of years and the facts adduced have brought about an almost unanimity of opinion that such powers of the Federal Courts have been exercised to the detriment of the public welfare and should be curbed.

As evidence that "the abuses are not confined to the United States," the brief gave details of a specific instance in New Brunswick in which, it was alleged, a 30-day *ex-parte* injunction in a labour dispute had interfered with the legal rights of a union and its members and resulted in an injustice being done.

Court Action and Industrial Disputes

The brief emphasized that "court actions do not solve industrial disputes. Genuine solution of the problems affecting the parties is made infinitely more difficult by resort to the courts." It was asserted that "the public interest is best served by the solution of industrial disputes and not by the victory or defeat of either party." Labour Relations Boards "act with a view to reducing friction between the parties by developing a spirit of compromise and to convince them (the parties to the dispute) of the senselessness of court prosecution."

An Impartial Tribunal

It was pointed out in the brief that the Labour Relations Board "is tripartite in nature, representing management, labour and government. As such it cannot be suggested that it is partial to any particular point of view." While the CCL had often criticized decisions or policies of Labour Relations Boards, it had "never suggested that any Board in Canada has acted other than in an impartial manner. They have established themselves as important and useful agencies in the complex field of industrial relations."

Time Limit for Injunctions

Attention was drawn to the fact that "an 'interim injunction' order is binding upon those against whom it is directed for the period indicated, as fully and effectually as a 'permanent' injunction." It was claimed, however, that "the injunction process was never intended to be used as an aid to the economic position of a litigant," and the "granting of an interim injunction in a

labour dispute for an unreasonable length of time has precisely that result."

It was submitted, therefore, that if injunctions were permitted in labour disputes, "there must be a time limit placed upon the period of the interim injunction. If this is not done . . . government by injunction in connection with labour disputes, as an instrument of labour relations policy, is a real possibility." Reference was made to the action of the Ontario Legislature, which amended the Judicature Act of that Province in 1942, limiting the application of *ex-parte* interim injunctions in labour disputes to a period not longer than four days. This, it was claimed, was "clear proof of the recognition and adoption by the Ontario Legislature of the basic principle that the inevitable consequences of the unhampered use of the injunction in labour disputes is 'government by injunction' in the hands of the judiciary."

The brief urged the Government of New Brunswick "to adopt legislation similar in principle to that passed in Ontario" but that the period of time be reduced from four days to two days.

LABOUR AND INDUSTRY IN BRITISH COLUMBIA

The work of the British Columbia Department of Labour in administering labour legislation in that Province is summarized in the Department's Annual Report for the year 1947.

The Annual Report of the Department of Labour of British Columbia for 1947 records a year of industrial expansion. Average weekly earnings, for which comparative figures are given for the years 1940-47 inclusive, rose in 22 of the 25 industries surveyed. The average weekly wage for all male wage-earners was \$43.49, the highest *per capita* earnings yet recorded. This represented an increase of \$3.62 over the previous year. Payroll totals showed increases in 23 of the 25 industrial classifications, with decreases noted in only two, shipbuilding and cigar and tobacco manufacturing. This upward trend was most marked in the lumber industries where payrolls were \$30 millions over the preceding year; in construction, up \$17 millions; public utilities, up \$8 millions; and in the metal trades, where payrolls were increased by \$7 millions. More moderate gains were

recorded in metal mining, pulp and paper manufacture and in the other industrial groups.

The highest monthly employment figure for wage-earners in 1947 was 153,994 in August, compared with 130,631 recorded in August of 1946.

Weekly hours of work declined in most industries. With respect to all wage-earners, the average fell from 43.63 in 1946 to 42.24 in 1947. Information submitted by 8,410 firms covering 159,300 wage-earners showed that 92.67 per cent worked 48 hours or less per week, 5.49 per cent from 48 to 54 hours, and 1.84 per cent over 54 hours.

New Legislation

Legislation affecting labour passed by the Legislature during the 1948 session is summarized. This includes substantial

changes in the Industrial Conciliation and Arbitration Act, complete revisions of the Coal Mines Regulation Act and the Metal-liferous Mines Regulation Act, and Amend-ments in the laws relating to minimum wages, hours of work, workmen's compensa-tion, apprenticeship and others. A review of this legislation appeared in the *LABOUR GAZETTE* for August, 1948 (p. 880).

Board of Industrial Relations

The 14th annual report of the Board of Industrial Relations points out that for 30 years minimum wage legislation has been in effect in the Province for the protection of women workers, and for 23 years with respect to male workers.

During 1947 the Board held 85 sessions, and received 35 delegations. Public hear-ings were held in connection with the carpentry industry, automotive maintenance workers, radio technicians, sheet-metal workers, theatrical workers and bakery salesmen.

Ten minimum wage Orders were com-pletely revised to improve wage rates and working conditions. The application of all but four was widened to include both men and women workers. A new Order was made for hairdressing, and the Order gov-erning the carpentry trade was made to apply throughout the Province instead of being restricted to five areas, as before.

Most Orders provide for the issue of special licences to inexperienced employees who receive a graduated scale of wages during the learning period. During 1947, 1,067 licences were granted, as against 1,253 in 1946 and 217 in 1945.

The occupations of stationary steam engineers and special engineers and of bartenders, waiters and utility men were added to the schedule of the Hours of Work Act which enumerates the industries in which eight and 44-hour limits apply.

Regulations made during the year gov-erning shipping staff, baking, construction and the mercantile industry permit or continue certain exceptions from those limits.

Women and Girl Employees

A section of the report is devoted to statistics covering women and girl employees, of which there were a total of 61,442 in 1947, according to reports of 7,850 firms. The comparable figure for the previous year was 55,332. Tables give a comparative picture for the past five years of employ-ment, earnings and hours in the occupa-tions covered by Orders of the Board, including the mercantile industry, laundries,

hotels and catering, offices, personal service, fishing, telephone and telegraph occupa-tions, manufacturing, the fruit and vege-table industry, transportation and public places of amusement.

In line with general trends, average weekly earnings of women workers in all these occupations showed a marked in-crease, and in most cases average hours were shorter. The average weekly wage was lowest in transportation, shops, and hotels and catering, \$19.27, \$19.88 and \$19.94, respectively, and highest in the fruit and vegetable industry (\$26.07), fishing (\$27.61) and offices (\$27.56). Office occupations con-tinue to employ greater numbers of women than any other included in the survey. It is to be noted that in all cases the actual average earnings of women continue to exceed the minimum set by law. The average for all occupations was \$23.52, as against \$21.06 in 1946. Average hours worked per week in all occupations declined from 39.42 to 38.33.

Male Employees

As regards male workers in occupations covered by Orders under the Male Minimum Wage Act, tables based on returns covering wage-earners only indicate the same general trends of wages and employ-ment. The total number of wage-earners increased in each industrial group except the baking and ship-building industries. An increase is noted in average weekly earnings and a decrease in average hours worked per week.

Employment of Children

Under the Control of Employment of Children Act, 1944, unless permission is granted to the employer by the Minister of Labour, children under 15 may not be employed in manufacturing, shipbuilding, logging, construction, catering, amusement places, shops, shoe-shine stands, automobile service stations and the transport industry. On December 31, 1947, 234 permits were in effect for boys and 34 for girls, making a total of 268. Of these 36 were for employment in factories, 21 in amusement places, 185 in the mercantile industry, 11 in transport, 9 in catering, 3 in construction, 2 in shoe-shine stands and 1 in logging.

Inspection and Wage Adjustments

As regards investigation and collection of arrears of wages, the report noted that employees were paid in arrears of wages approximately eight times the amount paid during 1946, \$84,907.36 as against \$11,240.29.

Due to an increase in the inspection staff of the Board and in the number of businesses operating in the Province, a total of 13,912 investigations were made in 1947, as compared with 8,113 in 1946. Of 47 court cases brought under the Male and Female Minimum Wage Acts, the Hours of Work Act, the Semi-monthly Payment of Wages Act, and the Control of Employment of Children Act, 43 convictions were obtained, 2 being dismissed and 2 withdrawn.

Labour Disputes and Conciliation

The report of the Industrial Conciliation and Arbitration Branch describes the activities of the Branch under the provisions of the Wartime Labour Relations Regulations Act from January 1 to May 15, and for the rest of the year under the Industrial Conciliation and Arbitration Act which became law on May 15. The report provides summaries in tabular form of all cases dealt with by the Labour Relations Board, cases in which the services of a Conciliation Officer were obtained, those referred to a Conciliation Board, strikes and lock-outs in 1947, disputes with time-loss and number of workers affected in the period 1937-47, strikes by industry in 1947, and number of employees' and employers' organizations.

The board dealt with a total of 1,205 cases during the year, two less than the total for 1946.

Of 945 applications for certification (1,014 in 1946), 672 were granted, 135 rejected, 78 withdrawn and 60 were being investigated at the close of the year. Twenty-eight representative votes were taken; there were 163 investigations by Conciliation Officers; 30 Conciliation Boards and 3 Industrial Inquiry Commissions were established; there were 8 appointments of Referees; 4 strike votes were supervised; grievance procedures were prescribed in 3 cases; and 21 prosecutions were instituted.

During the year, there were 106 conciliation cases, involving about 48,894 employees and 434 employers. Fifty-eight cases were settled by Conciliation Officers, 35 were referred to Boards of Conciliation, and four were withdrawn. Other cases were terminated by strike action or negotiations were discontinued at the request of the parties.

There were 25 strikes during 1947, affecting 6,386 workers and 65 employers, and causing a loss of 153,168 working-days. Although more strikes occurred than in 1946, the time-loss in man-days and the number of employers and employees affected were much less than those of the preceding year.

In 1946, strikes which numbered 21 involved approximately 40,014 workers and 524 employers and caused a loss of 1,294,174 working-days. The greatest loss of time due to strikes in 1947 occurred in transport, with manufacturing in second place.

Employees' and Employers' Organizations

A steady increase is shown from year to year in the number of employees' organizations making returns to the Department of Labour. In 1947, there were 715 organizations with 135,320 members. In 1939, membership was 44,867 and the number of organizations was 380. Employers' organizations numbered 37 in 1945, 1946 and 1947.

Factory Inspection

Services of the Factory Inspection Branch include inspection of factories, passenger and freight elevators and laundries. In the year 1947, 1,481 inspections and reinspections were made.

The Chief Inspector of Factories reported that the increase in industrial activity has led to a corresponding increase in interest in industrial accident-prevention. He was of the opinion that "An interested management, co-operating with a live accident-prevention committee or with persons charged with accident-prevention matters in a plant can do much to stimulate constant vigilance on the part of very workman." It was suggested that workmen may be made safety-conscious by use of safety signs, inserts in payroll envelopes, articles in plant publications, short addresses, bulletin boards, moving pictures and slide films. Workers should be kept aware of the accident-prevention regulations applicable to their particular job.

The Chief Inspector pointed out that the main causes of factory accidents are ignorance, carelessness, unsuitable clothing, insufficient lighting, defective machinery and structure, absence of safeguards, etc., and offered significant comment on means of cutting down industrial accidents. Stress was laid on the wearing of personal protective equipment, particularly as regards women, and it was noted that the wearing of unsuitable clothing was largely within the control of the employer. Women's caps should be designed to enclose the hair completely, should not interfere with the wearing of shields, goggles, etc., and should be tightly woven to exclude dust and dirt. Accidents due to defects of machinery can be reduced by frequent inspection and

prompt repairs when necessary. An ever-increasing trend in the direction of guarding machines at the point of manufacture was noted. Where machines are not so guarded, the user should make them safe by patented devices or by home-made safeguards.

Besides emphasizing the importance of adequate lighting, sufficient room and good housekeeping, the Chief Inspector stressed the advisability of having an abundant supply of pure air in a plant, pointing out that workers in an unhealthy atmosphere suffer a loss of alertness similar to and only less in degree than that caused by fatigue due to overwork, which statistics have proved to be a cause of accidents.

Of the progress made during the year in providing new factory buildings, it was stated, "The modern trend developed in these new factories is a credit to management, from not only a production standpoint, but a milestone has been reached in providing excellent working conditions for the employees." The report noted that washing facilities for workmen were showing marked improvement in design. Morning and afternoon rest-periods are now the general practice in many industries.

Industrial Home Work

Seven employers and 22 workers were granted home-work permits. These expire each calendar year and inspections are made in connection with renewal applications in addition to inspections made as requests are received. In almost every instance investigation revealed healthful surroundings.

Elevators

Each year additional modern passenger and freight elevator equipment is being installed, mostly of the traction type. Forty-six plans and specifications of such equipment were approved. All elevator

installations are required to comply with the regulations governing installation, operation and maintenance.

Operators of passenger elevators are required to pass a written examination in order to obtain a licence. One thousand one hundred and thirty-six licences were renewed, and 680 temporary and 539 permanent licences were issued.

It is noted that interlocking equipment on hoistway doors or gates has eliminated at least 80 per cent of the causes of elevator accidents. No person suffered serious injury while being transported in passenger or freight elevators during the year.

In all, 1,406 inspections and reinspections of elevators were made.

Apprenticeship

The annual report of the Director of Apprenticeship stated that there were 1,877 subsisting apprenticeship contracts on December 31, 1947. One thousand nine hundred and thirty-eight persons have successfully completed their apprenticeship, distributed according to trade as follows: automobile maintenance, 192; boiler-makers, 49; barbers, 143; carpenters, 164; electricians, 132; hairdressers, 169; machinists and fitters, 373; moulders, 89; pharmacists, 127; plumbers, 86; sheet-metal workers, 85; and miscellaneous trades, 329.

Hope was expressed that, with the end of the training of ex-service men under apprenticeship contract and the operation of a new system of vocational schools, it will be possible to pay more attention to trade tests and thus raise the standard of competency attained at the end of the training period. It is recognized that the only way in which the shortage of skilled craftsmen can be met is by an adequate apprenticeship training program.

INTERNATIONAL LABOUR ORGANIZATION

Protection of Migrant Workers

*Third Session of the Permanent Migration Committee of
the International Labour Office.*

Progress towards international agreement on principles concerning the living and working conditions of migrant workers, was made by the Permanent Migration Committee of the ILO at its third session, held in Geneva, January 13-27, 1949.

Twenty-four governments were represented at the meeting by delegates, and two by observers. The Canadian delegation consisted of Mr. G. C. Congdon, Superintendent of Canadian Immigration, Department of Mines and Resources, London, and Mr. S. H. McLaren, Executive Director, National Employment Service and Unemployment Insurance Commission, Ottawa.

One of the Committee's tasks was the revision of a Convention and related Recommendations on Migration for Employment, adopted originally at the 1939 conference of the ILO. As revised by the Committee, the texts will come before the Thirty-Second Session of the Conference, to be held at Geneva in June of this year.

These texts are designed to protect workers against abuse in regard to methods of recruitment, misleading propaganda, placement operations, and conditions of employment.

The second item on the Committee's agenda was the formulation of principles concerning migration, and the preparation of a model Agreement for use by governments. The texts approved by the Committee are to be circulated to member governments for their examination.

A further item concerned refugees and Displaced Persons who are specialists in some occupation. The Committee felt that every effort should be made to settle the 30,000 persons coming within this category in their own occupation. It was recommended that the ILO sponsor an exchange of information and publicity among member states concerning the specialists available and opportunities for their settlement and re-training in their own or ancillary occupations.

Other items discussed by the Committee included methods to further exchanges of trainees, and the question of additional action on migration within the manpower program of the ILO.

Model Safety Code for Factories

A Technical Conference was held at Geneva from September 27 to October 16, 1948, to examine a Draft Model Code of Safety Regulations for Factories which had been drawn up by the International Labour Office. The Conference was a tripartite one, with members of Government, employers' and workers' groups.

Twenty-five of the countries belonging to the International Labour Organization were represented as follows: Austria, Belgium, Brazil, Bulgaria, Canada, China, Colombia, Denmark, Ecuador, Egypt, United States of America, France, Great Britain, Hungary, India, Italy, Luxembourg, Mexico, Netherlands, Panama, Portugal, Sweden, and Switzerland.

Canada was represented by the following delegation:—

Government Delegate.—Dr. Bertrand Bellemarre, Special Adviser to the Quebec Minister of Labour on Industrial Safety and Hygiene.

Employer's Delegate.—Mr. R. B. Morley, General Manager of the Industrial Accident Prevention Associations of Ontario.

Workers' Delegate.—Mr. Chester Jordan, President, Quebec Provincial Council of Paper Mill Unions (AFL), Quebec.

The Conference set up committees to examine in detail the different parts of the Draft Code relating to factory buildings, safety of machinery, electrical plant, pressure vessels and furnaces, and health and medical matters, respectively, and as a result of recommendations made by the various committees the Conference adopted a considerable number of amendments to the Draft Code. The Conference also

decided to change the title to "Model Code of Safety Regulations for Industrial Establishments for the Guidance of Governments and Industry." Moreover, the Conference agreed to recommend to the Governing Body of the International Labour Office that a special meeting of electrical experts should be called to consider further a part of the Code relating to electricity; and it was also contemplated that further consideration should be given by competent physicists and radiologists to supplementing the provisions of the Draft Code dealing with X-rays and radio-active materials.

The Conference adopted resolutions requesting the Governing Body to consider (a) the advisability of preparing a similar code of safety regulations for commercial establishments, and (b) the question of preparing a draft of an international convention on the subject of the sale or hire of inadequately protected machinery and equipment; the voting on these resolutions was not unanimous.

The Code will later be submitted for the approval of the International Labour Conference.

Commenting on the work of the Conference, Dr. Bellemarre expressed the view that from it will result considerable unity on the subject of Safety Regulations, from which governments will be able to draw freely to improve or modify their present legislation. "This constitutes an important forward step which should be gratifying to all," he stated.

Model Safety Code for Coal Mines

A draft of a Model Safety Code for Coal Mines was studied by an ILO Committee of Coal Mining Experts which met in Geneva from January 31 to February 4, 1949.

Technical experts from the following seven countries attended the meeting: Belgium, Canada, France, India, Netherlands, United Kingdom, U.S.A. Canada was represented by John Crawford, Chief Inspector of Mines, Alberta.

Mr. Crawford reported that numerous lengthy discussions took place on contentious matters arising from the draft and from amendments, but that "amiable com-

promise was established in nearly all cases," the few cases that could not be finally dealt with being left over for consideration at a tripartite session to be held later this year.

The Canadian representative stated that he was in complete agreement with the other members of the Committee on the work accomplished on the revised Code.

Fourth Regional Conference of American Member States

At the Fourth Regional Conference of the American States Members of the International Labour Organization, held in Montevideo, Uruguay, from April 25 to May 10, the Canadian Government Delegation was headed by Warwick Chipman, K.C., of Buenos Aires, Canadian Ambassador to the Argentine, with W. G. Stark, First Secretary of the Canadian Embassy in Rio de Janeiro as the alternate head of the Delegation. Technical Advisers to the Government Delegates were Harry Taber of Ottawa, Industrial Relations Officer in the Department of Labour, and N. D. Cochrane of Fredericton, N.B., Deputy Minister of Labour for New Brunswick.

The Employers' Delegate was Harry Taylor, of the Canadian National Carbon Company, Toronto, while Roland K. Gervin, of Vancouver, Chairman of the B.C. Provincial Executive of the Trades and Labour Congress of Canada, was the Workers' Delegate.

Lionel Roy, First Secretary of the Canadian Embassy in Buenos Aires, was named as Secretary-General of the Canadian Delegation.

The agenda of the conference was to include discussions of the conditions of life and work of the indigenous populations of American countries, the conditions of employment of agricultural workers and the adjustment of labour disputes.

Also on the agenda was to be a Report of the Director-General of the ILO featuring the question of industrialization, with special reference to factors bearing on the efficiency of the labour force in Latin-American countries, particularly training and health conditions.

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

The month of March was marked by strikes of seamen employed aboard East Coast deepsea dry cargo and passenger vessels. Otherwise, labour relations were harmonious in industries coming under Dominion jurisdiction, agreements being reached in Northwest Territories gold-mining operations and, with respect to officer personnel, by the principal coastal shipping companies on the West Coast.

Introduction

Toward the end of March, the Canadian Seamen's Union (TLC) called a strike of seamen employed aboard the vessels of some 20 East Coast deepsea dry cargo shipping companies. A few days earlier, the same union had also called a strike against passenger vessels operated by Canadian National (West Indies) Steamships Limited.

Disputes involving various East and West Coast deepsea dry cargo shipping companies and two East Coast companies operating passenger vessels had separately been considered by a Board of Conciliation following lengthy direct negotiations between the Canadian Seamen's Union and the various employers and following the unsuccessful efforts of a Conciliation Officer to effect settlements. Details concerning the personnel of the Board of Conciliation, its reports, unanimous recommendations and the issues in dispute, will be found in last month's LABOUR GAZETTE.

At the end of February, the two Associations representing the dry cargo shipping companies announced on behalf of their member companies acceptance of the recommendations of the Board in settlement of the matters in dispute.

The Canadian Seamen's Union rejected the Board's major recommendations stating that they would result in discrimination in hiring against union members and a reduction in take-home pay, and asked for a further conference with the companies.

The strike was called on the same day that the East Coast dry cargo companies reported they had entered into an agreement with the Seafarers' International Union of North America (AFL), incorporating therein the recommendations of the Board of Conciliation which had been rejected by the Canadian Seamen's Union.

It was estimated that about 3,000 seamen employed aboard some 90 vessels would ultimately be affected by the strike as vessels returned to Canadian ports or while overseas. Approximately five vessels were immediately affected. At the end of March, it had not been reported that the vessels of the West Coast dry cargo operators were affected by the strike or that the strike had been called against the West Coast operators. Early in April, however, it was reported that the crews of vessels of East Coast operators had struck while in West Coast ports and that vessels in United Kingdom waters and elsewhere were also struck.

With respect to the strike of seamen on passenger vessels of Canadian National (West Indies) Steamships Limited, the strike was called by the Canadian Seamen's Union on March 21. It is reported that members of the crew of the ss. *Lady Rodney* refused to sign articles and stayed aboard the ship after the strike was declared. Subsequently, other vessels of the company were involved in the "stay-in" strike on their return to East Coast ports. Upon the refusal of the crews to leave the ships, court injunctions were obtained by the company and the vessels were vacated.

In this dispute also, the company had accepted the recommendations contained in the draft agreement prepared by the Board of Conciliation; but these had been rejected by the trade union in so far as they pertained to hiring, exclusion of subversive elements, discipline, promotions, ships' delegates and the issuance of passes.

The Canadian Pacific Steamships Limited had also been a party to the proceedings before the Board of Conciliation affecting passenger vessels of Canadian National

(West Indies) Steamships Limited. However, the Canadian Seamen's Union had not, at the end of the month, called off the crews of the Canadian Pacific passenger vessels and it was reported that the crew of one of its vessels had been permitted by the union to sign articles and sail. Early in April, however, it was reported that the crew of this vessel had struck in the United Kingdom.

During March, the principal coastal shipping companies of the West Coast signed agreements affecting their deck and engine room officer personnel with the Canadian Merchant Service Guild (TLC) and the National Association of Marine Engineers of Canada (TLC). For a report of the settlement of disputes and the signing of agreements affecting gold mining operations in the Northwest Territories, see elsewhere in this Section.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for one day during the month of March. During the month the Board received six applications for certification, issued three certificates designating bargaining agents, rejected three applications for certification, allowed the withdrawal of one application, and issued Reasons for Judgment in three cases.

Applications for Certification Granted

1. The Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, for a unit of maintenance employees of Eastern Canadian Greyhound Lines Limited, comprising motor mechanics, helpers, servicemen, bus fuelers, washers, cleaners, apprentices and janitors employed by the company at 301 Chatham Street, East, Windsor, Ont. (See Reasons for Judgment below.)

2. The Canadian Brotherhood of Railway Employees and Other Transport Workers for a unit of employees of MacArthur & Son, Limited, Brandon, Man., in the occupational classifications of highway truck driver, pick-up truck driver, oil truck driver, oil blender, service station attendant, teamster, mechanic, and greaseman. The senior mechanic was excluded from the bargaining unit.

3. The Canadian Marconi System, Division No. 59, Commercial Telegraphers' Union, for a unit of employees of the Canadian Marconi Company, comprising employees in the Trans-Oceanic Service in the classifications of radio-telegraph operator, technician, telephone operator, and local delivery clerk at the central telegraph office, Montreal, P.Q., and shift engineer at the stations at Drummondville, P.Q., and Yamachiche, P.Q. The classification of chief telephone operator at the central telegraph office, Montreal, was excluded.

Applications for Certification Rejected

1. Transport Drivers, Warehousemen and Helpers' Union of America (Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America), and Desrosiers Cartage Company, Inc., Ville St. Pierre, P.Q. (L.G., Jan., 1949, p. 46). The Board rejected the application for the reason that the company's operations do not fall within the jurisdiction of the Board as set forth in the Act. (See Reasons for Judgment below.)

2. Sudbury General Workers' Union and Eastern Canadian Greyhound Lines Limited, 31 Cedar St., Sudbury, Ontario (L.G., Jan., 1949, p. 45). The Board rejected the application for the reason that the employees of the Sudbury Division of the company are not employed in connection with an undertaking within the jurisdiction of the Board as set forth in the Act. (See Reasons for Judgment below.)

3. Transport Drivers, Warehousemen and Helpers' Union, Local 106, Montreal, and General Truck Drivers' Union, Local 938, Toronto (International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America) and Taggart Service Limited, Ottawa (L.G., March, 1949, p. 289). (See Reasons for Judgment below.)

Applications for Certification Received During the Month of March, 1949

1. International Brotherhood of Electrical Workers, Local 1598, for locomotive engineers, brakemen and dispatchers employed in the operation of the rolling stock of the out-of-doors electric railways of the Hudson Bay Mining and Smelting Company, Ltd., Flin Flon, Manitoba. (Investigating Officer: R. H. Hooper.)

2. Transport Drivers, Warehousemen and Helpers' Union (Local 106, International

Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America) for chauffeurs, helpers to chauffeurs, dockmen, checkers and warehousemen employed by J. B. Baillargeon Express, Limited, Montreal, P.Q. (Investigating Officer: L. Pepin.)

3. Canadian Brotherhood of Railway Employees and Other Transport Workers, for bus operators and garage maintenance employees of Abitibi Coach Lines, Val d'Or, P.Q. (Investigating Officer: L. Pepin.)

4. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees for prevailing rates employees of the National Harbours Board employed at Quebec, P.Q. (Investigating Officer: L. Pepin.)

5. Canadian Seamen's Union for unlicensed personnel employed by the Commercial Cable Company, Halifax and New York, on the cable ship *John W. MacKay*. (Investigating Officer: H. R. Pettigrove.)

6. Canadian Brotherhood of Railway Employees and Other Transport Workers for employees of Canadian National Railways employed as divers, tenders and

helpers at Cape Tormentine, N.B., and Borden, P.E.I. (Investigating Officer: H. R. Pettigrove.)

Application for Certification Withdrawn

The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company (News agents). (L.G., Jan., 1949, p. 46.)

Complaint Referred to the Board by the Minister of Labour

During the month, the Board gave preliminary consideration to a complaint referred to the Board by the Minister of Labour under Section 43 of the Act. The complaint affected the National Association of Marine Engineers of Canada, Inc., complainant, and the Canada Dredge and Dock Company, Limited, respondent.

Reasons for Judgment

Reasons for Judgment in cases dealt with by the Board at its March sitting follow.

REASONS FOR JUDGMENT in dispute between

**Transport Drivers, Warehousemen and Helpers' Union,
Local 106, Montreal (International Brotherhood of Teamsters,
Chauffeurs, Warehousemen and Helpers of America), Applicant,
and
Desrosiers Cartage Company, Inc., Respondent.**

This is an application by the Transport Drivers, Warehousemen and Helpers' Union, Local 106, Montreal, to be certified as bargaining agent for a unit of employees of the respondent company consisting of chauffeurs and chauffeurs' helpers employed by the Company.

The Company in opposing the application claims that the Company's operations are provincial in scope and that the regulation of the relations between the Company and its employees is governed by provincial labour relations legislation. Counsel for the Company argued that, in the circumstances, the provisions of the Industrial Relations and Disputes Investigation Act do not apply to the Company and its employees. The Company also denies that the applicant union represents the majority of employees in the bargaining unit.

According to the information furnished to the Board by the parties and by its own Investigating Officers, it appears that the Company, which is incorporated under the Companies Act of the Province of Quebec,

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, J. A. D'Aoust, A. Deschamps, A. J. Hills and H. Taylor, members. The reasons for judgment of the Board were delivered by the Vice-Chairman.

operates a general cartage business for the transportation of merchandise by truck and has its office and terminal at Montreal, Quebec. It operates thirty trucks, all of which operate out of the Company's terminal at Montreal. All of the employees in the proposed bargaining unit report for duty at and work out of the Montreal terminal of the Company. The Company has no depot or terminal in Ontario. The Company's operations are almost entirely confined to the Province of Quebec, and the only interprovincial operations in which it is regularly engaged are those arising out of a contract with the National Breweries

Limited at Montreal, for the delivery of the latter Company's products from Montreal to various warehouses of the brewery company, one of which is at Ottawa. Under the contract, the Desrosiers Cartage Company transports the products of the brewery company from time to time as required by the latter company. This may, at times, involve deliveries twice a week and at other times deliveries may be at intervals greater than a week. Four of the thirty trucks of the Desrosiers Cartage Company which are employed in making deliveries to Ottawa carry an Ontario licence as well as a Quebec licence. The Company also holds a Class "D" Public Commercial Vehicle Licence for Ontario which permits trucking operations between Montreal and Ottawa and between Montreal and points within seventy-five miles of the interprovincial boundary at Point Fortune on Number 2 Highway.

The Company claims that apart from the foregoing, the only interprovincial cartage operations in which it engages is to use the Ontario highways between Montreal and Hull during periods of the year when the highway on the Quebec side of the river is in poor condition.

Sections 53 (b) of the Industrial Relations and Disputes Investigation Act provides that Part I of the Act shall apply in respect of employees who are employed upon or in connection with the operation of any work, undertaking or business that is within the legislative authority of the Parliament of Canada, including . . . "railways, canals, telegraphs and other works and undertakings connecting a province with any other or others of the provinces, or extending beyond the limits of a province".

The decisions of the courts do not establish clearly the tests to be applied for the

purpose of determining the question whether a particular undertaking connects a province with any other or others of the provinces or extends beyond the limits of a province.

However, in the opinion of the Board, the mere fact that the ordinary business of the Company requires its trucks to travel outside the Province of Quebec does not in itself necessarily mean that the undertaking is one extending beyond the limits of the province. Rather the true test to be applied is whether the Company has so arranged its physical properties and its operations so that its operations are carried on outside the province with a certain regularity or in accordance with a certain pattern.

In the present case, from the information furnished to the Board, it appears that there is no physical property or arrangement of operations that connects the Company's operations in Quebec with its operations in Ontario.

The Board is of opinion that the Company's operations as presently carried on do not bring the same within any of the categories of works or undertakings described in section 53 of the Industrial Relations and Disputes Investigation Act to which Part I of the Act applies.

For the above reason the application is rejected.

(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman,
for the Board.

A. HEMMING, Esq.,
for the Applicant.

B. W. HOWARD, Esq., K.C.,
for the Respondent.

Dated at Ottawa, March 15, 1949.

REASONS FOR JUDGMENT in dispute between

Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, Applicant (Intervener),

and

Eastern Canadian Greyhound Lines Limited, Respondent,

and

Sudbury General Workers' Union, Intervener (Applicant).

These are two applications for certification made under the provisions of the Industrial Relations and Disputes Investigation Act. Application No. 1 is an application by the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, to be certified as bargaining agent for a unit of

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, J. A. D'Aoust, A. Deschamps, A. J. Hills and H. Taylor, members. The reasons for judgment of the Board were delivered by the Vice-Chairman.

maintenance employees of the Eastern Canadian Greyhound Lines Limited, consisting of motor mechanics, helpers, servicemen, bus fuelers, washers, cleaners, apprentices and janitors employed by the Company at 301 Chatham St. East, Windsor, Ontario, and at 31 Cedar St., Sudbury, Ontario. The application does not include bus drivers. There is a total of 30 employees in the proposed bargaining unit of whom 21 are employed at Windsor and 9 at Sudbury.

The Sudbury General Workers' Union (CCL) has intervened to oppose the application on the ground that the unit is inappropriate in that the employees employed at Sudbury should not be included in the bargaining unit with employees at Windsor.

The intervener has, also, in Application No. 2, on its own behalf, applied to be certified as bargaining agent for a unit consisting of employees employed at Sudbury by the Company including both the maintenance employees at that point who are covered by Application No. 1 of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, and also the drivers employed by the Company working out of Sudbury, who are not included in Application No. 1. There is a total of 23 employees in this proposed bargaining unit consisting of 9 maintenance employees and 14 drivers.

From the information furnished to the Board by the parties to these applications and by its own Investigating Officers, it appears that the Company operates an international bus line service extending to points in the United States with garage facilities at Windsor, Ontario. This service or Division of the Company's operations is known as its Southern Ontario Division. In addition, the Company operates a bus line service or Division running from North Bay to Sault Ste. Marie, Ontario, with garage facilities at Sudbury, Ontario. This operational service or Division is known as the Sudbury Division.

The Company does not operate a bus service to connect its Southern Ontario Division with its Sudbury Division. The operations of the Sudbury Division are, however, under the same direction as the operations in the Southern Ontario Division, but this fact has in the opinion of the Board no bearing on the disposition of this case.

Section 53 (b) of the Industrial Relations and Disputes Investigation Act provides that Part I of the Act shall apply in respect of employees who are employed upon or in connection with the operation

of any work, undertaking or business that is within the legislative authority of the Parliament of Canada including . . . "railways, canals, telegraphs and other works and undertakings connecting a province with any other or others of the provinces, or extending beyond the limits of a province".

The Company in its Southern Ontario Division operates an international bus line service. As such, this service, in the opinion of the Board, is a work or undertaking of the nature described in paragraph (b) of section 53 of the Act, to which the provisions of Part I of the Act apply.

On the other hand, the operations of the Company in its Sudbury Division are in themselves of a local or purely provincial nature. As there is no physical connection or arrangement of physical things between the operations of the Company in its Sudbury Division and its Southern Ontario Division, the Board is of opinion that the bus line operations in the Sudbury Division cannot be regarded as a part of or extension of the bus line operations carried on in the Southern Ontario Division.

Having regard for the foregoing, the Board is of opinion that Application No. 2, the application of the Sudbury General Workers' Union for certification as bargaining agent for employees at Sudbury, should be rejected as the employees are not employed upon or in connection with a work or undertaking to which the provisions of Part I of the Act apply.

The Board is of opinion that the maintenance employees of the Company in its Southern Ontario Division, consisting of motor mechanics, helpers, servicemen, bus fuelers, washers, cleaners, apprentices and janitors employed by the Company at 301 Chatham St. East, Windsor, Ontario, constitute an appropriate unit. The Board finds that the majority in this unit are members in good standing of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, and accordingly certifies this union as the bargaining agent of employees of the Company in the said unit.

(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman,
for the Board.

I. M. DODDS, Esq.,

for the Applicant (Intervener).

S. L. SPRINGSTEEN, Esq., K.C.,

for the Respondent.

H. G. RHODES, Esq.,

for the Intervener (Applicant).

Dated at Ottawa, March 15, 1949.

REASONS FOR JUDGMENT in dispute between

Transport Drivers, Warehousemen and Helpers' Union, Local 106, Montreal, and General Truck Drivers' Union, Local 938, Toronto (International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America), Applicant, and Taggart Service Limited, Respondent, and Montreal Workers' General Union (Truck Transport Branch, CCL), Intervener.

This is an application for certification of the applicant union as bargaining agent for a unit of employees of Taggart Service Limited consisting of chauffeurs, chauffeurs' helpers, dockmen, warehousemen, and mechanics employed by the Company at Ottawa, Perth, Pembroke, Kingston and Montreal.

The present applicant made an application for certification with respect to the same employees on November 5, 1948. The Board held a hearing on that application on December 16, 1948, at the request of the applicant, at which the applicant was not represented. Later the applicant requested leave of the Board to withdraw the application and submitted the present application, dated January 5, 1949, to the Board. At its meeting on January 19, 1949, the Board declined to grant leave to withdraw, and rejected the application of November 5, 1948.

The rules of the Board provide that where an application is rejected the Board will not entertain a new application from

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, J. A. D'Aoust, A. Deschamps, A. J. Hills and H. Taylor, members. The reasons for judgment of the Board were delivered by the Vice-Chairman.

the same applicant with respect to the same bargaining unit for at least six months following the rejection of the application unless the Board is of opinion that the application was rejected on technical grounds.

In the circumstances, the Board is of opinion that the application should not be entertained at this time.

(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman,
for the Board.

Dated at Ottawa, March 15, 1949.

Conciliation and Other Proceedings Before the Minister of Labour

Appointment of Conciliation Officers

During March, the Minister of Labour appointed Conciliation Officers under Section 16 of the Industrial Relations and Disputes Investigation Act to confer with the parties in the following industrial disputes:—

Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59, applicant, and the Canadian Marconi Company, Montreal, P.Q., respondent (radio telegraphers and radio officers at Coastal Stations and in the Marine Service). (Conciliation Officer: R. Trépanier.)

Yellowknife District Miners' Union, Local No. 802, International Union of Mine, Mill and Smelter Workers, applicant, and the

Consolidated Mining and Smelting Company of Canada, Limited, Yellowknife, N.W.T., respondent. (Conciliation Officer: G. R. Currie.)

Yellowknife District Miners' Union, Local No. 802, International Union of Mine, Mill and Smelter Workers, applicant, and Giant Yellowknife Gold Mines, Limited, Yellowknife, N.W.T., respondent. (Conciliation Officer: G. R. Currie.)

Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59, applicant, and the Canadian Marconi Company, Montreal, P.Q., respondent (Trans-Oceanic Service). (Conciliation Officer: R. Trépanier.)

Catholic Syndicate of Garage Employees of the Quebec Railway Light & Power Co., Inc., applicant, and the Quebec Railway

Light & Power Co., Inc., Quebec, P.Q., respondent. (Conciliation Officer: L. Pepin.)

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant, and the National Harbours Board, Montreal, P.Q., respondent. (Conciliation Officer: R. Trépanier.)

Agreements Facilitated by Conciliation Officers

On March 31, 1949, the Minister of Labour received a report from H. R. Pettigrove, Conciliation Officer, indicating the settlement of matters in dispute between the National Harbours Board, Halifax, N.S., and its employees who are represented by Divisions 224 and 231, Canadian Brotherhood of Railway Employees and Other Transport Workers. (L.G., Dec., 1948, p. 1413.)

On March 31, 1949, the Minister of Labour received a report from G. R. Currie, Conciliation Officer, indicating the settlement of disputes between the Yellowknife District Miners' Union (Local 802, International Union of Mine, Mill and Smelter Workers), and Consolidated Mining and Smelting Company of Canada, Ltd. (Con and Rycon properties, Yellowknife, N.W.T.), and Giant Yellowknife Gold Mines, Ltd., Yellowknife, N.W.T. (See above.)

Complaint under Section 43 that a Party has Failed to Bargain Collectively

During the month the Minister received a complaint affecting the National Association of Marine Engineers of Canada, Inc., complainant, and the Canadian Dredge & Dock Co., Ltd., respondent. The complaint alleged that the company had failed to bargain collectively as required by Section 14 (a) of the Act. The Minister referred the complaint to the Canada Labour Relations Board for investigation.

Application for Consent to Prosecute

During the month, the Minister of Labour received an application for consent to prosecute affecting Arnold Robinson, applicant, and the Prescott and Ogdensburg Ferry Co., Limited, respondent. The application alleged the violation of Section (2) (a) of the Act by the dismissal of the applicant because he was a member of the Canadian Seamen's Union. At the end of the month the application was receiving consideration.

Conciliation Board Appointed

On March 18, 1949, the Minister of Labour appointed a Board of Conciliation and Investigation to deal with a dispute between the Canadian Marconi Company and Canadian Marconi System Division No. 59, Commercial Telegraphers' Union (AFL-TLC) representing radio telegraphers at Coast Stations and radio officers in the Marine Service of the company. The Board was appointed following receipt of the report of Raoul Trépanier, Conciliation Officer (see above). Constitution of the Board had not been completed at the end of the month.

Conciliation Board Report Received

On March 25, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Quebec Railway, Light and Power Company, Quebec, P.Q., and the National Catholic Brotherhood of Transport Employees of Quebec, Inc. (CCCL), representing employees in the Tramways and Autobus Division of the company (L.G., March, 1949, p. 290). The personnel of the Board was as follows: L. P. Pigeon, K.C., Chairman, appointed on the joint recommendation of the other two members, Gerard Lacroix, K.C., appointed on the nomination of the company; and Marius Bergeron, appointed on the nomination of the union. All three members of the Board reside in Quebec City. The text of the Board's report is reproduced below.

Strikes Following Board Procedure

On March 31, 1949, the Canadian Seamen's Union (TLC) called strikes against East Coast deepsea dry cargo and passenger shipping companies. Following receipt of the reports of the Boards of Conciliation and Investigation appointed to deal with disputes involving the union and the dry cargo and passenger companies (L.G., April, 1949, pp. 423, 432), the parties were unable to arrive at an understanding as to the terms of new collective agreements between them. The recommendations of the Boards were accepted by the employers but were rejected by the union.

REPORT OF BOARD in dispute between

**Quebec Railway, Light and Power Company,
and**

**National Catholic Brotherhood of Transport Employees of
Quebec, Inc. (CCCL).**

To the Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

The Board, consisting of Gerard Lacroix, K.C., arbitrator appointed by the employer, Marius Bergeron, arbitrator appointed by the bargaining agent, and Louis Philippe Pigeon, K.C., appointed Chairman on the joint recommendation of the other two, begs to report as follows:—

Nature of the Dispute

The dispute arose on the occasion of bargaining for the renewal of the collective agreement which has been in existence for many years between the Company and the Brotherhood. The agreement was supposed to be renewed on November 1, 1948. The principal requests of the Brotherhood concerning which agreement proved impossible, in spite of the intervention of a conciliator, are as follows:—

1. A reduction in hours of work;
2. The generalization of the weekly holiday;
3. A third week's vacation with pay after 25 years' service;
4. An extension of the guarantees of work;
5. A bonus for work on Sundays and statutory holidays;
6. An increase in wage rates;
7. The retroactive application of this increase.

Except with regard to the wage increase, we have come to unanimous decisions, and are attaching to the present report a draft collective agreement which we strongly advise the parties to sign. Mr. Marius Bergeron, arbitrator appointed by the Brotherhood, sets forth in a minority report his findings with regard to wage rates, as well as a reservation on a secondary point.

Here is a resumé of the reasons for our unanimous or majority decision concerning each of the points at issue.

1. *The Reduction of Hours of Work*

At the present time, the working day for bus drivers in Quebec City is considerably

On March 25, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Quebec Railway, Light & Power Company, Quebec, P.Q., and employees in its Tramways and Autobus Division who are represented by the National Catholic Brotherhood of Transport Employees of Quebec, Inc. (CCCL) (L.G., March, 1949, p. 290).

The Board was composed of L. P. Pigeon, K.C., Chairman, appointed on the joint recommendation of the other two members of the Board, Gerard Lacroix, K.C., appointed on the nomination of the company, and Marius Bergeron, appointed on the nomination of the union. All three reside in Quebec City.

The text of the Board's report is reproduced below.

longer than the average. In fact, the present agreement sets the maximum working day, paid for at the regular rate, at 8½ hours. As a matter of fact, most of the primary runs involve 8½ hours' work per day. However, these runs actually require 9 hours a day, as the employees are obliged to report fifteen minutes ahead of time for each of the two work periods.

In the past, compulsory reporting time was paid for, but a few years ago the parties agreed not to take it into account when calculating remuneration, but to increase the hourly rate in consequence. It is quite evident that this change is an important fact which must be taken into consideration when making comparisons.

Statistics show that the average number of working hours per week in this type of concern (urban transport) is 45, whereas the average number of hours worked by the members of the Brotherhood is 48.80 per week. Besides this, we know that the number of hours paid for, more often than not, includes the compulsory reporting time in addition to the time devoted to the work properly speaking. Such is the case with the largest company of this type: the Montreal Tramways Company, and with

several others. Moreover, a working day of 8 hours in addition to the compulsory reporting time appears to be a fairly generally accepted standard in this type of concern.

In principle, the Brotherhood's request to have the maximum daily working hours reduced to 8½ would therefore be fully justified. In that way, most of the primary runs would involve 8 hours' work per day. However, the fact must be taken into account that, for a public service such as this, a reduction in working hours necessitates a corresponding increase in staff. In order that the training and recruiting may be carried on under good conditions, the change must be gradual. Moreover, we must also think of the practical necessity of keeping the weekly earnings of each employee up to a satisfactory level while at the same time not imposing excessively high wage rates upon the employer.

For all these reasons, we recommend a reduction of a quarter of an hour only for this year.

2. The Weekly Holiday

At the present time, only primary runs call for a weekly holiday, so that only 60 per cent of the drivers have this advantage. This is quite abnormal. Up to the present, the great obstacle to reform in this respect has been the difficulty of giving a sufficient number of hours of work per week otherwise to employees with the poorer runs. At our last meeting, the employer produced a scheme for an arrangement of the runs involving a quarter hour's reduction in the daily working hours, and the simultaneous setting up of the weekly holiday. This table demonstrates the possibility of carrying out the reform without a reduction of weekly earnings amounting to more than \$0.03 an hour except for the work normally devolving upon beginners. For this reason, we are unanimously agreed to grant to the latter, as from the coming into effect of the new regime, a special wage rate adjustment, in addition to the general increase which we recommend respectively.

For all these reasons, we therefore have no hesitation in recommending the setting up of the weekly holiday. In order to give the employer the required time for the training of the additional employees and for the new arrangement of the work, we suggest that he be given until the 1st of June next at the latest to do this.

The Brotherhood asked that an employee required to work on his weekly holiday be paid double time. This request seems to us to be excessive. It must not be forgotten that this is a public service, and that,

offsetting the advantages of stability which this type of work offers, the employees must put up with the disadvantages which the obligation to maintain the service under difficult or unforeseen circumstances may entail. We therefore believe that the bonus should, in this instance, be set at a sufficiently high level to deter the employer from withdrawing the day's rest unnecessarily without at the same time making the continuation at any cost of the service required by those using the lines unduly onerous. For this reason, we recommend the bonus now in force for these cases in Montreal—a quarter of the regular rate.

3. A Third Week's Vacation with Pay after 25 Years' Service

We are sorry to have to refuse this request, on the grounds that the vacations now granted—one week per year after one year's service and two weeks per year after five years' service—are in no way inferior to what is generally granted in similar concerns or to what is generally granted in the locality.

4. An Extension of the Guarantees of Work

The problem which comes up in connection with this point has proved extremely complicated and extraordinarily difficult to solve. At the present time, the employer guarantees only the primary runs, those which are the most stable and to which about 60 per cent of the drivers are assigned. There is no guarantee for the others. They are employed according to the need and paid in accordance with the time worked. The extras receive only an hour's pay for each day on which they reported and did not obtain any work.

The employer did not deny the desirability of giving employees whose seniority is not sufficient to permit them to have a primary run greater assurance of stability in weekly earnings. He even offered more complete guarantees of work than those requested by the Brotherhood, but he laid down as a condition of his offer a change in the method followed in choosing the runs and in the method of assigning work not booked in advance.

The latter change is as follows. The work includes booked runs divided into primary, secondary and voluntary. None of these runs is allotted to an employee other than the one who chose it (signed for it) unless the latter is absent. In this case, these runs become the lot of the extras, with all the runs not booked in advance. This work is distributed among the extras in accordance with their respec-

tive seniority. If it happens that a booked run is cancelled or shortened, the employee to whom it was entrusted takes his place among the extras in accordance with his seniority, and it is only if his run was classed as a primary run that he is entitled to pay for the time lost in case, as an extra, he should not have obtained as much work as his run called for. Besides this, the guarantee does not stand for Sundays and holidays.

The employer has offered to guarantee all runs, every day, but on condition that, in case a run should be cancelled or shortened for reasons of service, he may assign to the employee to whom it was entrusted any available work in the same work period without regard to the seniority of the employee or to that of the extras, so that only the work which has not been thus assigned will remain for the latter. In return, the extras would have a guarantee of at least 36 hours of work per week, instead of an hour a day as at present and three hours as called for in the Brotherhood's request.

The employer's plan, in spite of its indisputable advantages, gave rise to such serious apprehension among the representatives of the Brotherhood that they did not hesitate to state that they would rather give up any extension of the guarantees of work than consent to a change in the system of distributing the work which would interfere with the privileges of seniority.

Under these conditions, we recommend that a fair trial be made of the new system, at the same time as the reduction in working hours and the generalization of the weekly holiday are put into effect. If the Brotherhood is not satisfied with the experiment, a return will be made to the old system of guarantees and distribution of work in accordance with seniority, except in so far as the minimum assured to the extras is concerned, which shall be three hours and not one hour in accordance with the request made by the Brotherhood and agreed to by the employer.

In the attached draft agreement, the guarantees of work clauses correspond to the present system, with the alterations indicated above and the changes entailed by the reduction of working hours, etc. At the end are found the new clauses which we suggest trying out under the conditions indicated above.

While agreeing in suggesting this trial, Mr. Marius Bergeron does not agree with regard to the penalty imposed upon extras who fail to report every day. According to the text the guarantee would then be

reduced to six hours. He would like this penalty to be reduced by the number of hours' work which this employee would have been able to do that day in spite of his failure to report at all the relief periods when he was supposed to do so.

It is true that the penalty suggested exposes the employee to not receiving in two weeks' time a higher remuneration than if he had not done these hours of work. It must not be forgotten, however, that if he does not have to invoke the guarantee he will have all the benefit of this work, and, if he must invoke the guarantee, his absence signifies that the Company has had to give a guarantee to another extra to replace him. Taking into account the nature of the concern, the proposed penalty does not seem excessive to the majority of the members of the Board. Moreover, this is the system which has been in force for a number of years in Montreal.

5. Bonus for Work on Sundays and Holidays

As this is a public service and as work on Sundays and holidays is, after all, distributed according to seniority, it seems to us that a bonus for this work should be an unnecessary complication, and that it would be better to decide, as was done for the compulsory reporting time, that this is one of the elements to be considered when fixing the wage rate, and to set it accordingly, while not losing sight of the other elements to be taken into account.

6. Increase in Wage Rates

The Brotherhood had asked for a general increase of \$0.23 an hour as follows:—

| | |
|--------------------------------------|--------|
| For the increased cost of living.... | \$0.11 |
| For the reduction in hours of work. | 0.06 |
| For the change of work..... | 0.06 |
| Total | \$0.23 |

They are also asking for \$0.05 more during the second year's service—that is, for this category, a total increase of \$0.28 an hour. For the third year, they ask that the maximum rate should apply, which brings the increase called for in this case up to \$0.33.

Here are the findings of the Chairman of the Board and of the employer's arbitrator on this question; the union arbitrator, Mr. Marius Bergeron, sets forth his views in his minority report.

Change of work.—During the last year the employer completed the substitution, which had already been begun, of buses for streetcars as the medium of urban

transportation. The Brotherhood maintains that the bus is harder to drive and requires more attention and more handling. The steering of the vehicle, instead of being delegated to the rails, requires the constant manipulation of the steering-wheel. Besides this, on vehicles which are not provided with automatic gears, changing the gears and manipulating the clutch require a considerable effort at the stops, which are so frequent. The narrowness of the streets, the hilly ground, the snow and ice for more than a third of the year, etc., were also pointed out.

While recognizing the difficulties of the work and the necessity for adequate remuneration, the Board has reached the conclusion that the request for an increase on this account should be refused, because the uniform and general practice in other cities where there are both streetcars and buses is to assign the same wage rate to the bus drivers and to the conductors of one-man cars. This had, moreover, been the case in Quebec since the partial introduction of buses about 1939. A higher rate for bus drivers had never been asked for before the removal of the streetcars. This seems to us to be a decisive argument for refusing this request.

Reduction of Working Hours.—Having requested an average reduction in working hours of half an hour per day, the Brotherhood asked for an increase in wage rates of \$0.06 an hour in order to maintain the weekly earnings at the same level in spite of the reduction in hours of work. It goes without saying that, in recommending a reduction of only a quarter of an hour per day, this request would first of all have to be cut down by a half. Even thus reduced, however, it does not seem to us to be justified.

Just because Quebec bus drivers had longer than average hours of work in the past, they cannot now, while obtaining a gradual reduction intended to bring them back to the average, ask for higher pay than that to which they would be entitled if they had always had the same hours of work. If the members of the Brotherhood could prove that their employer has taken advantage of their long hours of work to pay them a lower wage it might be different, but in the present case no such evidence has been presented. This is a group of employees which has been strongly organized for a long time and has enjoyed complete union security for many years.

Up to the present, in order to have higher than average weekly earnings, they have accepted longer than average hours.

The agreement signed in November, 1947, gave them average weekly earnings of \$42.34 a week (48 hours at 88.2¢) when the national average for their occupation was \$39.24 (45 hours at 87.6¢). The one signed in November, 1946, brought weekly earnings of about \$37.50 (48 hours at 78.2¢) when the national average was \$35.57 (46 hours at 77¢). If they now want to reduce their hours of work to the average, they cannot for that reason ask for higher than average weekly earnings. This would be absolutely unfair, not only with regard to their employer, but also with regard to the other wage-earners of Quebec who are called upon to pay these wages in the form of transportation rates, and whose average earnings are, unfortunately, much lower than the national average (\$34.92 as compared to \$42.16 on November 1, 1948).

The Increased Cost of Living.—From November, 1947, to November, 1948, the cost-of-living index rose from 143.6 to 159.6—an increase of 11 per cent. This factor, applied to an hourly wage of \$0.92, would amount to an increase of \$0.10 an hour. If the calculation were based on the average rate for the group concerned, which is \$0.88.2, there would be only a negligible fraction's difference.

Is this argument decisive? After close consideration and lengthy deliberation, we do not think so. In negotiating the last agreement, in November, 1947, in preparing an agreement which would bind them for one year, the parties were necessarily obliged to take into account not only the existing economic conditions, but also the movement of prices and the general economic tendency which was then strongly directed towards an increase, as indicated by the variation of the index. From November to December, 1947, it rose from 143.6 to 146. If, as is proper, we take for granted that the two parties took the right view in their forecasts, must it not be presumed that they were counting on a continual increase like the one which had occurred the preceding year, and which had also caused the index to rise 16 points between November, 1946, and November, 1947?

Under these conditions, it seems to us that it is not correct to consider the wage rates established in November, 1947, as set in terms of the cost-of-living index at that time. This was not an agreement with a sliding scale, but a steady agreement for a year. Should the rates not rather be considered as set in terms of the average level expected for the year to come, which did in fact amount to 151.6 in April, 1948?

We believe that the employer was right to a certain extent in maintaining as he did that the wage increases granted by him in 1946 and in 1947 exceeded, at the time they were respectively granted, the increase in the cost of living shown by the index and took into account the future increase which was to be expected in view of the economic tendencies.

We therefore conclude that it is not right, in the circumstances of the case under consideration, to consider the wage rates agreed upon in November, 1947, as set in terms of the price and wage level at that date, but that they should rather be considered as set in terms of the average conditions anticipated for the duration of the agreement, that is in terms of the 151.6 index instead of the 143.6 index.

It is quite clear at the present time, as it was last November, that the general economic tendency is no longer directed towards a rapid increase, but, on the contrary, towards stabilization, if not regression. Consequently, the objective consideration of the cost-of-living index factor alone would lead to an increase of only \$0.05 an hour (that is for the rise from 151.6 to 159.6). This result is only different by one cent from the Company's offer, which is for \$0.04.

Other factors, however, must be taken into consideration. These other factors are, in the first place, the wage rates paid in other comparable concerns. No satisfactory point of comparison can be found in our Province, but elsewhere it can be seen that the most generally prevalent rate for cities of comparable size is \$1 an hour. This is the rate in force in Winnipeg, Sault Ste. Marie and Ottawa, by virtue of a recent agreement. In these cities, it is true, the difference between the initial rate and the maximum rate is much less than in Quebec. In return, it must be noted that the average earnings of other workers at Quebec is appreciably lower than in these other cities. This divergence is, to a large extent, justified.

It is also because of this local condition that we do not feel able to recommend the \$0.10 an hour increase which would be required to bring the average hourly earnings of the Quebec bus drivers up to the average level of the earnings of urban transport service workers (97.7¢ an hour on November 1, 1948). We are obliged to note, to our regret, that the difference between the average earnings of workers in Quebec and the national average has been increasing since 1947. On November 1, 1947, this difference was \$5.09 a week. On November 1, 1948, it had risen to \$7.24.

If this were an industry serving the national market, or an export market, strong arguments could be found for maintaining that local conditions are no reason for paying lower wages than those generally paid in this industry, all other things being equal. Here, however, we are in the presence of a public service serving the locality, whose employees are, in the last analysis, paid by the local workers. It seems to us that the latter are entitled to demand that their economic condition be taken into consideration when setting wage rates which cannot fail, sooner or later, to have repercussions on the structure of the transportation rates.

For these reasons, the majority of the members of the Board recommend a general increase of \$0.08 an hour, bringing the hourly wage for drivers up to \$1. Although in fixing this amount we have eliminated any consideration of compensation for the reduction in hours of work and the weekly holiday, it seems quite satisfactory to us to note that the suggested increase, based on objective comparisons, is exactly equal to the \$0.03 an hour compensation required in addition to the \$0.05 an hour required by reason of the increased cost of living in accordance with the method of calculation set forth above.

In addition to this general increase, we are of the opinion that a special increase should be granted to beginners so as to bring the rate for the first year up to \$0.75 an hour. The necessity of this special increase has been admitted by the employer's representatives. It will constitute a first step in the reduction of the considerable difference between the initial wage and the maximum wage for drivers.

We must point out that, when comparing the national average for urban transport workers with the average for the Quebec drivers' group, we did not forget that the national average included workers other than drivers. However, an examination of the wage rates paid elsewhere to these other workers showed us that they did not differ appreciably from those paid to the drivers, so that the national average corresponds fairly accurately to theirs.

7. Retroactivity

In view of the reasons for our decision, we are of the opinion that the increase suggested should be made retroactive to the date of renewal of the agreement, that is the 1st of November, 1948. However, the special adjustment granted beginners should not come into effect until the reduction in hours of work and the generalization of the weekly holiday come into force.

Moreover, because of the preliminary work required, we recommend that the reduction in hours of work and the weekly holiday should come into effect only at the time of the second signing for runs following the date of the present report, which signing should take place before the 1st of June next. Also beginning on this same date the new system for guarantees of work would be tried out.

We wish to thank the parties for their co-operation.

(Sgd.) LOUIS PHILIPPE PIGEON,
Chairman.

(Sgd.) GÉRARD LACROIX,
Arbitrator.

Quebec, March 24, 1949.

Minority Report

1. *Wages*

I am sorry that I am unable to share my colleagues' point of view concerning the question of the wage increase, and also that I was unable to discuss with the Chairman of the present Board the reasons put forward by him for granting a general increase of 8 cents an hour.

According to the LABOUR GAZETTE for February, 1949 (English edition), the average hourly earnings of local transport employees were 87·6 cents on November 1, 1947, and 97·7 cents on November 1, 1948; according to the LABOUR GAZETTE for July, 1948, the hourly earnings were 92·4 cents on April 1, 1948.

According to the LABOUR GAZETTE for February, 1949 (English edition), the cost-of-living index was 143·6 on November 1, 1947, and 159·6 on November 1, 1948.

N.B. In preparing its evidence with regard to the cost of living, the Brotherhood took the year 1939 as a basis.

The Arbitration Board refused to allow it to refer to 1939 because the Quebec Railway Company was then operating mainly streetcars, whereas since the autumn of 1948 it has been operating only buses. Thus I do not understand how my colleagues can go back in their arguments to November 1, 1947, when the Company's operations were carried out on the same basis as in 1939.

According to the collective agreements filed for the cities of London, Ottawa, Winnipeg, Hamilton and Montreal (the question of wages for the City of Montreal has now been submitted to arbitration), transport employees reach the maximum hourly rate in a period of time generally extending from 12 to 18 months.

In the case of employees of the Quebec Railway Company, the average hourly earnings of the said employees were 84·75 cents an hour for the pay period from October 28, 1948, to November 24, 1948;

on November 1, 1947, the parties negotiated an increase of 10 cents an hour, which represented the increase in the national average for the period from November 1, 1946, to November 1, 1947;

no reason was adduced before the present Board to the effect that the average hourly rate should not be increased in the same proportion as the national average, which, from November 1, 1947, to November 1, 1948, also rose 10 cents;

the majority decision mentions that the parties signed an increase of 10 cents an hour on November 1, 1947, and that they took the future rise in the cost of living into consideration.

Personally, I cannot agree with this claim. However, I believe that if this principle is accepted for the cost of living, it must also be applied to the tendency of the wages of local transport employees.

The establishment of the six- (6-) day week will chiefly affect the earnings of new employees. And the Company's representatives mentioned, with good reason, I believe, that the wage increase for the latter should be much greater.

According to the table provided by the Company, there are at present only three employees who are in their 3rd year of service with the Company. The time is therefore most favourable for reducing the three-year period which an employee must work before reaching his maximum wage. If this period were reduced by one year, a 2-year period would still be much greater than the period in force for the agreements we have been able to examine.

For these reasons, I would recommend an increase in wages divided as follows:—

- (a) an increase of 10 cents an hour by reason of the increased cost of living;
- (b) an increase of 3 cents an hour by reason of the establishment of the 6-hour day, which affects more than half the employees, and by reason of the 15-minute reduction of the normal working day;
- (c) an increase of 4 cents an hour to make allowance for the tendency of the average hourly earnings in the local transport industry;
- (d) a bonus of 3 cents an hour due to the particularly difficult conditions in the City of Quebec;
- (e) the elimination of the first year.

Consequently, I would recommend the following wages:—

| | Cents an hour |
|--------------------|------------------|
| 1st year | \$0.92 |
| 2nd year | 1.02 |
| Subsequently | 1.12 |

2. Guarantee to Extras

The majority decision decrees that an extra who fails to report on time at the relief hours at which he is supposed to report shall have his guarantee for the twelve- (12-) day period reduced by six

(6) hours, even if the employee has, nevertheless, worked for a few hours during that day.

I believe that the guarantee in this case should be reduced by six (6) hours only in case the employee should not work at all. If he succeeds in working, his guarantee should be reduced by the difference which may exist between his guarantee of six (6) hours and the hours he actually works.

Respectfully submitted.

(Sgd.) MARIUS BERGERON,
Union Arbitrator.

Recent Decisions of Canadian Railway Board of Adjustment No. 1

The Canadian Railway Board of Adjustment No. 1 has released its findings in cases heard on January 11, 1949.

Case No. 577 concerning the Canadian National Railways (Atlantic Region) and the Brotherhood of Railroad Trainmen, with respect to assessment of discipline against an assistant conductor.

Statement of Facts: The assistant conductor in the case was regularly assigned as a breakman on freight trains, but in the instance under review he was called on short notice, as assistant conductor, on a passenger train. En route, the conductor received "run late" orders which changed the time schedule of the train. These orders were not communicated to the assistant conductor, nor did the latter make any enquiries about orders received by the conductor, although "certain other matters" were discussed by the conductor and the assistant. The "run late" order was not obeyed and, as a result, the train collided head-on with a light engine, running as an extra. Following an investigation, the assistant conductor was discharged "for responsibility head collision. . . ."

The employees contended that "in no case have assistant conductors been used to assist conductors in the operation of their trains." They held that conductors, particularly those in the Atlantic Region, were under the impression that the only responsibility of assistant conductors was that of handling transportation (ticket collectors) and looking after the training and detrainning of passengers, etc. These duties, it was asserted, the evidence in the case showed the assistant conductor was performing efficiently at the time of the accident. The employees contended that the assistant conductor was wrongfully discharged and

that he should be reinstated in his former position and compensated for lost time.

The Brotherhood of Railroad Trainmen in their "statement of facts" in the case reviewed the findings of the investigation into the accident, which *inter alia* discharged all members of the train crew, including the conductor and assistant conductor.

The Company contended that if there was any doubt on the part of conductors, while acting as assistant conductors, that their only responsibility on passenger trains was that of handling transportation, etc., they should have enquired of their supervisory officer, or their representatives. "Certainly there was no misunderstanding on the part of the Company's officers of the Atlantic Region." It was claimed that "the classification of assistant conductor or ticket collector was negotiated into the wage schedule covering conductors . . . effective June 1, 1929. It was held that the assistant conductor in this case "was a member of the train crew . . . and not having been specifically relieved of his responsibility as such, he definitely participates in responsibility with other members of the crew. . . ." He "failed to perform properly all of the duties devolving upon the position of assistant conductor . . . his discharge as discipline assessed for his failure . . . was warranted."

The parties to the dispute presented further oral evidence to the Board.

The Board in its decision held that the assistant conductor must be held responsible with other members of the crew, but under the particular local circumstances affecting him in this case, the discipline should be modified to the extent of reinstatement to the service without pay for time lost.

Case No. 578 concerning the Canadian National Railways (Central Region) and the Brotherhood of Locomotive Engineers. The controversy centred on the claims of three locomotive engineers "for a new day or trip for turning equipment . . . and placing it on a steam track after arrival at. . . ."

Joint Statement of Facts: A bulletin issued by a Superintendent of the Company required crews of two specified trains, after detrainning passengers, to turn their equipment and yard their trains on steam track before going off duty. The regularly assigned engineers of the trains specified presented "claims for a new day or trip for turning equipment and placing it on steam track."

These claims were declined and payment was made for the time occupied in turning the equipment and placing it on the steam track as set forth in Clause 4 of the current schedule for locomotive engineers, the relevant clause of which reads:—

"Engineers in passenger service will be paid on the minute basis for switching at terminals and turn-around points, except as otherwise provided for . . . each three minutes to count as one mile."

The employees contended that the switching of equipment was yard work and should be taken care of by the yard crew on duty.

The Company held that the agreed interpretation of the relevant clause of the Schedule indicated that it was permissible to use engineers in passenger service to perform switching at final terminal to be paid for as provided in Clause 4 of the Schedule. Thus, the duties in dispute were part of the regular assignment of the engineers, and the rules and agreed interpretations did not justify the claims.

Both sides in the controversy presented additional oral evidence before the Board.

The Board held that the "definition of separate runs" in the Engineers' and Firemen's schedule entitled the employees concerned to a separate day for the service performed in the instance under review. The claim of the employees was sustained.

Case No. 579 concerning the Great Northern Railway and the Brotherhood of Railroad Trainmen. The dispute arose in respect to the claims of three brakemen in the amount of 100 miles at local way freight rate, "account runaround and not sent out in turn at Vancouver, October 5, 1943, and for each succeeding trip out of Vancouver subsequent to that date, and for all other brakemen similarly situated."

Joint Statement of Facts: Details of the claimants' assignments to duties, together with quotations from the trainmaster's bulletin governing such assignments were presented in the "joint statement of facts." The claims were based on alleged violations of a Trainmen's Rule which became effective on February 1, 1941, and which read as follows:—

"Trainmen not sent out in their turn, or who are runaround at terminals, will be paid 100 miles for each runaround. This not to apply after crews are on duty or under pay."

Position of Employees: The employees held that the following rule of the current trainmen's schedule supported their claim:—

"All bulletins will specify the time and date of closing, whether vacancies thereon are temporary or permanent, terminals of runs bulletined, layover or relief point, nature of service, and days upon which service is to be performed. Bids from employees must be in the hands of the proper officer by the specified time and date of closing. No bids may be withdrawn after specified time and date of closing of bulletin. . . ."

In accordance with the above ruling a bulletin was issued showing in detail the proper assignments of the claimants. It was asserted that this bulletin was not adhered to by the Company and that employees were therefore, "entitled to 100 miles each day under the provisions of the current schedule Rule quoted in the 'Joint Statement of Facts.'"

Position of Carrier: The argument of the carrier took issue in the first place with the clause in the statement of claim, namely: "and for all other brakemen similarly situated," by quoting a Trainmen's Rule as follows:—

"Claims regarding improper payment under the provisions of this schedule must be filed . . . within 30 days of the date payment is made to the employee for such service period. Retroactive claims in excess of that period will not be considered." The carrier asserted that no claims had been filed by the employees, other than some ten specified dates in October, 1943, and, consequently protested the inclusion of "all other brakemen similarly situated" in the statement of claim.

Concerning the claims "actually filed with the carrier" it was asserted, that "one of the principal rules governing the interpretation of agreements or schedules is to ascertain the intent and purpose of the parties, who made the agreement or

schedule." Accordingly, the carrier presented lengthy and technical argument as to the interpretation of the rules, timetables and schedules relevant to the case under review.

In conclusion, the carrier submitted that "no brakeman in the facts here disclosed was deprived of any work. The incident was trivial and simply involves a reversal of calling time of crews assigned to two entirely separate trains with different distant terminals and the procedure discloses no plan or purpose to violate the agreement."

Representatives of the parties to the dispute appeared before the Board and presented additional oral evidence in support of their respective contentions.

The decision of the Board was that the claim of the employees was not sustained.

Case No. 580 concerning the Canadian Pacific Railway (Eastern Region) and the Brotherhood of Railroad Trainmen, with respect to a claim of a conductor for time held out of service.

Joint Statement of Fact: The conductor was arrested and held in custody for two days, charged with being in possession of smuggled American cigarettes. He was then released on bail and after several remands, his case finally came to trial some ten months after his arrest, when the charge against him was dismissed. Four days later he "reported for duty" and "allowed to resume duty."

The employee requested that he be paid "for time held out of service, under Rule 30 of the Agreement" between the Railway and the Brotherhood of Railroad Trainmen.

The Company contended that it was justified in holding the conductor out of service until his case had been decided by the Courts. The railway claimed that Rule 30 was not applicable to the case and quoted former decisions of the Board in support of their contention.

Both parties to the dispute appeared before the Board and presented oral evidence in support of their respective contentions.

The Board denied the claim of the employee.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Research and Statistics Branch of the Department of Labour. These are obtained directly from the parties involved and from the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc. are summarized in separate articles following this.

Manufacturing

Vegetable Foods

WINNIPEG, MAN.—CHRISTIE, BROWN AND COMPANY LIMITED AND UNITED BAKERY AND CONFECTIONERY WORKERS, LOCAL 476.

Agreement to be in effect from October 7, 1948, to October 16, 1949, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. There shall be no discrimination, interference, restraint or coercion by either

Longer vacations with pay to production workers are provided in an increasing number of agreements in certain industries. The granting of 2 weeks' vacation to employees with at least 1 to 5 years' service is fairly common. Provision for a third week to employees with 20 to 25 years' seniority is included in six of the agreements summarized in the following article. A third week of vacation is granted to employees with 15 years' service in the agreement between St. Lawrence Alloys and Metals Limited and The Alloys and Metals Workers' Union, which also grants 4 weeks' vacation with pay to employees with 25 years of the company service credit. (See also L.G., April, 1949, pp. 445-450.)

the company or the union because of membership or non-membership in the union. **Check-off:** the company agrees to deduct union dues from the pay of employees, who so authorize, during the term of the agreement and to remit same to the union.

Hours of work: for production staff, 45 per week; for shipping floor staff, 40 per week; for engineers, 48 per week. **Overtime** at time and one-half shall be paid production staff workers for work in excess of 9 hours per day or 45 hours per week, shipping floor staff for work in excess of 8 hours per day or 40 hours per week and engineers for work in excess of 8 hours per day or 48 hours per week. On 8 specified holidays employees who work the day immediately preceding and following the holiday will be paid a full day's pay if the holiday falls on a normal work day. A *relief period* of 15 minutes will be allowed all employees during the morning and afternoon. **Vacation with pay:** one week to employees with one year's continuous service with the company, provided, that they have not been away from work more than 5 weeks in the previous 12 months; 2 weeks to employees with 3 or more years' continuous service with the company.

Hourly wage rates for certain classes: males—machine captain, ovenman \$1.02; assemblyman 97 cents; assistant mixers 92 cents to \$1.02; mechanics \$1 to \$1.17; mechanic's helper 72 to 99 cents; engineer watchmen 90 and 95 cents; general 72 to 92 cents; shippers \$43.80 per week; assistant shippers \$28.80 to \$38 per week; deliveryman \$42.80 per week; starting and step-up rates for males 72 cents increased to 75 cents after one month, to 78 cents after 2 months and to 82 cents after 4 months with additional raises based on merit; for females and boys (under 18 years) 55 cents increased to 57 cents after one month, to 59 cents after 2 months and to 63 cents after 4 months with additional raises on merit; agency and shipping branch \$28.80 per week, increased to \$30 per week after one month, to \$31.20 after 2 months and to \$33.40 after 4 months with additional raises based on merit. A *night shift premium* of 5 cents per hour shall be paid to employees starting work between 4 p.m. and 4 a.m. Any employee in the bakery above the general help classification, who is required to act as a temporary assistant foreman, will be paid his own rate for the first 2 weeks, after that period while working as a temporary assistant foreman, he will be paid 10 cents per hour above his own rate.

Provision is made for *seniority rights* and *grievance procedure*.

Animal Foods

NORTH SYDNEY, N.S.—LEONARD BROTHERS DIVISION OF NATIONAL SEA PRODUCTS LIMITED AND CANADIAN FISH HANDLERS' UNION, LOCAL 4.

Agreement to be in effect from October 19, 1948, to October 18, 1949, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agency for their employees. **Check-off:** the company agrees to deduct from the pay of employees, who so authorize, initiation fees and union dues and to remit same to the union.

Hours of work: 8 per day, 6 days per week. **Overtime** at time and one-half for work in excess of the regular daily hours and for all work on Sundays and 5 specified holidays. Four additional holidays are *paid holidays* for employees who work the days immediately preceding and following the holiday. **Vacation with pay:** one week to employees with one year of completed service with the

company, 2 weeks to employees with 3 years' service (a minimum of 288 days shall be worked in the year prior to the vacation period). One-half day's vacation to employees with one but less than 3 years' service, and one full day's vacation to employees with over 3 years' service will be allowed for each 20 days of actual work. In no case, however, shall a vacation exceed 6 or 12 days as the case may be.

Hourly wage rates effective during the life of the agreement: cutters, skimmers and splitters (while actually performing these duties) 77 cents; smokers, boilermen, fish handlers, general labour and basic 74 cents, boxmakers and carpenters 72 cents to 79 cents, boys (under 16 years) 56 cents, females 54 cents, watchmen \$35 per week. In addition a special wage rate of 3 cents per hour above the basic rate for charge or leading hands, weighers and cullers while actually performing these duties, and for freezermen while they are actually working in the cold storage rooms.

Uniforms worn by female employees shall be supplied and laundered once a week by company. Knives and stones for all cutters and skimmers shall be supplied by the company.

Provision is made for *seniority rights*, *grievance procedure* and the continuance of the present *joint contributory voluntary insurance plan*.

Metal Products

MONTREAL, P.Q.—R.C.A. VICTOR COMPANY LIMITED AND UNITED ELECTRICAL RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 531.

Agreement to be in effect from November 7, 1948, to November 6, 1949, and for a further period of one year unless 60 days' notice is given by either party. This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, March, 1948, p. 188 with the following changes—**Check-off:** the company agrees to check-off union dues and initiation fees for all employees included in the bargaining unit. Such deductions shall continue during the term of the agreement as a condition of employment. Formerly the check-off of union dues and initiation fees was by voluntary authorization. **Vacation with pay** has been changed so that 3 weeks is now granted employees with 20 years' seniority, instead of after 25 years as formerly.

Hourly wage rates, effective November 7, 1948, range from 77 cents for bracket "A" to \$1.52 for bracket "S". These starting rates are increased automatically by 5 cents per hour after 2, 4 and 6 months respectively. Provision is also made for a further increase of 5 cents per hour in each bracket (except "D", "E" and "F" where the total increases over the starting rates are 10, 12 and 16 cents respectively) for day work operations only, based on merit. Thus the hourly day work maximum range is from 97 cents in bracket "A" to \$1.72 in bracket "S".

BEAUHARNOIS, P.Q.—ST. LAWRENCE ALLOYS AND METALS LIMITED AND ALLOYS AND METAL WORKERS' UNION, LOCAL 22613 (A.F. of L.).

Agreement to be in effect from October 9, 1948, to October 8, 1949, and thereafter from year to year subject to notice. The company

recognizes the union as the sole and exclusive collective bargaining agency for all eligible employees. The company and the union agree that there shall be no discrimination, intimidation, restraint or coercion because of membership or non-membership in the union. *Check-off*: the company agrees to deduct union dues monthly from the pay of employees, who so authorize, for the term of the agreement.

Hours of work: 8 per day or shift, a 48-hour week. *Overtime* at time and one-half for work in excess of the regular hours and for all work on 3 specified holidays. Six additional holidays are *paid holidays* for employees who work their regular shifts immediately preceding and following the holiday provided holiday falls on a regularly scheduled work day. *Vacation with pay*: one week to employees with one year and less than 2 years of company service credit, 2 weeks to employees with 2 years of service credit, 3 weeks to employees with 15 years of service credit and 4 weeks to employees with 25 years of service credit. An employee with less than one year of service credit receives one-half day for each month of completed service with the company with pay equal to 2 per cent of total earnings or his regular rate, whichever is higher.

Hourly wage rates for certain classes: locomotive crane operator \$1.45, electricians \$1.13 to \$1.33, machinists \$1.23 to \$1.33, mechanics \$1.13 to \$1.28, carpenters \$1.18 to \$1.27, bricklayers \$1.20 to \$1.25, pipe fitters \$1.18 to \$1.24, fireman, craneman \$1.20; blacksmiths \$1.13 to \$1.18, locomotive crane fireman or oiler \$1.10, oiler \$1.13, truck driver \$1.05, labourers \$1 to \$1.05. Starting rate for new employees shall be 7 cents per hour lower than the scheduled rates. Where aptitude is shown, employee may be upgraded during the trial period but after accumulating three months of service, all employees will be paid according to the scheduled rates. *Off shift bonus* of 5 cents per hour for work on first night shift and 7 cents per hour for work on second night shift. The first night shift includes all shifts starting between 3 and 5 p.m. inclusive, while the second night shift includes all shifts starting between 10 p.m. and 1 a.m.

Provision is made for *seniority rights* and *grievance procedure*.

TORONTO (LEASIDE), ONT.—CANADA WIRE AND CABLE COMPANY LIMITED AND UNITED ELECTRICAL RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 521 (FORMERLY LOCAL 514).

Agreement to be in effect from November 25, 1948, to November 24, 1949, with provision for entering into negotiations for its renewal. This agreement is similar to the one previously in effect (L.G., April, 1947, p. 542) with the following changes—*Hours of work*: 8 per day, 5 days per week, a 40-hour week for day shift now as for other shifts (day shift changed from 44 hours to 40 hours per week in agreement effective November 24, 1947). *Paid holidays* were also increased from 3 to 8 then. *Vacation with pay* provisions were also changed to 3 weeks for employees with 25 years' continuous service with the company and a vacation allowance of 2 per cent of employees' earnings to employees with 3 months' service but less than one year.

Hourly wage rates have been increased by 12 cents and 11 cents during 1947 and 1948 respectively so that the starting rate for males is 90½ cents, increased to 93 cents after 2 pay periods, to 97 cents after 2 months and to \$1 after 3 months; for females the starting rate is 78 cents, increased to 80½ cents after 2 pay periods and to 82½ cents after 3 months (female rate ranges will apply to youths 16-18 years of age, except apprentices); rates for certain classes (excluding supervisors) now are as follows: accessories 92½ cents to \$1.23; braiding, male 90½ cents to \$1.34½, female 79 to 95½ cents; cleaning, male 90½ cents to \$1.07, female 78 to 89½ cents; cord, male 90½ cents to \$1.19, female 80 to 94½ cents; drawing, male 90½ cents to \$1.27½, female 79 to 94½ cents; enamel, male 92½ cents to \$1.29½, female 80 to 94½ cents; fine wire stores, male 92½ cents to \$1.12, female 79 to 90½ cents; magnet, male 90½ cents to \$1.21, female 80 to 94½ cents; plastics 92½ cents to \$1.18; rubber covered, male 90½ cents to \$1.25, female 79 to 94½ cents; salvage 92½ cents to \$1.08; shaped wire 92½ cents to \$1.23½; shipping 92½ cents to \$1.21; spools, male 92½ cents to \$1.12, female 79 to 92½ cents; stranding, male 90½ cents to \$1.29½, female 78 to 96½ cents; test laboratory, male 92½ cents to \$1.25½, female 82½ to 94½ cents; carpenters \$1.16 to \$1.35; electricians (first and second class) \$1.10 to \$1.47, electrician's helper 96½ cents to \$1.10½; machinists \$1.13 to \$1.43; millwrights (first and second class) \$1.01 to \$1.35. *Night shift premium* has been increased from 5 to 7 cents per hour for work on No. 1 shift. Premium for work on No. 3 shift remains at 5 cents per hour.

TORONTO, ONT.—THE TRANE COMPANY OF CANADA LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 512.

Agreement to be in effect from November 3, 1948, to July 24, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. There will be no discrimination, intimidation, restraint or coercion because of membership or non-membership in the union. *Compulsory check-off*: the company will deduct union dues monthly from the pay of all employees who shall, as a condition of employment, sign a dues deduction authorization card; the company also will deduct an initiation fee from employees joining the union and remit all dues and fees to the union.

Hours of work: 8½ per day Monday through Friday, a 43½-hour week. *Overtime* at time and one-half for all work in excess of the regular hours and for all work on Saturdays; double time for work on Sundays and 8 specified holidays which are paid holidays. *Vacation with pay*: all employees, except those designated for maintenance or other special purposes, will be required to take a 2 weeks' vacation when the factory will be closed. Vacation pay will be granted according to length of service, 2 per cent of earnings to employees with less than one year, one week to employees with one year's service, 2 weeks to employees with 3 years' service and 3 weeks to employees with 20 years' service. *Rest periods* of 10 minutes during each half shift shall be granted workers on both day and night shifts.

Hourly wage rates effective July 24, 1948, follow: electric arc welder \$1.04 with 5 cent increases after 3, 6 and 9 months to \$1.19 and an additional 5 cents for merit to \$1.24; power brake operator, punch press operator (set up and operate) 99 cents with corresponding increases to \$1.14 after 9 months and to \$1.19 for merit; punch press (operate and minor set up), power shears, power rolls, spot welders, miscellaneous production workers in sheet metal department, assemblers, spray painters, testers, power trucker, brazers, drills 94 cents with increases to \$1.09 after 9 months and to \$1.14 for merit; craters, packers, shippers, receivers, stores, hand truckers, fin stringers 89 cents with increases to \$1.04 after 9 months and to \$1.09 for merit. Miscellaneous unskilled help 89 cents with increases to 99 cents after 6 months; the following rates are all on merit—toolmaker or diemaker \$1.34 to \$1.54; machine operator (toolroom) \$1.14 to \$1.34; improver (toolroom) 94 cents to \$1.14; mechanical maintenance, electrical maintenance (grade 2) \$1.09 to \$1.24. Lead hands are paid 5 cents per hour more than the highest paid workers under them. A *night shift bonus* of 7 cents per hour shall be paid to all factory employees for night shift work.

Provision is made for *seniority rights, grievance procedure* and a *labour-management committee*.

TORONTO, ONT.—AMALGAMATED ELECTRIC CORPORATION LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 514.

Agreement to be in effect from November 4, 1948, to November 4, 1949, and for a further period of one year unless notice of termination should be given by either party. The company recognizes the union as the sole collective bargaining agency for all eligible employees. *Check-off*: the company agrees to deduct initiation fee and monthly union dues from the pay of employees who so authorize and to remit same to the union during the term of the agreement.

Hours of work: 8½ per day Monday through Friday, a 43½-hour week for all shifts. *Overtime* at time and one-half will be paid for time worked in excess of 8½ hours per day and for all work on Sundays. However employees will be limited to 12 hours' work in any one shift. On 8 specified holidays permanent employees will receive their regular wages if they work their regularly scheduled shifts immediately preceding and following the holiday, provided the holiday falls on a normal work day.

Vacation with pay: one week to employees with one year's continuous service with the company, 2 weeks to employees with 5 or more years' service and 3 weeks to employees with 21 years' service; employees with 3 months' service but less than one year will be paid on a *pro rata* basis. *Rest periods* of 10 minutes during each half shift will be allowed, also a *clean-up period* of 5 minutes at the end of day and night shifts.

Hourly wage rates, including an increase of 7 cents per hour, effective November 4, 1948 (to which 3 cents per hour will be added May 4, 1949)—metal spinner, arc welder 97 cents to \$1.28; assembler, sheet metal worker, production machinist 85 cents to \$1.28; coil winders 85 to 93 cents; acetylene welder, plater finisher 85 cents to \$1.18; spot welder, punch press operator 85 cents to

\$1.08; die setter \$1.08 to \$1.23; press shear operator, shipper and receiver, moulders 85 cents to \$1.13; painter, buffer and polisher 91 cents to \$1.23; labourer, sweeper, trucker 91 cents to 98 cents; die maker \$1.38 to \$1.58; factory clerk 79 to 91 cents; tool maker \$1.33 to \$1.53; maintenance electrician 97 cents to \$1.38; maintenance carpenter 97 cents to \$1.30; maintenance painter \$1.08 to \$1.18; machine repair man \$1.18 to \$1.48; general maintenance \$1.08 to \$1.28; minimum starting rate—for inexperienced males 91 to 93 cents, for inexperienced females and boys (under 18 years) 79 cents increased to 83 cents after 6 weeks and to 85 cents after 12 weeks.

Provision is made for *seniority rights* and *grievance procedure*.

TORONTO AND BRANTFORD, ONT.—MASSEY-HARRIS COMPANY LIMITED AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCALS 439 AND 458.

Agreement to be in effect from September 15, 1948, to September 15, 1949, and thereafter from year to year subject to notice, except that the question of wages may be opened once again during the life of the contract on or after February 15, 1949. *Union security*: all employees who are or who may become union members must remain dues paying members of the union during the life of the agreement. All new employees after 60 days' employment shall become and remain dues paying members of the union for the life of the agreement as a condition of employment. *Check-off*: the company will, during the term of the agreement, upon authority of union members, deduct union dues monthly from their pay, also any assessment authorized by the union and in the case of new members the initiation fee and remit same to the union. The union agrees that "at the company's option" union security and check-off may be suspended if at any time any clauses of the agreement are violated.

Hours of work: the regular work week shall be 9 hours per day Monday through Friday, a 45-hour week. In the case of the departments in the Toronto plant working three 8-hour shifts, the normal week will be 8 hours per day, 6 days per week for the period from September 6, 1948, until May 14, 1949. From the latter date until Labour Day such departments will work a 5-day week. A paid 20-minute lunch period will be allowed all employees on shift work. *Overtime* at time and one-half shall be paid for work in excess of the regular working day or the standard calendar week; in the case of the special shift hours or in excess of the 45 hours in the calendar week will also be paid for at the rate of time and one-half. All work performed on Sundays (except as part of the regular work week) or 8 specified holidays will be paid for at time and one-half. All employees with 6 months' service who work their regular shifts immediately preceding and following the holiday will be reimbursed for wages lost by reason of the plant being closed on any of the 8 specified holidays. *Vacation with pay*: one week to employees with one year's seniority, 2 weeks to employees with 5 years' seniority and 3 weeks to employees with 25 years' seniority. Employees with 3 months but less than one year of seniority shall be entitled to *pro rata* holiday pay on the basis

of 2 per cent of their earnings up to May 31. *Rest and wash-up periods:* a 10-minute rest period will be allowed each half shift and 5 minutes for washing and putting away tools will be allowed at the end of each half shift.

Hourly wage rates: scale of wages presently being paid and authorized by the Regional War Labour Board on July 24, 1946, plus an additional 21 cents per hour, shall be maintained for the duration of the agreement with certain exceptions; the minimum starting rates for day workers shall be 91 cents, increased to 93 cents after 30 days and to 96 cents after 90 days; foundry labour shall start at 96 cents with no automatic increases. These rates include the 31 cent increase given since July 1, 1946.

Provision is made for *seniority rights, grievance procedure* and a *labour-management committee*. The company also will undertake to provide the employees with a group life insurance, sickness, hospitalization and accident insurance plan.

ST. CATHARINES, ONT.—ENGLISH ELECTRIC COMPANY OF CANADA, LIMITED AND THE UNITED STEELWORKERS OF AMERICA, LOCAL 4152.

Agreement to be in effect from December 13, 1948, to December 12, 1949, and for a further period of one year unless either party to the agreement gives notice of termination at least 60 days before the expiry date. *Union security and check-off:* the company will deduct union dues monthly from the pay of all employees covered by the agreement during its term and remit same to the union; new employees shall become union members within 30 days and will then be subject to deductions for initiation fee and union dues.

Hours of work: 9 per day, 5 days per week. If 3 shifts become necessary, then 8 hours per shift 6 days a week will be worked until the company can conveniently return to normal work week. *Overtime* at time and one-half will be paid for work in excess of normal daily hours of work or 45 hours per week and for all work on Sundays. Employees will be paid straight basic hourly rates on 8 specified holidays which occur in the standard work week and on which they would otherwise have worked. *Rest periods:* two 10-minute rest periods per shift and a 5-minute wash-up period shall be continued during the life of the agreement as long as the standard work week remains unchanged. *Vacation pay* to employees who have completed 12 months' continuous service shall be 2 per cent of annual earnings to employees with one year's continuous service, 2½ per cent to employees with 2 years' continuous service, 3 per cent after 3 years, 3½ per cent after 4 years, 4 per cent after 5 years and 6 per cent after 20 years' continuous service. In the event that the company elects to shut down the plant for the purpose of observing vacations, all employees with 3 months' service but less than one year will receive 2 per cent of total earnings while with company up to July 1 and will take their vacation at the specified time.

Hourly wage rates, effective from date of agreement, for certain classes, excluding supervisors and learners: pattern shop 77½ cents to \$1.37; machine shop 95 cents to \$1.27; press room 95 cents to \$1.17; motors 95 cents to \$1.24½; transformer 77½ cents to \$1.14½; stores 95 cents to \$1.12; inspection 95 cents to \$1.29½; toolroom 95 cents to

\$1.44½; welding 95 cents to \$1.24½; packing and crating 95 cents to \$1.14½; cleaners 77½ to 83½ cents; maintenance 95 cents to \$1.24½; general labour 95 to 97 cents; females, in various departments 77½ to 94 cents.

Off shift premium of 6½ per cent shall be paid employees on a regularly scheduled shift commencing after 2 p.m.

Provision is made for *seniority rights* and *grievance procedure*.

Non-metallic Minerals and Chemicals

WINDSOR, ONT.—CANADIAN INDUSTRIES LIMITED (WINDSOR WORKS) AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement to be in effect from October 20, 1948, to October 19, 1949. Either party may on 10 clear days' notice within the period of 2 months prior to the expiry date of the agreement require the other party to enter into negotiations for the renewal of the agreement and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such renewal. The company recognizes the union as the exclusive bargaining agent of the employees for the purpose of collective bargaining during the term of the agreement. There shall be no discrimination, intimidation, interference, restraint or coercion either by the company or the union because of membership or non-membership in the union. An employee shall be free to join or not to join the union. *Check-off:* the company agrees to deduct union dues monthly from the pay of employees who so authorize and to remit same to the union.

Hours of work: normal daily hours shall not exceed 9 and the normal weekly hours shall not exceed an average of 44 hours. *Overtime:* time and one-half for work in excess of the normal daily hours of work; double time for work on an employee's regularly assigned day of rest. Permanent employees shall be paid for 6 specified holidays not worked if they work their regularly scheduled shifts immediately preceding and following the holiday.

Vacation with pay: 2 weeks to employees who have completed or shall complete one year of continuous service with the company during 1949, with pay equal to 4 per cent of the employee's total wages earned during the 12-month period immediately preceding the date upon which he became eligible for a vacation.

Hourly wage rates for certain classes effective October 16, 1948: journeymen machinists, millwrights and scale and instrument mechanics \$1.40; well drillers \$1.39; armature winder \$1.37, pipefitter and power house electrician \$1.35; journeymen electricians, plateworkers \$1.30; welders, lead-burners \$1.29; blacksmiths \$1.28; carpenters \$1.25; press operators \$1.20; painters, drill press operators \$1.19; power house firemen, truckers, trackmen \$1.16; truck drivers \$1.08 and \$1.12; labourers \$1.08; apprentices starting rate 88 cents with increases every 6 months till \$1.08 is paid after 42 months. Male working leaders shall receive 10 cents per hour and female working leaders 6 cents per hour more than the rate for the highest ranking job in the group being led. A

process shift operator who graduates to a day job as a departmental repairman shall be paid a rate which is 3 cents per hour more than the rate approved for process shift operators. A *night shift premium* of 5 cents per hour will be paid for work performed on regularly scheduled multiple or fixed evening or night shifts commencing between the hours of 1 p.m. and the following 5 a.m.

Provision is made for *seniority rights* and *grievance procedure*.

Miscellaneous

VANCOUVER, B.C.—NEON PRODUCTS OF WESTERN CANADA LIMITED and THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 213.

Agreement to be in effect from September 2, 1948, to September 1, 1949, and thereafter subject to 60 days' notice.

Union security: the employer agrees to employ only union members in good standing to perform the various classes of work. Should the union be unable to furnish the employer with qualified workmen within 24 hours, the union agrees to issue working permits to applicants recommended by employer until such time as union can furnish workmen.

Hours of work: 8 per day Monday through Friday, a 40-hour week. *Overtime:* time and

one-half for first 4 hours immediately following the employees' regularly assigned hours and double time thereafter until relieved from duty; double time on Sundays and 8 specified holidays including Labour Day on which no work shall be performed except to protect life or property.

Hourly wage rates: journeymen electricians and journeyman electricians used as maintenance men \$1.65 from September 1, to December 31, 1948, and \$1.68 from January 1, to August 31, 1949; journeymen neon tube benders, sign hangers and shopmen \$1.55 from September 1, to December 31, 1948, and \$1.58 from January 1, to August 31, 1949; apprentice rates are 40 per cent of the foregoing during first 6 months, 48 per cent during second 6 months, and 60, 62.4, 65.6, 70.4, 76.8 and 80 per cent respectively during each succeeding 6 months until end of fourth year. Foremen receive \$1 per day in excess of journeyman's rate. *Off shift premium,* glass department employees required to work a second or third shift shall be paid a premium bonus of 12½ cents per hour worked. Employees of the electrical department required to work a shift commencing after regular working hours shall be paid two times the standard rate for the first 3 shifts and thereafter at straight time.

Provision is made for *seniority rights*, *grievance procedure*, and an *apprenticeship plan*.

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec* include the repeal of one agreement, the amendment of thirteen other agreements and the correction of one of them. These include the amendment of the agreements for barbers and hairdressers at St. Hyacinthe and at Quebec, retail stores at Chicoutimi, iron oxide miners at Red Mill, hospital and charitable institution employees at St. Hyacinthe, the shoe industry for the province and for sheet metal manufacturing at Montreal in the *Quebec Official Gazette* of

March 5, and the amendment of the agreement for funeral undertakers at Montreal in the issue of March 19. The other Orders in Council are summarized below.

Requests for the amendment of the agreements for building trades at Chicoutimi, Hull, Joliette, Quebec, St. Hyacinthe, St. Johns, Sherbrooke, Sorel, St. Jérôme, Three Rivers and in the counties of Drummond, Arthabaska and Nicolet, and for a new agreement for the sash and door industry at Quebec were gazetted February 26. Requests for the amendment of the agreements for sheet metal manufacturing and for garage and service station employees at Montreal and for the men's and boys' clothing industry for the province were published March 5. Requests for the amendment of the agreements for grocers and butchers at Sherbrooke and for barbers at Valleyfield were published March 12. Requests for the amendment of the agreements for municipal employees at Jonquière and for barbers and hairdressers at Sherbrooke were gazetted March 19.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or association of employers either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June,

Manufacturing

Fur and Leather Products

WHOLESALE FUR INDUSTRY, MONTREAL.

An Order in Council, dated February 24, and gazetted March 5, amends the previous Orders in Council for this industry (L.G., March, 1947, p. 368; June, 1948, p. 619, Dec., p. 1421, and previous issues) by providing that all employees shall receive a 10 per cent increase on their weekly wages from September 1, 1948. Employees in the fur strippings and piece plates business only are to be paid the following minimum apprentice rates of pay: apprentice-cutters from \$14 per week in first 3 months to \$29 after 21 months and to the end of 2 years; apprentice-operators from \$14 per week in first 3 months to \$27 after 21 months and to the end of 2 years; after 2 years they are classified as second-class workers in their respective trades. General hands receive a minimum ranging from \$14 per week in first 6 months to \$20 in fourth 6 months.

Textiles and Clothing

DRESSMAKING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated March 10, and gazetted March 19, amends the previous Orders in Council for this industry (L.G., May, 1946, p. 627, July, p. 930, Sept., p. 1249, Nov., p. 1583; April, 1948, p. 332, and previous issues).

Statutory holidays: every employee (including homeworkers) covered by this agreement and who has been employed in the industry at least one year and by the same employer for 3 months shall be granted 3 specified statutory holidays with pay each year; any employee who is unjustifiably absent for any one full day during the work week in which a holiday falls shall be

entitled to only 80 per cent of the pay granted for such holiday; if absent for 2 full days during the week, he shall receive only 50 per cent of the pay granted for such holiday; if absent for more than 2 days, he shall not receive any pay for the said holiday. These provisions shall not apply to employees who receive at least 2 weeks' vacation with pay during the year.

Vacation: every employee (including homeworkers) governed by this agreement is entitled, after one year's continuous service, to a continuous annual vacation with pay for a minimum duration of 7 days, comprising at least 5 working days; an employee with less than one year's continuous service is entitled to a continuous annual vacation with pay of as many half days as the number of calendar months of continuous service. An employee whose employment is terminated before one year of continuous service is completed, shall be given, in lieu of vacation with pay, a sum equal to 2 per cent of the wages earned during that part of the year in which he was employed.

This amendment also provides for the method of computing the minimum wages earned by and due to the homemaker when working on a piece-work basis, as well as the necessary information with which the employer must furnish the Joint Commission for the Dress Industry of the Province of Quebec at the time he gives out the work to the homemaker.

Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated February 25, gazetted February 26, and corrected March 5, amends the previous Orders in Council for this industry (L.G., Sept., 1946, p. 1250, Dec., p. 1772; March, 1947, p. 369, April, p. 543, Dec., p. 1803; May, 1948, p. 486). The new ranges of minimum wage rates for

day work are shown in the accompanying table. The new minimum wage rates shown for zones II and III shall only become effective from the first payroll period commencing on or after April 1, 1949.

Vacation: after one year's continuous service an employee is entitled to 5 days' vacation with pay, after 2 years 7 days, thereafter an additional day's vacation with pay for each additional year of service until the maximum of 10 days' vacation is granted after 5 years' service.

This amendment also provides for slight changes in the general provisions governing apprenticeship in zone I.

Construction

BUILDING TRADES, COUNTIES OF DRUMMOND, ARTHABASKA AND NICOLET.

An Order in Council, dated March 10, and gazetted March 19, amends the previous Order in Council for this industry (L.G., Aug., 1948, p. 872). "L'Association des Maîtres-Plombiers et Electriciens de Victoriaville et du District" and "Le Syndicat des Compagnons Electriciens de Drummond" are no longer included in the list of co-contracting parties.

BUILDING TRADES, MONTREAL.

An Order in Council, dated February 24, and gazetted March 5, amends the previous Orders in Council for this industry (L.G., Sept., 1948, p. 993, Nov., p. 1247; Jan., 1949, p. 67, Feb., p. 178, March, p. 302) in so far as the section applying to the trade of *asbestos insulation mechanic* is concerned, as follows:—

Overtime rate of double time shall be paid only after midnight.

Minimum wage rate for asbestos insulation mechanic is increased by 10 cents to \$1.45 per hour, for apprentices from 87 cents to 90 cents per hour in second year, from 99 cents to \$1 in third year and from \$1.07 to \$1.10 in fourth year. Foremen also receive an increase of 10 cents per hour.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

Recent proceedings under the Industrial Standards Acts, etc.* include, in addition to the three new schedules summarized below, a new schedule for the barbering industry in the Renfrew zone published in *The Ontario Gazette* of February 19.

SASKATCHEWAN

Construction

PAINTERS, SASKATOON.

An Order in Council, dated February 18, and gazetted February 26, makes binding the terms of a new schedule for painters and

The number of apprentices is increased from one to two apprentices for each mechanic employed.

Another Order in Council, dated March 10, and gazetted March 12, amends the section of the agreement applying to *plumbers, steamfitters, pipe welders, pipe mechanics* and apprentices in these trades, as follows:—

Hours are reduced from 44 to 40 per week.

Overtime is payable at time and one-half until midnight and on Saturday, double time after midnight and on Sundays and 12 specified holidays.

Minimum wage rates are increased as follows: master plumber and master heating contractor working as employee from \$1.75 to \$2 per hour; journeyman in plumbing, heating and pipe work, pipe welder from \$1.40 to \$1.55 per hour; junior mechanic from \$1 to \$1.11 per hour; apprentices, first year from 55 to 61 cents per hour, second year from 65 to 72 cents per hour, third year from 70 to 78 cents per hour, fourth year from 75 to 83 cents per hour.

Maintenance men (except those employees with a minimum annual salary of \$2,700) are paid at time and one-half after 48 hours per week.

Minimum wage rates for maintenance men are increased as follows: master plumbers, master heating contractors working as employees from \$55 to \$61 per week; journeymen in plumbing, heating and pipe work from \$40 to \$52; junior mechanics from \$28 to \$40; apprentices, first year from \$16 to \$20, second year from \$20 to \$26, third year from \$22 to \$28, fourth year from \$24 to \$30.

Transportation and Public Utilities

Water Transport

CHECKERS (OCEAN NAVIGATION), QUEBEC.

An Order in Council, dated February 24, and gazetted March 5, repeals the Order in Council making this agreement obligatory (L.G., Oct., 1942, p. 1211).

* In six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, December 1948, page 1422.

decorators at Saskatoon and within a radius of 5 miles, to be in effect during pleasure.

Hours: 8 per day, Monday through Friday, 4 on Saturday, a 44-hour week.

Overtime is payable at time and one-half. Work performed on any of eight specified public holidays shall be remunerated as provided for under The Minimum Wage Board's Order governing this class of employment.

Minimum wage rate: 90 cents per hour.

ELECTRICAL WORKERS, REGINA.

An Order in Council, dated February 15, and gazetted February 26, makes binding the terms of a new schedule for electrical workers at Regina and within a radius of 5 miles to be in effect during pleasure.

Hours: 8 per day, 40 per week.

Overtime is payable at time and one-half, with double time after 5 p.m. on Saturday until midnight Sunday.

Minimum wage rates: journeyman wireman \$1.40 per hour, probationary journeyman \$1.30, apprentices and helpers from 60 cents per hour in first year to \$1 per hour in fourth year.

Apprentices: one apprentice or helper is allowed for each journeyman or probationary journeymen employed.

Vacation shall be governed by The Annual Holidays Act, 1944.

Public holidays, which include in this schedule Sundays and nine other specified days, shall be paid for as provided for under the Minimum Wage Board's Order governing this class of employment.

ALBERTA

Service

Business and Personal

LAUNDRY AND DRY CLEANING INDUSTRY, CALGARY.

An Order in Council, dated February 23, and gazetted February 28, makes binding the terms of a new schedule for the laundry and dry cleaning industry in Calgary, to be in effect from March 10, 1949, to March 9, 1950, or thereafter during pleasure.

Hours: 9 per day, 44 per week.

Overtime: all work in excess of the above daily or weekly maximum is payable at time and one-half. Employees working on any of eight specified statutory holidays shall be paid double time.

Minimum wage rates: female employee (experienced) 52 cents per hour; male employee (experienced) 71 cents per hour and 2 cents per hour increase for each 6 months' service until a minimum of \$35 per week is reached; inexperienced employees—female from 41 cents per hour for the first month to 49 cents for the third month, male from 61 cents for the first month to 69 cents for the third month.

Vacation: one week with pay after one year's service, two weeks with pay after two years' service; employees with less than one year's service, but more than six months, will be entitled to *pro rata* vacation of not less than three days.

Any employee called to work but not required to work a full shift will receive a minimum of 4 hours' pay. Females employed to perform the same amount of work as performed by males shall be paid on the basis of equal pay for equal work. All employees governed by this schedule shall receive a rest period of 10 minutes in the morning and 10 minutes in the afternoon.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During February

(1) *Works of Construction, Remodelling, Repair or Demolition*

During the month of February the Department of Labour prepared 84 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 71 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

| Department | No. of contracts | Aggregate amount |
|---|---------------------|---------------------|
| Canadian Commercial Corporation. | 5,231 | \$14,760,257.00 |
| Post Office. | 8 | 26,079.91 |
| R.C.M.P. | 2 | 41,613.00 |

LABOUR LAW

Labour Legislation in British Columbia and Quebec in 1949

BRITISH COLUMBIA

Little legislation of labour interest was passed by the British Columbia Legislature in its session from February 8 to March 24. Laws dealing with apprenticeship and municipal employees' pensions were revised.

Apprenticeship

By an amendment to the Apprenticeship Act, persons under 21 working in designated trades under conditions that prevent them from receiving the necessary training to become proficient at those trades may be exempted by the Minister from being required to enter into a contract of apprenticeship. The facts in each case are to be laid before the Minister by the Provincial Apprenticeship Committee. Formerly, the Minister could exempt only those employed exclusively on specialized or repetitive work in the designated trades.

A minor who has learned his trade without entering into a contract of apprenticeship and who has, in the opinion of the Provincial Apprenticeship Committee, the skill required for a fully qualified tradesman in that trade, is no longer prevented from working at his trade, as formerly.

Boiler Inspection

By amendments to the Boiler Inspection Act and the Electrical Energy Inspection Act, the administration of both Acts is transferred from the Workmen's Compensation Board to the Minister of Public Works.

Municipal Employees

A section added to the Municipal Act provides that when arbitration proceedings are taken respecting salaries, wages or working conditions, including proceedings under the Industrial Conciliation and Arbitration Act, and an award is made which requires the expenditure of money by the municipality, the award of the arbitration board must be made and published on or before April 15 of the year in which the award is to take effect.

It is provided further that where a conciliation board is appointed under the Industrial Conciliation and Arbitration Act to deal with a dispute between a municipality or Board of Police Commissioners and the firemen and policemen in their

employ, the recommendation of the conciliation board is binding in every respect upon the municipality or Board of Police Commissioners.

Municipal Employees' Pensions

An amendment to the Municipal Superannuation Act excludes from the definition of "employee" a person who has not completed at least 10 years' service before reaching the compulsory retirement age prescribed by the Act. This provision relates only to employees of employers who adopt the Act on or after January 1, 1949. From the same date, the Act is declared applicable to the Greater Victoria Water District and its employees except casual employees.

A new subsection permits an employer under the Act, with the approval of the Provincial Secretary, to enter into an agreement with the Commissioner of Municipal Superannuation providing for increased superannuation benefits for an employee, group of employees or former employees. The agreement may make larger benefits conditional on increased employee contributions but may not result in increased advances from the Consolidated Revenue Fund.

Bill not Passed

Withdrawn after first reading, a Government Bill to amend the Hours of Work Act would have given the Board of Industrial Relations extended powers to make regulations providing for exceptions from the eight- and 44-hour limits set by the Act. At present, the exceptions may be made only in respect of workers in preparatory, complementary, seasonal or intermittent work. The amendment would have allowed for permanent exceptions, at the discretion of the Board, in any case where the nature and conditions of the whole or part of an industrial undertaking or class of undertakings make it expedient to permit longer hours.

QUEBEC

The Quebec Legislature which convened on January 19 and prorogued on March 10 enacted a new law governing the arbitration of disputes between municipal and school

corporations and their employees. Acts relating to vocational education, workmen's compensation and housing were amended. The Government did not proceed with the Labour Code which was introduced at the beginning of the session. The Code was designed to consolidate, revise and extend seven existing labour laws.

Municipal and School Corporations

An Act respecting Municipal and School Corporations and their Employees provides that disputes between city and town municipal and school corporations and their employees must be heard and settled by councils of arbitration composed of three members and appointed for a term of two years. Arbitration board decisions and collective agreements are to remain in force for two years and any provision involving increased expenditure will take effect only at the beginning of the next fiscal year. "Minister" in respect of a dispute involving a municipal corporation is the Minister of Municipal Affairs, and, as regards a dispute relating to a school corporation, is the Provincial Secretary.

These provisions were contained in the Labour Code which was withdrawn. A number of amendments which were proposed by labour organizations in the Province were made in the Bill by the Legislative Council.

One member of a council of arbitration is to be appointed by the Minister on the recommendation of the corporation, another on the recommendation of its employees or the association authorized to represent them, and the third who represents the public and acts as president is to be appointed by the Lieutenant-Governor in Council. If either party does not name an arbitrator within the time fixed, the Minister may make the appointment. As introduced, the Bill provided for the appointment of the president on the joint recommendation of the two arbitrators representing the parties, or failing agreement, by the Minister concerned.

In cases where municipal or school employees are represented by more than one certified association, each association representing a category of workers may name a person to act as the employee representative on a council when a dispute concerning that class of workers is heard. This provision, one of the main labour proposals, was added by the Legislative Council.

Recommendations as to the members of councils of arbitration are to be made to the Minister concerned every two years,

and at the latest during the 30 days before the end of the fiscal year. The first council, the members of which must be named before June 30, is to have jurisdiction from July 1, 1949, to settle any dispute which may arise between the municipal or school corporation for which it was appointed and its employees until the close of the fiscal year ending in 1951.

The original Bill stipulated that the term of collective agreements and arbitration board decisions should be "at least 24 months". By an amendment the term is limited to 24 months. Agreements and decisions which involve increased expenditure for a municipal or school corporation cannot take effect before the end of the current fiscal year and must not have retrospective effect further than 12 months from the date of the decision.

Arbitration board decisions and collective agreements may contain a clause providing for salary readjustments during the term of the agreement or decision, according to the fluctuations of the official cost-of-living index for Canada. They must not contain any provision or condition conflicting with the statutory rights of municipal or school authorities in the matter of hiring, suspending or dismissing their employees, and must not be interpreted so as to interfere with the jurisdiction of municipal corporations concerning the closing of certain establishments at fixed hours and days.

A council which has begun to hear a case must terminate it and give its decision notwithstanding the expiry of the two-year term and the formation of a new council, but if the hearing has not been started, the case must be referred to the new council.

Councils of arbitration established at the time of the coming into force of the Act are to have jurisdiction to complete pending cases. Such cases are, however, in other respects subject to the application of the Act.

Any vacancy in a council arising by reason of the death, resignation or refusal to act of one of its members is to be filled in the same manner as that used for his appointment. The death, absence or refusal to act is not to affect the validity of the proceedings or the competency of the council.

A provision inserted by the Legislative Council prohibits the issue of any writ of *quo warranto*, *mandamus*, of *certiorari*, or injunction against a council of arbitration or any of its members on account of a decision or any procedure relating to the exercise of its functions.

Workmen's Compensation

An amendment to the Workmen's Compensation Act increases the membership of the Quebec Workmen's Compensation Commission from four to five and the number of members required to form a quorum from two to three.

Closing of Shops

An amendment to the Early Closing Act permits municipal councils of cities and towns, by by-law, to order the closing of stores all day on New Year's Day, Epiphany, Ascension Day, All Saints Day, Conception Day and on Christmas Day.

Vocational Education

Minor revisions were made in the Trade-schools Act, retrospective to July 15, 1941, when the principal Act was proclaimed in force. These re-enact the provision that a student who does not complete a course of instruction in a trade-school is obliged to pay the proportion of the cost of the course corresponding to the number of lessons taken, plus one-fifth of the price of the course, and add the stipulation that a student who has taken no lessons at all must pay only one-tenth of the amount agreed upon for the course.

A student may claim repayment of any sum paid for a course to a school which does not hold a permit under the Act, but action to recover such claim must be taken within a year.

By amendments to the Department of Social Welfare and of Youth Act, the Lieutenant-Governor in Council may authorize the Minister of Social Welfare and Youth to organize technical schools, initiatory handicraft schools, arts and crafts schools, trade schools and any other schools of specialized instruction and to acquire lands and buildings for such purposes, by private agreement or by expropriation.

An Act was passed to repeal the charter of St. Hyacinthe Technical School corporation and to operate the technical school as a property of the Province under the name of "St. Hyacinthe Textile School". The assets of the corporation, including the technical school which it owned, have been acquired by the Government under the Act to Facilitate the Establishing of Youth, 1945.

The new Act provides that, under the Specialized Schools Act, the city of St. Hyacinthe will contribute a sum of ten thousand dollars each year for the upkeep of the St. Hyacinthe Textile School.

Housing

Amendments were made to the legislation which was passed at the 1948 session to facilitate the building of homes (L.G., 1948, p. 1267).

One of these authorizes the Government to spend an additional \$3,500,000 for the purpose of paying interest in excess of two per cent on loans made for the building of new homes, such homes to be not more than two-unit dwellings. Previously, a dwelling could be either a self-contained or multiple-unit dwelling-house, exclusive of an apartment-house. It is stipulated that the Government will pay such portion of interest only to the extent of a capital sum of \$6,000 for a self-contained dwelling or \$10,000 for a two-unit dwelling, even if the loan granted exceeds these amounts.

A further amendment permits any authorized insurance, trust, loan, building or finance company which has a place of business in the Province to make building loans under the Act, even though its head office may be outside of Quebec. Previously, it was necessary for the head office of the company to be in the Province.

Court of Review

For the first time a right of appeal against penal convictions under various provincial laws will be established by means of an Act which sets up the new "Court of Review in Provincial Matters". The Court, which is to be composed of a Chief Justice and three other judges appointed by the Lieutenant-Governor in Council, will hear appeals in cases in which the offender may be sentenced to a fine of at least two hundred dollars, to prison without option of fine, or to both penalties. The Act, which will come into force on proclamation, transfers to the new Court appeals against summary convictions formerly heard by the Court of King's Bench, Crown Side.

As a result of this new statute, changes have been made in the penalties sections of the Collective Agreement Act and the Minimum Wage Act. Penalties provided for in these Acts are to be imposed on prosecutions taken in accordance with the Quebec Summary Convictions Act and appeals may be made to the Court of Review in Provincial Matters when the offender may be fined two hundred dollars or more. Formerly, penalties under these Acts could be imposed, at the prosecutor's option, either on summary prosecution or by penal actions before a civil court.

Acts Repealed

The Masters and Servants Act and the Fishermen's Engagement and Wage Act, together with municipal by-laws adopted under the former, were repealed as obsolete.

The Masters and Servants Act permitted city, town and village corporations to pass by-laws regulating the relations between masters and servants and imposing fines, and in default of payment, imprisonment for violations of such by-laws. For municipalities where no by-laws were made, the Act provided similar penalties.

The repealing Act inserted in the Civil Code a section providing that the contract of a domestic, servant, journeyman or labourer hired by the week, month or year but for an indefinite period of time may be terminated by a week's notice by either party if the contract is by the week; by two weeks' notice if the contract is by the month; and by a month's notice if the contract is by the year.

Labour Code

The Quebec Labour Code which was introduced on January 19 and which roused the vigorous protests of the three major labour groups in the Province was withdrawn for further consideration on February 9 (L.G., March, 1949, p. 247).

The Code was an attempt to consolidate seven Provincial Acts, namely, the Labour Relations Act, Trades Disputes Act, Industrial Disputes Investigation Act, Public Services Employees Disputes Act, Professional Syndicates Act, Collective Agreement Act and Minimum Wage Act.

Important changes were made in the legislation covering the field of employer-employee relations, i.e. the Labour Relations Act, the Public Services Employees Disputes Act and the Trades Disputes Act. The provisions dealing with minimum wages, collective agreements and the incorporation of trade unions were not materially altered.

"Association" was defined as:—

A professional syndicate, a union or federation and a confederation of professional syndicates, a group of *bona fide* employees or employers, having as its object the establishment of well-ordered relations between employers and employees, as well as the study, defence and development of the economic, social and moral interests of its members, with respect for law and authority.

"Employee" was defined generally as any person who leases or hires his services to an employer except those, who in the opinion of the Labour Relations Board, exercise executive functions or are con-

fidential employees, persons in the professions subject to special statutes, university professors, domestic servants and farm workers. The Code provided that an employee did not cease to be such, except in the event of his having accepted employment from another employer, if he was dismissed contrary to the provisions of the Code, or if he took part in a legal strike, or, in the case of an illegal strike, if he had not participated voluntarily.

Sections of the Code dealing with "protection of integrity of associations" would have forbidden any person to be an officer or representative of an association of employers or employees if he is a member of a Communist or Marxist organization or of a party recognized as such, if he supports or co-operates in any manner whatsoever with such an organization, if he is "notoriously known as a follower, preacher or propagandist of the Communist or Marxist doctrine", or if he approves or advocates the "change of established Order of the Government . . . by means of force, violence, terrorism, sabotage, or other illegal or unconstitutional means."

The Code would have empowered the Labour Relations Board to refuse to certify, or, if certified, to require the decertification of, an association if any of its officers or representatives fell into one of these categories, and if within 15 days after notification by the Board it had not proved to the satisfaction of the Board that such persons had ceased to be officers or representatives of the association, or if the association was affiliated with an organization which is "notoriously under the direction or influence of followers of the Communist or Marxist doctrine". To see that these provisions were observed, the Board was authorized to visit premises, to examine the association's books or documents, to question any person and to inquire into pertinent facts by any means it deemed proper. For refusal to expel officers or representatives at the request of the Board, an association was liable to a fine ranging from \$100 to \$500.

The Code granted to every employee and to every employer the right to be a member of an association and to cease to be a member whenever he so desired, and stipulated that no employee or employer could be compelled to belong to an association to which he did not wish to belong.

An employer was forbidden to belong to an association of employees, to take part in or interfere with its establishment or management, or to grant it financial or other assistance, but he could permit

workers to confer with him during working hours and to carry on the business of the association on his premises.

Except with the employer's consent, no association or person acting on its behalf was permitted to solicit membership on the employer's premises.

Power to order the reinstatement of, and payment of back wages to, employees who had been wrongfully dismissed, suspended or demoted was given to the Labour Relations Board, and the employer was obliged to carry out the Board's order within eight days. Before making an order, the Board was required to hear the parties, if they so desired.

The Code permitted an employer to agree with each of his employees to the check-off of union dues, provided the worker signed the authorization personally. This agreement was to remain in force for 12 months and to be renewed from year to year unless notice of cancellation was given by either party within 60 days of the expiry of the agreement.

In addition to the previous requirements for the furnishing of returns to the Board, the keeping of registers of members and minutes of all general and executive meetings, and the keeping of financial records, the Code required the books of an association to be audited annually by a chartered accountant authorized to practise in the Province, and the auditor's report to be filed in the office of the association and with the Labour Relations Board. The Board could deny certification to an association which did not comply with any of these obligations or, if already certified, revoke its certification if it did not comply within an interval fixed by the Board.

Provision was made in the Code for the appointment of conciliators and of Arbitration Boards to promote the settlement of disputes. As in earlier legislation, Arbitration Boards are essentially the same as Conciliation Boards in other provinces. Unless the parties mutually agree in advance to be bound by the findings of an Arbitration Board, its decision is not mandatory.

Under the proposed Code, the Board would have been empowered to cancel the certification of an association which had neglected or refused to negotiate in good faith within three months.

An association could not be certified while the certification of another association representing the same employees was in force, except during the 30 days preceding the expiry of the existing agreement.

A rival association or the employer, with the permission of the Board, could contest

the certification of the association with which the employer was called upon to negotiate, on the ground that it was obtained illegally or that the association did not truly represent the employees at the time of certification, provided that such petition for contestation was received within 15 days following certification.

An employer who believed that an association no longer represented the majority of his employees could, between the sixtieth and the thirtieth day before the expiry of the term of an agreement or of one of its renewals, ask the Board to investigate the facts. During the same period, a rival association might petition the Board for certification in place of the association which signed the agreement. In such case, the Board was required to give its decision within 15 days after receiving the petition from the rival association.

The Code provided that Arbitration Boards consisting of a chairman and two "assessors" were to be appointed by the Minister, at the request of either party or on his own initiative. Each party was given 10 days to name an assessor or representative. If either party failed to do so, the Minister was obliged to make the appointment from a panel drawn up by the Minister after consultation with the Permanent Board of the Superior Labour Council and approved by the Lieutenant-Governor in Council. The two assessors were given five days in which to recommend a chairman. If they failed to do so, the Minister was authorized to appoint as chairman a judge of the Sessions or a District Magistrate. The Board was required to report within three months unless the Minister acceded to its request for a longer period. The Code stipulated that the decision of the Board should be that of the majority but, in default of a majority, the decision of the chairman should prevail, and the report should be signed by the chairman alone. The Board acted as mediator but, in making decisions, should not infringe the provisions of the Code. If the report of the Board was not accepted, each of the parties had the right to submit the dispute anew to conciliation.

Strikes and Lockouts.—As with the legislation it sought to replace, the Code forbade any recourse to strike action so long as an association had not been certified and so long as the required negotiation, conciliation and arbitration procedures had not been complied with and until 14 days after the Minister had received the report of an Arbitration Board.

Any strike was forbidden which had not been decided by a secret vote of the majority of employees directly affected under the supervision of the Labour Relations Board.

The Code also forbade any strike or lock-out during the term of a collective agreement or an agreement made binding on a whole industry; during the period of enforcement of a binding Arbitration Board decision; in an undertaking in which less than 10 persons are habitually employed; in cases of dispute arising out of the interpretation or application of a collective agreement; and by employees of the Provincial Government or of Provincial Boards and Commissions. Sympathy strikes, and those designed to limit production or to prevent an employer from doing business or to force him to do business with any person were also prohibited.

Public Services.—The Code imposed compulsory arbitration and prohibited strikes or lock-outs in any circumstances in the public services, which included municipal and school corporations, charitable institutions, hospitals, insane asylums, telephone and telegraph services, transport by bus and tramway, navigation, and the production, transmission, distribution or sale of gas, water or electricity, and railways, as far as their operations are within Provincial jurisdiction.

Firemen in the employ of a municipality, as well as policemen and employees of the Provincial Government, as heretofore, were forbidden to be members of or to affiliate with an association which does not consist solely of persons in the same category.

The Code provided that a collective agreement between a municipal or school corporation and its employees must be for a term of at least two years, and that a dispute between any such corporation and its employees might be submitted immediately to an Arbitration Board without passing through the conciliation stage. The Public Services Employees Disputes Act provides that any dispute in the public services must be referred to conciliation and subsequently to arbitration. An Arbitration Board set up every two years, in January, consisting of a representative or assessor named by each of the parties and a chairman appointed on the joint recommendation of the two assessors was empowered to decide all disputes which might arise between the parties during the two-year term of an agreement. Such decisions were to be binding.

Disputes arising between municipal and school corporations and their employees in villages or rural municipalities could not be submitted to conciliation or arbitration.

Collective Agreements.—The Code incorporated the provisions of the Collective Agreement Act which provided for the application by Order of the Lieutenant-Governor in Council of the terms of a collective agreement respecting wages, hours, apprenticeship, and vacations with pay to cover all the employers and workers in that industry in the Province or in a stated part of the Province. The agreement must have been voluntarily entered into by one or more unions and by one or more employers or employers' associations, and the parties representative of a sufficient proportion of the industry.

The Code provided that collective agreements, except those between municipal and school corporations and their employees, must be made for a term of at least one year and might include a clause providing for wage readjustment according to the fluctuations of the Dominion cost-of-living index.

Collective agreements also were to include a clause providing for a special method of arbitration of disputes arising out of the interpretation or application of the agreement. If the parties did not include such a clause in the agreement, the Board became the arbitrator.

It was also provided that no agreement might contain a clause restricting the rights of employees and employers to belong or not to belong to their lawful association, and any clause or condition having such effect was null and void.

Unincorporated Groups.—Provision for the incorporation of associations as under the Professional Syndicates Act was continued in the Code. This part of the Code was to have been administered by the Minister of Labour, instead of by the Provincial Secretary. The Code also contained provisions dealing with unincorporated groups. Such groups might be summoned to appear before the Provincial Courts as a body under the name by which they were commonly designated, as well as through their officers individually, and judgments rendered in such cases might be executed against the property of the group.

Labour Relations Board.—The Labour Relations Board, under the proposed Code, was to consist of six members appointed by the Lieutenant-Governor in Council, a chairman, a vice-chairman representing the public at large, and two members chosen

"in so far as possible" from persons recommended by associations of employees and of employers, respectively. The Board members were required to serve full time and were appointed and paid under the Civil Service Act. They would be granted the privileges and powers of Superior Court Judges for their duties.

The Labour Relations Board, Minimum Wage Commission, Arbitration Boards and their members, and conciliators were not subject to writs of *quo warranto*, *mandamus*, *certiorari*, prohibition or injunction nor to the right of supervision and reform nor to the orders and control of the Superior Court or its judges.

Penalties.—Penalties in the form of fines or in default of payment, imprisonment, were provided for various infractions of the Code, such as breach of the anti-Communist clauses, employer discrimination for union activity, employer interference in the affairs of a union, violation of the anti-strike provisions, etc. Any certified association which ordered a strike prohibited by the Code, contributed to the starting of such a strike or participated in it was liable to lose its certification unless the strike ended within six days of notice from the Board that the strike was illegal. Further, the association and every worker was liable to

a fine ranging from \$200 to \$500 for each day of the strike and any individual, in default of payment of a fine, might be imprisoned from 30 to 90 days.

Exemptions.—The provisions regarding conciliation and arbitration of disputes did not apply to enterprises in which less than 10 persons are usually employed. Further, the Labour Relations Board was empowered by regulation to determine classes of employers employing less than five workers who might be exempted from the application of any provision of the Code.

Collective agreements and the decree extending them to non-parties and minimum wage orders were not binding on employers and workers of enterprises situated outside cities and towns, except in the case of commercial or industrial establishments in which at least 10 persons are employed habitually or on an average during the year.

Included in the Code was the provision that the individual contract of lease or hire of personal services is subject to the general rules set forth in the Civil Code of the Province, and that special provisions respecting the lease or hire of the personal services of workmen, farm servants, domestic workers, fishermen and seamen are also set forth in the Civil Code.

Recent Regulations Under Provincial Legislation

In Manitoba, the minimum wage regulations have been revised to raise the minimum rates to \$19.50 and \$18.50 a week for women in urban and rural areas, respectively, and to 50 cents an hour for men. The standard work-week is unchanged at 44 hours for women and 48 for men, but overtime to a greater extent is permitted for women workers. Overtime rates have been increased by 21 and 22 cents an hour for women and 25 cents an hour for men. Unlike the earlier Orders, no specific learners' rates are set but provision is made for the issue of permits by the Minister, under certain conditions, to allow employment at lower rates for inexperienced and handicapped workers. ¶Quebec has renewed General Order 4 and a number of special Ordinances to May 1, 1950.

Manitoba Minimum Wage Act

New minimum wage regulations, 12/49, filed on March 17, and gazetted March 19, raise minimum wage rates for full-time workers from eight to 10 cents an hour. Minimum overtime rates are increased by 21 and 22 cents an hour for women and 25 cents an hour for men. Women workers are now permitted to work overtime to a

greater extent, and for the first time the limitations on overtime vary as between urban and rural areas. Earlier orders (L.G., 1947, p. 551) are repealed.

Instead of the former arrangement of four divisions applying to women (I. Manufacturing and General; II. Shops and Offices; III. Hotels and Restaurants; and IV. Places of Amusement) and one Division (V) gov-

erning male employees in all occupations, the new regulations have two main divisions, one for females and the other for males. Division I covers the employment of all women workers in the Province, except those employed in farming and market gardening and those in a managerial capacity. Excluded by the Act are workers employed in private homes as domestic servants, in religious or charitable institutions, in hospital nurses' training schools, or by a municipal or public body.

A new general provision requires every employer to comply with the health and sanitation regulations for factories, workshops, offices and office buildings which are appended. These are substantially the same as those which were made under the Manitoba Public Health Act in September, 1948, and summarized in the *LABOUR GAZETTE* for December, at page 1437. They are substituted for the provisions under the heading "conditions of labour" in the former regulations.

As before, rates for women are lower in rural areas than in cities, \$1 per week less for full-time workers and five cents per hour less for part-time workers. In each case, two minima, in addition to overtime rates, are set: (1) for female employees who regularly work 40 hours or more per week; and (2) for those who normally work less than 40 hours per week. "Urban" rates apply to women workers in Greater Winnipeg, Brandon, Portage la Prairie, Flin Flon, Selkirk and to summer resorts from May to September, inclusive. "Rural" means all Manitoba other than urban.

For occupations which require skill or training, the former regulations established learners' rates rising by stages to the full minimum at the end of the learning period. In manufacturing, shops and offices, the learning period consisted of three two-month periods; in hotels and restaurants, a beginner's rate was set for one three-month period after which the full minimum had to be paid.

Under the new regulations, no *specific* learners' rates are set. Provision is made for the employment of workers at a lower rate than the minimum if the employer obtains from the Minister of Labour a permit certifying (1) that the job is one for which it is reasonable to employ inexperienced workers for a training period of stated maximum duration and specifying a schedule of minimum rates payable during such period or (2) that it is fair and reasonable to employ the worker named in the permit at the rate specified by reason of his physical or mental handicap. It is

stipulated, however, that in no event must the training period at lower rates exceed six months and that the initial training rate must be at least 75 per cent of the applicable minimum rates. A worker must be given credit, against an authorized training period, for previous experience on the same or a similar job. Of the women workers in an establishment, excluding supervisors, not more than 25 per cent may be employed at training rates. Where less than four are employed, application for a permit may be made in respect of one employee.

Except with a permit from the Minister, no employer may employ a child under 15. A new provision forbids an employer to permit any employee under 15 to work any overtime.

Minimum Rates

The new urban rate for full-time women workers is \$19.50 per week or \$84.50 per month, instead of 36 cents an hour, as formerly, representing an increase of about eight cents an hour. In rural areas, the rate is raised from 33 cents an hour to \$18.50 per week or \$80.17 per month, an increase of about nine cents an hour.

For women workers who regularly work less than 40 hours weekly, the new rate is 50 cents an hour in urban areas, and 45 cents in rural districts. The earlier regulations required women workers who were employed 30 hours a week or less to be paid an hourly rate not less than the minimum increased by five cents.

For male workers in all employment except farming and market gardening and those in a managerial capacity, the rates are 50 cents an hour (formerly 40 cents) for men over 18 years, and 40 cents an hour for boys under 18. Previously, rates for boys under 18 were 27, 30 and 33 cents per hour for three successive periods of two months and 36 cents an hour thereafter.

As before, where the employee provides a bicycle, the minimum rate must be increased by not less than 50 cents a week.

Hours of Work and Overtime

The new rates apply to what are termed "Standard Hours of Work". These are, for women, eight hours per day and 44 hours per week, and, for men, 48 hours per week. An employer may not require an employee to work for more than eight hours in a day, or 44 or 48 hours in a week, as the case may be, unless he pays him or her at not less than the overtime rate prescribed by these regulations.

Variations are permitted from the standard eight-hour day, without payment at overtime rates, until otherwise ordered by the Minister, to continue an established custom or practice or to allow for a work-week of less than six days, provided the weekly limit of 48 hours for men and 44 hours for women is not exceeded.

Workers in shops may work up to 11 hours on one day in each week at regular rates of pay, provided that no more than eight hours are worked on any other day and that the weekly limit is not exceeded.

To facilitate a rotation of shifts an employer may, with the authorization of the Minister, permit his employees to work in excess of the daily or weekly limit without payment at overtime rates, if the average number of hours worked by any employee, over such period of weeks as may be prescribed by the Minister, does not exceed the limits prescribed.

Overtime rates for women are 67 cents an hour for urban workers and 65 cents an hour in the rest of the Province. For males the overtime rate is 75 cents an hour for men over 18 and 60 cents for boys under 18. Under the former regulations, both men and women workers were required to be paid for overtime the minimum hourly rate increased by 10 cents, such overtime to be paid after 44 hours for women and after 48 hours for men.

For urban women workers overtime is now limited to three hours in a day, six hours in a week and 12 hours in a month. Women in rural areas may work overtime to the extent of four hours in a day, eight hours in a week and 16 hours in a month. The previous maximum allowed for all women workers was three hours in a day, six hours in a week and 120 hours in a year. There are, as before, no restrictions on overtime for men.

Public Holidays

The list of eight public holidays remains the same except that on Remembrance Day the holiday extends only from 9 a.m. to 1 p.m. instead of covering the whole day, as formerly. As before, no woman may be required to work on a holiday except with a permit from the Minister. No reduction below the applicable minimum weekly rate may be made from the wages of a full-time woman worker who does not work on a holiday but who works regular hours on the workdays immediately before and after such holiday and on all other days of the week in which the holiday occurs unless she is prevented from working by illness or is absent with the employer's consent.

A woman who works under permit on a holiday either must receive, in addition to the regular daily rates, a day's pay at not less than the minimum rate, or must be granted a day off without loss of pay within seven days or at a later date by arrangement between the parties.

No provision is made for the observance of public holidays by male workers.

Special Employment Conditions for Women

Working hours must be arranged so that no work-period for a woman worker will end between 12 midnight and 6 a.m., unless adequate transport to her home is provided at the employer's expense. Formerly, this provision applied only to women in hotels and restaurants.

No woman may be required to work longer than four hours without a meal period. The meal period may not be less than an hour unless the Minister, after being informed of local conditions and the preference of the employees, permits otherwise. During each work-period of three hours or more, rather than of four hours, as before, a 10-minute rest-period must be granted.

General Provisions

General provisions regarding payment of wages, keeping of records, posting of regulations, etc. are unchanged. As before, any worker required to report must be paid for at least three hours.

Where an employer expresses a preference that workers wear or use any specified kind of clothing, uniform or equipment it must be furnished and maintained by him without cost to the workers. Uniforms may not be worn when off duty. Formerly, the provisions regarding uniforms applied only to women workers.

Where the employer furnishes meals or lodging or both, he may deduct from the minimum wage not more than \$6.30 for a week's board of 21 meals, formerly \$5, or not more than 30 cents a meal, formerly 25 cents. Maximum deduction for room rent remains at \$3. This provision formerly applied only to workers in hotels and restaurants.

Health and Sanitation

Health and sanitation standards to be observed in factories, workshops, offices and office buildings cover such matters as air and floor space, lighting, ventilation, heating, washing and toilet facilities, lunch and rest rooms, drinking fountains, elimination of dusts, vapours or gases, and matron or welfare supervisor.

Quebec Minimum Wage Act

General Order 4 applying to all workers under the Act except those covered by special Ordinances, and a number of special Ordinances were extended for another year to May 1, 1950, by an Order in Council (No. 295) of March 17, gazetted March 26.

The special Ordinances renewed include Order 2, requiring the payment of time and

one-half for overtime; Order 3, providing for a week's holiday with pay; Order 5, governing silk textiles; 8, cotton textiles; 11, charitable institutions; 14, real estate undertakings; 19, full-fashioned hosiery; 23, taverns in Montreal; 26A, taxicabs in Montreal; 29, taxicabs in Quebec and Lévis; 37, manufacturing of glass containers; and 39, forest operations.

Legal Decisions Affecting Labour

Ontario Appeal Court Dismisses Action Against Union Officials for Inducing Breach of Contract

On January 6, 1949, the Ontario Court of Appeal dismissed with costs the appeal of William Newell, a plumbing and heating contractor operating a "non-union" shop against Barker and Bruce, two officials of the United Association of Journeymen Plumbers and Steamfitters. The action had previously been dismissed in the Ontario Supreme Court by Mr. Justice Smily last June.

The plaintiff charged that "wrongful action" of the union officials caused him to lose a contract with the W. H. Cooper Construction Company Limited, which in turn held a contract from the head contractor H. K. Ferguson Company of Cleveland, Ohio. His tender to the Cooper Company, submitted in October, 1945, had been accepted and he had begun work, although he had not received a written contract.

The defendants, Barker and Bruce, on learning of the contract, advised the Cooper Company that the plaintiff did not employ union men. The Company then telephoned the plaintiff and told him all men on the job must be union men. The plaintiff agreed and tried to have his men admitted to membership in the union but found the defendants opposed to the making of any agreement between the plaintiff and the local. At a meeting between Bruce and a member of the Cooper firm, the former said, "I can't stop you from carrying on with Mr. Newell's contract at all, but you realize that if Mr. Newell carries on with this work that I cannot give Al Davis all the men he will require for this process piping". The Cooper Company then withdrew the contract and the plaintiff signed an acceptance and a release of the Cooper Company "from all responsibility or liability or damages which I have suffered or may sustain by reason of your being unable to enter into such a contract".

Mr. Justice Laidlaw stated that interference with contractual rights was recog-

nized by law as a wrong, and unless there was found to be sufficient justification for interference an action lay for the damages suffered. Three questions had to be considered: (1) Was there a contract between the plaintiff and the Cooper Company? (2) If so, did the defendants interfere with the plaintiff's contractual rights? (3) Did this interference (if any) cause damage to the plaintiff? If both the first and second question were answered in the affirmative, a further question would arise as to whether there was sufficient justification for the interference.

Mr. Justice Laidlaw accepted the finding of the trial judge that there *was* a contract between the Cooper Company and the plaintiff, but was of the opinion that there had been no breach of contract on the part of the Company. The contract included the condition that the plaintiff would employ only union men. The plaintiff had agreed to this condition, but could not perform that part of his obligation. Thus the case was not one in which the rights of either party were interfered with, but simply one where the contractual rights had been terminated by agreement of both parties.

The plaintiff's case, stated Mr. Justice Laidlaw, must fail for lack of proof. The plaintiff had failed to establish that his failure to make an agreement with Local 67 of the Union or to obtain the benefits of the agreement with Master Plumbers Association was caused by any wrongful action of the defendants.

Thus his Lordship felt it unnecessary to discuss the third question, for if the plaintiff suffered any damage it was caused by his own inability to perform the contract. His Lordship added that if it were necessary, he would hold that there was sufficient justification in the circumstances for anything done by the defendants. They were both aware that trouble had already existed between the plaintiff and the Union and were entitled to decide for themselves whether they wanted the plaintiff and his workmen to be associated with it. The statement of the defendant, Bruce, to the Cooper Company

official was proper and no fault could be found with that attitude on Bruce's part as organizer of the Union in Canada.

Mr. Justice Hogg, in accepting the fact that there was a contract between the plaintiff and the Cooper Company and that this contract did include a term or condition that the plaintiff should employ only union men, stated that the next question should be whether the termination of the contract was voluntarily agreed to by the plaintiff. The evidence showed that even before the alleged wrongful acts of the defendants the plaintiff had voluntarily agreed with the Cooper Company that the contract would be terminated unless he employed union men. Had the plaintiff told the Cooper Company he would not agree to the termination, and that in his view the company was committing a breach of contract at the instigation of the defendants, the situation would have been quite different. However, Mr. Justice Hogg did not approve of the defendants' action and he considered them responsible for the company's action.

The appeal was dismissed with costs. *Newell v. Barker and Bruce* (1949), Ontario Weekly Notes. No. 3.

Manitoba Court Awards Damages For Injury Due to Unsafe Working Conditions Notwithstanding Contributory Negligence of Workman.

On February 1, 1949, the Manitoba Court of King's Bench awarded two-thirds of the damages claimed, with costs, to a farm labourer who had the thumb, three fingers and part of his right hand severed by a power-operated saw. Total damages were assessed at \$6,671 and the plaintiff was awarded \$4,447.33.

The plaintiff, who was employed by the defendant for about a month prior to the time of the accident as a general labourer on his "mink farm", was assisting the defendant's foreman to cut firewood when the accident happened. Neither the plaintiff nor the foreman could explain definitely the manner in which the plaintiff's hand came in contact with the saw. There was some contradiction between the evidence of the plaintiff and the foreman as to how the log was held in position for cutting.

In summing up the evidence Mr. Justice Donovan stated that the foreman had held the log in a faulty manner while it was being put before the saw by bracing it against his hip instead of placing it firmly on the platform. This method naturally

called for assistance from the plaintiff in holding the log more firmly as it came in contact with the saw.

Secondly there was no suggestion that before the day in question the plaintiff had ever engaged in the kind of work which was then assigned to him, or that his rate of pay was fixed on any scale other than of an ordinary farm labourer. Mr. Justice Donovan believed that the foreman should in advance, both by instruction and advice, have prepared the plaintiff for the risks of the work. The defendant in speaking of the accident had stated concerning the plaintiff, "Sometimes I had the impression his mind was far away." The plaintiff was a war veteran who had been imprisoned for five years at Hong Kong. However, the Court maintained that the defendant, being aware of the frailties of the plaintiff, should have had his foreman supervise closely the plaintiff's actions when working so closely to the saw in operation.

In *Thomas v. Quartermaine* it was held that

The duty which a master owes to one servant may be quite different to that which he owes to another; it may vary with the knowledge, the experience, the skill and the powers of the workman.

In the third place there was no guard over the saw. The defence stated that it was not the custom in the district in which the defendant lived to have any guard on such a machine, but Mr. Justice Donovan declared that this was no answer at all. While it is true, he stated, that the saw would not have been made foolproof by the presence of a guard, yet had even a partial or defective guard been in position it would at least have tended to operate as a warning to the plaintiff that there was danger of injury, and then if an accident happened it would likely not have been of a serious nature.

Mr. Justice Donovan did not see how the principle of *volenti non fit injuria* might be used as a defence. It was not a case of the plaintiff voluntarily taking the risk. There was no evidence that he realized that, because of the speed and force with which the saw revolved, contact by any part of his body or clothing might result in very serious bodily injury.

On the other hand the Judge did not consider that the plaintiff could be altogether excused. There was nothing to interfere with his view of the saw. He concluded that the failure of the plaintiff to keep an appropriate lookout made some contribution to his misfortune.

McShane v. Hole 1 (1949), Western Weekly Reports 421.

1948 State Labour Legislation In the United States

The chief developments in American State legislation in 1948 were in the field of child labour and workmen's compensation. Virginia and Kentucky by revising their child labour laws to adopt a 16-year standard for employment during school hours are now included in the group of States which rank first in child labour legislation.

A workmen's compensation Act was passed in Mississippi, the only State which had not previously adopted such a law. In Louisiana, minors engaged in street trades are covered by a special system of workmen's compensation. Also enacted was a disability compensation Act in New Jersey. Changes were made in the industrial home-work statute in Rhode Island.

Child Labour

Both Kentucky and Virginia enacted child labour laws in 1948 which raised the minimum age for general employment during school hours to 16. This brings up to 20 the total number of States that are in line with the child-labour provisions of the Federal Fair Labour Standards Act.

These laws widen the occupational coverage of the former laws, and raise standards with respect to hours, employment certificates, and the regulation of night work and hazardous occupations.

The former minimum age in both States was 14 but in Kentucky this applied only when the schools were in session, and in Virginia children of 12 years and over were permitted to work outside school hours in fruit and vegetable canneries. Now, in both States, a child must be 14 or over for work after school and during vacation. In Virginia, under the new law, if a child has completed high school, or is over 14 and enrolled in a work-training program or is 14 or over and cannot profit from further schooling, the 16-year minimum is waived. The Virginia law exempts from its provisions domestic work if performed in connection with the child's home and for his parent, and work outside school hours on farms, in orchards, or in gardens with the parent's consent.

As regards certain hazardous occupations, the Kentucky Act raised the minimum age from 16 to 18. A 16-year minimum age for work in manufacturing or mechanical establishments at any time is required.

A step forward in both States was the establishment of a maximum 40-hour work-

week for boys and girls up to 18 years of age. Formerly, there was a 48-hour week in Kentucky and a 44-hour week in Virginia for children under 16. The new Acts give to minors under 18 the eight-hour day and the six-day week formerly applicable only to those under 16.

In Kentucky, part-time work of 14 and 15-year-olds attending school is limited to three hours on a school day and to 23 hours in a school week. Employment of 16 and 17-year-olds is limited to four hours on a school day and 28 hours in a school week. Both laws provide for a 30-minute meal-period.

The two States require employment certificates for minors under 18 instead of under 16, as formerly; the Virginia law adds a provision for yearly physical examination up to 18. Both Acts also provide for the issuance of age certificates for minors 18 and over, upon request.

In Kentucky, night work for minors 16 and 17 is prohibited after 10 p.m. or before 6 a.m. Formerly, this was 8 p.m. to 6 a.m. for boys under 16 in specified occupations. Minors of 15 years are forbidden to work after 8 p.m. and those under 15 years, after 6 p.m. The Virginia law retains the night work prohibition of 6 p.m. to 7 a.m. for minors under 16. Boys of 16 and 17 years of age may be employed until midnight and girls of 16 and 17, not enrolled in school, may be employed until 11 p.m. and if enrolled in school, until 10 p.m. These provisions do not apply to children in Virginia 16 years of age and over on farms, in orchards or in gardens.

Workmen's Compensation

Mississippi approved a workmen's compensation law which provides for compulsory coverage for employers of eight or more, unlimited medical care, a second injury fund, and double compensation for minors injured while illegally employed.

Exempted are domestic servants, farmers and farm labour, transport and maritime employments. All accidental injuries arising out of or in the course of employment are covered.

Insurance may be obtained through private insurance carriers or by self-insurance. Compensation payments begin on the sixth day after the injury unless disability lasts for 14 days or more in which case compensation is payable from the date of disability. The benefits are to

be paid at the rate of 66 $\frac{2}{3}$ per cent of average weekly wages, with maximum payments of \$25 per week for a maximum period of 450 weeks. The minimum weekly payment is \$7. Death benefits are payable during widowhood, and to dependent children under 18 years of age.

Amendments were made in existing workmen's compensation Acts in six other States—Kentucky, Louisiana, Massachusetts, Missouri, New York and Virginia, and in the first five named, increased benefits were provided.

In Louisiana, the workmen's compensation law was made to apply to all illegally employed minors. By a second enactment, minors who are engaged in specified street trades, including the selling and delivery of newspapers, are covered by a compulsory system of workmen's compensation. Wisconsin is the only other State which has a comparable provision. The law applies to employers of more than three minors between 12 and 17 inclusive. The time of engaging in a street trade is defined to include the time spent in reporting to and from the place or places where the trade is carried on. A minor accidentally injured while engaged in a street trade is entitled to compensation benefits and should death occur, compensation is payable to his dependents.

Disability Compensation

New Jersey, following the example of California and Rhode Island, established a

system of disability compensation providing for weekly benefits to workers, who, because of illness or accident not covered by State workmen's compensation law, are not able to work. Benefits range from \$9 to \$22 a week, depending on the worker's previous wages. Compensation is not payable for disability resulting from pregnancy or from a wilfully and intentionally self-inflicted injury.

Industrial Home Work

Rhode Island amended its home-work law to extend its coverage to subcontractors furnishing material to be processed in a home, and also provides that "industrial home work" shall include processing in the home of the employer. Several provisions were added concerning the issuance of licences to employers and homeworkers.

Industrial Relations

Louisiana repealed a 1946 act which regulated and controlled trade union activities. The effect of the repeal is to restore to full measure the anti-injunction act of 1934. Under the 1946 law, injunctions could be issued against unauthorized strikes in violation of contracts, against violence or threats of violence, and against combinations of employees in restraint of trade. An Act to prohibit the transportation of strike-breakers into the State was also passed.

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act. Published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant was unemployed within the meaning of the Act.—CU-B. 362 (May 26, 1948).

MATERIAL FACTS OF CASE:

The claimant, having been steadily employed for five years as a milling machine operator, lost his employment on July 30, 1947, due to shortage of work, and had been on benefit for approximately six

weeks when it was found that he was assisting on his farm which comprised 140 acres with 23 head of cattle, some pigs and chickens. He had purchased the farm in 1943 and had established his permanent residence there, but he continued to live in town while in industrial employment, his wife operating the farm on a share basis with the assistance of their sons, aged 13 and 11 years. He stated that his wife's

income from the farm was less than \$1 a day. When he became unemployed, he returned to the farm and assisted in performing the chores and making general repairs and was engaged in putting a roof on the barn, with the assistance of a neighbour whom he had hired, when this information came to light.

The Insurance Officer disqualified him for an indefinite period as from September 25, 1947, under Section 27 (1) (a) of the Act, on the ground that he was not unemployed but was in business for himself, and the Court of Referees unanimously upheld this decision.

The union of which the claimant is a member appealed to the Umpire and an oral hearing was held.

DECISION:

The question to decide is whether the claimant has proved that he was unemployed within the meaning of the Act.

It was agreed at the hearing that the claimant is an industrial worker and not a farmer. He went to reside on his farm during the period of his involuntary unemployment and immediately upon securing employment, he returned to the city. The farm, which was purchased in 1943, is operated by his wife and two children.

Under the circumstances, he cannot be considered as self-employed for the purpose of the Unemployment Insurance Act. Although he might have assisted his wife and children in performing the usual chores on the farm, there is no indication that, if he derived any remuneration therefrom, it was in excess of \$1.50 a day within the meaning of Section 29 (1) (b) (ii) of the Act.

The decision of the Court of Referees is reversed and the appeal of the claimant is allowed.

Held that the claimant was not unemployed within the meaning of the Act.—CU-B. 363 (May 26, 1948).

MATERIAL FACTS OF CASE:

The claimant owned a half-section of land which he farmed during the summer months. He had no livestock and did not intend to live on the farm during the then approaching winter. On making claim for benefit he gave his occupation as "farmer". His pattern of industrial employment disclosed that in 1944-45 he had 4 months' employment with a packing company and in 1945-46 10 months' employment with the same company.

He was disqualified for an indefinite period under Section 27 (1) (a) of the Act,

as from March 31, 1947, on the ground that he was not unemployed but was in business for himself, having refused to apply for employment as a farm labourer because he was working on his own farm.

He made renewal claim on October 7, 1947, stating that he was now available for work, and the Insurance Officer held the indefinite disqualification imposed as of March 31, 1947 to be still in effect. The Court of Referees unanimously upheld this decision but the chairman granted leave to appeal to the Umpire.

DECISION:

The question to decide is whether the claimant has proved that he was unemployed within the meaning of Section 27 (1) (a) of the Act.

The facts indicate that the claimant is mainly and primarily a farmer working on his own account on his land. In his submission, dated October 25, 1947, the claimant stated: "My main occupation is (that of) a farmer and I do intend to return to the farm in the Spring".

The claimant contends that because then "he had finished his farm work" and therefore had become temporarily available for work, he should be entitled to receive unemployment benefit. Availability for work is not the deciding factor in this case and the claimant because he satisfies the requirements of paragraph (b) of subsection (1) of Section 27 has not proved "*ipso facto*" that he is unemployed within the meaning of paragraph (a) of subsection (1) of Section 27.

Even though the claimant may suspend his farming operations during the winter months or off-season, he does not cease to be a farmer. He retains all his interest in the land during the off-season and the soil continues its inherent functions as a result of his toil. Unless he gives up his farming operations as his main occupation, he cannot qualify for the receipt of benefit and will remain outside of the Unemployment Insurance plan for the duration of his self-employment. As regards insured persons who have entered into business on their own account and thereby become self-employed, it is not the intent and purpose of the Act to subsidize these persons for the period during which they do not draw profit or remuneration from their enterprise.

The claimant might be employed in insurable employment during the off-season in what could be termed subsidiary or auxiliary employment and thus, contributing to the unemployment insurance fund. However, in such case, he is paying a premium

to be insured against the risk of future unemployment whenever he ceases to be self-employed.

Under the provisions of the Act and the existing regulations, I have no other alternative, therefore, than to find that the claimant has failed to prove that he is unemployed within the meaning of paragraph (a) of subsection (1) of Section 27 of the Act.

This problem of self-employment has been given a great deal of consideration in the past and was lately the subject of an official hearing in the case of (CU-B. 362). In view of the different climatic and economic conditions in our

country, the representatives of the labour unions and of the Unemployment Insurance Commission, who were present at the hearing, submitted to the Umpire that too broad and uniform an application of the principles laid down in decisions pertaining to matters of self-employment might tend to create some hardship or anomalies.

In this connection, I wish to point out that under the Act the Commission has full authority, if it so desires, to introduce by way of remedial regulations the changes necessary to remove such hardship or anomalies as may exist in cases of self-employment.

The appeal is dismissed.

Unemployment Insurance Statistics February, 1949*

According to the monthly report issued by the Dominion Bureau of Statistics there was a total of 108,759 claims for Unemployment Insurance benefit filed at local offices of the Unemployment Insurance Commission across Canada during February, compared with 140,305 in January, and 88,016 in February last year. These totals include 15,296 revised claims in February, 13,656 in January, and 11,293 in February, 1948. Revised claims are registered when circumstances require the reconsideration of already existing claims, and are not, therefore, considered in estimating employment and unemployment levels among insured persons. Initial and Renewal claims, which originate almost exclusively from new cases of unemployment among insured persons, numbered 93,463 in February, 126,649 in January and 76,723 in February last year.

Ordinary claimants (that is, those completely separated from their employment) on the live unemployment register at any given time provide a measure of recorded unemployment among insured persons at that time. On February 28, there were 208,818 (172,968 males, 35,850 females) ordinary claimants on the live Unemployment Insurance register, compared with 197,675 (164,438 males and 33,237 females) on January 31, and 146,074 (116,676 males and 29,398 females) on February 28 last year. In addition there were 7,066 (5,904 males, 1,162 females) other claimants (mainly short-time) on the live unemployment register on February 28, 5,742 (4,953 males, 789 females) on January 31, and 7,279 (6,444 males and 835 females) on February 28 last year. Short-time claimants are those who have been put on short-time at their places of employment.

Table E-6 classifies all the claimants included on the live unemployment register according to the number of days they have been continuously signing the register since their most recent initial or renewal claim. Certain live registers will indicate however that an initial claim has followed without interruption the termination of a previous benefit year. In these latter cases though the initial claim is the most recent claim, it is ignored and count is made instead of the cumulative number of days the claimant signed the register since the commencement of this continuous period of unemployment, that is, since the most recent renewal claim. Sundays, days of sickness, and brief periods of employment where no renewal claim was necessary (usually employment of less than one week), are excluded from this count of unemployed days on the register.

During February, a total of 116,078 claims was disposed of. This includes 1,234 special requests not granted (that is, requests for antedating, extension of the two-year period and dependency rate of benefit) and 1,338 cases referred to courts of referees by claimants. Of the remaining 113,506 claims, in which entitlement to benefit was the main consideration, 92,568 were considered entitled to benefit and 20,938 not entitled.

Chief reasons for non-entitlement to benefit were: "insufficient contributions while in insurable employment" 11,133 cases; "voluntarily left employment without just cause" 4,588 cases; "discharged for misconduct" 1,049 cases; "refused an offer of work and neglected an opportunity to work" 862 cases; "not capable of and not available for work" 712 cases.

* See Tables E-1 to E-7.

During February, 210,681 beneficiaries were paid \$8,158,903 for 3,734,487 compensated unemployed days, compared with 163,643 persons paid \$6,727,221 for 3,056,418 compensated unemployed days in January and 138,417 persons paid \$5,017,492 for 2,544,452 unemployed days in February, 1948. The average duration of the unemployment compensated was, then, 17·7 days in February, 18·7 days in January and 18·4 days in February last year. The average amount of benefit paid per beneficiary was \$38.73 in February, \$41.11 in January and \$36.25 in February last year. The average amount of benefit paid per compensated day

of unemployment was \$2.18 in February, \$2.20 in January and \$1.97 in February, 1948.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for the month ending February 28, 1949, showed 3,645,493 employees were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1948, an increase of 41,496, since January 31, 1949.

As at February 28, 1949, 211,935 employers were registered as having insurable employees representing an increase of 772 since January 31, 1949.

WAGE RATES FOR CERTAIN CLASSES OF CIVIC EMPLOYEES, 1948

The Research and Statistics Branch of the Department of Labour in their annual survey obtains from employers statistics on wage rates, hours and working conditions in Canadian industry. The following tables show wage rates as reported in the 1948 survey for certain classes of civic employees in 67 municipalities. Rates are shown for Police Constables, Firefighters, and Labourers. The term, "Maximum Basic Salary", means that such extras as bonuses for long service, allowances for clothing, etc., are not included. However, cost-of-living bonus payments are included in these rates.

Salaries of police constables in 1948 in these 67 municipalities varied between \$1,740 per year and \$2,827. In general, salaries in the larger cities were highest, although there are exceptions to this tendency, as indicated in the table. Constables in the city of Toronto, receiving \$2,827 per year, were the highest paid; in Hamilton the rate was \$2,761, Windsor \$2,721, and Sudbury \$2,655. Eight other cities, including Montreal, Vancouver and Winnipeg, showed rates of \$2,500 or more per year. Increases over 1947 in policemen's wage rates ranged from \$18 in

Niagara Falls to \$418 in Sault Ste. Marie. These increases, reported by 56 of the 67 centres, averaged \$224 per year.

Wage rates paid to fire-fighters are in many cases the same as for policemen in the same city. In some of the smaller centres, of course, where the maintenance of two separate forces would entail unnecessary expense, the duties of both are performed by the same men. As in the case of police constables, the highest fire-fighter's rate was in Toronto; here the annual salary was \$2,947. In Vancouver the rate was \$2,820 and in Hamilton, \$2,711. Increases over the 1947 figures of \$26 per year in St. Catharines up to \$480 per year in Vancouver are reported. Of 49 centres showing increases the average was \$218 per year.

Average wage rates for labourers employed by municipalities in 1948 ranged from 55 to 1.03 cents per hour. In about half the centres covered in the table ranges of rates are shown for this class of worker; these ranges might indicate differentials paid for unpleasant or hazardous work, special qualifications, or length of service. Increases of from 2 to 18 cents per hour over 1947 rates are reported for labourers, with all but eight of the 67 municipalities reporting higher rates in 1948.

WAGE RATES FOR CERTAIN CLASSES OF CIVIC EMPLOYEES, BY MUNICIPALITY, 1948

(1) Most firefighters work under the two-platoon system, 10-hour day shift and 14-hour night shift, averaging 72 hours per week, with one day off in seven. A number of municipalities have adopted the three-platoon system, three 8-hour shifts and 48-hour week.

(2) The higher rate for married men.

(3) Drivers of apparatus only; others on call.

(4) Both police and firefighting duties performed by the same men.

(5) Work on certain eight listed statutory holidays to be paid for at regular rate.

(6) Free uniforms.

(7) Uniforms supplied, boot allowance of \$20 per year and free street car transportation to and from work.

(8) Paid also for work on statutory holidays.

An analysis of the current employment situation prepared by the Research and Statistics Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics and other official information.

CURRENT EMPLOYMENT CONDITIONS

During March, unemployment continued to decrease from the peak reached in the latter part of February. Despite this improvement, unemployment at the end of March was still high in terms of the previous two years' records. By May, however, these workers were expected to be absorbed again in the seasonal jobs now opening up in construction, agriculture and transportation. A greater than usual seasonal drop in employment this year was evidence of the gradual shift from a sellers' to a buyers' market among various lines of goods and services. While these changing economic conditions called for the re-alignment of production in some lines, employers as a whole were still making plans for future expansion. Indeed, industrial construction contracts awarded during the first quarter of 1949 exceeded those of any other quarter for as far back as 1939.

The seasonal factor was now acting in favour of employment expansion and hiring had begun to pick up during March. However, since the seasonal slump had affected more workers than usual this winter, unemployment at the end of March still exceeded that of either 1947 or 1948. Considerably fewer jobs were available in logging, meat packing, sawmills, rubber and shipbuilding compared with 1948. In addition, the tremendous expansion in the working force in construction caused more workers to be seasonally displaced, even though construction employment itself was higher than in 1948. The seasonal upswing which takes place in April and May, however, was expected to supply sufficient jobs for all those now seeking work, and labour shortages may develop before the summer is very far advanced. Construction, agriculture, fishing, water and inland transportation, and food processing industries will shortly be providing many jobs for workers.

Increased seasonal unemployment this year appeared to be due partially to the readjustment of production to changing market conditions. Consumer demand had generally become less insistent in the domestic market and had even started to fall off in some lines. At the same time, the export market had become increasingly difficult to penetrate because of continued dollar shortages and greater competition from other countries. In line with the

easing of demand, wholesale prices have been levelling off since the last quarter of 1948. Industrial production itself underwent a sharp drop during January to reach a level just above that of 1948 at that time. This new phase of market conditions had called for a careful re-assessment of production costs by employers. While employment itself had not been seriously affected, the changing market picture had been reflected in a return to greater seasonality, granting of fewer wage increases and an increasing emphasis on productivity.

Employers still appeared to view the situation with optimism, however. Industrial construction contracts awarded during the first quarter of 1949 exceeded those for all previous quarterly periods since 1939. Reports received by the Department of Labour on plant expansion in manufacturing also indicated a high level of activity and already more than 350 employers had signified their intention of expanding plant facilities during 1949.

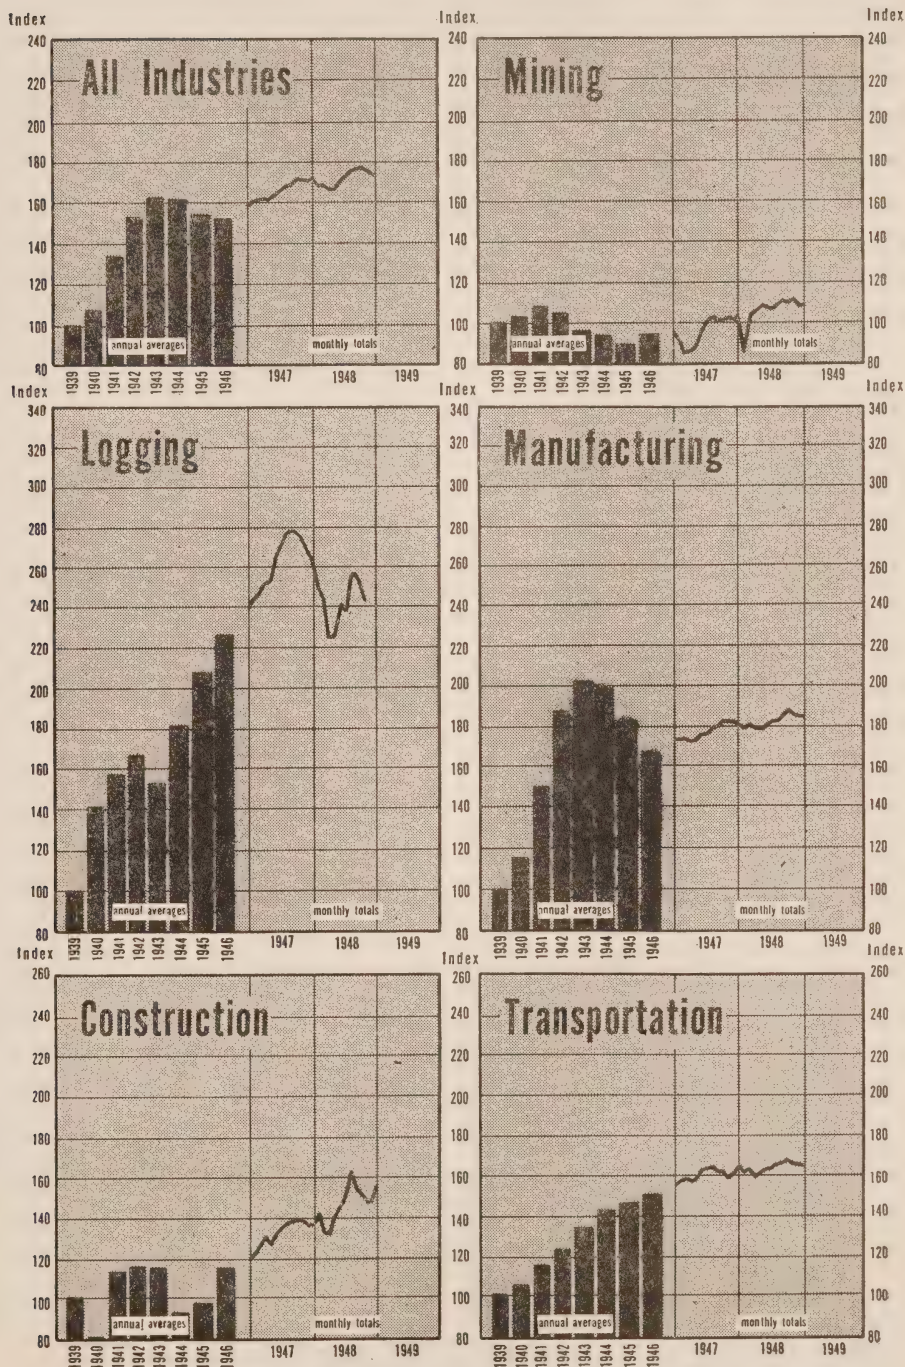

Industrial Analysis

The *agricultural* industry was again about to enter a season of high activity. Generally it was felt that the demand for farm products in 1949 would equal that of 1948 although some decline might occur in the export market. The domestic market was expected to expand as a result of levelling off of farm prices. The monthly index of

EMPLOYMENT TRENDS IN CANADIAN INDUSTRIES

Average: 1939=100

Seasonally Adjusted

farm prices reached a peak in August, 1948, and, contrary to the experience of 1947, declined during the next quarter. In general, farm prices during the year 1949 were expected to remain at approximately the 1948 level, which in itself was 20 per cent higher than in 1947 and 120 per cent above the 1941 level.

Against this background of continued buoyancy, farmers were making plans for extensive farming operations during the coming season. A strong demand for farm help was expected which, in many areas, would exceed the local supply of workers available. Immigration plans were already under way to meet such a shortage and Dutch farmers had begun to enter the country. Peak seasonal labour needs for the harvesting of special crops will again be met by a program of labour movements.

The **fishing** industry was temporarily slack during March between the winter and spring operations. Pockets of unemployment had developed in the Maritimes, both among fishing crews and workers in fish packing plants. Below average winter operations, as well as the seasonal slack, were responsible for the unfavourable situation.

The outlook for the industry itself was not entirely optimistic, either on the Pacific or Atlantic coasts, owing to unsettled export market conditions. This affected some 10,000 employees in fish packing and curing plants as well as the fishermen themselves. The usual market in the United Kingdom for canned salmon from British Columbia may not be available, while the domestic market and the United States market for fresh and frozen fish may be adversely affected by the increased competition from meat products, which have recently decreased in price.

Logging operations were drawing to a close in Eastern Canada, and workers were being released as hauling operations were completed. River drivers, however, will be needed when the ice leaves and the logging drive gets under way. Some workers who had been laid off were waiting for construction work and lake navigation to begin, while others had returned to the farms.

A different situation existed on the west coast where most logging camps were re-opening after the severe weather conditions had kept them closed for the greater part of the winter. Uncertain market conditions may prevent many small operators from re-opening this year, however.

The employment scene in **manufacturing** was quiet during March with relatively

little hiring of workers. Facing the more competitive market conditions, employers were examining their costs closely and not taking on staff unless absolutely necessary. The greater seasonality of manufacturing employment this winter, along with the loss of some export markets, had caused a relatively large drop in employment in the previous three months. At the beginning of February, 7 of the 17 major manufacturing industries reported fewer persons working than in 1947. The industry as a whole, however, still employed more workers than in the previous year. By the end of March, greater seasonal activity was apparent and hiring was again under way in heavy industry and textile and clothing firms. Also, the removal of the war tax on jewellery, confectioneries, soft drinks, and chocolate bars, announced in the Federal budget was bringing about expansion in these industries.

Contracts between employers and unions were up for renewal in numerous manufacturing plants during March. A strike had developed among 600 bakery workers in Winnipeg, Manitoba, but, on the whole, negotiations were progressing peacefully. Due to the levelling off in the cost of living, wage demands this year may not be pressed as strongly as previously, but more emphasis was expected on fringe issues, such as welfare plans, improved working conditions, holidays, and various social security programs.

The **construction** industry was still in its inactive season during March, but employment was well-sustained for the time of year. At the beginning of February, the latest date for which statistics are available, the index of employment in construction (base 1926=100) stood at 147.9 as against 137.6 in 1948. Continuing fine weather during April will create many opportunities for construction work and extensive hiring was expected. Labour shortages were already developing in some of the skilled trades, particularly bricklaying.

For the third successive month in 1949, construction contracts awarded showed gains over the comparable period of 1948, bringing the total for the first quarter of 1949 to \$204 million as against \$129 million in the same period of 1948.

A recent survey conducted by the Department of Trade and Commerce indicated that the supply of building materials had improved to such an extent that all construction projects in 1949 could be carried out with few supply difficulties. Increased production was expected for 21 of the 30 building materials covered in the survey.

The most serious shortages were expected to occur among iron and steel products, although a slight increase in primary iron and steel production over 1948 was foreseen.

Sales in *trade* establishments during March picked up after winter inactivity when buying in almost all cities throughout Canada had been curtailed. Increased sales reflected both the beginning of the Easter trade and the usual spring requirements for farming equipment, gardening supplies and clothing. Consumer purchasing power was also on the increase, in part a result of the recent distribution of many millions of dollars which had been set aside by the Compulsory Savings program. Dollar value of sales in department stores throughout Canada during March was about 10 per cent above the previous year's level. This rise, however, was accounted for almost entirely by price increases.

The steady rise in prices which had taken place in the past three years and which had become an increasingly important factor in consumer buying, appeared now to be drawing to a close. Prices on the wholesale level have been levelling off since the last quarter of 1948. The general index of wholesale prices (1926=100) stood at 159.3 in January, 1949, as against 159.2 and 146.9 in October and January of 1948. Generally it was felt that any significant decline in prices would have a beneficial effect on sales, unless accompanied by a serious loss of income through unemployment.

Regional Analysis

The *Maritime* region was delayed in its spring expansion during March because of heavy snowfalls in some areas. Preparations for a busy construction and fishing season, however, were under way. The entry of Newfoundland as the tenth province of Canada particularly affected the Maritimes and it was expected that many workers from Newfoundland would be attracted to the region when seeking employment.

In Nova Scotia, northern ports expected a heavy increase in passenger and freight traffic to and from the new province. This, along with the construction of the bridge over the Strait of Canso, was expected to stimulate both trade and transportation in the Cape Breton area.

Manufacturing employment was expanding and most workers who had been laid off temporarily had been recalled by the end of the month. Heavy iron and steel industries reported substantial orders on hand. In paper production, emphasis was shifting from quantity to quality in order to com-

pete with Scandinavian and other manufacturers who were looking for markets in this country.

Employment conditions in the *Quebec* region were fairly stable during March. The usual seasonal upswing had been slow because of adverse weather, overstocking in certain manufacturing fields, and hesitancy in hiring while industry awaited the Federal government budget. As a result, labour demand was light during March, but optimism prevailed with regard to the next few months. Both heavy industry and construction were well supplied with contracts.

Greater stability was evident in the employment situation in manufacturing. In primary textiles, production was at a high level with labour demand and supply well balanced; low turnover was evidence of stabilization in an industry previously noted for its constantly changing labour force. Clothing firms also reported an adequate labour supply, one factor being the immigration of qualified and experienced workers from Displaced Persons camps. Employment in heavy steel industries fluctuated according to the supply of imported steel; orders were plentiful.

Logging operations were now completed except for the river drive which was expected to start early in April and continue for about three weeks. Workers were being released and were turning to employment in agriculture and construction.

In the *Ontario* region, spring activity and the Federal budget announcements towards the end of March stimulated employment in some industries. For others, a better balance between supply and demand for goods in the domestic market, and the loss of export markets, were increasing the element of competition and cost-cutting, thereby reducing labour demand. Nevertheless, employment remained above the 1948 level, and the labour surplus continued to decline.

Labour demand in general manufacturing industries remained dull, but those affected by the new budget showed signs of increased activity. The confectionery, soft drink, cosmetic and jewellery industries, especially, planned immediate employment expansion. Heavy manufacturing firms remained active and gradual employment expansion was forecast. The trend in employment had continued steadily upward throughout the past year.

Full employment of all construction workers was expected this year, although there may be less activity than in 1948 in some areas. Many workers will be needed in agriculture shortly with spring work now

in its early stages. In lake navigation also, hiring was under way for the opening of navigation early in April; crews were already aboard most ships.

Employment expansion in the *Prairie* region was well under way during March. The labour surplus continued to decline, despite the fact that several thousand men released from logging were looking for other employment. The construction industry was starting on another heavy building season, especially in Alberta. Employment conditions in this province appeared to be particularly favourable with the oil boom stimulating expansion in many directions.

The spring rush in agriculture had not yet started, but farmers were coming into town to place orders for workers, arrange for machinery repairs, and deliver grain. This activity was felt throughout the region, stimulating business in general.

In the Great Lakes area, a surplus of workers had accumulated since the completion of winter logging. The river drives will start after the spring break-up, however, and these, with increased activity in farming, construction and navigation, were expected to absorb the available manpower. Navigation is scheduled to open early in April and there were 55 million bushels of grain at the Lakehead awaiting shipment within the next few months.

In the *Pacific* region, greater improvement occurred in the employment situation during March than in any other region. Many hundreds of workers, who had been temporarily unemployed because of severe weather, were returning to their jobs. Transient workers were leaving British Columbia to return to farming in the Prairies. Construction and logging were expanding after the forced shut-down of the past few months, and shortages of skilled workers were already imminent in some areas. By late spring, the usual scarcity of young and middle-aged workers for heavy unskilled work will probably develop.

The re-opening of coastal logging camps had provided a great deal of employment, not only for woodsmen, but also for many in associated industries. Because of road conditions, interior camps and those on higher levels were still closed but full operations will begin after the spring thaw. Sawmills were working at capacity, and shingle mills were again active.

Great activity in mining areas was expected in the coming months; base metal operations, particularly, will absorb many workers. Labour demand during March, however, was still relatively light. Similarly,

in fishing the situation was quiet, but preparations for the season were going ahead; conditions were somewhat unsettled since terms and prices for fish had not yet been decided upon. Fishing companies had tightened the financing of gear and boats and many boats were listed for sale.

Employment Service Activities

The end of seasonal unemployment was in sight during March. Although very little of the renewed seasonal activity had yet materialized into job openings, most workers were expected to be back on the job by early May, barring any serious set-back in weather conditions.

Most outside work was now only awaiting the disappearance of snow and frost before large-scale hiring would begin. A few construction workers returned to the job during March but the real construction season will not get underway until the frost leaves the ground and excavation work can be satisfactorily undertaken. Farm labour demand also will crystallize when workers can begin work on the land; already advance orders for help were being placed with employment offices. Re-employment of truck drivers was awaiting the clearing up of road conditions as provincial bans now prohibited heavy traffic on many highways. All signs pointed to an early resumption of lake navigation; the opening of the port of Montreal was the earliest for many years and it seemed likely that movement on the lakes would commence almost a week earlier than usual.

In the women's field, the resurgence was not so marked because of the less seasonal nature of their work. The outlook in trade, however, had brightened with the prospects of Easter activity and, while hirings for this season will not be large, full employment of the regular staff was assured. The seasonal element was also evident in the personal service industries, and demand for domestic servants and laundry workers was rising.

The renewed seasonal activity, however, did not have a marked effect on the number of unplaced applicants during March. All in all, the number unplaced had fallen by only 20,000 during the month, leaving 245,000 on file at the beginning of April. Part of the sluggishness could be attributed to the re-entrance of loggers into the labour market at this time. It was also possible that unemployment itself was falling at a faster rate than the decline in unplaced applicants since the total of unplaced applicants represents the count of the live file at any one date. An application remains

alive for 30 days unless the applicant is placed by the Employment Service or notifies the office when obtaining a job on his own. It is quite probable that at the time of the spring renewal, numbers of workers will find jobs through their own efforts and will neglect to inform the office.

The greater severity of the seasonal decline this year was apparent in the placement statistics now available for the greater part of the winter months. Comparing the months of December, January, and February with those of the previous year, the first noticeable change was the absolute drop in the numbers placed. Placements during this period were 31 per cent fewer than in the previous year. While the greatest part of the slump occurred in the more seasonal segments of the labour force, there was a 16 per cent drop among women and a 27 per cent decline for veterans. In addition, many more of the current placements were temporary; casual placements rose from 17 per cent to 21 per cent of all placements effected. Clearance fell off to a much

greater extent than in previous years. In contrast to this, however, placements at Executive and Professional offices, which are largely non-seasonal, have been holding their own over the year.

Generally, it would appear that the duration of unemployment for the average worker has been longer this year. At the end of February, 55 per cent of the persons claiming unemployment insurance had been registered for 25 days, 30 per cent being registered for more than 49 days. One year before the comparative percentages were 51 and 27. It was encouraging to note, however, that for those claiming unemployment insurance (currently approximately 80 per cent of the unplaced), a much larger proportion were entitled to benefits. Also, this year benefits were being paid at a higher rate. During the December-February period, 80 per cent of all claims were allowed as against 75 per cent one year before, with the average daily benefits paid being \$2.18 as against \$1.96 in 1948.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

A further fractional decline in the Dominion Bureau of Statistics cost-of-living index kept the index at the approximate level it has maintained for the past six months. The index receded three-tenths of a point between February 1 and March 1. This decline, the second in succession, brought the index four-tenths of a point below the index peak of 159.6. It was, however, 8.4 points above March 1 last year. The latest index stood at 159.2 as compared with 159.5 at February 1, 159.6 at January 1, and 150.8 a year ago. It was 57.9 per cent above the August, 1939 level.

As in January, the decline was due to a further decrease in the food group. Price reductions for shortening products, meats, butter and eggs were mainly responsible for the index moving down from 200.4 at February 1 to 199.1. There were moderate offsetting seasonal increases in a few vegetables. At the March 1 level, the food group index was down 6.3 points from the October peak of 205.4, but still 13.2 points above the March 1, 1948 level.

The clothing index rose nine-tenths of a point from the February standing of 182.7 and was 12.8 points above March last year. The home furnishings and services section

gained fractionally from 167.8 at February 1 to 167.9, and was 6.7 points higher than on the same date last year. Fuel and light moved up by a small amount between February 1 and March 1—from 130.8 to 131.0—but was 10 points higher than a year ago.

The miscellaneous items index held at 128.1 between February 1 and March 1, but was 5.3 points above last year's level. The rentals index continues nominally at 121.7 until returns from the March survey are completed, and 1.8 points higher than a year ago.

Cost of Living in Eight Cities

Six out of eight regional city cost-of-living indexes moved down between February 1 and March 1, 1949. The Winnipeg series remained unchanged at 153.8 while that for Halifax rose 0.2 to 152.3 when higher prices for fuel, clothing and home furnishings and services more than overbalanced weakness in foods. Further declines in prices of foods were responsible for the lower indexes in other centres. Clothing prices continued to average slightly higher in most cities while home furnishings and services indexes presented a mixed pattern. Composite city index declines between February 1 and March 1 were as follows: Saint John 0.4 to 155.8; Montreal 0.4 to

* See Tables F-1 to F-6.

COST OF LIVING AND WHOLESALE PRICES IN CANADA FROM JANUARY 1914 TO DATE

(Base 1935-39=100)

162.0; Saskatoon 0.4 to 161.6; Edmonton 0.2 to 154.2; Toronto 0.1 to 154.6, and Vancouver 0.1 to 160.7.

Wholesale Prices, February, 1949

The general index of wholesale prices dropped 1.2 points to 158.1 (base 1926=100) between January and February, 1949. Weakness was most apparent in the animal products group where a decline of 4.6 points occurred. Livestock, fresh meat, hides and skins, lard and eggs were all lower, while a narrow rise was noted for fowl. Chemicals and allied products moved down 1.8 points to 128.6 when lower quotations for alcohol, tartaric acid and soap overbalanced sodium cyanide and calcium carbide advances. A drop of 1.4 to 137.0 in vegetable products was due to easier prices for oats, rye, corn, cottonseed oil, cocoa beans and onions. These outweighed a moderate gain in potatoes. Textile products receded 0.3 to 162.4 due to declines in burlap bags and raw wool, while the wood, wood products and paper series weakened 0.2 to 191.1 following lower prices for wood-pulp. Two groups were higher. Iron and its products gained 0.4 to 171.0 supported by a firmer tone for

steel sheets, plates and hardware, and non-ferrous metals moved up 0.2 to 166.2 reflecting strength in silver. Non-metallic minerals remained unchanged at 138.0.

Canadian farm product prices at wholesale dropped 3.1 points to 145.1 between January and February with declines predominating in both animal and field products. The animal products series receded 5.7 points to 178.3 when sharp reductions in livestock, hides and skins, eggs and raw wool overbalanced an increase in fowl prices. Decreases for oats, barley, rye, onions and hay outweighed strength in potatoes, to lower the field products series 1.5 to 125.3.

A revision in the index of Canadian farm products, retroactive to August 1, 1945, occurred this month. This was due to an additional payment to western producers of 20 cents per bushel for wheat sold to the Canadian Wheat Board since August 1, 1945 (Order in Council P.C. 919, dated February 24, 1949). It brought the price paid to the producer to \$1.75 per bushel for No. 1 Manitoba Northern wheat, basis in store, Fort William/Port Arthur or Vancouver.

STRIKES AND LOCKOUTS*

Canada, March, 1949

The number of work stoppages arising from disputes between employers and workers during March, 1949, showed an increase of one as compared with February, 1949, but fewer workers were involved during the current month. However, the time lost during March, 1949, was almost double that for the previous month, and was much greater than for March, 1948. Preliminary figures show 10 strikes and lockouts in existence, involving 5,978 workers, with a time loss of 135,725 man-working days, as compared with 9 strikes in February, 1949, with 7,235 workers involved and a loss of 71,732 days. In March, 1948, there were 15 strikes, involving 3,845 workers, with a loss of 57,133 days.

Almost 90 per cent of the strike idleness during March, 1949, resulted from a strike of 4,650 asbestos miners and mill-workers in various centres in Quebec. The strike of seamen, which commenced at Halifax, N.S., on March 22, 1949, involved only three ships by the end of the month and did not spread to other ports until after the first of April.

For the first three months of this year, preliminary figures show 24 strikes and lock-outs, involving 9,750 workers, with a time loss of 217,157 days. For the similar period in 1948 there were 36 strikes, with 15,947 workers involved and a time loss of 333,098 days.

Based on the number of wage and salary workers in Canada, the time lost in March, 1949, amounted to 0.17 per cent of the estimated working time, as compared with 0.09 per cent in February, 1949; 0.07 per cent in March, 1948; 0.09 per cent for the first three months of 1949; and 0.14 per cent for the first three months of 1948.

Of the 10 strikes recorded for March, 1949, only one was terminated during the month and that was indefinite in result, work being resumed pending final settlement. At the end of the month, therefore, nine strikes were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes about which informa-

* See Tables G-1 and G-2.

tion has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C., on May 30, 1946; soft drink factory workers at Edmonton, Alta., December 1, 1947; printing pressmen at Toronto, Ont., December 15, 1947; coal miners, Edmonton district, Alta., January 13, 1948; and seamen, Great Lakes and St. Lawrence River, June 6, 1948. The strike of costume jewellery factory workers at Toronto, Ont., which commenced on April 29, 1948, is considered to have lapsed.

Great Britain and Other Countries

The latest available information as to strikes and lock-outs in various countries is given in the *LABOUR GAZETTE* from month to month. Statistics given in the annual review, issued as a supplement to the *LABOUR GAZETTE* for April, 1949, and in this article are taken, as far as is possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in January, 1949, was 112 and five were still in progress from the previous month, making a total of 117 during the month. In all stoppages of work in progress in the period there were 54,400 workers involved and a time loss of 115,000 working days was caused.

Of the 112 disputes leading to stoppages of work which began in January, eight, directly involving 29,200 workers, arose out of demands for advances in wages, and 39, directly involving 11,400 workers, on other wages questions; four, directly involving 700 workers, on questions as to working hours; 17, directly involving 3,100 workers, on questions respecting the employment of particular classes or persons; 38, directly involving 3,300 workers, on other questions respecting working arrangements; and four, directly involving 900 workers, on questions of trade union principle. Two stoppages, directly involving 1,400 workers, were in support of workers involved in other disputes.

United States

Preliminary figures for February, 1949, show 225 strikes and lock-outs beginning in the month, in which 80,000 workers were involved. The time loss for all strikes and lock-outs in progress during the month was 650,000 man-days. Corresponding figures for January, 1949, are 225 strikes and lock-outs, involving 70,000 workers, with a time loss of 800,000 days.

SELECTED PUBLICATIONS RECEIVED RECENTLY IN LIBRARY OF DEPARTMENT OF LABOUR*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the *LABOUR GAZETTE*.

NOTE.—Many of the statistical data in this table are included in the *Canadian Statistical Review* issued by the Dominion Bureau of Statistics.

†Comparable statistics are not available. (1) Labour Force survey figures given are as of November 20, 1948, February 21, 1948 and February 23, 1946. (2) Base 1926=100. (3) Figures are as at end of quarter ending December 31, 1948, 1947, 1945 and 1938 respectively. (4) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average for 1946=100. (5) First of month. (6) Base 1935-1939=100. (7) Figures are for four week periods. (8) Annual figures; monthly not available. (9) Year-end figures.

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed in Tables I and 9, with the exception of electric light and power.

² Mainly hotels and restaurants and laundry and dry cleaning plants.

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners)

SOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operating firms.

| Week preceding | Average Hours Worked | | | Average Hourly Earnings | | |

* Industries classed in the durable manufactured industries.

¹ Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.c. the latest figures are as follows—Dec. 1, 1948, 223-0; Jan. 1, 1949, 224-9; Feb. 1, 1949, 224-9; at Feb. 1, 1948, the index was 194-7.

² Chiefly street and electric railways. ³ For information respecting the sex distribution of the persons in recorded employment, see Table C-5.

NOTE: Average Real Weekly Earnings were computed by dividing the index of the cost of living into an index of the average weekly earnings, both indexes having been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are: January 1, 1945, 39.6 hours, \$27.72; April 1, 1945, 43.6 hours, \$30.69; January 1, 1946, 38.1 hours, \$25.87; January 1, 1947, 38.1 hours, \$29.03; January 1, 1948, 38.3 hours, \$33.17; April 1, 1948, 41.6 hours, \$37.02; January 1, 1949, 40.6 hours, \$39.46.

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices, etc., occur from time to time.

(a) Rent figures are obtained by multiplying increases since June, 1941 by the average rental determined by the census of that date. The increases are based upon reports from real estate agents and periodic sample surveys which are now being conducted by direct interview.

(b) Rents marked (b) for apartments of flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

(c) Averages include prices for cuts with bone-in.

TABLE F-2.—INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF MARCH, 1949

(BASE:—August, 1939=100)

| | Total | | | Food | Rent | Fuel | Clothing | Home Furnish- ings and Services | Miscella- neous |
|-----------------|-----------------|-----------------|-----------------|-------|-------|-------|----------|--|--------------------|
| | Mar. 1, 1948 | Feb. 1, 1949 | Mar. 1, 1949 | | | | | | |
| Halifax..... | 145.5 | 152.1 | 152.3 | 198.4 | 109.1 | 133.4 | 189.6 | 155.7 | 121.5 |
| Saint John..... | 148.9 | 156.2 | 155.8 | 191.9 | 113.8 | 136.6 | 189.6 | 156.4 | 127.7 |
| Montreal..... | 154.0 | 162.4 | 162.0 | 208.2 | 117.4 | 127.7 | 175.5 | 171.3 | 124.9 |
| Toronto..... | 148.1 | 154.7 | 154.6 | 191.3 | 118.2 | 146.6 | 183.7 | 164.8 | 126.4 |
| Winnipeg..... | 145.6 | 153.8 | 153.8 | 199.6 | 114.4 | 121.2 | 174.4 | 171.5 | 122.3 |
| Saskatoon..... | 153.1 | 162.0 | 161.6 | 209.3 | 121.9 | 140.4 | 186.4 | 172.8 | 121.0 |
| Edmonton..... | 145.9 | 154.4 | 154.2 | 203.4 | 108.7 | 114.6 | 186.3 | 163.4 | 124.6 |
| Vancouver..... | 149.7 | 160.8 | 160.7 | 206.4 | 112.1 | 138.9 | 193.3 | 162.4 | 129.8 |

N.B.—Indexes above measure percentage changes in living costs for each city, but should not be used to compare actual levels of living costs as between cities.

| Cumulative totals..... | 36 | | 15,947 | | 333,098 | ·14 |

* Preliminary figures.

‡ Strikes untermi-nated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1949 ⁽¹⁾

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man-Working Days | Particulars ⁽²⁾ |

Strikes and Lockouts in Progress Prior to March, 1949

| | | | | |
|--|----|-------------------------|---------|---|
| MINING— Asbestos miners, mill work- ers, etc., Asbestos, Black Lake, Coleraine, Norbestos, Thetford Mines, P.Q. | 10 | ⁽³⁾ 4,650 | 120,000 | Commenced February 14; for a new agreement providing for increased wages, elimination for asbestos dust, welfare and pension plan, extension of vacations with pay, pay for nine statutory holidays, following reference to provincial conciliation; untermi-nated. |
| | | | | |
| MANUFACTURING— Textiles, Clothing, etc.,— Knitting factory workers, Paris, Ont. | 1 | 100 | 2,300 | Commenced January 18; for a union agreement providing for increased wages, reduced hours, union security, pay for eight statutory holidays, extension of vacation plan, etc; (partial return of workers; untermi-nated. |

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1949 ⁽¹⁾

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man- Working Days | Particulars ⁽²⁾ |
|--|---------------------|----------|---|--|
| | Establish- ments | Workers | | |
| Strikes and Lockouts Commencing During March, 1949 | | | | |
| MANUFACTURING— <i>Vegetable Foods, etc.—</i> Bakery workers, Winnipeg and Selkirk, Man. | 5 | 644 | 9,500 | Commenced March 13; for a greater increase in wages than recom- mended by unanimous report of conciliation board, guaranteed wage for salesmen, etc., in new agreements under negotiations; un- terminated. |
| <i>Fur and Leather Products—</i> Fur factory workers, Winnipeg, Man. | 3 | 200 | 400 | Commenced March 15; for a new agreement providing for increased wages, time and one-half for over- time, two weeks' vacations with pay, pay for statutory holidays, etc; terminated March 16; return of workers pending further negoti- ations; indefinite. |
| <i>Metal Products—</i> Pattern makers, Toronto, Ont. | 6 | 66 | 240 | Commenced March 28; for a greater increase in wages than recom- mended by conciliation board in new agreement under negotiations; unterminated. |
| <i>Miscellaneous Products—</i> Upholsterers, Vancouver, B.C. | 1 | (4) 5 | 75 | Commenced March 10; refusal to accept reduced piece-work rates on newly designed furniture; untermi- nated. |
| Stencil factory workers, Vancouver, B.C. | 1 | 14 | 60 | Commenced March 26; for a new agreement providing for increased wages and reduced hours, following reference to arbitration and concili- ation board; untermi-nated. |
| TRANSPORTATION— <i>Other Local and Highway—</i> Truck drivers, Courtenay, Duncan, Nanaimo, Port Alberni, Victoria, B.C. | 5 | 53 | 500 | Commenced March 21; for a new agreement providing for increased wages, two weeks' vacations with pay and contributory medical, hospitalization plan, following ref- erence to conciliation board; un- terminated. |
| <i>Water—</i> Seamen, Halifax, N.S. | 3 | 166 | 1,050 | Commenced March 22; for a union agreement providing for increased wages, reduced hours, changes in working conditions, preferential hiring arrangements, etc., following reference to conciliation board; unterminated. |
| SERVICE— <i>Business and Personal—</i> Hotel barmen, waiters and apprentices, Quebec, P.Q. | 21 | 80 | 1,600 | Commenced March 7; for increased wages as recommended by arbi- tration board; untermi-nated. |

⁽¹⁾ Preliminary data based where possible on direct reports from parties concerned, in come cases incomplete; subject to revision for the annual review.

⁽²⁾ In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

⁽³⁾ 500 indirectly affected; ⁽⁴⁾ 4 indirectly affected.

June, 1949

The Labour Month in Brief

The expansion of seasonal activities continued to dominate the employment scene during April and early May. Labour surpluses were dwindling rapidly, and labour shortages began to appear for seasonal industries in areas where weather favoured early activity. In manufacturing, however, small lay-offs continued as a result of market difficulties for several industries. Meanwhile, steady gains in earnings together with stability in consumer prices, contributed to further gains in the purchasing power of many workers.

Employment

Industrial employment continued above last year's level, a consistent trend since 1947. The Dominion Bureau of Statistics reported the highest index of employment on record for April 1, 1949, although the usual seasonal pattern was again in force and a reduction from the level of employment at the first of March was registered. The abrupt decline in eastern logging employment at this time of year offset growing activity in mining, transportation, construction, and services; manufacturing employment remained stable—caution was the keynote, and many employers were endeavouring to increase output by more efficient production methods rather than by hiring additional workers.

Later in April and in May, the river log drive, sawmill operations, farming and fishing activity added further seasonal impetus, and employment expansion was further stimulated.

This seasonal increase in activity was reflected in the rapid absorption of those who had been unemployed. The peak of winter unemployment had been reached late in February, when 265,000 unplaced

applicants had been registered at National Employment Service offices. The unusually bad winter had caused heavier unemployment than usual, but once the weather improved industries resumed operation as rapidly as possible. Thus the number of unplaced applicants dropped by 100,000 in three months to total 161,000 at May 26.

Those regions where primary industries are relatively important were especially affected by the seasonal expansion of activity. The employment situation in the Prairie provinces, British Columbia and Quebec showed the greatest improvement; in the Maritimes, seasonal activities start a little later, and in Ontario, construction activity was slow and manufacturing expansion slight.

The Labour Force

Canada's civilian labour force increased 74,000 in the year preceding March, 1949, to reach the highest figure for this time of year yet recorded according to the quarterly Dominion Bureau of Statistics sample survey of the labour force. The labour force was estimated at 4,899,000 persons in the week ending March 5, 1949, as compared with 4,825,000 in March, 1948, and 4,706,000 two years ago. Employment was estimated at 4,700,000, an increase of 31,000 over last March. A slight decline in agricultural employment during the year was more than offset by gains in non-agricultural industries. Seasonal unemployment was also heavier than in the past year, rising to 199,000 from 156,000.

Agricultural employment increased in the Maritimes and British Columbia and declined elsewhere; non-agricultural employment expansion was concentrated solely in Quebec and Ontario—other regions registered losses.

Industrial Relations

The situation in respect to industrial disputes did not change significantly during April—the strikes involving 4,650 asbestos miners and millworkers in Quebec, and 1,500 seamen in Canadian and foreign ports, continued. The only other large dispute, involving 640 bakery workers in Winnipeg and Selkirk, Manitoba, was settled towards the end of the month.

Elsewhere, industrial relations were fairly harmonious, and all other disputes were of minor importance. The three major strikes together accounted for 93 per cent of the total time loss during April and for 85 per cent of all workers involved in disputes during that month.

The time loss of 139,000 man-working days in April, amounted to .17 per cent of the working time estimated for all wage and salary workers during the month.

For the first four months of this year, preliminary figures show 33 strikes involving 11,000 workers with a time loss of 357,000 days. For the same period in 1948, there were 48 strikes with 18,000 workers involved and a time loss of 384,000 days.

Cost of Living

The cost-of-living index for May, 1949, was still hovering just below the peak of 159.6 recorded in January. A slight downward trend had been in evidence until April, when an increase in rents again boosted the cost of living. At May 2, another few points were added and the index moved up to 159.5. Most of this gain was due to seasonal advances in the price of meat and other food—the first advance in the food index since October. Smaller increases in the price of clothing, household furnishings and coke and coal were also recorded.

At May 2, 1949, the cost-of-living index had advanced 6.2 points from the level of May, 1948; from May, 1947 to May, 1948, the increase had been 20.2 points. Furthermore, nearly all of the increase for the

1948-49 period was concentrated in the first six months—the index has been relatively stable since then.

Earnings

Average hourly earnings of hourly-rated workers in manufacturing moved upwards again at March 1, following brief stability at February 1, to reach 97.5 cents per hour. A year ago, hourly earnings averaged 88.0 cents per hour. In durable goods manufacturing at March 1, workers were earning 105.2 cents per hour, and in non-durable manufacturing, 89.7 cents. In both cases, these are new records.

Average hours worked did not change at March 1 from the February 1 level of 42.9 weekly hours, and were still below the 43.2 weekly hours of December 1, and of March 1, 1948.

Average weekly earnings have continued their steady rise during the first three months of 1949, and averaged about 12 per cent higher than in the initial quarter of 1948. With the rise in consumer prices halted, real weekly earnings are showing their first sharp increase for some time. In the first quarter of 1949, the latter averaged almost 5 per cent more than one year ago and about 7 per cent higher than the average for 1946.

Foreign Trade

Canada's total domestic exports in April rose in value to \$237,800,000 from \$216,800,000 in the preceding month, and \$212,300,000 in the corresponding month last year. This raised the cumulative value for the first four months of this year to \$896,000,000 from \$884,000,000 in the same period of 1948. Sharp gains in exports to the United Kingdom and India and Pakistan were outstanding. Among commodities, advances were largest in exports of wheat, with lesser gains for other grains, rubber, seeds, cattle, newsprint and base metals.

NOTES OF CURRENT INTEREST

Growth of Labour-Management Committees in Canada

The Labour-Management Co-operation Service of the Industrial Relations Branch continued its steady progress in promoting the formation in industry of committees — representing management and labour—for the purpose of increasing and improving production, during the three months period ending March 31, 1949, with the result that as of March 31 it was able to report a total of 615 Labour-Management Production Committees established in Canadian plants. This compares with a total of 250 at the end of 1944, when a record of committees was first maintained, and of 346 at the end of the war. Distribution by provinces was: Prince Edward Island, 2; Nova Scotia, 40; New Brunswick, 19; Quebec, 121; Ontario, 295; Manitoba, 47; Saskatchewan, 28; Alberta, 19; British Columbia, 44. A breakdown by industries and trade unions, as of December 31, 1948, is given in the accompanying tables.

During the period under review the Service maintained its circulation of information and research material, in both English and French, on Labour-Management Production Committees. This included "Industrial Democracy at Work"—the basic handbook on the organization and operation of Labour-Management Production Committees, "Labour-Management Production Committee Handbook on Suggestion Plans"—a comprehensive review of suggestion plans, and "The Foreman and the LMPC"—an information bulletin on the desirability of foremen becoming

associated in committees and the manner in which they can contribute to their success. During the quarter 3,575 posters and 38,850 pay envelope stuffers presenting various phases of committee activities and based on the theme "Teamwork Pays Off" were distributed. The monthly bulletin "Teamwork in Industry" containing news of Canadian committees, developments in the field outside of Canada and discussions of committee problems and suggested activities, enjoyed steadily increasing circulation. Designed to help already established committees become more effective, a new sound slide film in colour, "Making the Most of Your LMPC", was completed in both English and French during the quarter.

The services of field representatives of the Branch in a number of the Dominion's principal industrial centres were available to both managements and trade unions to assist them in setting up Labour-Management Production Committees and to assist such committees after becoming established.

Training for apprentices in building trades

Discussing apprenticeship before the 1949 annual meeting of the Association, Mr. J. M. Pigott, of the Pigott Construction Company pointed out that there were only about 3,000 registered civilian apprentices in training in 1948, with the training of war veterans practically completed. He declared that "men interested in construction should realize that they are faced with one of the most important problems connected

| Total | 600 | 276,011 |

with construction that has probably ever faced the industry in this country. . . . We have to find ways and means of drawing into the ranks of our workers five times as many boys as we have now." He continued: "Employers in the construction industry are very much aware of the crowding into the ranks of journeymen of partially trained men, accepted because of the circumstances created by the shortage (of apprentices)."

(Estimates prepared by employers and representatives of organized labour, meeting under Government auspices in 1946, as published in the proceedings of the Canadian Construction Association for that year, indicated that approximately 20,000 apprentices were needed annually for "all (construction) trades, all provinces.")

The Federal Department of Labour has also been concerned with the seriousness of the problem. As a step in solving it, the Federal Government passed Order in Council, P.C. 5517, dated December 21, 1948. This Order opened the way for an extension of the Apprenticeship Agreements with the several provinces to cover half the cost of *pre-employment training* and subsequent special training of apprentices.

"Where a province so desires, full time class training may be given on a pre-employment basis prior to the actual indenture of an apprentice, but the number in each trade to be admitted to such classes shall be determined by the Provincial Apprenticeship Authority in consultation with the appropriate Trade Advisory Committee. The normal period of such pre-employment training should be about six months, but its actual duration shall be determined by each province. On its completion, trainees will be trade tested and given time-credit on the period of apprenticeship in accordance with the degree of trade competency attained, provided such credit would at least equal the length of the training period in class."

Pre-employment training for apprentices may not fully answer the prayers of employers in the construction industry, but it should do much to provide more competent journeymen in a shorter time. Moreover, it will help young men to determine whether or not they should continue in a given trade *before*, rather than *after*, they enter upon indentureship.

Mr. Pigott was of the opinion that the offer of the Federal Government, as provided in the Order in Council, should be accepted.

Wage increase in steel industry

An important settlement was reached in April between the Steel Company of Canada, Hamilton, and the United Steelworkers of America for a wage increase of 10 cents an hour and a reduction in weekly hours from 48 to 44.

Other features of the renewed agreement included the raising of paid statutory holidays from six to eight, and the voluntary check-off.

Demands for a pension and welfare plan were dropped by the union.

Similar terms were subsequently agreed to by a number of other employers in the steel industry, including the Algoma Steel Corporation, Sault Ste. Marie, and the Dominion Steel and Coal Corporation, Sydney.

Compensation for injured workmen to be increased in Ontario

Higher benefits for injured workmen in Ontario will be provided as a result of 1949 amendments to the Workmen's Compensation Act. These increase the basic rate of compensation for disability from 66½ per cent to 75 per cent of the workman's average weekly earnings. The maximum amount of average earnings to be taken into account in computing compensation was raised from \$2,500 to \$3,000 per annum. These changes, which bring the Ontario Act in line with the Saskatchewan law, will come into effect on January 1, 1950.

Prevention of accidents can reduce cost of compensation

During the year ending in March, 1949, "the Workmen's Compensation Board of Ontario awarded over \$23,000,000 for accidents which happened to men and women in the employ of companies, individuals, firms, governments, etc., in this province," according to a recent bulletin issued by the Industrial Accident Prevention Associations (Ontario).

The writer of the bulletin was of the opinion that the expenditure of more money in accident prevention measures would not only "result in an important reduction in the amount of money awarded" by the Board, but would greatly reduce human suffering.

Compensation benefits, including pensions, have increased materially since the Board was established in 1915, wages have increased, and the maximum wage on which payments are made has risen greatly. At the same time, interest rates on the Board's

investments have declined from about five per cent to less than three per cent, thus making necessary "increased sums to pay pensions awarded." Consequently, "the country has only one relief from the increasing cost of compensation and that is intensified accident prevention effort."

It is pointed out that "the most effective accident prevention work which can be done, is on the job." Plant managers, superintendents, foremen and individual workers, all have their responsibilities to protect their fellow workers and themselves by striving, singly and co-operatively, to remove dangerous conditions in plants. Each one too, can vigorously observe recognized safety regulations and check carelessness in others. It is a good idea to remember that "nature does not supply spare parts for your body," nor can any monetary compensation restore lost arms, or legs or eyes.

Standard Code for window cleaning

A "Code of Practice for Window Cleaning" was recently published by the Canadian Standards Association. The Code was prepared at the request of the Canadian Association of Administrators of Labour Legislation (L.G., 1947, p. 775) to serve as a guide to Provincial authorities in making regulations for the adequate protection against accident of this class of workers. It is also intended for the use of Municipal authorities, organizations engaged in window cleaning and manufacturers of safety equipment used in such operations.

The Code applies to all window cleaning operations performed on the outside of public buildings of more than one storey or in which the window sills are more than 10 feet above grade or adjoining flat roof. The term "public building" is defined to include

factories, office buildings, mercantile buildings (wholesale and retail), hotels, theatres, warehouses, apartment houses, provincial and municipal buildings, schools, colleges and university buildings, hospitals, buildings containing a place of public assembly whether or not maintained or leased for pecuniary gain, and any other building whose windows are more than 10 feet above grade, except dwelling houses not more than two storeys high or occupied by not more than six families.

The responsibility of both owner and employer for observance of the Code is emphasized.

Detailed specifications, illustrated by diagrams, are set out for the design and safe operation of swinging scaffolds, boat-swain's chairs, ladders, safety belts and fittings and other approved devices recommended for compulsory use by window cleaners. In no case should the window cleaner be permitted to pass from window to window on the outside, except by means of a balcony or scaffold enclosed by a railing.

Another section of the Code deals with the safe installation of anchors, by which the safety belt is fastened to the building, with special reference to installations in masonry, wood and metal construction. Special rules apply to casement windows and those of extra width.

Inspection of belt anchors by a competent person at least once in six months and of belts and life-lines at least once a week, is recommended. The keeping of permanent records of all inspections and replacements of equipment which should be available to the proper authority on request, is also advised.

The Code may be obtained for 50 cents a copy from the General Manager of the Canadian Standards Association, National Research Council, Ottawa.

Health plan for Northern Electric employees

"The importance of industrial medicine in furthering overall efficiency in the plant has been recognized by management for some time, but it is only in comparatively recent years that company medical centres, capable of undertaking a fairly widespread health program, have become the rule rather than the exception," states the journal *Plant Administration*.

One of the first companies to establish a medical centre in Canada, it states, was the Northern Electric Co., Ltd. Today, the company has an organization which covers all its manufacturing and sales personnel from Vancouver to Halifax.

The medical department, besides treating sickness and accident cases, is concerned with such matters as working conditions, plant sanitation, proper placement of disabled workers, control of industrial hazards, and pre-employment medical examinations. Its staff comprises one full-time and four part-time doctors, and 18 nurses, for the three plants at Montreal, Lachine and Belleville, and 40 physicians on a part-time basis to attend to the medical requirements of the company's personnel in other

parts of the Dominion. A branch, staffed by a part-time doctor and a full-time nurse, is being opened in Toronto.

Every new employee, before commencing work, is given a thorough medical examination to determine his physical capabilities, and to ensure that he is not placed in a job that might prove detrimental to his health.

Employees working on jobs involving potential occupational hazards receive medical examination periodically. Cases of occupational injury or disease remain under the complete charge of the company's medical department until such time as the patient recovers. Treatment of non-occupational illness is strictly limited to emergency care and the relief of minor ailments. In all other cases the employee is referred to his own physician.

Canteen workers and all employees who handle food are examined every six months. The examination includes a chest X-ray and blood test. Vaccination is given every seven years.

During a period of employee absence the medical department keeps in touch with the administrators of the company pension and benefit fund, as sickness benefit payments made to the employee are based on the medical department's reports.

While the benefits of an industrial medical service cannot be assessed in terms merely of dollars and cents, "the fact that Northern Electric has had an established medical department for the past thirty years is clear evidence of management's conviction that it is economically sound," the journal states. "Prevention is still better than cure when it involves loss in working time, whether in production to the company or in pay to the employee."

Editorial workers of newspaper obtain agreement

On April 12 the Toronto *Star* announced the signing today of a collective bargaining agreement with the *Star* unit of the American Newspaper Guild (CIO).

The announcement said the contract is the first of its kind in Canada and provides for salary increases and a wide range of other benefits for the 185 editorial employees of the *Daily Star* and the *Star Weekly*. It gave no wage figures.

Under the contract, the *Star* will pay time-and-a-half in cash for overtime work by editorial employees, who have a five-day 40-hour week.

The contract requires all employees to retain membership in the Guild as a con-

dition of employment. Nine out of 10 new employees must join the Guild.

The Ontario Labour Relations Board certified the *Star* unit of the Guild as the collective bargaining agency last November. Contract negotiations began early in 1949 and were successfully concluded with the signing of the agreement.

Changes in old age pensions and family allowances

Increased old age pension payments by the Federal Government and a widening of the scope of family allowances legislation were provided for at the recent session of the Parliament of Canada.

Proclaimed in force May 1, the amendment to the Old Age Pensions Act increases from \$30 to \$40 the basic monthly pension to which the Dominion Government contributes 75 per cent of the cost. The province pays the remaining 25 per cent, together with administrative costs.

Changes in the Family Allowance Act, 1944, effective April 1, repeal the provision which reduced the amount of allowances to the fifth child and subsequent children in a family of more than four, and permit allowances to be paid in case of immigrant children after they have been in Canada one year, instead of three years, as was previously required.

NES helps solve farm labour problems

Selection and placement of agricultural workers present complexities that are not encountered with urban labour. In the first place, farm workers usually live in their employer's home. Thus, it is essential for officials of the National Employment Service, not only to select those who have skills and abilities suitable to farm work, but to pay due regard to matching, as far as possible, the personalities of employers and workers.

Then, too, as farm operations fluctuate with the seasons of the year, it is frequently necessary to go beyond local areas in order to supply demands for workers, although the general policy is to exhaust local supplies first. This involves the transfer of workers from areas of over-supply to areas where there are shortages. To facilitate the movement of workers from one area or region to another, the Dominion has, in recent years, entered into annual agreements with the several provinces to enable officials of the Dominion Department of Labour and those of the provincial Departments of Agriculture to

co-operate in the interchange of farm labour on an interprovincial basis (L.G., March, 1949, p. 279).

Under the agreements, the Directors of Farm Labour in each of the provinces, working in close contact with their respective agricultural extension services, and the Regional officials of the National Employment Service, form Dominion-Provincial committees on farm labour. These Committees deal with farm labour problems other than those handled through the regular activities of the National Employment Service of the Unemployment Insurance Commission. The Committees co-operate with the Immigration and Farm Placements Branch of the Federal Department of Labour, which, in turn, acts as a clearing house for advance information as to potential requirements in the several regions across the country and prepares in advance for labour transfers, whether provincial, inter-provincial or through immigration.

During 1948, a total of nearly 16,000 farm workers were moved from areas having seasonal surpluses of labour to areas of seasonal scarcity. This number included about 9,200 Canadian workers who assisted with the maple sugar, grain, potato and sugar-beet harvests in the United States; 1,350 workers from the United States to assist with the tobacco harvest in Ontario and Quebec; and a total of 5,300 workers were moved interprovincially for the haying harvests in Ontario, fruit picking in British Columbia and Nova Scotia (women only were recruited for fruit picking in British Columbia) grain harvesting on the Prairies and potato picking in Prince Edward Island.

Most of these migrations of farm labour have been developed since 1943. Harvesting operations on the Prairies is an exception. The transfer of workers from Ontario and Quebec to help with Prairie harvests, was undertaken in a large way by the railway companies more than half a century ago and in the 1920's some 35,000 workers were thus transferred each year. However, improvements in harvesting machinery have greatly reduced this demand, so that only approximately 2,000 were recruited for this work in 1948.

Transportation arrangements for farm labour movements are made through the use of provincial transportation warrants when movements are within a province and by Unemployment Insurance Commission warrants when the movement is from one province to another. In all cases, the workers pay at least a share of the trans-

portation costs, but these may be also shared by the provinces concerned and the Federal Department of Labour.

The arrival of some 4,450 Displaced Persons from Europe to work on Canadian farms was timed to meet special farm labour requirements during the summer of 1948. Of these, 2,814 were male workers; 176 were married couples; 425 were members of "sugar-beet families" and 867 were rural household workers. They were placed on farms all across Canada and, on the whole, made an appreciable and valuable contribution to relieving the shortage of farm workers.

The regulations for the transfer of workers across the international boundary involve arrangements between officials of the Dominion Department of Labour and the United States Employment Service.

During recent years many Canadian combines crossed the border to assist in harvesting the grain crops in the Western States. However, reports indicate that many new combines had been purchased by American farmers and a good supply was in the hands of dealers. In view of this situation, the Hon. Humphrey Mitchell, Minister of Labour, stated recently that "it was not likely that there would be any demand for Canadian combines for the harvesting of the 1949 United States grain crop."

Labour and management partners in production

"Partners in Production—Number Two", a 32 page booklet detailing the accomplishments of Labour-Management Production Committees in Canadian industry as seen through managements' eyes, has just been issued by the Labour-Management Co-operation Service of the Industrial Relations Branch.

Printed in two colours, this booklet supplements "Partners in Production" which contained managements' opinions on the work of committees during the war years. "Number Two" deals with LMPC accomplishments in peace time—accomplishments which amply support the view that Production Committees are just as valuable—if not more so—in peace as they were in war.

Statements carried in "Partners in Production—Number Two" were written by management spokesmen for companies engaged in a variety of industries. These include pulp and paper makers, lumber companies, transportation corporations, textile mills, packing companies, bakers, communications systems, mining and smelting concerns, foundries and others.

It is hoped that the booklet, dealing as it does with the experiences of management representatives working with Labour-Management Production Committees under present day competitive conditions, will find favour with all who are interested in this helpful instrument for bettering labour-management relations, increasing production and improving efficiency.

Copies of "Partners in Production—Number Two" may be obtained from the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour, Ottawa.

Employment trends in U.S.A.

Commenting on the employment situation in the United States, the *Monthly Labour Review*, official publication of the U.S. Department of Labour, in its March issue, notes a lessening of business activity from post-war peaks in a number of industries.

"This tendency, combined with seasonal contraction in some industries, caused a significant decrease in non-agricultural employment between early January and early February. At the same time unemployment increased by over a half million to more than 3 million. Total employment, however, was as high as it was a year ago, and most of the basic heavy industries continued to operate near peak rates."

The publication describes lay-offs in lumbering and transportation as "probably more than seasonal," and continues: "In industries such as textiles, coal mining, furniture, appliances, and paper, curtailed production as a result of declining demand also caused lay-offs. There is undoubtedly a general easing of the demand for goods after more than 3 years of high production, but for the immediate future the normal spring expansion in outdoor industries will tend to reduce the number of unemployed."

A special article deals with recent readjustments in a number of consumer-goods industries. It points out that immediately after the war backlogs of demand and purchasing power were both at "unprecedented levels." Production and employment in non-agricultural industries thus began a general rise which continued until the end of 1948.

With the meeting of the backlogs of demand, a number of industries have recently been undergoing readjustments to somewhat lower levels.

Among the first industries to feel the impact of declining demand were those

dealing in luxury items, such as entertainment, furs, jewellery, and liquors. Readjustments in these activities first became apparent in 1947, and took the form of decreased employment or lowered prices, or both. They were relatively small and had no visible effect on the general economic situation.

"The second type of adjustment to changes in post-war demand in 1947 took the form of a reappearance in several consumer-goods industries of pre-war seasonal patterns in production and employment. Textiles, apparel, shoes, radios, furniture, and rubber tires showed declines in employment and weekly hours during the spring and early summer months and a sharp pick-up in the fall and winter. By the end of 1947, it was evident that the radio manufacturing and rubber-tire industries were readjusted to somewhat lower levels of demand by employment reduction. The textile, apparel, shoe, and furniture industries, however, had resumed their upward trend, reaching new employment peaks in February and March, 1948. These were followed by spring and summer seasonal decreases, which affected the shoe industry with particular severity. The expected upturn appeared in August, but proved to be short-lived. Reversing the usual seasonal pattern, employment in cotton, woollen and worsted textiles, and shoe manufacturing turned downward in September and declined further in October and November. These employment declines were accompanied by even sharper reductions in the length of the work-week.

"Probably the most important employment development in late 1948 was the contraseasonal decline in manufacturing employment during the last quarter. Between September and December, these industries dropped about 450,000 workers, in contrast to an increase of 100,000 during the same period of 1947. In January, 1949, employment declined by another 400,000 bringing the total well below the level a year ago. This reduction was largely concentrated in consumer-goods industries, as readjustments spread from soft goods to a number of consumer durables. Between October and January there were increasing reports of lay-offs, part-time work, plant shut-downs, and price reductions, in plants producing washing machines, refrigerators, furniture, radios and phonographs, stoves, oil burners, and heating equipment, in addition to the textile and apparel items indicated previously."

Recreation in industry in U.S.A.

The provision of recreational facilities for industrial workers is already assuming a large role, and it looms even larger for the future, the New York State Department of Labour observes in its publication, *Industrial Bulletin*, for March.

The purpose of all recreation programs is to help the individual make the best and most satisfactory use of his leisure time. "Industrial recreation is based on the realization that the workers' plant and outside lives are interdependent," the article states.

Most recreation programs are operated under the auspices of a plant management or union, or both. All have available to them the studies and advice of a number of public and private agencies interested in promoting worker recreation. Among these is the International Committee for Workers' Spare Time, the purpose of which is to "co-ordinate the work of existing national and international organizations and to establish new organizations" in the field. The National Recreation Association, with headquarters in New York City, has for the past 40 years, served as a co-operative clearing house. The Association publishes a monthly magazine, *Recreation*, and issues various pamphlets and books; it also furnishes a bulletin service and maintains field representatives in all parts of the United States.

New York, as one of the oldest and most heavily industrialized states, has important reasons for being interested in worker recreation, the article continues, and "has within its borders some of the best and most highly developed management and union programs for worker recreation." One of the best known and most extensive union programs is that of the International Ladies' Garment Workers Union. In the words of one of its vice-presidents, the ILGWU is devoting itself to the "pursuit of happiness as a regular union function." The union not only promotes recreational activities but also provides for the cultural interests of its members. Through its Educational Department, study classes in a variety of subjects are conducted. These include current events, labour problems and trade union methods, parliamentary law and public speaking, languages, and arts and crafts.

Worker recreation programs instituted by management range from sports to cultural interests. Typical successful programs include "the two basic essentials—100 per cent backing by management and a high degree of worker direction." Generally,

workers join and participate in the programs with the payment of nominal fees, while management contributes facilities, space, and often the assistance of recreation instructors.

Rochester, a centre of the optical, camera and photographic supplies industries, has "one of the most interesting recreation combinations in the country," it is claimed. An Industrial Recreation Council, to which "all the important firms in the City" belong, serves as a clearing house for interplant games and for recreation problems and their solutions. Some of the plants have large landscaped areas with lawns, trees, benches and noon-day recreation equipment, and these "parks" have come to be regarded by the residents as basic assets of the community.

At the 1947 Industrial Recreation Conference, held in New York City, the need for the wider extension of recreation programs to small businesses was emphasized. It was suggested that businesses which would normally be too small to conduct programs of their own could join with each other in conducting combined programs in their own areas.

The U.S. Supreme Court took action late in April in the case of the Inland Steel Company and the United Steelworkers of America (CIO) on the question of collective bargaining on pension plans in industry.

The Court ruled, in effect, that an employer subject to federal labour legislation is required to bargain on a pension plan with a union at its request. The court's action came in the form of refusal to review a lower court decision upholding a National Labour Relations Board order directing the company to negotiate with the steelworkers on a pension plan (L.G., July, 1948, p. 700).

Insurance plans for worker groups in U.S.A.

According to the Institute of Life Insurance, nearly 8,000 worker groups in the United States established new group life insurance plans in the United States during 1948. These new plans cover about 1,300,000 workers, with protection amounting to \$3 billion. In addition, the group life insurance policies already in effect were increased by about \$3 billion, making a record total of \$6 billion in new protection in the year. The Institute reports that at the beginning of 1949 over 17,000,000 workers were covered by total insurance of \$37,500,000,000.

**Disability
benefits
law in
N.Y. State**

A plan to provide social insurance benefits protecting workers against the hazards of sickness and disability not incurred in their employment is contained in the New York State Disability Benefits Law, signed by Governor Thomas E. Dewey in April, and summarized in the State Labour Department's *Industrial Bulletin*.

The law provides cash benefits rather than medical care.

Up to 13 weeks of benefit payments are provided by joint contributions of employers and employees. Employees' contributions are to be one-half of 1 per cent payroll tax up to 30 cents weekly, with the rest paid by employers. It is estimated that the cost to the employers, while not limited, is not apt to exceed 30 cents per week per employee.

The weekly benefit rate is 50 per cent of the employee's "average weekly wage," the weekly minimum benefit is \$10, and the maximum \$26; but if the average weekly wage is less than \$10, then that wage figure is the amount of the benefit.

Employers may carry policies either with private insurance companies, or with the State Insurance Fund; or they may set up their own plans. Existing private plans are recognized in the bill, provided they include certain standards.

Those employers who, after July 1, 1949, have four or more persons in employment on each of at least 30 days in a calendar year are subject to the law as a "covered employer." All their employees are entitled to benefits, except those specifically excluded as, for instance, when disabled by pregnancy, by any act of war, or when injuries are self-inflicted. Not entitled to benefits are employees of government agencies, religious, educational and charitable organizations and other types of workers listed below.

There is a non-benefit waiting period of the first seven days of disability. Successive disabilities caused by the same or related injury or sickness are deemed a single period of disability with only one waiting period, if separated by less than three months.

Both employed and unemployed wage-earners are eligible to receive disability benefits.

An estimated 6,000,000 workers in the State are covered by the new law which is administered by the Workmen's Compensation Board of the State Department of Labour.

New York thus becomes the fifth state in the nation with a disability benefits law. In Washington, Rhode Island and California, three of the other such states, however, the whole burden of financing the insurance fund is on the workers. And while New Jersey employers are required to contribute to the fund, the New York bill places a heavier financial responsibility on employers.

**Voluntary
procedures
urged for
disputes in
atomic plants**

A procedure for adjusting labour disputes in atomic energy plants in the United States has been accepted by President Truman, on the basis of a recent inquiry into the problem by a special Commission, headed by William H. Davis, a former chairman of the National War Labour Board.

Mr. Davis' Commission stressed the importance of voluntary collective bargaining. It recommended the appointment of a three-member impartial panel, which could assume jurisdiction in disputes of extreme gravity, but did not propose compulsory powers for this body. In fact, as a means of encouraging voluntary negotiation, the Commission suggested that the panel should not be easily available to the parties as a regular part of their relationships, but should be a "mediation agency of last resort."

In declining to recommend compulsory action, the Commission mentioned that the possibility of a strike or lockout was "a useful thing" since it is "an ever-present pressure towards agreement."

The Commission proposed the following four-point program, to govern labour-management relations:—

(1) No strikes or lockouts during the period covered by the collectively bargained contract, with grievance machinery including arbitration as the final step to settle all disputes about the interpretation or application of the contract.

(2) That, while "fully recognizing and safeguarding the primary responsibility of local representatives for sound and stable relations," provisions be made for bringing into all critical disputes those individuals at the very highest levels of management and labour whose wider experience and heightened responsibility are accompanied by relatively detached judgment because they have not themselves been directly involved in the earlier stages of the dispute.

(3) That the determination of bargaining units and representatives under the National Labour Relations Act be made by agreement and consent election, wherever possible, in preference to contested proceedings before the National Labour Relations Board, thus avoiding at the start attitudes and actions "which give rise to hatreds and leave a residue of bitterness" and also avoiding procedural difficulties before the National Labour Relations Board in cases which may affect security.

(4) That management and union should co-operate "to integrate the union into the plant organization as a two-way channel of communication and a medium of understanding between management and workers." Emphasis is put on the value of "a sincere purpose by both sides, once collective bargaining representatives have been designated to make the union an integral and responsible element of the plant organization by training management supervisors and union officers to recognize the function and responsibility of the union and to have an accurate understanding of the provisions of the collectively bargained contract under which they work."

In cases where the panel procedure was invoked, unions and contractors would be required to agree to maintain production so long as the panel retained jurisdiction and for an additional thirty days.

The final thirty days was inserted so that, as under the Railway Labour Act, the parties themselves would either agree voluntarily to accept the recommendations or would work out any mutually acceptable modification of the panel's recommendations.

However, if the recommendations should fail to obtain continuous production, then full responsibility would be thrown back on the Atomic Energy Commission. If the commission then decided special legislation was required it would make such a proposal in the light of the practical experience gained by the work of the panel "and the Congress would have the benefit of that experience in considering such special legislation."

On April 26 President Truman named Mr. Davis as chairman of the Atomic Energy Labour Relations Panel, and announced that the panel plan was being adopted for a trial period of two to three years, subject to termination at the discretion of the Atomic Energy Commission.

India develops national employment service

India's nation-wide Employment Service was established during the summer of 1945. Intended primarily to assist in the rehabilitation of veterans of the Armed Services and war industrial workers, a network of Employment Exchange was set up throughout the country.

Despite much adverse public prejudice and even hostility, the service was soon extended to all categories of workers and to all portions of the country, including hitherto inaccessible and comparatively backward Indian States. A further impetus was given to the project by the large numbers of persons displaced following the partition of India.

To mark the third anniversary of the nation-wide employment service, the Director-General of Resettlement and Employment of the Indian Ministry of Labour published a few months ago, a souvenir booklet entitled *Employment News*. It is a symposium prepared mainly by some 20 leading Indian labour and employment officials and provides a general view of the service, its history, its initial difficulties, the progress made during the first three years of operations and its significance as a factor in future Indian industrial expansion.

It is stated that "starting at scratch" in 1945, some 400,000 workers had been placed in employment by the several offices and training given to about 8,000 men and women during the three years. While these numbers were not large in comparison with the total working force of India, they indicate that very real progress had been made in enlisting the voluntary co-operation of both employers and workers.

Since employment is normally a provincial responsibility under the Indian constitution, it is noteworthy that the provincial Ministers of Labour, meeting in conference, are reported to have decided to place the employment service on a permanent footing. However, it is expected that the Federal Government will continue its financial assistance and to have some measure of responsibility for policy, standardized procedures and the training of workers.

The Indian National Minister of Labour, in a brief preliminary article in the booklet, stated that the Government is "determined to shape a new India—an India in which every man and woman, who is able and willing to work will be assured his or her right to work."

THE WORK WEEK IN MANUFACTURING INDUSTRIES, OCTOBER, 1947

Slightly more than half the workers in manufacturing in Canada were on a five-day week. Ninety per cent of the workers were on a standard week of 48 hours or less; while 55 per cent worked 45 hours or less, and 20 per cent were on a work week not exceeding 40 hours.

This study was prepared in the Research and Statistics Branch, Department of Labour, and is the final article of a series of three dealing with certain working conditions in the manufacturing industries. Vacations with pay and statutory holidays were covered in the April and May issues of the *LABOUR GAZETTE*.

The information for the present study on the work week in manufacturing industries, as in the two previous articles mentioned above, was compiled from replies to a general questionnaire on working conditions, sent to employers across Canada as part of the Department's annual wage survey covering the last pay period preceding October 1, 1947. Returns from 4,339 establishments, employing 576,477 workers, exclusive of office staffs, were used. This coverage was nearly two-thirds of the total number of wage-earners employed in manufacturing in 1947 and is believed to be representative of the industry as a whole. For details of breakdown of the number of establishments and workers in the various groups and sub-groups of the industries covered, see page 407 of the *LABOUR GAZETTE* for April.

Provincial Legislation on Hours

Maximum weekly hours for employment in factories have been fixed by statute or under statutory authority in most of the provinces, although in some provinces the regulations refer only to females and boys. These maximum weekly hours are shown below by province.*

* Information taken from *Provincial Labour Standards Concerning Child Labour, Annual Holidays, Hours of Work, Minimum Wages and Workmen's Compensation*, an annual publication of the Legislation Branch of the Department of Labour.

| — | Normal | Emergencies |
|---------------------|--------|-------------|
| New Brunswick.... | 54(1) | |
| Quebec..... | 55(1) | 65 |
| Ontario..... | 48 | |
| Manitoba..... | 48(2) | 54 |
| Saskatchewan | 44(3) | |
| Alberta..... | 48 | |
| British Columbia... | 44 | |

(1) Females and boys under 18.

(2) Females and boys under 17.

(3) Applies unless time and one-half is paid for work beyond the limit. Maximum hours for females and boys under 18 are 48 in any one week, although in emergencies employment may continue, on not more than 36 days in a year, up to 12½ hours in a day and 72½ in a week.

It should be noted that these hours exclude restrictions imposed on some classes of factories by Orders in Council under the Quebec Collective Agreement Act or the Industrial Standards Acts of Ontario, Saskatchewan and Alberta.

With respect to emergencies, establishments may be exempted from Act in Quebec, Alberta and British Columbia. Longer hours may be permitted in New Brunswick by Minister and by Inspector in other provinces except Alberta and British Columbia where Board of Industrial Relations exercises this power. When longer hours are permitted, limits in certain provinces are imposed as shown in table. Such extended hours are restricted to 36 days in a year or in Quebec to six weeks at a time.

In Ontario, the Hours of Work and Vacations with Pay Act, 1944, provides for an 8-hour day and 48-hour week and stipulates that these limits prevail over any statutory provision for longer hours but permanent and temporary exemptions may

be made. Under the Factory, Shop and Office Building Act, hours of females and boys under 16 are restricted to 12 and 60 with provision for 12½ and 72½ on not more than 36 days in a year.

Weekly Hours by Area

Tables 1 and 2 show that 77 per cent of the establishments and 83 per cent of the wage-earners were reported on either 40, 44, 45 or 48 hours per week, with 30 per cent of all workers on a 48-hour week. The 40-hour week was worked by the majority of wage-earners in British Columbia but in the remaining provinces the percentage of the total number of workers on this schedule ranged from two per cent in the Maritime Provinces to 18 per cent in Ontario. In all of Canada, only 14 per cent of the establishments and 10 per cent of the workers were reported on a weekly schedule of more than 48 hours.

In the Maritime Provinces, one-half the plants and 74 per cent of the wage-earners worked either 44 or 48 hours with nearly one-half the workers on a 48-hour week. Two-thirds of the Quebec workers and three-quarters of those in Ontario were on either a 40, 45 or 48-hour week with the largest proportion working 48 hours in each

case. In Manitoba, one-third of the workers were on a 44-hour week and another third were divided equally between the 40 and 48-hour week. Three-quarters of the workers in Saskatchewan were reported under a 44-hour week and nearly one-half of those in Alberta worked on either a 44 or 45-hour schedule. In British Columbia, 89 per cent of the workers were on either a 40 or 44-hour week, with 54 per cent on a 40-hour week.

NUMBERS OF WORKERS ON THE FIVE AND SIX DAY WEEK IN MANUFACTURING IN CANADA

By Region, 1947

Thousands of Workers

Weekly Hours by Industry

(Table 3)—More than half the establishments in three of the industries were on a 40-hour week (Clothing, Printing and Publishing, and Fur Products); in another three (Pulp and Its Products, Electric Current Production and Distribution, and Chemical Products), more than half reported a 48-hour week and in the Tobacco Products Industry, two-thirds of the establishments were equally divided between the 44 and 45-hour week. In the other industries, hours varied considerably. For instance, seventy-seven per cent of the establishments in the Iron and Its Products Industry worked either 40, 44, 45 or 48 hours weekly and although the major group of establishments reported working 45 hours per week, they represented only 24 per cent of the total number of establishments in the industry.

(Table 4)—More than one-half the workers in each of the Clothing, Fur Products, and Printing and Publishing Industries were reported on a 40-hour week with two-thirds of the workers in the latter industry on this schedule. In Tobacco Products, 80 per cent of the wage-earners worked a 45-hour week. The 48-hour week was common in three industries with 70 per cent of the workers in Chemical Products, 74 per cent in Electric Current Production and Distribution and 89 per cent in Pulp and Paper on this schedule.

The Five-day Week

Slightly more than one-half the workers in manufacturing in Canada were reported working a five-day week. As shown in Table 2, 61 per cent of the workers in Ontario were included in this schedule, with 57 per cent of the British Columbia

workers, 47 per cent in Quebec, 41 per cent in Manitoba and 20, 12 and two per cent in Alberta, Saskatchewan and the Maritime Provinces, respectively, on a similar arrangement. For practically all workers, weekly hours ranged in length from 40 to 50 hours. The 40-hour week was in effect for 36 per cent of the workers on a five-day week in Canada with another 34 per cent working 45 hours.

In 11 of the 17 industrial groups covered, from 50 to 89 per cent of the workers were on a five-day week (Table 4). The establishments in these 11 industries accounted for 85 per cent of the total number of workers on a five-day week. The Pulp and Paper Industry, as well as Electric Current Production and Distribution and Edible Animal Products, reported few if any workers on a five-day week.

The Six-day Week

In all provincial areas but Ontario and British Columbia, there were more workers on this schedule than on the five-day week. Hours varied between 40 and 60 with 54 per cent of the workers on a 48-hour week and 16 per cent working longer hours; another 21 per cent were reported working 44 hours.

The six industries reporting the majority of their workers on the six-day week were Pulp and Paper, Electric Current Production and Distribution, Edible Plant and Animal Products, Chemical Products and Lumber and Its Products. In the latter industry, the number of workers on a six-day week were only slightly more than half, while in the other five the percentage varied between 73 per cent in the Edible Plant Industry and 100 per cent in the Pulp and Paper Industry.

PENSION AND WELFARE PLANS IN CANADIAN INDUSTRY

A survey during the latter part of 1947 into the welfare plans of Canadian industry reveals that 630,000 workers, or about one-third of those on the payrolls of the reporting firms, were covered by pension plans. Almost as many were eligible for group life insurance and for various types of medical and hospital services.

The development of pension and health plans has been of widespread and growing interest to management and staff, as well as to the general public, but little information has been available on the extent and characteristics of such plans. In order to collect that information, the Dominion Bureau of Statistics in collaboration with the Department of Labour and the Department of National Health and Welfare sent, in October and November, 1947, questionnaires to all industrial firms in Canada which normally employ fifteen or more employees.

Those employed in public administration, in educational and other publicly or privately owned institutions, and those employed by such private organizations as charitable associations, political parties, etc., are therefore not covered so far by this survey.

The Bureau has issued a preliminary report* giving tentative figures on pension plans and some preliminary estimates on other welfare plans reported by employers under this survey. Pension plans cover only formal plans for retirement pensions and annuities, leaving out any arrangements individual employees may have for their own retirement, or arrangements whereby the employer pays such benefits to certain employees but without any formal plan. The Bureau's report also does not include plans financed and administered entirely by trade unions.

Results of Survey

Of 17,040 questionnaires sent out, 15,437, or 90.6 per cent, were answered, representing 96.5 per cent of the total employment in firms under survey. Because in a number of cases several questionnaires sent out were answered in one return and, on the other hand, some firms submitted several returns though they originally received but

one questionnaire, the above figure does not quite conform with the number of actual returns received.

The firms under survey were asked to complete a separate return for each of their establishments. In a number of cases, however, they stated they were unable to do so due to their administrative organization. In some cases, these multi-plant companies were able to supply statistics on a "plant" or "establishment" basis; others could only report on the entire firm and provided no figure by plant. As a result, there is no clear segregation of "firms" and "establishments". Each report was therefore taken as representing a "unit" and the published results are in terms of "units". This problem proved so troublesome in the case of railways that the reports from this group have been omitted from any analysis of units.

Returns received cover approximately 1,960,000 employees on payroll on October 1, 1947. The number of returns received from firms other than railway companies is 14,551, covering a total of 1,764,251 employees on payroll. Of these, 3,419 units, having 879,114 employees on payroll, had pension plans. The number of employees actually covered by the pension plans, however, was considerably smaller, amounting to 447,445. This was about 25 per cent of the total workers employed by all the companies (other than railways) who co-operated by responding to the survey.

In addition there is an unknown proportion of 60,755 employees on the staff of 214 reporting units which in their returns did not state the number covered.

Figures of those employed by railway companies were calculated separately from other employees, because of the high percentage of coverage among railway employees and because railways operate establishments in all main industrial groups with the exception of Finance.

As explained above, there is no breakdown of the number of "units" operated by

* *Survey of Industrial Pension Welfare Plans, 1947.* Dominion Bureau of Statistics, Ottawa, 1949.

railways. The number of employees on payroll of reporting railways (including those in railway-operated establishments in other industries) was 193,908. Of these, 193,392 were in units reporting pension plans, and 181,788 were actually covered by plans. The percentage of coverage was 93·7.

The total figures for all employees (including those in railway establishments) are thus as follows:—

| | |
|---|-----------|
| Number on payroll of reporting units | 1,958,159 |
| Number on payroll of units reporting pension plans..... | 1,073,321 |
| Number covered by plans..... | 629,233 |
| Percentage covered by plans (of number on payroll of reporting units) | 32·1 |

PENSION PLANS IN CANADIAN INDUSTRY, 1947

Characteristics of Pension Plans

The report demonstrates that pension plans are not new to Canadian industry (Table 3). Three of the plans were already in existence at the beginning of the present century. On the other hand, over 70 per cent of the plans were introduced in the nine years immediately preceding the survey (1938-1947).

Pension plans appear to be more numerous in industries which are comparatively stable; only a small proportion of the workers are covered in such seasonal industries as logging and construction, the report indicates.

The report also gives an indication of the distribution of pension plans by size of reporting unit, that is, by the number of employees on payroll in each unit.

While 3,248, or 95.0 per cent, of reporting units with pension plans (other than railways) are units with less than 1,000 employees on payroll, they have only 47.8 per cent of the total number of employees on payroll and 39.3 per cent of the total number of employees actually covered by pension plans. The 4.9 per cent of the units with 1,000 or more employees on payroll account for the majority of employees covered by pension plans. The extent to which this is true varies in the different industrial groups and does not apply to Logging, Construction, Services and Finance.

From Table 4 it will be seen that in 3,499, or 98.6 per cent, of all pension plans reported in this survey, other than those reported by railway companies, the

employer either contributes to the cost or, for almost one-third of employees covered, bears the entire cost. The table also indicates who administers the plans, whether employer, employer and employees, or some outside underwriter.

It will be noted that 800 plans, covering over 50,000 employees, are administered by the Government Annuities Branch of the Department of Labour.

The column "other and not stated" contains mostly plans where the administration is divided, e.g., where a commercial company underwrites a plan to supplement Government Annuities.

None of the reported plans are administered solely by employees and only in a small number of plans are the employees the only contributors.

Income Tax Provisions

Present income tax provisions are such that both parties are encouraged to contribute to pension plans. Any payments on the part of management to plans approved by the Income Tax Division can be charged as business expense; workers' contributions also may be deducted when earned income is computed for income tax purposes.

The Government has further encouraged pension plans through its Annuities program which makes special provision for group plans.

The Income Tax Division is at present considering the conditions under which it may broaden its approval of pension plans, to include plans in which the employer's

NUMBER OF WORKERS COVERED BY . . .

Thousands

contributions are varied to some extent on the basis of his profits. Under existing practice, contributions to pension plans cannot fluctuate with a company's earnings in order to be allowed relief under the Income Tax Act.

Other Welfare Plans

Tabulation of the part of the survey relating to other types of welfare plans is not sufficiently advanced to permit more than an approximate estimate of the number of employees covered by each type of plan. These estimates cover firms from which replies were received in this survey as indicated in Table 1, including railway companies. The estimated number of employees covered by the type of plan indicated is as follows: Group Life Insurance, 620,000; Cash Benefits for Medical and Hospital Services, 300,000; Medical Care Services, 230,000; Hospital Care Services, 450,000.

A further report on this survey is in preparation.

Trade Unions and Pension Plans

The Bureau's report is timely in view of the interest currently being shown by many trade unions in pension plans as a subject for collective bargaining.

Several CIO unions, both in Canada and the United States, notably the United Automobile Workers, have publicly announced their intention of seeking pension plans through collective bargaining this year. At its annual convention in October, 1948, the Canadian Congress of Labour adopted a resolution encouraging affiliated unions to press for a system of industrial pensions.

The success of the United Mine Workers of America in the United States in winning a \$100 a month pension, financed by a

royalty paid by the companies on the amount of coal mined, has recently encouraged many unions in that country to seek this kind of plan. In addition, a decision by the U.S. National Labour Relations Board in April, 1948, brought pension plans within the scope of compulsory collective bargaining.

The Bureau's survey indicates that pension plans in Canada have for the most part not been included in collective bargaining agreements. Less than 3 per cent of the plans, covering less than 20,000 employees, are reported as being included in agreements.

TABLE 2.—PENSION PLANS BY PROVINCES (EXCLUDING ESTABLISHMENTS OPERATED BY RAILWAY COMPANIES)

| Province | Number of units reporting plans | Number of employees on payroll | Number of employees covered ⁽¹⁾ |

| | No. of plans | No. of em- ployees covered | No. of plans | No. of em- ployees covered | No. of plans | No. of em- ployees covered | No. of plans | No. of em- ployees covered | No. of plans | No. of em- ployees covered | No. of plans | No. of em- ployees covered |
| Employer..... | 516 | 219,815 | | | 12 | 14,479 | 33 | 4,025 | 25 | 5,608 | 3 | 259 |
| Employees..... | 4 | 44 | | | 2 | 25 | 3 | 60 | 4 | 131 | | |
| Employer and employees | 592 | 23,869 | | | 179 | 27,503 | 894 | 67,320 | 770 | 44,747 | 65 | 6,166 |
| Not stated..... | | | | | | | 3 | 23 | 1 | 4 | | |
| TOTAL..... | 1,112 | 243,728 | | | 193 | 42,007 | 933 | 71,428 | 800 | 50,490 | 68 | 6,425 |
| | | | | | | | | | | | 433 | 33,367 |
| | | | | | | | | | | | | 2,895 |
| | | | | | | | | | | | 22 | 388 |
| | | | | | | | | | | | 3,539 ⁽¹⁾ | 447,445 |

⁽¹⁾ Of these, 120 plans are reported by units that have more than one plan in operation; 214 units, with 60,755 employees on payroll, did not state the number covered by plans.

The Bureau's survey does not extend to plans administered and financed entirely by unions. Such an approach to the problem of group pension and welfare plans has been traditional with many craft unions, mostly affiliated with the American Federation of Labour, which for many years provided mutual benefit plans of various kinds for their members.

Many pay a death benefit, that is, a lump sum for funeral expenses and doctor bills. It is rarely sufficient to provide for dependents. Some unions pay sick and accident benefits, old age pensions and unemployment benefits, including the cost of travelling in search of work. Such outlays may be paid from the general funds of the union and vary with its financial condition; in other cases they are paid from special funds to which the members contribute, and the amount paid varies with the length of membership and the

contributions. A number of unions have insurance departments through which their members may obtain life and accident insurance.*

Some benefits are paid from national and international headquarters; others are paid from the funds of local branches.

International unions with a total membership in Canada of about 280,000, provided pension or welfare measures of some kind in 1947. Almost \$2,500,000 was expended in the form of death benefits, while over \$500,000 went to old age pensions and a like amount to sickness and accident benefits.

National unions, representing about 75,000 workers, paid \$70,000 in death benefits, and \$21,000 in sickness and accident benefits.

* *Thirty-Seventh Annual Report on Labour Organization in Canada*: Department of Labour, Ottawa, 1948.

REPORT OF THE ROYAL COMMISSION ON PRICES

As a result of its investigation, the Royal Commission on Prices concluded that the main factors in the post-war price rise were consequences of the war, rising prices abroad, heavy export demands, and the investment boom in Canada and the United States.

The Commission ruled out price controls as impractical and inadvisable under present peacetime conditions.

The Royal Commission on Prices, appointed in July, 1948, to continue the inquiry begun by the Special Prices Committee of the House of Commons,¹ has made its report on the causes of the recent rise in the cost of living. The three-volume report was tabled in the House of Commons on April 8.

The post-war price rise in Canada was in the main, it states, "a consequence of the war, of rising prices abroad, of large export demands financed to some degree by the Canadian Government, and of our capital boom accompanied as it was by an American capital boom." The report continues: "The effect of these all-pervading and powerful generating forces was offset or held in check to some extent by fiscal and monetary measures and by direct controls. Outside of exceptional cases we did

not find in the behaviour of particular industries, individuals or groups a main cause of rising prices."

Positive action by the Government to attain economic stability, by modifying fluctuations in the volume of private business, is advocated. The Government, the report says, must be prepared to "apply brakes" as well as to "provide stimulus," as conditions require. "A government policy aimed at economic stability must be flexible, ready to move quickly to counteract either inflationary or deflationary tendencies as they arise, or, better still, before they arise. We shall continue to be affected very largely by events abroad which are beyond our control, but there is much that can be done by sound fiscal and monetary action and in other ways to stabilize the level of demand."

¹ See LABOUR GAZETTE, Aug., 1948, p. 831.

Price Controls

On the question of price controls, the Commission expressed agreement with the decision not to continue and augment the wartime controls. "We are satisfied," it says, "that the preservation of 1941 prices far into the post-war period under totally different domestic and world conditions would have been not only impractical, but economically highly undesirable."

"To have reimposed the ceilings after the war would have involved the refixing of prices at every step of production and distribution at a level so unrelated to the realities of the economy that their use in the post-war period would have been wholly impracticable and undesirable. Moreover, in a peace-time economy there could be no discrimination in price setting between essential goods and luxury goods, or essential services and luxury services. Also every wage and every salary would have to be set and controlled. . . .

"In our view," it concludes, "general price control should not be relied upon as an important instrument for stabilizing prices in peacetime. . . . Selective price controls may be useful in exceptional cases. Price control in any form, however, is no substitute for action designed to bring over-all demand into line with over-all supply. It disguises inflation. It does not remove the cause of the trouble."

Prices and Wages

An examination of the relationship between wages and prices led to the conclusion that no simple answer can be given to the question: Do rising wages cause rising prices or do rising prices cause rising wages? They affect each other. "To put the matter in its broadest terms, a price inflation usually includes a wage inflation."

While wages are a cost of production, higher or lower wages do not necessarily mean higher or lower labour costs per unit of output, it is noted. "As one witness said," the report continues, "'It all depends upon productivity.' Furthermore, wages are only part of total costs and a varying part. . . . It is our view that in Canada, since 1939, other general forces and influences, such as fiscal and monetary policies, external influences, the development of new resources, and technological improvements, have had an important influence on both wage and price movements."

Since 1939, consumer prices, as measured by the cost-of-living index, it is stated, "have risen less than the increase in wages. That is, real wages have risen substantially

since before the war, whether viewed as hourly wage rates, average weekly earnings or total labour income."²

In its reference to the Emergency Exchange Conservation Act, which provides for the imposition of import embargoes to conserve exchange, the Commission sees a danger of pressure on the government for retention of such embargoes beyond the period where their continuance can be justified for purely foreign exchange reasons. "In our view," it states, "import controls should not be used as a protectionist device."

Restrictive Business Practices

The Commission found a growing tendency toward "monopolistic competition through brand names and special advertising, price leadership by a few large firms in an industry and resale price maintenance whereby a manufacturer sets the retail price for his product. The experiences and influences of the war period," it says, "have created conditions conducive to the spread of patterns of behaviour from which active price competition is excluded." One of the legacies of wartime conditions mentioned is the system of fixed percentage mark-ups. "Where a fixed percentage mark-up is used by the manufacturer, wholesaler and retailer," the report says, "an initial cost increase at the manufacturing level is pyramided through the entire price structure."

With regard to the policy of resale price maintenance, it is recommended that the Combines Investigation Commission give careful study to this problem "with a view to devising measures to deal with it."

The Commission, while recognizing the dangers and difficulties involved, was "impressed with the importance of publicity in influencing business generally through exposing the occasional circumstances of high pricing, profiteering and restrictive practices."

Consumer Credit

Inquiry into consumer credit led the Commission to "believe that the consumer is inadequately informed about effective rates of interest by lenders. The consumer can be misled by such terms as 'discount rates' which work out a good deal higher than apparent annual rates. We suggest that the effective annual rates should be stated clearly in loan contracts as well as

² For further details on the analysis of prices, and wages the reader is referred to Chapter 7, Volume II, of the report.

in advertising literature." In this connection the report observes, "the lack of adequate and accurate statistics is one of the major obstacles to a knowledge of consumer credit," and recommends that statistics relative to "this important economic indicator" be broadened and refined.

Cost-of-Living Index

In referring to the cost-of-living index and the importance attached to it in wage negotiations, the Commission recommended that the possibilities of its improvement be explored by the Dominion Bureau of Statistics. "There appears to be need," it says, "for the development of a continuing program of sample surveys such as are now carried out at infrequent intervals. Thus when the articles in the base budget change in importance, or if new articles should be included, adjustments can be made to present a more accurate index number. Further, some system for the measurement of the changes in owner-occupied shelter should be established, as the present system of reckoning shelter costs gives an inadequate picture of the true costs. We are of the opinion that the Bureau should give consideration to including the cost of children's clothing in compiling the clothing group index in the cost-of-living index."

In this connection, however, the Commission felt that "exaggerated importance" seemed to be attached to every change in the cost-of-living index. "Even assuming a continuing high level of income and employment and a reasonable balance between total demand and total supply, the general level of prices will move up and down to some extent," the report says. "At the present time, for example, a decline in consumers' prices would, we think, be a healthy development. It would not necessarily mean that the country was going into a slump. Similarly, a further rise in the cost-of-living index would not necessarily mean that a new phase of the inflationary spiral was under way."

Recommendations

In the field of statistics, emphasis is given to the recommendation of the Special Committee on Prices, that the Dominion Bureau of Statistics publish periodically an analysis of the way in which the consumer's dollar is divided among the various price elements of basic commodities. The Com-

mission was also of the opinion that a statistical study of productivity should be made available as soon as possible.

A further recommendation is that "more adequate collection and publication of current information on the amount of corporate profits, possibly on a quarterly basis, might be undertaken by the appropriate government agency."

Other recommendations contained in the report include:—

1. Revision of the Dominion Companies Act to bring about more uniform reporting, and to have financial statements show more detail on inventories, reserves and profits; and that the co-operation of the provincial governments be obtained to develop uniform financial reporting under the Companies Act.

2. Presentation of the public accounts in such a way that the effect of government transactions is clear "not only to the specialist, but to the man on the street."

3. An improved grading system for beef cattle, similar to that presently in use for hogs.

4. A uniform system of grading for lumber, especially in the more commonly used types and dimensions.

The Commission, which was under the chairmanship of Professor C. A. Curtis, of the Department of Economics, Queen's University, held 77 public hearings and examined 179 witnesses, drawn from trades and industries located in all of the provinces. In addition, twelve national organizations, covering wide fields of social and economic activity, were invited to submit briefs. In the Commission's industry investigations and those of the Special House of Commons Committee, ten essential commodities were studied—bread, butter, fruits and vegetables, meats, primary textiles, fertilizers, hides and leather, shoes, secondary textiles, and lumber.

The findings of the Commission are contained in a three-volume report. Volume II presents an analysis of the economic factors underlying the general price rise. Volume III contains detailed studies of the ten industries or commodities investigated and the survey made of consumer credit, and a statistical supplement. A brief summary of both volumes, together with some general observations and suggestions, appears in Volume I.

CAUSES OF INDUSTRIAL PEACE UNDER COLLECTIVE BARGAINING

The first five in a series of studies of plants in which labour-management relations are known to be good, have been issued by the U.S. National Planning Association. The whole series will constitute an inquiry into the causes of industrial peace under collective bargaining.

"Every seven or eight years since 1876, the Government of the United States, through congressional committees or through presidentially appointed commissions, has been making inquiries into the causes of industrial conflict and strife. In my opinion, the time has come when, instead of looking into the causes of conflict that we know and hear so much about, we ought to try to discover how much peace there is and what makes peace," Mr. Clinton S. Golden, of the National Planning Association, declared.

Following up this idea, the National Planning Association—an independent, non-political, non-profit organization, in the spring of 1947, set up a committee composed of labour and business leaders and professional consultants, under the chairmanship of Mr. Golden, to inquire into the causes of industrial peace under collective bargaining. The study will include a survey of 12 to 15 companies whose labour-management relations are known to have been good. Reports on the case studies will be published as completed, together with a final summary. They will attempt to answer the question, "What Makes Peace?" The first report of the series was published in September, 1948, and up to May, 1949, five case studies had been issued.*

A summary of the first case study is given below. Subsequent studies will not be dealt with at length, but when the final report has been issued a detailed summary of it will be published in the **LABOUR GAZETTE**.

* Case Study 1: Crown Zellerbach Corporation and the Pacific Coast Pulp and Paper Industry/International Brotherhood of Pulp, Sulphite and Paper Mill Workers-International Brotherhood of Paper Makers; Case Study 2: The Libby-Owens-Ford Glass Company/ Federation of Glass, Ceramic and Silica Sand Workers of America; Case Study 3: The Dewey and Almy Chemical Company/The International Chemical Workers Union; Case Study 4: Hickey-Freeman Company/Amalgamated Clothing Workers of America; Case Study 5: Sharon Steel Corporation/United Steelworkers of America (CIO); National Planning Association, 800 21st Street, N.W., Washington 6, D.C.

It is an often forgotten fact, the report states, that an overwhelming majority of contracts between employers and unions are negotiated peacefully each year, without work stoppages. "Strikes make better newspaper copy and livelier congressional hearings than peaceful settlements." In 1947, it is estimated, 24 out of every 25 of the 100,000 contracts between employers and unions were negotiated peacefully.

The National Planning Association believes, however, that a healthy labour-management relationship involves far more than the absence of conflict; that, in fact, a reasonable amount of healthy conflict is often consistent with a constructively peaceful relationship. In its several studies, the question, How many strikes?, was as a rule less crucial than such questions as: How much and what kind of freedom does the employer enjoy in his relationship with the union? How much mutual confidence have both parties in each other? Have the company, the union, the public gained or lost from the collective bargaining relationship? Only when satisfactory answers were found to such questions was the Association able to say that a "constructive peace" had been achieved.

Case Study 1

Crown Zellerbach Corporation and the Pacific Coast Pulp and Paper Industry—International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers (AFL).

The first case study is concerned specifically with the Crown Zellerbach Corporation, the largest company in the West Coast pulp and paper industry, and generally with the entire industry in that area. Not only does this company meet the various criteria laid down for the selection of the companies and unions to be studied, but "the peace in this West Coast industry

has been remarkable." During the past 14 years, not a single day's interruption of work has been experienced by any paper mill on the Pacific Coast because of a dispute between a mill and its employees. The only strike at all, and that confined to a single plant, was over a dispute between the established unions and a rival organization.

Industry-wide bargaining has been an instrument of industrial peace, the report states, and summarizes the conditions which were found to exist in the Corporation and the industry as follows:—

1. No authorized strikes have taken place.
2. The parties have largely relied upon themselves to settle controversies without resort to third parties.
3. The workers have benefited from relatively good wages and security. Turn-over and absenteeism have been low.
4. The unions have felt institutionally secure from management attacks.
5. Profits have been good and productivity high.
6. Negotiations have been conducted without undue delay.
7. The parties have shown a disposition for mutual discussion of a wide range of subjects.
8. Contracts have been strictly observed by both parties.
9. The representatives of both sides have shown a high degree of respect for each other.
10. Joint collusive actions against competitors or purchasers have not occurred.

The Parties and Their Environment

The achievement of industrial peace cannot be studied by viewing Crown Zellerbach alone, it is stated. "While it is the leading company in the West Coast industry, industrial relations policies have been determined and applied by the industry." Collective bargaining, from the time it was first undertaken in 1934, has been region-wide. The basic contract has covered the industry. Beyond that, contract administration, such as job rates, grievances, safety rules, has been on a region-wide basis. Eighteen individual companies make up the bargaining group, and 32 primary pulp and paper converting mills in the states of Washington, Oregon and California are included in the bargaining system. Only three firms of any size, with one plant each, do not belong. The managements of the mills, operating through the Pacific Coast Association of Pulp and Paper Manufacturers, have dealt collectively with all production and

maintenance employees since 1934, under a series of uniform labour agreements with two AFL unions.

Approximately 15,000 production and maintenance workers are employed in the 32 mills, ranging from plants with less than 200 to around 2,000. The most recent count showed that over 98 per cent of the eligible workers belonged to the two AFL unions, which jointly possess the exclusive collective bargaining rights. The International Brotherhood of Paper Makers, which is the smaller of the two, has exercised jurisdiction principally over the paper machine operators—the highly skilled craftsmen of the industry. The industrial-type International Brotherhood of Pulp, Sulphite and Paper Mill Workers has had jurisdiction over all other production and maintenance workers.

By virtue of a history and tradition of joint relations with employers in the United States and Canada, the two unions have constituted practically a single industrial union for purposes of collective bargaining, although the autonomy of each has been carefully preserved. They have bargained jointly but have had their own separate officers and internal life. Both unions are long established and relatively conservative, with half a century of experience in dealing with employers under various economic circumstances.

The factors conditioning the environment within which the parties have conducted their relationships are summarized as follows:—

1. Geographically and industrially, a large part of the industry has been located in an area characterized by industrial strife.
2. The work force has been homogeneous; and composed of relatively stable workers.
3. On the whole the jobs have been relatively interesting and have called for an individual sense of responsibility.
4. Employment has been regular.
5. The industry has been expanding, thus creating opportunities for advancement and forestalling worker attitudes based on fear of job scarcity.
6. The plants and the towns have been relatively small, permitting closer personal relationships and a high degree of mutual interest among managers and employees.
7. The mills are not mobile; investment per worker has been high; management has had a real interest in the attitude of the worker toward his job and his employer, and has been encouraged to act responsibly toward him.
8. Negotiations have not been marred by a crisis psychology; and the market has been "neutral", leaving the parties to their own devices.

While none of these factors assured peace, most of them have facilitated its achievement, it is stated.

Management's Approach to Employee Relations

The special importance which the Crown Zellerbach Corporation has attached to effective personnel administration is indicated by its vice-president in charge of industrial and public relations: "A bad program of personnel administration will make collective bargaining difficult. The best collective bargaining in the world, the best union contract ever written, is no substitute for a sound and intelligent program of personnel administration. The time has come when we should direct our major attention to the personnel administration program, and free ourselves from the exaggerated concern we have been giving to the single phase of employee relations called collective bargaining." Good personnel policies have been a contributing factor to peaceful collective bargaining in this industry, the report states, "unlike personnel programs in some others which, rather than setting the stage for collective bargaining, have been developed to discourage union membership."

The company has paid special attention to the selection of employees. It has tested the physical and mental capacity of applicants. It has also been concerned with the ability of the individual to enter co-operatively into the group life of the plant. In general, when an employee is hired he goes in as common labour. This has made the selection process more difficult, it is stated, because work histories disclose relatively little about common labour. Further, the individual, under a system which has relied predominantly on seniority as the basis for promotion, must be visualized as he will progress through the job structure of the mill. This has required looking a long way ahead. At the other end of the process, the division manager has held "exit interviews" with every employee with over five years of seniority, to determine the reasons for his leaving.

Constant consultation has been an essential aspect of the company's personnel policy. Foremen in each mill have been brought into formal meetings at least once a week to help solve problems, such as those relating to quantity and quality of output. In addition, they have been called upon frequently in an informal way. Recently, the foremen in the several mills have been trying to devise a workable merit rating plan.

The employees also have been consulted through their union representatives on a wide range of problems. Periodic joint meetings are scheduled between shop stewards and foremen to discuss problems of mutual interest, such as safety problems, seniority status of returning veterans, first-aid classes, and open-house programs.

Reliance has been placed on a more free exchange of knowledge between management and men. The worker has been given the opportunity to ask questions and discuss situations, as well as receive facts. Channels of communication, upward and downward, are the foremen and shop stewards. Through these channels, incentives other than financial have been brought into play: interest has been aroused in the product and its uses, in the attainment of production records, in the success of safety efforts; and by emphasizing the importance of the individual job.

The ratio of foremen to workers has been high, permitting constant personal contact between workers and the "first layer" of management. The foremen are given considerable responsibility. While applicants are pre-tested and screened by others, the ultimate decision to hire is made by the foreman of a work group. He also has the power to settle grievances, except where a matter of policy is involved. Responsibility is delegated as completely as possible to the local plant manager, from there to the individual foreman, and ultimately to the worker.

Personnel and industrial problems have been handled solely by the line organization, with staff specialists on personnel and industrial relations serving in an advisory capacity only. Foremen and other line supervisors have been trained to understand some of the more technical subjects, such as job evaluation and time and methods study, so that they may work more closely and co-operatively with industrial engineers and other experts.

Every effort is made to ensure steady employment. The sense of security of the individual workers is further strengthened by a promotional system based largely on seniority, a liberal retirement plan, and advance preparation for changes.

Paternalistic practices have been carefully avoided. The company has never used personnel counsellors. It has, however, assisted the employees in developing their own programs such as group life, hospital and medical plans, credit unions in the mills, and athletic, though not "company", teams. Mill managers have been selected for their ability to get along with the men under them. Rigid rules have been avoided.

Political Compatibility of the Parties

"One prerequisite for industrial peace is the political compatibility of industry and labour," the report states. "The private enterprise and the trade union alike are institutions that desire to survive and to grow. If either party concludes that the opposite party seeks its extinction, the basis for co-operative relations does not exist. If each party concludes that the other will permit it to exist and perhaps even help it to succeed, the prospects for peace are favourable."

From the beginning, management in the West Coast pulp and paper industry has wholeheartedly accepted the principle of unionization of its employees. The unions have accepted and fully supported private ownership and operation of industry.

The international unions have retained some control since the start of organization. No agreement can be signed which they do not approve. They have had a policy of contract observance. The internationals have also retained the authority to suspend, expel or administer the individual locals, and to pass on the validity of strikes before they are called, and may expel individual members for "subversive activities".

Both unions have been highly democratic, although centralizing bargaining powers at the regional instead of local level. Authority has been retained to an unusual degree by the membership. A particular point has been made of not building up a "bureaucracy" of paid officials.

Decision-making is shared by management and union on such problems as wage determination, discharges, promotions, safety, and vacation and other benefits. In addition, management representatives consult constantly with local leaders on a wide variety of operating problems. Foremen do not belong to the union. No strikes are permitted during the life of the contract. A mutually acceptable sharing of power and rights has been worked out by the parties.

The "political" situation is summarized as follows:—

1. The parties were no basic threat to each other. There was no real fear of insecurity and thus no undue concentration on the means for assuring security. Without this mutual acceptance, a more intense need for defining "rights" and "prerogatives" would have existed.
2. The parties got off to a good start. Experienced men guided the negotiations on both sides and avoided mistakes commonly made by novices. No grudges were harboured because of an initial bitter quarrel.

3. Without being unduly solicitous about the preservation of its rights, management has retained those rights which are essential to the efficient operation of the enterprise and to its survival and expansion—basic control over hiring, firing, promoting, directing the labour force, supervising and making improvements.
4. The unions, at the same time, have obtained basic institutional protection through the check-off, the maintenance-of-membership clause, management encouragement of union membership, and region-wide bargaining which has discouraged rival unions; and, beginning in June, 1948, the union shop.
5. Thus the efficient operation of the enterprise has been permitted and the security of the unions achieved. The line of demarcation between what belonged to management and what belonged to the unions could be drawn and was drawn without undue offense to either party.
6. This state of affairs was not automatically guaranteed. It could have been destroyed by at least several eventualities: If the craft unions had asserted effective jurisdiction; if region-wide bargaining had failed to keep out rival unionism; if management had changed its attitude toward union acceptance; or if the unions had rejected management's right to manage.

Economic Compatibility of the Parties

"The parties to a collective bargaining process are economically compatible," the report states, "when the minimum needs of the union for wages and 'fringe' benefits can be satisfied by the employer without undermining the economic position of the enterprise or unduly retarding its growth. When such compatibility does not exist, the parties may be condemned to intermittent or constant warfare."

The matching of the union's requirements with the industry's abilities has been achieved at all times, although the margin on occasion has been very narrow.

Conditions are summarized as follows:—

1. The unions have been under a compulsion to match wage levels in lumbering, specifically, and in the skilled crafts, generally, in order to retain members, preserve themselves against rival unions, and permit stability of leadership. This has required wage rates about 30 per cent above the rest of the industry in the United States.
2. The firms have needed to be profitable.
3. These two requirements have been compatible because of low pulpwood costs, the high value productivity of the labour in the pulp and paper industry, the relatively small percentage of labour costs to total costs, a degree of price stabilization in the industry, and the increasing demand for the products, among other factors.

4. While the average capacity and willingness to pay of the industry has been equal to or above the average needs of the unions, individual mills have not always wished to yield as much as individual locals wished to obtain. Break-downs of the negotiating organizations on one side or the other, or of the negotiations, have been threatened, particularly in 1937, 1940 and 1943. The accomplishment of acceptable settlements has, however, always been achieved.

Conclusion

In conclusion, the report states:—

The favourable complex of environmental conditions permitted industrial peace in the pulp and paper industry, but it did not assure it. The possession and exercise of a high degree of social skill by the leaders on both sides of the relationship were essential to the development of the structure of peace. The margin between peace and war even then has been a narrow one at several junctures; nor is its existence fully assured for the future. . . .

The joint acceptance of region-wide bargaining laid the framework for co-operative dealings. It served as a barrier to rival unionism; it standardized conditions among the mills and among the men; it gave rise to a greater sense of security for the industry and a greater feeling of equitable treatment by the men; and it raised the costs of industrial warfare. Both sides have exercised patience and tolerance throughout. The parties have evolved a division of power and rights, and of income which has met each of their needs. The sovereignty and economic requirements of the industry and of the unions have alike been satisfied. They have been able to co-exist in harmony, politically and economically.

Case Study 2

The Libbey-Owens-Ford Glass Company—Federation of Glass, Ceramic and Silica Sand Workers of America (CIO).

Unlike the case of Crown Zellerbach and the Pacific Coast Pulp and Paper Industry, the Libbey-Owens-Ford situation has not been free from industrial conflict. Because the National Planning Association regarded it as a significant example of progress toward industrial peace in a basic mass-production industry, this company was selected for the second case-study. "We found at Libbey-Owens-Ford," the report states, "a management and a union which appear to be moving toward a stable and constructive collective bargaining relationship. This relation represents progress rather than perfection. The case . . . is typical of a small but growing number of collective bargaining relationships in medium-sized plants, and it indicates a

trend which has recently become quite pronounced in some segments of the basic mass-production industries."

Case Study 3

The Dewey and Almy Chemical Company—The International Chemical Workers Union (AFL).

"This case study," the report states, "shows that the building of a good co-operative working organization is unlikely through paternalism but possible through collective bargaining."

A healthy union-management relationship exists today at Dewey and Almy, it is reported, but while there has been neither acute strife nor work stoppages, there was a period during which the relationship was strained. During the first few years it was characterized by a "well-meaning" paternalism on the part of top management. The relationship, however, gradually moved out of this paternalistic stage, and the nine-year record of collective bargaining at Dewey and Almy has been peaceful.

Case Study 4

Hickey-Freeman Company—Amalgamated Clothing Workers of America (CIO).

The men's clothing industry, this report states, has enjoyed unusually peaceful relations during its long history of collective bargaining with the Amalgamated Clothing Workers of America. "The relationships that have grown up between this one large union and many small and highly competitive employers have established one of the best examples of industry-wide bargaining in the United States."

The Hickey-Freeman Company has enjoyed an unusually good labour-management atmosphere. Since its recognition of the union 29 years ago, there has been no strike of any kind at the factory. No grievance has gone all the way to arbitration for 18 years. When the future of the closed shop relationship appeared threatened by the Taft-Hartley Act, the company, along with most of the other men's clothing manufacturers of the country, extended the contract to 1952.

Case Study 5

Sharon Steel Corporation—United Steelworkers of America (CIO).

Because of its record of twelve years of peaceful labour-management relations this Corporation was selected as the fifth case study.

The report attributes this high record to twelve causes. Management and labour are jointly credited with two. These are: "(1) The fact that the relationship was established, and the original agreement signed, without bitterness and strife; (2) Effective communications and consultation between the parties."

Six are credited to management: "(1) Management's flexibility—its willingness to experiment to adjust and even to improvise; (2) Management's firmness—it doesn't give anything to the union merely for the sake of avoiding a scrap; (3) Management's sustained effort to encourage a strong and responsible union; (4) Management's dis-

semination of its policies and practices to lower levels; (5) Co-operation between line and staff personnel; (6) Management's prior consultation with union representatives regarding changes in policies and procedures."

To the union are credited four factors: "(1) The high calibre of union leadership; (2) The responsible character of the union—its respect for its commitments and legitimate obligations; (3) The union's efforts to avoid factionalism within or between the locals; (4) Union's efforts to increase the responsibility and authority of local union officials."

EARNINGS AND HOURS OF MALE AND FEMALE WAGE-EARNERS AND SALARIED EMPLOYEES IN MANUFACTURING, 1947

Average weekly earnings of male wage-earners in manufacturing were \$41.35 in the last week of November, 1947, compared with \$23.11 for female wage-earners. Among the factors causing this difference were the larger number of male workers in the more highly-skilled occupations and highly-paid industries, and the shorter average hours worked by women. Average weekly salaries in manufacturing were \$60.21 for men and \$28.68 for women.

A preliminary report on the second annual survey of hours of work and earnings of male and female salaried employees and wage-earners in manufacturing has been issued by the Dominion Bureau of Statistics. The survey pertains to the last week in November, 1947, and includes all employees of manufacturing establishments usually employing 15 or more persons, with the exception of travelling salesmen, home-workers, charwomen, and workers engaged on new construction.¹

Wage Earners

An analysis of the data reported for wage-earners shows that in manufacturing as a whole, women comprised 22.7 per cent of the total; in the durable and non-durable manufactured goods divisions, they made up 8.8 per cent and 35.1 per cent respectively. A year earlier, the proportions of women were slightly higher, at 23.7 per cent in manufacturing as a whole, 9.5 per cent in the heavy industries, and 35.9 per cent in the light manufacturing

industries. As in the preceding year, in manufacturing as a whole, the lowest proportion of female wage-earners, 11.2 per cent, was reported in British Columbia, and the highest, 27.7 per cent, in Quebec. In each province, the proportion of women was almost one per cent lower than in November, 1946.

*Earnings*².—Average hourly earnings rose during the year in all parts of Canada and in all industrial divisions. At the end of November, 1947, the average hourly rate for Canada as a whole was 85.1 cents for both sexes, 92.1 cents for men, and 58.2 cents for women, as compared with 74.1, 80.7 and 50.2 cents respectively in 1946. While the advance in the earnings of men in the year was 3.4 cents an hour greater than the advance in the earnings of women,

¹ A much more detailed report has also been issued, covering the last week in November, 1946.

² Since November, 1947, there have been considerable and very general increases in salaries and wages paid in industry.

the increase in women's earnings in 1947 amounted to 15.9 per cent as compared with 14.1 per cent in men's earnings. The proportion of women's average hourly earnings to men's rose by one per cent in the year to 63.2 per cent.

Hourly earnings were highest in British Columbia, where the general increase of 14.2 cents over the year was also greater than in any other province. The percentage increase in Ontario, however, was higher for wage-earners of both sexes. Among men, the largest advances were in Ontario and British Columbia, while the hourly earnings of women showed an above-average percentage gain in New Brunswick. In Nova Scotia, the increase in women's hourly earnings in the year was small, a fact which to some extent is explained by variations in level of activity existing in the last week in November in 1946 and in 1947 in the seasonal food-processing industries, and partly by a decrease in the number of women employed in the comparatively highly-paid iron and steel industries in 1947.

In a comparison of average earnings, it must be borne in mind that various factors influence the levels of pay, such as variations in industrial activity, and the varying proportions of men and women workers and of highly skilled and relatively unskilled labour.

Average weekly wages increased in all areas in the twelve-month period. The higher earnings resulted largely from wage increases, or in some instances from the payment of larger cost-of-living bonuses. Table A gives the provincial figures for 1947 and 1946, and shows the percentage increase. The general levels of earnings in the provinces reflect the industrial distributions of their working forces, as well as sex and occupational differences.

In terms of money, men's earnings showed larger gains than women's, but in most cases, the percentages of increase in the earnings of women were higher. The proportion of women's average wages to those of men was slightly lower, on the average, in 1947, falling from the 1946 figure of 55.9 per cent to 55.4 per cent. Although the highest weekly wages were reported in British Columbia, there were proportionally larger increases in the year in the weekly wages.

Hours of Work.—The working time reported by leading manufacturers in Canada in the last week in November, 1947, averaged 43.7 hours for wage-earners of both sexes, 44.9 hours for men and 39.7 hours for women. These figures were very close to those recorded a year earlier,

the only difference being a decrease of three-tenths of an hour in the time worked by female wage-earners in November, 1947.

The distribution of wage-earners in accordance with their working time varied only slightly from the pattern of the previous year.

Averages are based on short-time, full-time and overtime hours actually worked, plus any hours of paid absence. Important causes of differences in working time include the employment of part-time and casual workers, short-time or overtime work due to seasonal and other circumstances, variations in working time on different jobs, absenteeism and labour turnover during the week under review, as well as variations in the standard number of hours in the working week.

Salaried Employees

Salaried employees, such as executive, managerial, office and factory clerical staffs, made up 16.1 per cent of all employees of both sexes included in the 1947 survey. Women comprised 33.1 per cent of the indicated salaried personnel—one per cent less than in November, 1946. Office workers made up 21.8 per cent of the total number of women reported in manufacturing in November, 1947, the proportion being approximately the same as in 1946. An examination of the provincial figures shows that in British Columbia, 27.8 per cent of the salaried workers were women. This was the lowest ratio recorded, while that of 37 per cent in Ontario was the highest. In both provinces, the proportions of women were lower than in November, 1946.

The proportions of salaried persons to the total staff varied considerably in different industries. The variations result for the most part from differences in the size and type of the industrial unit, their varying proportions of professional personnel, and the organization of their distributive operations.³

Weekly Salaries.—Salary increases were general throughout Canada during the period under review. On the average, the advances were greater in amount than those recorded for wage-earners, although the percentage gains were smaller. A comparison of the figures is given in Table B.

The general average of salaries and the average of salaries paid to women were highest in British Columbia; the average

³ Where separate sales offices are maintained, they are classified in the distribution industry and are excluded from this report.

paid to men was highest in Ontario. In all areas, the increases in the salaries paid women, in money and percentages, were much smaller than those reported for male salaried personnel. In November, 1946, the average salary paid women was 48·7 per cent of the average paid men; in 1947, the proportion was 47·6 per cent.

Hours of Work.—The average hours of the salaried personnel were somewhat lower than in November, 1946, and also below those worked by wage-earners, as shown in Table C.

As in the earlier period, there was a greater difference in working time of the men employed as salaried staff and wage-earners in November, 1947, than of the women. The standard week of office workers tends to be shorter, but higher proportions of wage-earners are reported as casual workers or as working short time. It must also be remembered that the time of salaried personnel is generally less carefully recorded than that of wage-earners, whose earnings are usually closely related to the hours worked.

NATIONAL INCOME IN CANADA, 1948

Preliminary estimates for 1948 show increases over 1947 in production, personal income, investment, and foreign trade. The most striking gain is in income from farm production.

While consumer expenditure rose, the increase was not as great as that in the cost of living, and a decline in real consumption is indicated.

Preliminary estimates compiled by the Dominion Bureau of Statistics indicate that Canada's gross national product and expenditure amounted to approximately \$15.4 billion in 1948, an increase of nearly 15 per cent over 1947. Most of this increase was the result of rising prices, as indicated by the rise of about 14 per cent in the cost-of-living index during 1948.

National income increased from \$11.0 billion in 1947 to \$12.8 billion in 1948, a gain of more than 16 per cent. Civilian and military labour income, which accounted for 56 per cent of national

income in 1948 compared with 57 per cent in 1947, rose by 14 per cent. Investment income increased by 12 per cent from \$2.3 billion in 1947 to \$2.6 billion in 1948.

The most striking gain occurred in the agricultural component of national income. A combination of higher prices, increased marketings and exceptional wheat adjustment payments boosted the net income of farm operators from farm production by 41 per cent, from \$1.2 billion in 1947 to \$1.7 billion in 1948. Net income of other unincorporated business rose by 12 per cent between 1947 and 1948.

| 6. | Residual error of estimate..... | +8 | +105 | +141 |
| 7. | Gross National Expenditure at Market Prices (1) (2) (3) (4) (5) (6)..... | 11,863 | 13,375 | 15,350 |

Item 2 Includes UNRRA, Mutual Aid, etc. of \$97 million in 1946; \$38 million in 1947; \$19 million in 1948.

Item 4 Excludes UNRRA, Mutual Aid, etc. which are included under Government expenditure, item 2 above.

Items 4 and 5 Minor adjustments have been made to the figures of current receipts and payments published by the Dominion Bureau of Statistics as "The Canadian Balance of International Payments" to achieve consistency with the other component series.

Indirect taxes less subsidies increased by \$0.1 billion. This was due to the drop in federal subsidy payments rather than to any general increase in indirect taxation. The significant decline in federal customs revenues due to import restrictions was roughly balanced by increased yields from other forms of indirect taxation at federal, provincial and municipal levels.

Examination of the components of gross national expenditure indicates increases in all components except net addition to inventories. These increases were for the most part the result of price factors. Consumer expenditure rose by \$1.1 billion from \$8.9 billion in 1947 to \$10.0 billion in 1948, an increase of 12 per cent. This is two per cent less than the increase in prices alone as measured by the cost-of-living index. Using the cost-of-living index as a measure of the importance of price changes in consumer expenditure, a decline in real consumption is indicated. Government expenditure on goods and services accounted

for approximately the same percentage of gross national expenditure in 1947 and 1948.

Gross home investment in plant, equipment and housing was 16 per cent of gross national expenditure in 1948, compared with 15 per cent in 1947. While the proportion of gross national expenditure represented by this component increased, the rate of increase showed a significant lessening. Thus the value of gross investment in plant, equipment and housing increased by over 54 per cent from 1946 to 1947, compared with 22 per cent from 1947 to 1948. If price increases are taken into account the comparison is even more striking. Net addition to inventories dropped substantially during 1948 and represented four per cent of gross national expenditure compared with six per cent in 1947.

While imports of goods and services remained at the 1947 level of \$3.6 billion, exports increased from \$3.6 billion to \$4.0 billion, resulting in substantial net foreign investment.

FACTORY INSPECTION IN GREAT BRITAIN

Progress in improving working conditions in Britain's factories is reported by the Chief Inspector of Factories in his Annual Report for 1947.

A decrease in the accident rate is noted, and numerous examples are given of safety precautions introduced or more widely adopted. Progress has also been made in the prevention of occupational diseases.

Average weekly hours have been reduced, 44-45 hours being standard, and the 5-day week has continued to spread.

In reviewing the work of the British Factory Department, the Chief Inspector describes 1947 as a year in which the will to achieve marked improvements in working conditions was beset by inevitable delays and bottlenecks. The problems in the pottery and cotton industries were particularly difficult since their products were of such vital importance to the export drive that maximum output was of immediate importance. In industry generally, one of the serious effects of shortages was the difficulty of obtaining materials for guards and other protective devices and essential replacements of parts of plant. In regard to unsatisfactory factory premises, a problem which was emphasized in the

1946 report, there has been little chance for improvement due to the restrictions on new building.

There has been a growing realization of the importance of the human factor, evidenced by formation of more "Working Parties", developments in personnel management, and organization of joint consultative machinery.

There has also been an enhanced interest in training, but not too much concrete achievement. In regard to training schemes, the Chief Inspector warns that

It is still not always sufficiently appreciated that training for industrial employment involves more than giving an individual employee a particular skill; it

implies equipping him to play his part in the industrial community of which he is a member.

He mentions various cases where firms have arranged for their young workers to attend the local Technical College for half a day or a day a week for purely non-technical education.

That such developments have taken place at a time when the shortage of juvenile labour is a serious problem, shows that there is a growing appreciation by managements of the value to industry of a high standard of general education among its workers.

In some factories there has been a rapid extension of training schemes for adult workers—for men who have to take up work in a different industry, for workers who were to be redeployed in the factories where they already worked, for married women who volunteered for shift work, and for DP's. "Good results are reported as having been obtained from a training school run by a firm engaged in wool spinning who have concentrated on training older women."

This year a number of special graphs have been included in the Report showing the trend of accidents since 1937 and their distribution amongst the main types.

Accidents

During 1947, there were 203,236 notifiable accidents reported at premises within the terms of the Factories Act, 1937, a decrease of 9.2 per cent compared with 1946. Of these 839 proved fatal, an increase of 1.6 per cent over 1946. A reportable accident means an accident which is either fatal or disables the workman for more than three days from earning full wages at his usual work. The Factories Act covers not only factories proper, where approximately 6,450,000 persons were employed in 1947, but also other places, the most important of which are docks and warehouses, sites of building operations and works of engineering construction.

The Report points out that the comparison of the numbers of accidents in various years is no real criterion in establishing whether or not accident prevention endeavours are succeeding. The numbers of workers and the average hours worked are factors that should be considered in determining whether there has been progress or retrogression in preventing accidents during one year as compared with another. Accident frequency rates relating the number of accidents to the number of employees, but not taking into account the hours those persons worked, have been prepared, and these rates show a decline

for all categories of workers when 1947 and 1946 are compared. For men, the accident rate in 1947 per 1,000 persons employed was 38 as against 46 in 1946, and the comparable women's rates were 12 in 1947 as against 15 in 1946. For the second year in succession, the accident rate for boys was lower than that for men. This rate fell from 45 per 1,000 persons employed in 1946 to 33 in 1947; the corresponding girls' rate declined from 16 to 13. When a comparison is made with the year 1937, it is noted that accident rates in 1947 were lower for all categories except women. The Chief Inspector comments as follows:—

Possibly the reduction in rates has been due in some measure to a lessening of hours of work and consequent reduction in exposure to risk, but I am firmly of the opinion that there has been a substantial fall in accident frequency.

There has been a slight increase in the percentage of accidents in factories due to power-driven machinery. One reason for this is that factory processes are more mechanized now than ever before.

The installation of new machinery has itself brought accidents and the importance of safeguarding machinery before it is first set in motion—not merely before it is run full out on production—is not sufficiently realized.

There is also evidence that guards which have got into a state of disrepair have not been replaced soon enough.

Accidents due to handling goods are the most numerous and their relative importance is on the increase. There is definite evidence that the more progressive firms are installing machinery for handling goods, but in some factories major changes in plant lay-out would be required to provide space for conveyors, lifting appliances and suitable runways and gangways, and under present conditions such alterations are not easily accomplished. Increased mechanization is, however, noted, particularly in the brick industry, in electrolytic plating plants and in iron foundries. An Inspector reported concerning one of the oldest foundries in one area

Reduction of strain in lifting and carrying was mainly achieved by installation of monorails for carrying ladles, conveyors for taking moulds to the knock-out and at vibrators, and also conveyors for taking sand to the new pneumatic moulding units. Spilt sand at moulding machines drops through gratings on to a conveyor belt beneath the floor of the foundry.

The Report emphasizes that even with increased mechanization there is much manual handling of goods and that there is a wide field of endeavour in which handling goods accidents can be lessened.

The safety education of the employees, the provision and use of personal protective devices such as special gloves and safety boots in appropriate cases, the withdrawal of persons of unsuitable physical ability and agility from tasks requiring strength and alertness and the proper supervision of all employees in industry by foremen who know the dangers, would do much to lower the appalling record of handling accidents. . . . Considerable absence from work has been caused by sepsis following the handling of goods. . . . Many instances have been reported of workers suffering a slight cut or scratch and failing to take the first aid treatment provided, with serious results. . . . Education in correct methods of lifting is . . . very necessary and if more widely resorted to would do much good.

The percentage of accidents in factories due to persons falling increased in 1947. There have been cases of ladders with missing or defective rungs, and even more cases of failure to secure ladders either by lashing or by having men hold the feet.

Slippery floors, ill-maintained floors, the use of boxes and even machines to gain access where ladders should be used, lack of fencing of holes in floors and openings in walls and failure to take precautions when climbing on roofs, particularly those of a fragile nature, have all brought their toll.

Unsuitable footwear, particularly that worn by women, has been severely criticized, although it has been stressed that this fault has often been due to the necessity for people to go on wearing shoes until they become unwearable.

One factory adopted a slogan which is good advice indeed:—"The lower the heel, the lower the accident rate".

There has been another drop in the number of accidents in factories caused by falling objects.

In one District it was found that 54 per cent of such falling accidents caused foot injuries, which emphasizes the desirability of safety boots being worn by all workers exposed to such risks. There is evidence from every quarter of the country that managements and workers are realizing the advantages of safety boots but there is still much progress to be made before these boots are in sufficiently universal use in the heavier industries.

In building operations the percentage of accidents caused by falling objects is comparatively high.

There is much room for improvement in the way materials of construction and scaffolding materials are stacked and stored, both at ground level and on stagings.

For the second year in succession there has not been a dust explosion of the type that sweeps from room to room of a factory and fills the whole building with

flame. Nevertheless, such an explosion can be so serious that the Chief Inspector again urges that industrialists who are building or remodelling should seize the opportunity to ensure that the design of the building will be such as to prevent the spread of an explosion. The feature of such design is isolation of the rooms in which an explosion may start from one another and from the rest of the factory.

In its simplest form this isolation takes the form of a continuous wall running from the bottom to the top of the factory through all the storeys of the building. On one side of this wall are the processes in which experience has shown that a dust explosion may start; on the other side is the rest of the factory throughout which the explosion may spread. No doorways or other free openings giving access from one side of the factory to the other are allowed in this wall. Communication between the parts of the factory on opposite sides of the wall is provided by means of outside balconies. On the side of the wall where the explosion may start the different storeys are isolated from each other by avoiding communication by internal stairways. Communication in a vertical direction is provided by stairways between the above-mentioned outside balconies. The balconies and stairways may themselves be covered by some light, weather-proof material which would burst rather than guide the flame and blast of a dust explosion from one part of the factory to another.

At the same time experimental work on the provision of explosion reliefs for elevator casings and similar plant was begun in 1946 and finished in 1947. A laboratory service to test dust samples for inflammability is also provided. The most dangerous of the dusts tested were those consisting of synthetic resin powders.

The report also reviews the achievements of joint committees to enquire into fencing problems in the spinning and weaving sides of the Cotton Industry. Two Agreements were signed in 1912, covering safeguarding of machinery, cleaning and first aid requisites in both industries, temperature in spinning, and spacing of looms, lifting of heavy weights and the lighting of dark passages and stairways in the weaving industry. They set out in detail what was then considered to meet the needs of secure fencing for various parts of machines, based on a consideration of the various types of accident which happened on those parts. In addition, the terms of the Agreements were a guide to machine makers in designing various machines. After further discussions, revised Agreements were signed in 1928 and 1929. These Agreements provided for Joint Standing Committees which have met regularly twice a year and examined the machinery acci-

dents which have occurred in the preceding six months. In many cases an *ad hoc* subcommittee was set up to investigate a particular type of accident. The Agreements are kept under review and amended as seems necessary following Committee reports. Subcommittees may also examine new designs for guards to certain machine parts and indicate to the trade whether or not they consider them satisfactory for general adoption. "There is no doubt that this steady and continuous attention to accident causation in the Cotton Industry has produced very good results."

In industry generally, the idea of "organizing for safety" has spread during the year, and the Report indicates that there has been a fair amount of progress in the setting-up of new safety organizations in factories and the appointment of safety officers in most parts of the country.

There is definite evidence that more and more firms have realized that Safety Officers lacking in technical knowledge, without authority and unable to command the attention of persons like works managers and engineers, cannot properly fulfil their functions.

The total number of notifiable electrical accidents was slightly less than in 1946, but still numbered 734, of which 30 were fatal. Most accidents occurred where the electrical pressure was below 250 volts, indicating a high standard of safety in high voltage construction and maintenance. Fifty-seven accidents involved electrical machinery, transformers and switchgear, and 52 of these were switchgear accidents.

Of the 244 gassing accidents, including 22 fatalities, carbon monoxide accounted for the greatest number, and there was a slight increase over 1946, due mainly to the exceptional severity of the weather at the beginning of the year. Further care needs to be taken to prevent distribution of blast furnace gas, and to see that exhaust fumes from gasoline engines, once led out of the factory, cannot be blown back. The second worst poisonous gas in the experience of the Factory Department was hydrogen sulphide. Four fatalities occurred on a carbon bisulphide extraction plant at a benzol refinery. Chlorine poisoning occurred in 22 cases, three of them during degassing of molten aluminum. One fatality was reported due to nitrous fumes. This was a man with diagnosable silicosis who was killed by exposure to a concentration of nitrous fumes which was easily tolerated by his fellow-worker. This case illustrated the characteristic lag between exposure and the appearance of serious effect, and the Chief Inspector warns that any exposure to nitrous fumes should be

treated expectantly. Seventeen cases of trichlorethylene gassing were reported, two of them fatal. Examination of one of these fatal accidents shows that thermostatic control as a standard fitting to trichlorethylene degreasing baths is an important safety measure.

Industrial Diseases

The Report follows the usual practice of measuring the progress of prevention and control of occupational diseases by comparing statistics of the year under review with those of the years immediately preceding it, but the Chief Inspector points out some shortcomings of this method and urges "that the time has come for an authoritative re-examination of the problem of obtaining occupational sickness data nationally." He suggests that the practical approach will be "investigation of selected kinds of illness, in selected industries and occupations in selected areas of the country."

The number of cases of notifiable diseases reported was greater than in 1946 or 1939. This does not necessarily indicate a deterioration in the prevention and control of occupational diseases over the period, since the following factors have affected the figures for 1947 and need to be taken into account: the increase in the working population and the proportion fully employed; inconsistencies in reporting diseases such as chrome ulceration that do not really disable; improved standards of diagnosis as in pneumoconiosis through increased use of radiography; the lag period in the culmination of some diseases. For example, during 1947 there were 212 cases of chrome ulceration at one firm engaged in prefabrication of aluminum houses by the process known as "pylum-inising". This outbreak was creditably handled by the firm and fully reported, with the result that the number of cases of chrome ulceration in 1947 is much larger than usual. The large number of deaths from pneumoconiosis (819) reflect the conditions of work obtaining in the silicosis-producing occupations ten to twenty-five years previous to 1947.

In 1947, there were 58 cases of lead poisoning with two fatalities, compared with 47 cases and eight fatalities in 1946. A significant step in the long fight against lead poisoning was the enactment of the Pottery (Health) Special Regulations of October, 1947 (L.G., 1947, p. 1752), which prohibited the use of any but low solubility or leadless glazes after specified dates. The tile industry was given a

further twelve months to effect the change-over. Attempts to promote the use of leadless glazes in potteries have long been made. As early as 1820 the Society of Arts awarded a medal for the discovery of what was then supposed to be a satisfactory leadless glaze for pottery, but not until the 1890's was the possibility of the use of glazes containing not more than a limited proportion of lead seriously considered.

Twenty-five cases of anthrax with two fatalities were reported, the increase over the previous year occurring in the handling of hides and skins. While potentially infected material is dry, there is an increased danger of contracting anthrax during its manipulation. Minimum handling before immersion and the prompt destruction of wrappings are therefore very important, as well as the use of good washing facilities and the early reporting of any suspicious skin lesion. If dry hides and skins have to be handled, a daily inspection of the men concerned by a responsible person is advisable.

Three more fatal cases of dinitro-orthocresol poisoning occurred since 1945. The workers were spraying DNOC in the field to kill weeds. Protective clothing, rubber gloves and boots were provided but apparently were not worn in hot weather.

New regulations, Factories (Luminising) Special Regulations, 1947, have superseded the wartime regulations (L.G., 1943, p. 1481; 1946, p. 1025) relating to the health and safety of workers in factories using materials containing radio-active substances. Employment of young persons in luminising is prohibited, and some of the precautions which formerly applied to luminisers only were extended to cleaners, and the provision of protective clothing was made compulsory for maintenance workers employed in rooms where luminising was carried on. Two other important new requirements were those relating to the tests of exposure of individual workers to radiation and provision for radiological tests to determine whether rooms hitherto used for luminising were safe for other work. All luminising workers have been clinically and haematologically examined and in no case could any disturbance of health observed be attributed to their occupation.

There were, in 1947, 164 whole-time medical officers covering 305 factories, and 962 practitioners giving substantial part-time service in 1,474 factories. Industry also employed 4,021 nurses, of whom 2,606 were state registered. Facilities are now available at universities, colleges and other

medical institutions for the special study of industrial health, and several of these bodies grant diplomas in this branch of preventive medicine.

Employment of Young People

Examining Surgeons granted in 1947 certificates of fitness for employment in factories to 188,220 young persons under 16, a fall of 67,833 from the 1946 figures, largely due to the raising of the school-leaving age to 15. The Factories Act, 1948, which came into effect October 1, 1948, amends the provision of the Factories Act of 1937 concerning medical supervision of young persons, so that this provision now applies to all young persons in factories under 18 (L.G., 1949, p. 15).

Premises

No substantial improvement in "slum factories" was noted during the year. Mention is made of additional authority obtained through the Factories Act, 1948 (L.G., 1949, p. 15) enabling the Department to obtain orders from Courts of Summary Jurisdiction to close down factories which are in such a condition that they cannot be carried on with due regard to the safety, health and welfare of the workers. The number of factories with underground rooms varies in different parts of the country but the proportion is higher than before the war. Some improvement is noted in standards of cleanliness but "the bad habits of the war years will take long to eradicate and all that can be said is that the gradual approach towards satisfactory standards has been maintained."

In regard to lighting, the last traces of wartime blackout have not yet entirely disappeared. New or reconverted factories usually have reasonable day-lighting. Fluorescent lighting is being widely used. Managements appear to favour its use on account of its flexibility and the ease with which it can be moved. Particularly good results have been noted in low pitched rooms. It is being more clearly recognized that lighting and colour schemes are interdependent and should be planned together.

The use of colour in factories has undoubtedly come to stay.

Progress in the adoption of colour schemes has been maintained in spite of the difficulties of the times, and what perhaps is more important is the enthusiasm with which it has been taken up in the heavier industries where dull, drab and even dingy surroundings has usually been accepted as a necessary concomitant of the type of work and process carried on. One report refers to a constructional engineering firm which took over part of an old steel works, painted the lower

parts of the walls light brown, remainder primrose, the steelwork light blue and the cranes salmon red, and adds that this is a typical case. . . . In the cotton and wool textile industries definite progress is being made, and in one of the main centres of cotton spinning it is reported that the cotton mills are now amongst the most colourful factories in the district. . . . Colour in factories is acknowledged throughout industry generally not only for its effect in creating a more cheerful atmosphere but as stimulating morale and as an inducement towards better house-keeping with its inevitable influence for good in accident prevention, tidier shops and a marked improvement in standards of cleanliness.

A general improvement was reported in the provision of washing facilities. In cotton mills the recommendation of the Joint Advisory Committee on Conditions of Work regarding the provision of foot and shower baths is being adopted in many of the welfare schemes.

An increase in the number of canteens was reported, both those providing hot meals and those providing snack meals. Many canteens operate with improvised premises and poor equipment, but in spite of all the material difficulties, some good new canteens were opened during the year and some others have been re-equipped or improved. The Inspectors noted that more attention was given to standards of cooking and service, and also to standards of hygiene and cleanliness, in which there is room for improvement.

Hours of Work

The general reduction in the weekly hours of work was maintained, and the shorter week became almost universal when the Engineering Trades Agreement for a 44-hour five-day week came into operation at the beginning of the year. With some exceptions, the average working week was 44-45 hours. One organized association of workers with an agreed week of 40 hours is mentioned, but the 40-hour week is found mostly in isolated instances in luxury trades. The agreement between employers and workers in the Cotton Industry provided for a 47½-hour week. The usual arrangement was a 9½-hour day, divided into two 4½-hour spells or one 5-hour and one 4½-hour spell, with a one-hour break at mid-day.

In this industry there are special difficulties (usually associated with the use of engines for driving machinery) in regard to stopping for short breaks such

as the 10 minutes required by the Act for women and young persons in any continuous spell of work exceeding 4½ hours, and to meet the re-arrangements of hours described above, the Cotton Factories (Length of Spell Exemption) Order, 1947, was made. It allows up to a 5-hour continuous spell, on condition that refreshments must be available for the women and young persons in the course of the spell.

Overtime as permitted by the Factories Act was rare. Overtime in the sense of hours worked in excess of the agreed week for an industry was more frequent, but there is some evidence of reluctance on the part of workers to do any overtime.

The adoption of the five-day week continued to spread over most industries, and it is very popular with workers. The long break from work each week, and the opportunity to shop on Saturday mornings (particularly appreciated by women), and the chance for men and boys to attend sports meetings even at a distance, are mentioned as the main reasons for its popularity.

Enforcement

Nine hundred and fourteen charges were laid under the Act, against 596 persons or firms, resulting in 764 convictions, 100 charges withdrawn (including 30 withdrawn on conviction on an alternative charge), and 50 dismissed. The greatest number of charges, 516, were for offences under safety regulations. Total fines imposed amounted to £8,107.

The number of Inspectors on the staff at the end of the year was 314, the authorized establishment being 414. Visits to factories and other places under the Act totalled 237,826. In addition to active inspection, the Chief Inspector comments on the considerable amount of time spent by inspection staff on educational work.

During the year Inspectors have addressed well over 300 meetings and conferences of employers, trade unionists, workers, students, group accident prevention committees and others. . . . In spite of the time taken up in this way, the dissemination of knowledge and of interest in the improvement of conditions in factories is without question very useful and well worth doing. Both sides of industry appreciate better not only what the law requires but their separate responsibilities. In this way they come to regard the spirit lying behind the statutory provisions and not the mere letter of the law as that which is really important.

LEGISLATIVE PROPOSALS OF SASKATCHEWAN FEDERATION OF LABOUR (CCL)

A memorandum of legislative proposals was presented to Premier T. C. Douglas and other members of the Government of Saskatchewan by a delegation from the Saskatchewan Federation of Labour (CCL) on December 17.

At the outset, the President of the Federation, Mr. L. A. Gardiner, reviewed briefly the inter-relationship he felt should exist between labour and agriculture in the field of legislation and contended that "labour legislation is not just for one group, but is, in the over-all picture, for the common good."

Hours of Work Act

The Government was asked to give consideration to the enactment of legislation, at the next session of the legislature, or as soon thereafter as economic conditions warrant such action, to provide for a 40-hour work week, without reduction in earnings and applicable to all industries in the province.

Trade Union Act

Although commending the Government for its efforts to strengthen the enforcement of the Trade Union Act, it was contended that still further measures were urgently required to prevent alleged evasions by "employer groups."

Specific attention was directed to the proneness of some employers to prevent certain of their workers joining unions on the ground that they were confidential employees and had authority to "hire or fire, or act in a confidential capacity." To regulate this, it was urged that the definition of "employee" be clarified in the Act.

Objection was taken to what was considered to be abuses of injunctions in labour disputes, and the request was made that the Act be amended to "prohibit the application to any court of competent jurisdiction by any party, for an injunction, whether interim or otherwise, during the course of a labour dispute."

Other suggested amendments to the Trade Union Act included the following:—

- (1) deletion of the veterans' clause (Section 25 (3)) ;
- (2) change of "maintenance of membership clause" to "union shop clause";

- (3) requiring employers to pay all wages from time of dismissal to time of reinstatement, in cases of wrongful dismissal;
- (4) making it an "unfair practice" for employers to interfere with, or try to influence employees with regard to the support of a trade union, or to undertake, or cause to be undertaken, votes amongst employees with respect to their support of trade unions;
- (5) making it unnecessary for a union to be re-certified in the event of change in ownership of a plant;
- (6) providing for the appointment of a Controller to take charge of a plant or an industry in any and all cases of labour disputes which work against the public welfare.

Workmen's Compensation Act

The memorandum reiterated the Federation's support of the principle of the payment of 100 per cent compensation to injured workmen. It was held too, that settlement payments for the loss of limbs, eyes, etc., should be on a flat rate basis, rather than on the basis of the past earnings of the injured workman. It was also alleged that the Compensation Board was often slow in issuing cheques for compensation and it was urged that "the machinery of the Board be investigated with a view to speeding-up the receipt of compensation payments."

Minimum Wage Act and Orders

The provincial Minimum Wage Orders were declared to be inadequate and to require amendments as follows:—

- (1) that there should be only one minimum wage rate instead of two as at present, and that the rate should apply to the whole of the province;
- (2) that the rates be increased to conform to the 37-point rise in the Dominion cost-of-living index, and that it be made applicable to all classes of employees in the province;
- (3) that employers be required to give their workers (including those laid off temporarily) one week's notice before terminating their employment.

Fair Wage Act

The enactment of a provincial Fair Wage Act was requested, providing for the setting up of a Board, having equal employer-employee representation, whose duty it would be to set fair wage levels in industries.

Other Legislative Proposals

Among other suggestions and recommendations made by the Federation were the following:—

- (1) that the Annual Holidays Act be amended so as to overcome discrimination in the awarding of vacations-with-pay credits to employees and that holidays be given to all workers, on the basis of service rendered;
- (2) that the provincial Department of Labour create a Research Division to study labour, employment and industrial conditions in Saskatchewan and that a program of labour education be established;

- (3) that the date of municipal elections be changed from the second Wednesday in December to a date early in October, so as to take advantage of better weather conditions;
- (4) that any unit of public service employees, through a Trade Union chosen by a majority of its members, be permitted to enter into collective bargaining agreements with the properly designated officer or officers of the Crown and within the meaning of the Trade Union Act of 1944, as amended.

Minimum Wages in Saskatchewan

Representing the Saskatchewan Federation of Labour (CCL), Messrs. W. G. Davies and Howard Mitchell appeared before the Minimum Wage Board of the province on November 29, to submit a brief urging an increase in minimum wage rates. (See "Labour Legislation in Saskatchewan in 1949.") (L.G., June, 1949, p. 740).

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

The strike of seamen at East Coast ports continued during April. Developments in this dispute are outlined below. The Canada Labour Relations Board issued its first order requiring an employer to bargain collectively.

Introduction

The last issue of the LABOUR GAZETTE reported the calling of a strike by the Canadian Seamen's Union against the dry cargo and passenger shipping companies operating ocean-going vessels of Canadian registry from East Coast ports.

As previously reported, the dispute between the shipowners and the Canadian Seamen's Union had received the attention of the Department of Labour under the conciliation procedures laid down by Parliament in the Industrial Relations and Disputes Investigation Act. After a Conciliation Officer had failed to reconcile the differences between the parties, the Minister of Labour appointed a Board of Concilia-

tion and Investigation under the Chairmanship of Hon. Mr. Justice J. O. Wilson, of the Supreme Court of British Columbia. The Board was unable to effect a settlement, and submitted a unanimous report to the Minister of Labour on February 19, 1949, to which was attached a draft collective agreement which the Board recommended that the parties should enter into for the ensuing year.

The shipowners, announced on February 28, their acceptance of the recommendations of the Board as a basis of settlement of the dispute, but the Canadian Seamen's Union formally advised the Department on March 28 of its decision to reject them.

Prior to this the Executive of the Canadian Seamen's Union attempted to negotiate terms of settlement different from those embodied in the Board's report and failing in this, adopted the policy of having crews of vessels stage "sit-in" strikes as vessels arrived in port. Such strike action was first taken on March 21 against the ss. *Lady Rodney* belonging to Canadian National (West Indies) Steamships, Limited. Other vessels were also immobilized as they reached the port of Halifax. The owners of these ships obtained a court order requiring the crews to leave the vessels and proceeded to man them through an arrangement with the Seafarers International Union of North America (AFL), Canadian District. At the same time most of the shipowners took the same action. On March 31 the CSU called a general strike tying up a number of vessels in ports in Great Britain, and other European countries, the West Indies, and as far distant as South Africa and Australia.

Longshore workers and dock workers refused to work Canadian-registered vessels at certain ports abroad and at Saint John, N.B. In most instances this action on the part of longshore and dock workers was not supported officially by the organizations concerned. Subsequently the workers at Saint John, N.B., decided to carry out their contract with the shipowners and work all ships.

The shipowners were successful in having a number of vessels manned, by obtaining other seamen to replace the strikers.

On the West Coast, while certain vessels belonging to Eastern companies were tied up by strike action, the autonomous Pacific Coast Division of the Canadian Seamen's Union reached an understanding on April 22 with three out of six of the deepsea dry cargo shipping operators who were parties to the 1948 agreement whereby the provisions of such agreement would be continued in force without modification until October 15, 1949.

At various places and at different times during April and the early part of May, violence occurred in connection with the replacement of striking crews by other seamen. Those who participated in acts of violence were, upon apprehension by the authorized police forces in the provinces concerned, prosecuted regardless of their status or union affiliation.

In the latter part of April the Minister of Labour issued a statement explaining to the people of Canada that the strike was lawful under the Industrial Relations and Disputes Investigation Act in so far as it affected vessels in Canadian ports, since the legislation adopted by Parliament did not

withhold from any group of workers the right to strike after the prescribed conciliation procedures were followed. He also explained that, in the same manner, employers had the right to lockout their employees following a lapse of seven days from the date of the receipt by the Minister of a Conciliation Board's report.

In view of the stoppages of work occurring in ports abroad, the Ministers of Labour and Transport made a joint public statement at the beginning of May calling to the attention of the public and the seamen concerned that such stoppages of work abroad in disobedience of the lawful orders of the master of a vessel were in violation of the Canada Shipping Act.

On May 16 the Minister of Labour distributed an open letter to "Trade Unionists and Interested Citizens" giving the facts of the dispute. The text of his letter is reproduced below:—

To Trade Unionists and Interested Citizens:

Each day brings contradictory statements concerning the seamen's strike. Many of the statements are extravagant, misleading and incorrect and clearly initiated from one source. Many telegrams are sent to Ministers of the Crown including myself asserting that the Dominion Government is responsible for the difficulties and for the strike. A few days ago 85 telegrams were received by the Prime Minister of Canada purporting to be signed by different persons or groups of persons, and enquiries disclosed they were filed and paid for in three different telegraph stations in Toronto by the same person. Twenty-six long telegrams were received last week from a Maritime port signed by twenty-six different names and the contents of each were word for word the same. No addresses were given. Because of the misleading nature of this publicity the actual facts are given for the information of those to whom this letter is addressed.

Conciliation Procedure

For some months the dispute, involving unlicensed personnel employed by the Canadian deep-sea shipping companies, had received the attention of the Department of Labour under the conciliation procedure laid down by Parliament in the Industrial Relations and Disputes Investigation Act.

Late last September, I was advised that the shipowners and the Canadian Seamen's Union had been unable to arrive at any settlement in their negotiations for a renewal of their Collective Agreement, which was due to expire on October 15, 1948. I appointed a conciliation officer, who

held a number of conferences with the parties but was unable to reconcile the differences between them.

Following receipt of the conciliation officer's report, I appointed a Board of Conciliation and Investigation, under the chairmanship of Mr. Justice J. O. Wilson of the Supreme Court of British Columbia, the other members of the Board being Theodore Meighen, K.C., of Montreal, nominated by the shipowners, and John Kerry, K.C., also of Montreal, nominated by the union. The Board was fully constituted on November 15, 1948. The Conciliation Board conducted an exhaustive investigation into all the matters in dispute, and held extensive public hearings in Montreal. Finding that it was unable to effect a settlement, the Board reported to me in February. The report of the Board was unanimous and was accompanied by a draft agreement which the Board recommended for execution by the shipowners and the union.

The report of the Board of Conciliation was submitted by me to the parties on February 19. The shipowners formally accepted the recommendations of the Board on February 28, 1949. The Canadian Seamen's Union formally rejected the recommendations on March 28, 1949.

Strike Called

It should be noted that the recommendations of the Board of Conciliation were concurred in by Mr. John Kerry, K.C., the nominee of the union on the Board. Despite this fact the executive of the union was not satisfied and attempted to negotiate different terms. To force acceptance of the executive's wishes the policy was followed of having crews of vessels stage a "sit-in" strike as vessels arrived in the port of Halifax. This of course resulted in the immobilization of the vessels. The first "sit-in" strike occurred on March 21, 1949, on which date the following telegram was sent by the Regional Director of the CSU:—

Halifax, March 21, 1949.

Capt. T. A. KELLY,
Marine Superintendent,
CNS, Halifax.

This is to advise you that pursuant to National office instructions a strike has been declared aboard the the royal mail ship *Lady Rodney*. Ship's personnel have been instructed by this office to render such service as you may require for the purpose of ordinary ship security. They will not however raise steam or do any duties connected with the taking of cargo passengers or preparing for sea.

(Sgd.) H. C. MEADE,
Regional Director.

The owners of these ships obtained a court order requiring the crews to leave the vessel and proceeded to man them with other men through an arrangement with the Seafarers International Union. On learning of this move the union executive called a general strike on March 31, 1949.

I believe few will disagree with the opinion I have expressed that the calling of these "sit-in" strikes was an error in judgment on the part of the executive of the union.

Strike in Canada is lawful under the Industrial Relations and Disputes Investigation Act

The legal position of the parties to the dispute, namely, the Canadian Seamen's Union and the various shipping companies as represented by the Shipping Federation of Canada, is as follows:—

Under the Industrial Relations and Disputes Investigation Act, the trade union is free to call a strike and the shipowners are free to declare a lockout and attempt to hire new employees after conciliation proceedings have been undertaken and seven days have elapsed following the report of the Board of Conciliation; therefore the strike declared by the union on March 31, 1949, is a lawful strike under the Industrial Relations and Disputes Investigation Act.

Tie-up of Ships outside Canada is Contrary to Canada Shipping Act

However, this does not permit seamen to violate provisions of the Canada Shipping Act, which prohibit strikes resulting in the disobedience of master's orders on ships at sea or in ports abroad nor until the tie-up of the ship and the safe securing of her cargo at her terminal port in Canada upon completion of her voyage. Nor does this justify the action of officers of the Canadian Seamen's Union in counselling and encouraging seamen on ships at sea or in ports abroad to refuse to obey the master's orders.

It is a fundamental principle of the law of every seagoing nation, which is accepted by every true seaman, that strikes at sea or in ports abroad resulting in the refusal of seamen to obey the master's orders must not occur. Such action endangers the lives of passengers, officers, and crew, the safety of the ship and its cargo. The provisions of the Canada Shipping Act in this respect give effect to this principle.

Strike of Tugboats at Halifax, N.S., is Contrary to Provisions of Industrial Relations and Disputes Investigation Act

The strike of the seamen on tugboats at Halifax, N.S., is in contravention of the provisions of the Industrial Relations and Disputes Investigation Act since the provisions of that Act relating to conciliation were not complied with before the strike took place.

Action taken by Companies to replace Strikers

Since both parties to the dispute had complied with the provisions of the Industrial Relations and Disputes Investigation Act prior to the calling of the strike, the shipowners were within their rights in making arrangements for the manning of their ships by other seamen to replace the striking seamen.

Contrary to assertions that have been made, the Canadian Seamen's Union has been certified as the bargaining agent for seamen on less than ten per cent of the deep-sea ships tied up in the dispute.

Reasons given by Union for calling a Strike

Since the strike was called on the East Coast, the Pacific Coast Division of the Canadian Seamen's Union has reached an understanding with the West Coast shipowners that the 1948 agreement between them would be continued in force without modification for another year. In view of this, and in view of the fact that the new agreement recommended unanimously by the members of the Conciliation Board differed only slightly from the 1948 agreement, it seems to me that the Canadian Seamen's Union would have been well-advised to have completed an agreement with the East Coast operators on the basis of the Board's report. That the union did not do so is their own business; and that the union chose to strike is their right (provided the right was exercised in a lawful manner) but they must accept full responsibility for this action and should not attempt to place this responsibility on any one else.

With the knowledge of these facts, every trade unionist, as well as members of the public, will naturally ask this question: "Why did the Canadian Seamen's Union call the strike?"

The Canadian Seamen's Union has stated publicly that the rejection of the unanimous recommendations of the Board of Conciliation was based on two considerations, i.e., the unsatisfactory hiring arrangement and a reduction in the take-home pay of the seamen.

Now I would like you to examine these two reasons which the union has advanced to justify its action in calling the strike. The 1948 agreement with the shipowners contained the following hiring clause:—

Article 1, Section (d).—The Companies agree that during the period this Agreement is in effect all unlicensed personnel to be hired shall be requested through the office of the Union and through the medium of the Seamen's Section of the National Employment Service. Replacements shall also be made through the Union and through the medium of the Seamen's Section of the National Employment Service in all North American ports as far south and including the port of Norfolk on the east coast and the port of San Pedro on the west coast, provided this does not result in any delays to the vessels and provided that such crew shortages are due to accident or illness or discharges by mutual consent.

The recommendation of the Board of Conciliation on this question was as follows:—

Article 1, Section 2 (b).—The Companies agree that all unlicensed personnel engaged by them in Canada will be hired either through the office of the Union or through the Seamen's Section of the National Employment Service. The Companies agree not to discriminate against Union members. Any unlicensed personnel hired in Canada, who are not Members of the Union, will be required, as a condition of employment, either to join the Union and to continue as Members thereof during their employment or, in the alternative, to tender to the Union one month's dues as well as the initiation fee as presently established and to pay subsequent monthly dues as required of Union Members (and failure to pay arrears of monthly dues at pay-off shall be a bar to further employment until such arrears are paid).

It is suggested that there would be no substantial change in the protection afforded seamen under either clause.

With regard to the alleged reduction in pay, I may point out that the report of the Board of Conciliation did not include any recommendation for a reduction in the pay of seamen, nor in the overtime rates, nor did it recommend any increase in the hours of employment. In fact, all the important provisions relative to remuneration of seamen remained unchanged under the Board's report. I have examined the scale of wage rates and find that the rates

set out in the agreement recommended by the Board are exactly the same as those specified in the old agreement. They are:—

| | |
|---------------------------|----------|
| Bosun | \$180.00 |
| Carpenter | 185.00 |
| A. B. | 170.00 |
| O. S. | 150.00 |
| First Cook | 200.00 |
| Second Cook | 170.00 |
| Second Steward | 170.00 |
| Galley Boy | 140.00 |
| Deck Boy (Utility Boy) .. | 140.00 |
| Mess Man | 160.00 |
| Mess Boy | 140.00 |
| Oiler | 175.00 |
| Fireman | 170.00 |
| Trimmer | 165.00 |
| Wiper | 165.00 |
| Donkeyman | 180.00 |

In addition to these wage rates, crew members are supplied board and living accommodation until they sign off ships' articles at the end of the voyage.

The Board's recommendations also included two provisions which were not contained in the previous agreement and which were of very considerable importance and benefit to the seamen and to the Union. The first of these was that the agreement would extend to all ships of Canadian registry operated by the shipowners, whereas the previous agreement applied to seamen under Canadian Articles only on these ships.

The second important recommendation was in favour of a three-watch system for which the union had asked, as against the previous provision which left with the master of the vessel the responsibility for determining the number of men on a watch.

With these facts on which to form a judgment, I think that most people will agree that it is necessary to look elsewhere than these objections to the recommendations of the Board of Conciliation to find the reason why the executive of the Canadian Seamen's Union did not accept such recommendations and make a new agreement with the shipowners as the latter were willing to do. Instead the executive called the men out on strike.

Many people like myself will find it difficult to accept the view that the chosen nominee of the Canadian Seamen's Union on the Board of Conciliation would have joined the other two members of the Board in making recommendations for the settlement of the dispute which would lessen the protection afforded the seamen or bring about a reduction in their take-home pay.

Maintenance of Law and Order

The use of violence to further the interests of either party to an industrial dispute is contrary to the provisions of the

Canadian Criminal Code. Acts of violence have occurred in the course of the present strike. Those who have participated in these acts of violence have, upon apprehension, been prosecuted regardless of their status or affiliation.

The various Police Forces acting under their respective authorities are preserving peace and order, as it is their duty to do, and in carrying out these duties are acting neither for nor against strikers or ship-owners.

My position and that of my Department in this dispute is the position that we have taken in every other industrial dispute. The services of the Department of Labour are available to the parties whenever they are prepared to open negotiations for settlement.

I conclude this letter by pointing out that the responsibility for law enforcement rests with the Governments of the Provinces. The Attorney-General of Nova Scotia has stated "the Government of Nova Scotia will do its utmost to preserve law and order regardless of the offenders. Our function is to preserve law and order and we will do that to the best of our ability irrespective of who the offenders may be."

I attach copy of the report of the Board of Conciliation.

Yours truly,

HUMPHREY MITCHELL,
Minister of Labour.

Ottawa, May 16, 1949.

The Minister appended the report of the Board of Conciliation and Investigation dealing with this dispute (L.G., April, 1949, p. 432).

* * *

The first order of its kind was issued by the Canada Labour Relations Board during April in connection with a complaint made by a union that an employer had failed to comply with the provisions of the Industrial Relations and Disputes Investigation Act requiring it to meet and bargain collectively with the union and to make every reasonable effort to conclude a collective agreement. The parties affected were the Canadian Dredge and Dock Company, Limited, of Toronto and The National Association of Marine Engineers of Canada, Inc. The Order of the Board requiring the company to commence collective bargaining forthwith with the union as the certified bargaining agent of certain of its employees is printed below in the section concerning Certification and Other Proceedings Before The Canada Labour Relations Board.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act and under the Conciliation and Labour Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board under the former Act.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until succeeded by the wartime Regulations in 1944.

Proceedings begun under the wartime Regulations are continued in so far as the services involved in such proceedings are authorized under the new Act. Likewise, decisions, orders and certifications given by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the new Act.

The Act applies to industries within Dominion jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations, and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Dominion Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, Industrial Inquiry Commissions, for the consideration of complaints that the Act has been violated or that a party has failed to bargain collectively, and of applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to admin-

ister provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements, and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Conciliation services are also provided by the Industrial Relations Branch under the provisions of the Conciliation and Labour Act. This statute empowers the Minister of Labour to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or arbitrator when requested by the parties concerned.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour. From time to time, as required, a third article under this section will cover Conciliation Proceedings under the Conciliation and Labour Act.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton. The territory of the officer resident in Vancouver comprises British Columbia and Alberta; an officer stationed in Winnipeg covers the provinces of Saskatchewan and Manitoba and Northwestern Ontario; two officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the province of Quebec and the officer resident in Fredericton, represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of April. During the month the Board received four applications for certification, held four hearings, issued three certificates designating bargaining agents, ordered three representation votes, rejected one application for certification, allowed the withdrawal of five applications, issued Reasons for Judgment in one case, issued one Order to bargain collectively, and rejected one request for reconsideration of decision in a certification case.

Applications for Certification Granted

1. The Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1415, for a unit of employees of Eastern Canada Greyhound Lines Limited, comprising bus drivers employed by the Company in its Southern Ontario Division. The safety supervisor was excluded from the bargaining unit. (L.G., April, 1949, p. 428.)

2. The Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 59, for a unit of employees of Union Steamships Limited, Vancouver, B.C., comprising assistant pursers and freight clerks employed in the purser's department of vessels operated by the company. The pursers were excluded from the bargaining unit. (L.G., April, 1949, p. 428.)

3. The Canadian Brotherhood of Railway Employees and Other Transport Workers, for a unit of employees of La Compagnie d'Autobus et de Camionnage d'Abitibi Limitée, Val d'Or, Abitibi, P.Q., comprising bus operators, garage employees and maintenance staff. The managerial and office staff, cashiers, foremen and inspectors were excluded from the bargaining unit. (L.G., May, 1949, p. 585.)

Representation Votes Ordered

1. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and National Harbours Board, Port of Quebec, P.Q. (L.G., May, 1949, p. 585.) Following an investigation of the application and a public hearing, the Board ordered that a representation vote be taken among employees engaged on hourly rates of pay, employed in the cold storage warehouse, refrigeration plant, general operation, maintenance department, and other miscellaneous departments. (Returning Officer: L. Pepin.)

2. National Association of Marine Engineers, District 3, and Quebec and Ontario Transportation Co., Ltd., Montreal, P.Q. (L.G., April, 1949, p. 428.) Following an investigation and a public hearing, the Board ordered that a representation vote be taken among marine engineers, chief engineer excluded, employed by the company. (Returning Officer: L. Pepin.)

3. National Association of Marine Engineers of Canada, Inc., District 3, and the Upper Lakes and St. Lawrence Transportation Co., Ltd. (L.G., April, 1949, p. 428.) Following an investigation and a public hearing the Board ordered that a representation vote be taken among the marine engineers, chief engineer excluded, employed by the company. (Returning Officer: F. J. Ainsborough.)

Applications for Certification Rejected

1. International Brotherhood of Electrical Workers, Local 1598, and Hudson Bay Mining and Smelting Co., Ltd., Flin Flon, Man. (L.G., May, 1949, p. 584.)

Applications for Certification Received

1. Canadian Telephone Employees Association, on behalf of employees of the Bell Telephone Co. of Canada (Plant Department). (Investigating Officer: L. Pepin.)

2. Canadian Telephone Employees Association, on behalf of employees of the Bell Telephone Co. of Canada (Operating, Accounting and Treasury Departments). (Investigating Officer: L. Pepin.)

3. Canadian Telephone Employees Association, on behalf of employees of the Bell Telephone Co. of Canada (Commercial Department). (Investigating Officer: L. Pepin.)

4. Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of employees of the Canadian National Railways (Purchasing Department, Toronto, Ont.). (Investigating Officer: F. J. Ainsborough.)

Applications for Certification Withdrawn

1. National Association of Marine Engineers of Canada, Inc., and Paterson Steamships Limited, Fort William, Ont. (L.G., April, 1949, p. 428.) On the request of the National Organizer of the Association the application for certification was withdrawn.

2. National Association of Marine Engineers of Canada, Inc., and Colonial Steamships Ltd., Port Colborne, Ont. (L.G., April, 1949, p. 428.) On the request of the National Organizer of the Association the application for certification was withdrawn.

3. Transport Drivers, Warehousemen and Helpers Union (Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America) and J. B. Baillargeon Express, Ltd., Montreal. (L.G., May, 1949, p. 584.) On the request of the Acting Secretary of the Union the application for certification was withdrawn.

4. Canadian Seamen's Union and the Commercial Cable Company, Halifax, N.S. (L.G., May, 1949, p. 585.) On request of counsel for the Union, the Board granted the withdrawal of the application for certification.

5. Canadian Brotherhood of Railway Employees and Other Transport Workers and the Canadian National Railways (divers, tenders and helpers, Cape Tormentine, N.B. and Borden, P.E.I.). (L.G., May, 1949, p. 585.) On request of the General Chairman of the Brotherhood, the application for certification was withdrawn.

Request for Revocation of Decision in Application for Certification

The Board rejected the request of the Western Union Telegraph Company, Halifax, N.S., for revocation of a decision certifying the Canadian Seamen's Union as bargaining agent. (See Reasons for Judgment below.)

Order to Bargain Collectively Issued

During the month the Board gave consideration to a complaint referred to it by the Minister of Labour under Section 43 of the Act, affecting the National Association of Marine Engineers of Canada, Inc., complainant, and the Canadian Dredge and Dock Co., Ltd., respondent. The Board issued an Order requiring the respondent company to bargain collectively with the complainant, in the terms of the following Order. (L.G., May, 1949, p. 585.)

ORDER

Upon the complaint made by The National Association of Marine Engineers of Canada, Inc., the complainant, to the Minister of Labour that Canadian Dredge and Dock Co., Ltd., the respondent, has failed to comply with paragraph (a) of Section fourteen of the Industrial Relations and Disputes Investigation Act having been referred by the Minister of Labour to this Board pursuant to Section 43 of the said Act;

And this Board having made inquiry in respect of the said complaint and the complaint having been set down for hearing by the Board and having come on for hearing and after having heard representatives of the complainant and the respondent, and the evidence presented to the Board and upon reading the papers filed in respect of the said complaint and decision having been reserved;

This Board does find that Canadian Dredge and Dock Co., Ltd., being a

party to collective bargaining with The National Association of Marine Engineers of Canada, Inc., the certified bargaining agent of marine engineers, employed by the said Company, excluding chief engineers, has failed to comply with the provisions of paragraph (a) of Section fourteen of the Industrial Relations and Disputes Investigation Act; and

This Board does order Canadian Dredge and Dock Co., Ltd., to commence collective bargaining forthwith with The National Association of Marine Engineers of Canada, Inc., the certified bargaining agent of marine engineers employed by the Company exclusive of chief engineers, with a view to the completion of a collective agreement between them and to make every reasonable effort to conclude such agreement; and

For this purpose to cause its authorized representatives to attend and meet with the representatives of The National Association of Marine Engineers of Canada, Inc., at such times and places as shall be fixed and designated for this purpose from time to time by Mr. F. J. Ainsborough, Conciliation Officer of the Department of Labour, or such other Conciliation Officer as may be instructed in his place by the Minister of Labour to confer with the said parties to assist them to conclude a collective agreement.

The Conciliation Officer of the Department of Labour aforesaid is requested to report from time to time to the Chief Executive Officer of this Board on the progress of collective bargaining between the said parties.

Leave is reserved to either of the said parties to apply to this Board for further directions in respect of any matter arising out of or relating to this Order or the complaint as the circumstances of the case in the opinion of such party may require.

By Order of the Canada Labour Relations Board.

Chief Executive Officer.

REASONS FOR JUDGMENT in dispute between

**Western Union Telegraph Company, Halifax, N.S., Applicant,
and
Canadian Seamen's Union, Respondent.**

This is an application of the Western Union Telegraph Company for revocation by the Canada Labour Relations Board of an order of certification made in 1944 by the Wartime Labour Relations Board under the provisions of the Wartime Labour Relations Regulations certifying the Respondent, Canadian Seamen's Union and

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, J. A. D'Aoust, A. Deschamps and A. R. Mosher, members. The Judgment of the Board was delivered by the Vice-Chairman.

bargaining representatives selected by it as the bargaining agents for unlicensed personnel employed by the Company on its cable ships *Cyrus Field* and *Lord Kelvin* stationed at the Port of Halifax, N.S.

The Applicant contends that the Wartime Labour Relations Board had no authority to make an order certifying the Respondent as aforesaid for the reason that employees in the bargaining unit, for which certification was granted, were not employed upon a work, undertaking, or business which was subject to the Wartime Labour Relations Regulations. The Applicant further contends that the provisions of the Industrial Relations and Disputes Investigation Act do not apply to the said employees as they are not employed upon a work, undertaking or business to which the Act applies.

The Industrial Relations and Disputes Investigation Act replaced the Wartime Labour Relations Regulations. These Regulations were revoked effective as of the date the Act came into force, September 1, 1948. Section 72 of the Act provides that the Canada Labour Relations Board established under the Act shall be the successor to the Wartime Labour Relations Board established under the Wartime Labour Relations Regulations and that every order, decision or determination or other act or thing made, given or done by or on behalf of the Wartime Labour Relations Board shall, in so far as the same might be done under the Act, be deemed to have been made, given or done by the Canada Labour Relations Board.

Therefore, if the order made by the Wartime Labour Relations Board certifying the Respondent as bargaining agent for employees of the Applicant employed on its cable ships at Halifax could have been made by this Board under the Act, the order has the same force and effect under the Act as though made by this Board.

It follows that if, as the Applicant contends, the Act does not apply to the company's operation and this Board could not have made the order certifying the Respondent as bargaining agent for the employees under this Act, the order of certification made by the Wartime Labour Relations Board has no continuing force and effect under the provisions of the Act.

Consequently if the Applicant's contention is well founded, the Board would have no authority to revoke the order in question since the only authority given to this Board in the matter of revocation is in respect of orders made by this Board under the Act or orders made by the Wartime Labour Relations Board which, in virtue of

Section 72 of the Act, are deemed to have been made by this Board under the Act (see Sections 11 and 61 (2) of the Act).

For these reasons, the Board is of opinion that if the Applicant's contention as to the application of the Wartime Labour Relations Regulations and the Act to the Applicant's operations were well founded, this Board would have no authority to make the order for revocation applied for.

The Board is of opinion, however, that the order for certification made by the Wartime Labour Relations Board is one which could have been made under the Wartime Labour Relations Regulations and which might be made by this Board under the Act for the reasons hereinafter set out.

The Applicant is a corporation which is incorporated under the laws of the State of New York and is registered under the provisions of Part II of the Domestic, Dominion and Foreign Corporations Act of Nova Scotia for the purpose of carrying on a general telegraph business in Nova Scotia. It operates a cable service between the United Kingdom and Canada using cables extending from the East coast of Canada to the United Kingdom and, in connection with these operations, it operates the two cable ships for the purpose of maintaining and repairing the transatlantic cable used in this service. The cable ships are owned by British companies, are of British registry but are operated by the Applicant under charter from these owners. The employees employed by the Applicant upon these ships comprise the bargaining unit of employees in respect of which the order for certification now attacked was made. The ships have, at present, and have for many years, operated from a depot at the Port of Halifax, N.S.

The employees in the bargaining unit are residents of Canada and were signed on and have been signed on from year to year for many years past at the Port of Halifax.

Even if the Board were to accept as correct the contention of the Applicant that these cable ships are floating work-shops used for repair and maintenance of the transatlantic cable rather than ships falling within the category of navigation and shipping described in paragraph (a) of Section 53 of the Industrial Relations and Disputes Investigation Act, the employment of the employees would, in any event, be upon or in connection with an undertaking falling within the provisions of paragraph (b) Section 53 of the Act as a work or undertaking extending beyond the limits of a province.

The Applicant contends that inasmuch as the ships are of British ownership and registry and are operated under direct instructions from New York in transatlantic service and the crew signed on under British Articles of Agreement, the provisions of the Act do not apply. The Applicant also contends that the use of the Port of Halifax as a depot for the ships is a matter of convenience only and is not essential to their operations which are in no way local but are transatlantic in character.

Considering that the Applicant is registered for the purpose of carrying on business in Canada and carries on operations in Canada in connection with which the ships are utilized, and that the employees are residents of Canada and signed on in Canada, and that the provisions of the Act are capable of enforcement against all interested parties, it is, in the opinion of the Board, immaterial in the particular circumstances of this case whether the ships are of Canadian or British registry or whether the employees have been signed on under British or Canadian Articles of Agreement. This conclusion is borne out by the provisions of Section 163 (1) of the Canada Shipping Act which require that the Master of every British registered ship (with some exceptions which are not applicable in this instance) shall enter into an agreement with every seaman whom he engages in Canada and carries as one of the crew in accordance with the

form of agreement prescribed in the said Act or, that is to say, under Canadian Articles of Agreement.

The Applicant further contends that the provisions of Section 165 of the Canada Shipping Act prescribing the form and terms of agreement which shall be entered into between the Master and crew exclude the application of other terms and conditions of employment to seamen and that the provisions of the Industrial Relations and Disputes Investigation Act relating to the negotiation and conclusion of collective agreements covering as they do terms and conditions of employment have, therefore, no application to the employment of seamen.

The Board is unable to agree with this contention. In its opinion, the two Acts are not repugnant but are in fact complementary to one another.

For the above reasons, the application is dismissed.

Conciliation and Other Proceedings Before the Minister of Labour

Appointment of Conciliation Officer

During April the Minister of Labour appointed Conciliation Officers under Section 16 of the Industrial Relations and Disputes Investigation Act to confer with the parties, in the following industrial disputes:—

The Shipping Federation of Canada, Inc., Montreal, P.Q., applicant, affecting long-shore operations at the Port of Montreal, and the International Longshoremen's Association, Local 375, respondent. (Conciliation Officer: R. Trepanier.)

Canadian Brotherhood of Railway Employees and Other Transport Workers, applicant, and the Hull City Transport

Company Limited, Hull, P.Q., respondent. (Conciliation Officer: R. Trepanier.)

Canadian Brotherhood of Railway Employees and Other Transport Workers, applicant, and MacArthur and Son, Limited, Brandon, Man., respondent. (Conciliation Officer: R. H. Hooper.)

International Brotherhood of Electrical Workers, Local B-1039, applicant, and Gatineau Power Company, Gatineau Transmission Company, and Gatineau Electric Light Company, Ottawa, Ont., respondent. (Conciliation Officer: R. Trepanier.)

International Brotherhood of Electrical Workers, Local B-1440, applicant, and Ottawa Light, Heat and Power Company, Ottawa, Ont., respondent. (Conciliation Officer: B. Wilson.)

Agreements Facilitated by Conciliation Officer

Early in April, 1949, the Minister of Labour received a final report from Mr. F. J. Ainsborough, Conciliation Officer, indicating the settlement of matters in dispute between Polymer Corporation, Ltd., Sarnia, Ont., and United Chemical Workers, Local 14 (L.G., April, 1949, p. 431).

On April 14, 1949, the Minister of Labour received a report from R. H. Hooper, Conciliation Officer, indicating the settlement of matters in dispute between Western Canadian Greyhound Lines, Ltd., Calgary, Alta., and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1374. (L.G., April, 1949, p. 431.)

On April 12, 1949, the Minister of Labour received a report from R. Trepanier, Conciliation Officer, indicating the settlement of matters in dispute between the Canadian Marconi Company, Montreal, P.Q. (Trans-Oceanic Service) and the Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59. (L.G., May, 1949, p. 588.)

On April 12, 1949, the Minister of Labour received a report from R. Trepanier, Conciliation Officer, indicating the settlement of matters in dispute between the Shipping Federation of Canada, Inc., Montreal, P.Q. (longshore operations at the Port of Montreal) and the International Longshoremen's Association, Local 375 (see above).

Conciliation Board Appointed

On April 27, 1949, the Minister of Labour appointed a Board of Conciliation and Investigation to deal with a dispute between MacArthur and Son, Limited, Brandon, Man., and Canadian Brotherhood of Railway Employees and Other Transport Workers. The Board was appointed following receipt of the report of R. H. Hooper, Conciliation Officer (see above).

Constitution of the Board had not been completed at the end of the month.

Conciliation Board Reports Received

On April 23, 1949, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Canadian Marconi Company, Montreal, P.Q., and the Canadian Marconi System, Division No. 59, Commercial Telegraphers' Union, representing radio telegraphers at coast stations and radio officers in the marine service of the Company. (L.G., May, 1949, p. 588.) The personnel of the Board was as follows: H. Carl Goldenberg of Montreal, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members; F. E. H. Gates of Montreal, appointed on the nomination of the Company; and Drummond Wren of Toronto, appointed on the nomination of the Union. The text of the Board's report is reproduced below.

On April 27, 1949, the Minister of Labour appointed a Board of Conciliation and Investigation to deal with a dispute between National Harbours Board, Montreal, P.Q., and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was appointed following receipt of the report of R. Trepanier, Conciliation Officer (L.G., May, 1949, p. 589). Constitution of the Board had not been completed at the end of the month.

On April 29, 1949, the Minister of Labour appointed a Board of Conciliation and Investigation to deal with a dispute between Quebec Railway, Light and Power Company, Quebec, P.Q., and Catholic Syndicate of Garage Employees of the Quebec Railway, Light and Power Company, Inc. The Board was appointed following receipt of the report of L. Pepin, Conciliation Officer (L.G., May, 1949, p. 588). Constitution of the Board had not been completed at the end of the month.

REPORT OF BOARD in dispute between

Canadian Marconi Company (Radio Telegraphers at Coast Stations and Radio Officers in Marine Service)

and

Canadian Marconi System Division No. 59, Commercial Telegraphers' Union (AFL-TLC).

The Hon. HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

The Board of Conciliation and Investigation appointed to endeavour to effect an agreement between the above sited parties begs to report as follows:—

Having held sessions at which the Board heard the representations of all the parties concerned in the dispute and at which the Board endeavoured to effect an agreement between the parties, the Board begs to report that it has been unable to effect such an agreement.

The dispute arises from proposals submitted by the Union representing the Employees for revision of the collective agreement with the Employer. The Union requested

1. Four weeks vacation for 30 years service for Radio Telegraphers on stations which are in year-round operation.

2. A 12 per cent increase in the present rates of wages.

3. An increase in the bonus to officers in charge to \$30, and the incorporation of the said bonus in the wage scale.

The Company rejected these proposals.

Having heard the submissions of the parties to the dispute, and having given full consideration to the representations made, the Board recommends that—

1. Radio Telegraphers at coast stations which are in year-round operation shall be granted an annual vacation with pay of four weeks after 35 years of service provided that one week of the said vacation shall be taken by the employee during the winter season.

On April 23, 1949, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Canadian Marconi Company (Radio Telegraphers at Coast Stations and Radio Officers in Marine Service) and Canadian Marconi System Division No. 59, Commercial Telegraphers' Union (AFL-TLC) (L.G., May, 1949, p. 588).

The Board was composed of Mr. H. Carl Goldenberg, Montreal, Chairman, Mr. F. E. H. Gates, Montreal, member representing the employer viewpoint, and Mr. Drummond Wren, Toronto, member representing the employee viewpoint.

The text of the Board's report is reproduced herewith.

2. The wage scale set out in Article 15 of the agreement between the parties dated May 10, 1948, shall be increased by 7½ per cent.

3. In lieu of the present bonus of \$15 per month payable to officers in charge of coast stations, the wage paid to the said officers in charge shall be \$20 per month above the wage payable to them under the wage scale, the said \$20 to form part of the total wage. The said \$20 shall be added to the wage of the officer in charge after the application of the 7½ per cent increase in the wage scale recommended herein.

The whole respectfully submitted.

(Sgd.) H. CARL GOLDENBERG,
Chairman.

(Sgd.) FRANK E. H. GATES,
(Sgd.) DRUMMOND WREN.

April 22, 1949.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Research and Statistics Branch of the Department of Labour. These are obtained directly from the parties involved and from the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec, are summarized in a separate article following this.

Manufacturing

Textiles and Clothing

WINNIPEG, MAN.—GARMENT MANUFACTURERS ASSOCIATION OF WESTERN CANADA AND AMALGAMATED CLOTHING WORKERS OF AMERICA, LOCAL 459.

Agreement to be in effect from December 15, 1948, to December 14, 1949. *Union security*: every worker included in the agreement must be a member of the union in good standing, except learners and beginners who are given 6 weeks time to become members of the union. No worker shall be discriminated against for union activities and the union shall not require the discharge of any worker unless such worker is replaced by the union by another worker satisfactory to the manufacturer. Whenever in need of a worker, a manufacturer shall apply to the union representative, who shall be given a reasonable time to supply a worker acceptable to the manufacturer. Whenever the union is unable to supply such help, whether temporary or permanent, the manufacturer may secure such help who must become members of the union within 6 weeks. *Check-off*: each and every manufacturer agrees to deduct union dues and also the initiation fee as well as such contributions as may be payable from the wages earned by the worker to the Garment Manufacturers' and Employees' Fund and to remit same to the union and the office of the Fund.

Hours of work: 8 per day Monday through Friday, a 40-hour week. *Overtime*: all work in excess of 8 hours from Monday to Friday shall be paid for at time and one-quarter, all work on Saturdays shall be paid for at time and one-half and all work on Dominion and Provincial legal holidays shall be paid for at double time. Christmas Day shall be a paid holiday for union members employed for at least 6 weeks. *Vacation with pay*: one week to employees with one year's continuous service of at least 1,700 hours. An additional week of vacation shall be given to employees with 2 or more years' continuous service who have worked 1,800 hours at least during each of the previous two years.

Wage rates for cutters shall be 8 per cent plus 10 per cent over the following—first class cutters \$1 per hour; second class cutters 7½ cents per hour; third class cutters (after 3 months) \$16 per week increased by \$1 per

Provision is made for *Rest Periods* in an increasing number of collective agreements in certain industries. The usual provision is for 10 minutes in the morning and 10 minutes in the afternoon, or during each half shift, generally midway through the half shift. A number of agreements also provide for a 5-minute period to put tools away and wash-up at the end of each half shift as in the agreement between the Coulter Manufacturing Company Limited and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America summarized below.

week each month until \$22 per week is reached; piece rates and time rates for single needle operators, special machine operators, folders, pressers, cleaners, examiners, bundle boys and service girls are increased 10 per cent over the 1947 rates. All these workers shall be paid an additional 5 per cent provided they have worked a full 40 hours during the previous week. All learners shall be paid a minimum of 35 cents during the first 2 months of employment, and thereafter regular piece work rates shall prevail. Manufacturers shall not give out work to the home of any workers.

Provision is made for the continuance of the joint health insurance fund and for grievance procedure.

Metal Products

NEW GLASGOW, N.S.—MARITIME STEEL AND FOUNDRIES LIMITED AND UNITED STEEL WORKERS OF AMERICA, LOCAL 3172.

Agreement to be in effect from March 10, 1949, to October 1, 1950, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole bargaining agent for all employees eligible to become members of the union, with the exception of employees who are members of the moulders' union. *Check-off*: the company agrees to deduct union dues from the pay of employees, who so authorize, and to remit same to the union. This authorization shall be irrevocable for the term of the agreement.

Hours of work: 8 per day, 4 on Saturday, a 44-hour week. *Overtime* at time and one-half for work in excess of 8 hours in any one day; double time for work on Sundays and 8 specified holidays. *Vacation with pay period* will be 6 days per year. Employees who have worked a minimum of 150 days during the previous year shall be eligible for a vacation at the rate of ½ day for every 24½ days worked.

Hourly wage rates: acetylene cutters 80 and 83 cents; acetylene welders 83 to 99

cents; blacksmiths 91 cents to \$1.03; buckers 82 and 84 cents; carpenters 82 to 92 cents; chippers 80 and 83 cents; electricians 93 cents to \$1.03; electrician specialists \$1.12; electric welders 83 to 99 cents; firemen 79 cents; forgers 91 cents to \$1.02; grinders 77 and 80 cents; hammer operators 77 and 82 cents; heater boys 68 and 77 cents; machine operators 80 to 88 cents; markers, machinists 93 cents to \$1.03; marker specialists \$1.10; riveters 83 and 91 cents; shot blast operators 82 and 87 cents; sticker boys 64 to 77 cents; structural workers 77 to 92 cents; template makers 98 cents and \$1.03; truck drivers 80 cents; electric and acetylene welders 83 cents to \$1.02; specialists \$1.12; labourers 77 cents; all helpers 79 cents; apprentices—first year 60 cents, second year 70 cents, third year 80 cents and fourth year 90 cents. If the cost of living index (Federal government) increases beyond 160 after October 1, 1949, then wages will be adjusted 25 cents per week for every point the cost of living index is above 160. This adjustment will be made for every five point change. If cost of living decreases below 160, there will be no decreases in wages during the period of the agreement.

Provision is made for *seniority rights, grievance procedure* and an *apprentice plan*.

NEW GLASGOW, N.S.—MARITIME STEEL AND FOUNDRIES LIMITED AND INTERNATIONAL MOULDERS AND FOUNDRY WORKERS OF NORTH AMERICA, LOCAL 332.

Agreement to be in effect from March 10, 1949, to November 22, 1950, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agent for all employees eligible to become members of the Moulders' Union.

Hours of work: 8 per day, 44 per week; for convenience, however, alternate weeks of 40 and 48 hours will be worked except during July and August when 44 hours per week will be worked. *Overtime* at time and one-half will be paid for work in excess of 8 hours per day and double time for work on Sundays (except as part of regular shift) and on 8 specified holidays. *Vacation with pay:* employees must work 150 days during the year to be eligible for vacation. They shall be granted $\frac{1}{2}$ day for each 24 $\frac{1}{2}$ days worked to a maximum of 5 $\frac{1}{2}$ days per year.

Hourly wage rates: moulders (dry sand) \$1.03, other moulders and core makers 85 cents to \$1.02; pattern makers 91 $\frac{1}{2}$ cents to \$1.03; apprentices of moulders, coremakers and pattern makers 60 cents during first year, 70 cents during second year, 80 cents during third year, and in pattern shop only, 90 cents during fourth year; crane operators 82 and 87 cents; crane chasers and ladlemen 78 $\frac{1}{2}$ and 82 cents; sand mixer operator 84 cents; moulding machine operators 85 cents; furnace melters \$1.00 $\frac{1}{2}$; furnace operators 92 cents; furnace helpers, foundry and corerom helpers 77 cents. If the cost of living index increases beyond 160 after November 22, 1949, then wages will be adjusted 25 cents per week for every point above 160. This adjustment will be made for every five point change. If cost of living decreases below 160, there will be no decrease in wages during the period of the agreement.

Provision is made for *seniority rights, grievance procedure* and an *apprenticeship plan*.

OSHAWA, ONT.—COULTER MANUFACTURING COMPANY LIMITED AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 222.

Agreement to be in effect from February 28, 1949, to February 27, 1950, and thereafter from year to year subject to 60 days' notice. The Company recognizes the union as the sole collective bargaining agency for all eligible hourly rated employees of the company.

Check-off: the company agrees to deduct monthly from the pay of employees, who so authorize, union dues exclusive of fines, assessments or any other union levy and to remit same to the union. This authorization shall be irrevocable during the term of the agreement.

Hours of work: 45 per week; for day shift—9 per day Monday through Friday; for other shifts, hours to be as agreed upon by the company and the union committee.

Overtime at time and one-half for work in excess of 9 hours, or apart from the regular shifts during the first 5 days of the week and for all work performed on Saturday or Sunday and 8 specified holidays, which shall be paid holidays when not worked for employees working their regularly scheduled shifts immediately preceding and following the holiday except as otherwise provided. *Rest periods* of 10 minutes are granted all employees during each half shift. Employees are also granted 5 minutes at the end of each half shift. *Vacation with pay:* one week to employees with one year's service (1,800 hours or more), 2 weeks to employees with 5 years' service. Any employee not having completed 1,800 hours work during the previous 12 months will receive vacation with proportionate pay.

Hourly wage rates: current schedule as per agreement May 4, 1948, may be revised from time to time by agreement between the company and the union—Males: labourers and shipping department employees 88 cents increased by 3 cents per hour per month to 94 cents in 2 months; polishing department employees 88 cents, increased 4 cents per hour per month to \$1.08 in 5 months; plating department employees 90 cents, increased 4 $\frac{1}{2}$ cents per hour per month to \$1.08 in 4 months; press operators 88 cents, increased 2 cents per hour per month for 3 months and an additional 3 cents for one month to 97 cents in 4 months; truck drivers range from 98 cents to \$1.05. Females: stamping department employees and wiring girls in the plating department 60 cents increased by 3 cents per hour per month to 72 cents in 4 months. *Off-shift premium* of 5 cents per hour will be paid for off-shift work.

Provision is made for *seniority rights and grievance procedure*.

Non-metallic Minerals, Chemicals, etc.

CALGARY, ALTA.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA LIMITED (PLANTS NEAR CALGARY) AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 690. (ALBERTA NITROGEN WORKERS' UNION.)

Agreement to be in effect from September 23, 1948, to September 22, 1949, and thereafter from year to year subject to notice. The company recognizes the union as the sole bargaining agency for all eligible employees as long as the union retains its right to conduct collective bargaining on behalf of

such employees under the law. There shall be no intimidation or discrimination because of membership or non-membership in the union.

Hours of work: for day shift and maintenance crews—8 per day Monday through Friday, a 40-hour week; for operating crews and maintenance men on shift work—8 per day (except where a change in shift is scheduled), normal working week shall constitute 42 hours, or the equivalent. **Overtime** at time and one-half shall be paid for work in excess of the scheduled shift, for work on 6 specified holidays and for work on assigned days off. **Vacations with pay** shall be granted employees covered by the agreement in accordance with provincial legislation.

Hourly wage scale: maintenance—welders, pipefitters, machinists, mechanics, fitters, insulators, carpenters, electricians and blacksmiths \$1.23 and \$1.33; painters \$1.18 and \$1.28; instrument men \$1.33; tool room attendant and radial drill operators \$1.13; oilers \$1.11; steam engineers, second class \$1.33; general helpers \$1.06; operators \$1.11 to \$1.21; janitors, labourers 96 cents (labourers with more than 120 working days of actual service with the company become lead hands and are paid \$1.01); chemical services 96 cents to \$1.16; warehouse floor-men \$1.06. **Off-shift differential:** a premium of 4 cents per hour shall be paid for time worked on the afternoon shift and 8 cents per hour for time worked on the night shift.

Provision is made for *seniority rights* and *grievance procedure*.

Construction

Buildings and Structures

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION OF THE WINNIPEG BUILDERS' EXCHANGE AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 343.

Agreement to be in effect from May 1, 1949, to April 30, 1950.

Hours of work: 8 per day Monday through Friday, a 40-hour week. **Overtime** at time and one-half for first 4 hours worked over 8 hours during week days, double time thereafter and for all time worked on Sundays and 6 specified holidays. On a seventh holiday, Labour Day, no work is to be done. Where more than one shift is employed or on special work the regular hours of work may be changed so long as they do not exceed 8 per day; second shift to be 7½ hours with 8 hours pay.

Hourly wage rate for journeymen shall be \$1.40 during the term of the agreement including increases of 10 cents per hour September 15, 1948, and 5 cents per hour May 1, 1949. A foreman in charge of 3 or more journeymen shall receive not less than 10 cents per hour above the journeymen's rate. Foremen shall be members in good standing of the local union.

Provision is made for *grievance procedure*.

Transportation and Public Utilities

Air Transport

CANADA—TRANS-CANADA AIR LINES AND THE CANADIAN AIR LINE PILOTS ASSOCIATION.

Agreement to be in effect from February 1, 1949, to January 31, 1950, and thereafter

from year to year subject to 60 days' notice. The company recognizes the association as representing the air line pilots. Mountainous terrain is the division between Lethbridge or Calgary and Vancouver and any other comparable terrain operated with twin-engine aircraft which may from time to time be mutually agreed upon.

Hours: twin-engine domestic operations—no pilot shall be allowed to fly more than 225 air hours on mountainous terrain operations or 255 hours on flat terrain operations (5 hours extra to complete flight) in any one calendar quarter; four-engine domestic operations—yearly maximum shall be 900 hours plus an amount equal to vacation credits; part year maximum flying hours shall be based on 75 hours for each full month and 2½ hours for each day of any part month plus an amount equal to vacation credits, the foregoing does not include training flights, familiarization flights or monthly instrument practice and local flight checks, except that 2½ or 2¾ hours in any one day is credited as flying time in route familiarization, equipment conversion training flights or as supernumerary crew on scheduled flights for route competency purposes. **Vacation:** 14 days with pay after one year's service. Pilots with less than one year's service will be granted one day for each month of service up till December 31.

Monthly salaries: four-engine captains \$550 per month in first 6 months increased \$100 in second, fourth and sixth 6 months to \$850 per month during sixth 6 months and thereafter; twin-engine captains—flat terrain \$450 during first 6 months increased by \$100 in second, fourth and sixth 6 months to \$750 during sixth 6 months and thereafter; mountainous terrain \$450 during first 6 months, \$600 in second 6 months increased by \$100 in fourth and sixth 6 months to \$800 during sixth 6 months and thereafter. First officers employed as pilots or holding laid-off status as pilots November 1, 1948, \$270 per month during first 6 months, \$320 during second 6 months; \$370 during third 6 months and \$400 per month during fourth 6 months and thereafter; first officers without foregoing qualifications \$200 during first 6 months, \$220 in second 6 months, \$250 in third, \$290 in fourth, \$340 in fifth and \$400 in sixth 6 months and thereafter. Reserve captains: a pilot designated as reserve captain shall receive a minimum salary of \$430 per month as of the effective date of such designation by the company with pay for time flown as captain to be computed on a daily basis according to length of service.

Vacations with pay: pilots who have completed one year or more of continuous service, will be granted 14 days with full pay; those with less than one year of continuous service will be granted one day's leave for each full month of service.

Provision is made for *seniority rights*, *grievance procedure*, *travelling and moving expenses*. Pilots are obliged to carry at least \$5,000 of life insurance. The company to pay only the flight risk portion of such insurance.

CANADA—TRANS-CANADA AIR LINES AND INTERNATIONAL ASSOCIATION OF MECHANISTS, LODGES 714 AND 1751 (AIRCRAFT MAINTENANCE MECHANICS, STATION SERVICES DEPARTMENT AND STORES DEPARTMENT).

Agreement to be in effect from October 1, 1948, to September 30, 1949, and thereafter from year to year subject to 30 days' notice, covers all landing fields of the Trans-Canada Air Lines in Canada. The company recognizes the union as the sole bargaining agency for employees in its maintenance and overhaul, cargo and commissary departments.

Hours of work: 8 per day exclusive of meal periods, 5½ days per week is the standard working week; where this is impracticable due to the requirements of the service, work schedules satisfactory to the company and the union shall be established. *Overtime:* time worked in excess of the standard work day, except in the case of rotation of shifts, shall be credited as overtime on a *pro rata* basis and compensatory time off allowed at the discretion of the company. At the end of each month or end of work schedule closest thereto, employees with overtime credits will qualify for payment of the overtime in excess of 24 hours, on a time and one-half basis. All employees will be granted 8 specified holidays or equivalent time off, or overtime credit.

Vacation: 2 weeks with pay, exclusive of legal holidays, for employees who have completed one year or more of continuous service, those with less than one year's service will be granted one day's vacation with pay, exclusive of legal holidays, for each full month of continuous service.

Monthly wage rates: maintenance and overhaul department—crew chief \$285 to \$305, shift foreman \$285 to \$295, aircraft inspector \$275 to \$295, licensed mechanic \$270 to \$280, shop and materials inspectors \$265 to \$275, lead mechanic \$265, mechanics \$245 to \$255, junior mechanics \$185 to \$230, learners \$115 to \$170, detail materials inspectors \$175 to \$245, aircraft tractor driver and crane operator \$205, sand or carboblast operator and helper \$185, tool room issuers \$165 to \$185, lead groomer \$180, groomer \$170, cleaner \$165, lead janitor \$175, janitor \$160, janitresses \$120 to \$145, labourers \$160, licensed fireman \$175, firemen \$160; station services department—assistant station controller \$235, ramp agents \$200 to \$220, station attendants \$160 to \$185, lead chauffeur \$190 to \$210, chauffeurs \$170 to

\$190, commissary attendant \$150; stores department—lead stockkeeper \$255, stockkeepers, shippers or receivers \$210 to \$235, assistants \$175 to \$195, issuers \$115 to \$165, tractor operators \$160 to \$180, labourers \$160.

Provision is made for sick leave, seniority rights and grievance procedure.

CANADA—TRANS-CANADA AIR LINES AND THE AIR LINE PILOTS ASSIGNED TO FOUR-ENGINE OVERSEAS OPERATIONS AS REPRESENTED BY THE CANADIAN AIR LINE PILOTS ASSOCIATION.

Supplementary agreement to the foregoing also effective from February 1, 1949, to January 31, 1950, and thereafter from year to year subject to 60 days' notice.

Hours of service: four-engine overseas operations—900 hours shall constitute the normal annual maximum, and in addition, pilots may be required to complete a maximum of 120 hours overtime in any year. For periods of less than one year the maximum shall be 75 hours for each full month and 2½ hours per day for each part month plus a total of 10 hours overtime for each full month. The company will exert a reasonable effort to prevent a pilot's air hours from exceeding 255 hours in any one-quarter. These hours shall not include training and familiarization flight time during period of transfer from domestic operations to first scheduled, extra section or other revenue flight as captain or first officer on four-engine overseas operations, or training and familiarization flight time relating to being promoted to captain on four-engine overseas operations.

Rates of pay: captains \$900 per month during first 6 months, increased \$50 per month during second 6 months and to \$1,000 per month during third 6 months and thereafter; first officers \$400 per month during first 6 months increased \$40 per month during second 6 months and to \$480 per month during third 6 months and thereafter.

Overtime rates shall be \$13 per hour and \$6.25 per hour for captains and first officers respectively for each air hour in excess of 900 air hours per year or established maximum for a part year.

Sick leave of one day per month with pay will be allowed pilots assigned to four-engine overseas operations for each month or part thereof in each year after assignment of which half the unused portion shall be cumulative indefinitely for the purpose of additional sick leave pay benefits.

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the repeal of one agreement and the amendment of twelve other agreements. These include, in addition to[†] those summarized below, the amendment of the agreement for railway car and bus manufacturing at Montreal published in the *Quebec Official Gazette* of April 2, and the amendment of the agreements for the fine glove industry for the province, for hairdressers at Montreal, for the sash and door industry at Quebec and for building trades at Hull, which were all published April 9, and another amendment to the agreement for building trades at Hull published April 23.

Requests for a new agreement for dairy employees at Quebec and for amendments to the agreements governing barbers and hairdressers at St. Hyacinthe and clock-makers in the eastern townships were gazetted March 26. Requests for the amendment of the agreements for barbers and hairdressers at Victoriaville, for building trades at Hull and at Chicoutimi and for truck drivers at Montreal were published April 2. Requests for the amendment of the agreements for building trades at Hull and at Chicoutimi were gazetted April 9, and for wholesale and retail commercial establishments at Roberval gazetted April 16. A request for the amendment of the agreement for garage and service station employees at Montreal was published April 23.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or association of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Manufacturing

Vegetable Foods

BAKERS AND BAKERY SALESMEN, QUEBEC.

An Order in Council, dated March 31, and gazetted April 9, repeals from April 1, 1949, the Order in Council making this agreement obligatory (L.G., Aug., 1948, p. 870).

Fur and Leather Products

WORK GLOVE INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated March 31, and gazetted April 2, amends from April 1, 1949, the previous Order in Council for this industry (L.G., May, 1948, p. 486). Agreement to remain in effect until December 31, 1949.

Overtime: for male employees paid on a piece-work basis, overtime rates are increased from 47 to 51.7 cents per hour in excess of the regular rates and for female employees paid on a piece-work basis from 22 to 24.2 cents per hour in excess of the regular rates; however, male and female employees paid on an hourly or weekly basis receive time and one-half for overtime work.

Statutory holidays: Good Friday, St-Jean Baptiste Day and Labour Day are to be kept as holidays. Every employee who has been at work the five days prior to these holidays shall receive for each holiday four-tenths of one per cent of the wages earned by him during the twelve months prior to June 1. However, when St-Jean Baptiste Day falls on Sunday, the holiday shall not be paid; if it falls on Saturday, the employee is entitled to half a day off with pay equivalent to two-tenths of one per cent of the wages so earned.

Minimum wage rates for all operations, except any connected with the stitching of a glove or a mitt on a "Wax Thread" machine, are increased by 10 per cent.

Vacation: every employee with five years' continuous service is entitled to an annual vacation of two weeks with pay equivalent to four per cent of his total earnings during the one year prior to June 1 of each year; every employee with from three to five years' service is entitled to a week and a half with pay equivalent to three per cent of his year's total earnings; every employee with less than three years' service is entitled to one week with remuneration equivalent to two per cent of his year's total earnings.

Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated April 14, and gazetted April 23, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1174, Sept., p. 1306, Oct., p. 1474; April, 1949, p. 450, and previous issues) by providing that, if any of the specified statutory holidays should fall on a Saturday or Sunday, then the said holiday shall be celebrated either on the day before or the first working day after the Saturday or Sunday, and, should any of the holidays occur during a vacation period, such holiday shall be paid for immediately after the vacation.

MILLINERY INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated April 14, and gazetted April 23, amends the previous Orders in Council for this industry (L.G., March, 1947, p. 369, Sept., p. 1307).

Holidays with pay: every employee who has been employed in the industry for one year and in the same shop for at least 3 months shall be granted 4 specified holidays with pay each year; if absent without good reason for one full day during the work week in which the holiday occurs, he shall receive only 75 per cent of the pay granted for such holiday; if absent 2 full days, he shall receive only 50 per cent of the pay for such holiday; if absent more than 2 days, he shall not be paid for the said holiday.

Minimum wage rates which were increased by approximately 10 per cent, are now as follows: hand blocker \$50.20 per week; blocker \$46.40; cutter, straw operator, fabric operator \$45.20; draper \$31.40; trimmer-draper \$27.60; trimmer \$25.

Vacation with pay: every employee, who has a minimum of 2 months service for the same employer, shall, in the event of termination of his employment, be entitled to 2 per cent of the wages earned by him after June 30 preceding his termination of employment.

Metal Products

GARAGES AND SERVICE STATIONS, MONTREAL.

An Order in Council, dated April 14, and gazetted April 23, amends the previous Order in Council for this industry (L.G., Nov., 1948, p. 1246).

Overtime: all work in excess of 9 hours per day or 54 hours per week is payable at time and one-half for servicemen in gasoline and service stations.

Holidays for garage servicemen: the three statutory holidays with pay to which they are entitled may be taken by these employees on the first working day following each such holiday and if they work on the said days, they shall be paid at double time.

Minimum wage rates: blacksmiths, body-men, carpenters, electricians, glaziers, lettering-painters, machinists, mechanics, painters, radiator repairers, sheet metal workers, testers, upholstery cleaners and dyers, upholstery makers, vulcanizers, welders, wheelwrights (day journeymen)—first class \$1 per hour, second class 90 cents; night journeymen—first class \$1.15, second class \$1; apprentices (day) from 40 cents per hour in first 6 months to 75 cents in fourth year, apprentices (night) from 45 cents to 85 cents; day service men in gasoline and service stations 60 cents per hour between 7 a.m. and 7 p.m., time and one-half between 7 p.m. and 10 p.m. and double time thereafter.

This amendment also provides for certain changes in the apprenticeship regulations.

SHEET METAL MANUFACTURING, MONTREAL.

An Order in Council, dated April 14, and gazetted April 23, amends the previous Orders in Council for this industry (L.G., Aug., 1948, p. 871, Sept., p. 993; Feb., 1949, p. 178) by providing that every employee with 5 or more years of continuous service for the same employer is entitled annually to 2 weeks' vacation with pay equivalent to 4 per cent of his preceding year's remuneration.

Construction

BUILDING TRADES, JOLIETTE.

An Order in Council, dated March 31, and gazetted April 9, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1175; June, 1948, p. 620, and previous issues) by increasing the minimum wage rates for journeymen in all trades by 5 cents per hour.

Trade

RETAIL STORES, QUEBEC.

An Order in Council, dated March 17, and gazetted March 26, amends the previous Orders in Council for this industry (L.G., May, 1946, p. 629, June, p. 783, July, p. 930, and previous issues). Other amendments to this agreement were published in the *Quebec Official Gazette* of May 31, 1947, and April 24, 1948.

Hours: for the department head, the floor walker and the chief-displayer performing only such work, the accountant and the outside collector, for the delivery-man and his helper, the clerks attending to the delivery and reception of merchandise, the tradesmen, warehousemen and general workmen, maximum hours which may be worked at regular rates were reduced from 55 per week in 1947, to 51 in 1948, and to 50 per week by the present amendment; for all other employees, the regular work week was reduced from 49½ hours per week in 1947, to 48 in 1948, and to 45 by the present amendment.

Minimum wage rates: various increases were granted in 1947, 1948 and 1949, but not all classifications were increased in each of these years. Increases for some classes are as follows: departmental manager—from \$45 per week in 1947 to \$50 in 1948 for males and from \$35 in 1947 to \$39 in 1948 for females if annual turnover is \$100,000, from \$40 in 1947 to \$45 in 1948 for males and from \$30 to \$33 for females if annual turnover exceeds \$50,000 and from \$35 in 1947 to \$40 in 1948 for males and from \$25 to \$28 for females if annual turnover is less than \$50,000; head displayer from \$45 in 1947 to \$50 in 1948; floor walker from \$33 in 1947 to \$36 in 1948 and to \$49 from March 26, 1949; bookkeeper from \$29.60 in 1947 to \$35 in 1948 and to \$37.50 in 1949; collector (outside) from \$24.60 in 1947 to \$30 in 1948; regular employees (male)—in 1947, from \$9.50 per week in first year to \$19 in fifth year, after 5 years from \$22 to \$30; in 1948, from \$14 in first year to \$24 in fifth year, after 5 years from \$28 to \$36; in 1949, from \$14 in first year to \$26 in fifth year, after 5 years from \$30 to \$39; regular employees (female)—in 1947, from \$8.60 per week in first year to \$12 in third year, after 3 years from \$13.50 to \$16; in 1948, from \$13 to \$16, after 3 years from \$17.50 to \$21; in 1949, from \$13 to \$17.50, after 3 years from \$19 to \$23; displayers (male)—after 5 years from \$28 to \$32 in 1947, from \$32 to \$40 in 1948 and from \$35 to \$45 in 1949; delivery-man from \$22.60 in 1947 to \$30 in 1948 and to \$33 in 1949; charwoman \$15 in 1948, increased to \$17 in 1949.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During March

(1) *Works of Construction, Remodelling, Repair or Demolition.*

During the month of March the Department of Labour prepared 105 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 50 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour," and also specify that the rates of wages set out therein are "*minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates."

(2) *Contracts for the Manufacture of Supplies and Equipment.*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

| Department | No. of contracts | Aggregate amount |
|---|---------------------|---------------------|
| Canadian Commercial Corporation. | 6,143 | \$17,113,343.00 |
| Post Office. | 13 | 42,613.05 |
| R.C.M.P. | 1 | 18,144.00 |

LABOUR LAW

Labour Legislation in Saskatchewan in 1949

Changes in the Workmen's Compensation Act include a provision for higher benefits for totally disabled workmen with dependents. A collective bargaining procedure has been established for teachers. Stricter safety requirements have been laid down in regard to freight and passenger elevators and electrical installations.

The Saskatchewan Legislature which was in session from February 10 to April 2, amended laws dealing with workmen's compensation, hours of work, minimum wages, weekly rest-day, factories and trade schools. Within prescribed limits, the Workmen's Compensation Board is permitted to increase benefits to totally disabled workmen with dependents. The weekly payment of compensation to totally disabled workers may not be less than \$15. The stipulation against a reduction in wages in undertakings where hours were reduced to 44 as required by the Hours of Work Act unless time and one-half is paid will apply to April 1, 1950. Janitors and watchmen were brought within the scope of the One Day's Rest in Seven Act. Stricter safety requirements were laid down in statutes governing freight and passenger elevators and electrical inspection and licensing. A new Act grants to teachers the collective bargaining rights enjoyed by other workers in the Province.

Workmen's Compensation

Amendments to the Workmen's Compensation (Accident Fund) Act, in force on April 1, 1949, provide for increased benefits to totally disabled persons with dependents; establish the minimum weekly compensation in total disability cases at \$15, instead of \$15 or average earnings; and bring Reeves, councillors and secretary-treasurers of rural municipalities under the Act.

Permanent total disability is, as before, compensatable at the rate of 75 per cent of the workman's average weekly earnings during the 12 months preceding the accident or for such lesser period as he has been in the employment of his employer.

It is now provided, further, that in cases of permanent total disability, where a workman with dependents is receiving compensation at a rate of less than \$1,200 a year, his benefits may be increased, at

the discretion of the Workmen's Compensation Board, by \$10 a month for a wife or invalid husband, and by \$5 a month each for the first and second child under 16. Where the only dependents are children, the increase may be \$10 a month for the first child, and \$5 each for the second and third child, and where dependents are other than children or consort compensation may be increased by a reasonable weekly sum to be determined by the Board. The total compensation for complete disability must not, however, exceed \$1,200 a year.

The minimum payment in permanent total disability cases is now \$15 a week instead of \$15 or average earnings, if less. In cases of temporary total disability, the minimum weekly payment remains \$15 a week or average earnings, if less, and in partial disability cases, as before, minimum compensation is a corresponding amount in proportion to the impairment of earning capacity.

In order to be recognized by the Board and recoverable, accounts for medical services must be filed with the Board within six months after the termination of the treatment.

Increases in compensation apply to all payments accruing after April 1, 1949, regardless of the date of the accident, but this provision is not to entitle any person to additional compensation for any period before that date.

Reeves, councillors and secretary-treasurers of rural municipalities are now brought under Part I of the Act, together with any other employees of rural municipalities which the Board may designate. For the purpose of computing compensation, the annual earnings of such persons are deemed to be \$1,200, but this amount may be increased or decreased by the Lieutenant-Governor in Council on the recommendation of the Board.

Hours of Work

By an amendment to the Hours of Work Act, employees working exclusively as janitors or caretakers in buildings used principally for residential purposes are, as before, exempted from the Act, but those who care for office and commercial buildings are now within its scope.

The stipulation in the Hours of Work Act, 1947, against a reduction in wages in any undertaking where hours were reduced to conform with the 44-hour limit which is imposed by the Act unless time and one-half is paid for overtime, has been extended to apply until April 1, 1950.

Weekly Rest-day

From July 1, 1949, workers employed solely as watchmen or janitors are entitled to a weekly rest of 24 hours, wherever possible on Sunday, as a result of an amendment to the One Day's Rest in Seven Act. The statute applies, with the exceptions noted below, to all employees in cities and in 21 specified towns. Exempted are persons in a managerial capacity, those who are not usually employed for more than five hours in a day, and repair workers in emergencies.

Minimum Wages

Changes were made in the section of the Minimum Wage Act which permits the Minimum Wage Board by order to fix the maximum amount which an employer may charge, or deduct from an employee's wages, for board and lodging. The revised section stipulates that the Board may fix the maximum deductions permitted for board, whether full or partial, and for permanent or temporary living quarters furnished by an employer to an employee, whether or not such quarters are self-contained and whether or not they are retained in the general possession of the employer.

A further amendment requires an employer to give at least a week's written notice of intention to lay off an employee who has been in his service continuously for three months or more. As previously, a week's notice is required in case of discharge.

Factories

A new section inserted in the Factories Act empowers the Minister of Labour to impose on the owner of a factory any statutory obligation to install equipment or make alterations in premises occupied by an employer other than the owner.

Elevators

The Passenger and Freight Elevator Act which, when proclaimed in force, will replace a 1942 Act and amendments (L.G., 1942, p. 590), will apply to all elevators which are subject to the legislative authority of the Province except such as are excluded by regulations. The chief inspector may by written notice to the owner bring under the Act any elevator or hoisting apparatus excluded by regulation.

Greater provision for safety is made by requiring, as formerly, the owner of an elevator to hold a valid elevator licence, and by now prohibiting any person, firm or corporation from constructing, installing, altering or repairing an elevator or any part which may affect the safety of the elevator unless he holds a contractor's licence. The Lieutenant-Governor in Council may by regulation require the licensing of operators and prescribe the conditions under which operators' licences may be issued. Licences are to be issued by the Department of Labour on the chief inspector's recommendation. The minimum age of elevator operators, which under the earlier Act was 18, will now be fixed by regulation.

The new Act sets out in detail the powers and duties of inspectors. The earlier statute provided that these should be prescribed by regulations of the Lieutenant-Governor in Council.

Inspectors are to be appointed and remunerated according to the provisions of the Public Service Act. Subject to the instructions of the chief inspector, an inspector must inspect periodically every elevator in his district and inspect without delay any elevator which he has reason to believe is unsafe. An inspector must rate the maximum carrying capacity of every elevator in respect of weight or number of passengers carried. This maximum must be recorded in the elevator licence. Operating an elevator with a load in excess of such maximum is declared an offence against the Act.

Inspectors are required to satisfy themselves that elevators are in satisfactory running order, that safety devices and appliances which operate in emergencies are free to operate, and that both elevator and operator are properly licensed. They are empowered to require that necessary information be supplied to them, and that required assistance be made available, and may issue instructions regarding operation, installation, alteration or repair or may condemn an elevator which is unsafe or

obsolete. They may require that negligent, incompetent or unlicensed operators be replaced.

Owners, persons in charge of elevators and contractors engaged in installation, service or repairs are required to notify inspectors of defects which might render the elevator unsafe, and faulty conditions must be remedied within a reasonable time. An unsafe elevator may be sealed or its licence cancelled. Accidents causing death or serious injury must be reported by telephone or telegraph to the chief inspector, who will cause an investigation to be made. Following an accident, the elevator may not be operated without the inspector's written permission.

The inspector must furnish the owner or his representative with an inspection report, setting forth the condition found and may require certain repairs, alterations or replacements to be made within a prescribed time. Within 30 days after receiving an inspection report, the owner must notify the Department of the arrangements which have been made to comply with the inspector's instructions.

The written permission of the chief inspector must be obtained before: (1) a condemned elevator may be repaired or operated; (2) an elevator which has been previously used may be sold, exchanged or reinstalled in a new location; or (3) an elevator which has been previously used outside the Province may be installed. Where the use of an elevator is being resumed after being out of service for a year or more, it must be specially inspected and operated only with the written permission of the inspector.

The Lieutenant-Governor in Council may make regulations governing the design, registration of designs, construction, installation, testing, operation, maintenance, repair, inspection, and classification of elevators; prescribing the conditions under which elevator and contractors' licences may be issued; governing the duration, transfer, suspension, cancellation, withdrawal and posting of licences; prescribing fees and other charges for licences and inspections; excluding any elevator or class of elevator from the Act; and adopting as regulations any relevant codes, rules or standards, with or without modification.

Fines may be imposed, on summary conviction, for violation of the Act or regulations. These may be not less than \$25 nor more than \$300 for each offence. The penalty for operating an elevator without a valid operator's licence is a fine of not less than \$10 or not more than \$50.

Electrical Licensing

The Electrical Inspection and Licensing Act, 1949, which will come into force on Proclamation, is a revision of an Act first passed in 1929 (L.G., 1929, p. 381; 1935, p. 417; 1947, p. 1493). Its administration is now the responsibility of the Minister of Labour. Provision is made, as before, for the appointment of inspectors, including a chief inspector, to enforce the Act, but the provision made in 1947 for the appointment of a Director of Electrical Inspection and Licensing has been omitted. No person may be appointed as inspector who is interested either directly or indirectly in the sale or installation of electrical equipment and who does not hold a valid journeyman's licence.

As formerly, electrical installation must conform to the latest authorized edition of the Canadian Electrical Code, subject to any changes made by the Lieutenant-Governor in Council.

The Act authorizes the Department of Labour to issue licences to contractors, journeymen, employers and persons operating supply houses of electrical equipment. To obtain any of these licences except a journeyman's licence, a person must furnish a guarantee bond of \$1,000, subject to conditions satisfactory to the chief inspector.

The Act applies to the performance of all the work of electrical installation and the installing of electrical equipment for the purpose of supplying electricity for light, heat, or power, or signal or communication systems, the inspection of such work and the sale of electrical equipment.

Excluded from the Act, in addition to electrical work in power houses, substations, etc., except those to which the public have free access, and work on railway or street railway cars or locomotives, as formerly, are transmission lines and distribution systems of public utilities, and the insertion and replacement of lamps or fuses and the performance of other minor adjustments and replacements.

As before, no contractor may make any electrical installation or install electrical equipment unless he holds a valid contractor's licence. To obtain such licence, a contractor must hold a journeyman's licence or employ at least one licensed journeyman. Engaging in the business of a contractor in a place unauthorized by licence is forbidden.

As in the earlier Act, a limited contractor's licence may be issued by the Department to a person who, in the chief inspector's opinion, is competent, permitting him to carry on the business of a contractor in the town or village in which he

lives and in places within a 50-mile radius, unless there is in the town or village a resident holder of a contractor's licence. He must not carry on business in a city or in the village of North Regina. A limited contractor may be assisted by only one apprentice or other employee who does not hold a journeyman's licence.

Provision is now made for the issue of a restricted contractor's licence to a person who holds a restricted journeyman's licence or employs at least one restricted licensed journeyman. Holders of contractors' and restricted contractors' licences may not employ more than two apprentices or other employees for each journeyman.

For a journeyman's licence, the chief inspector must be satisfied that an applicant has completed one of three alternatives: (1) four years' apprenticeship to the trade; (2) one year's apprenticeship and a full electrical course in a Canadian university or college; or (3) two years' apprenticeship and a full electrical course in a technical school operated by any provincial Department of Education. A candidate must also pass a written or practical examination, or both, as may be required by the Apprenticeship Act, 1944. Formerly, the requirements for a journeyman's licence were either four years of apprenticeship, or a three-year term of apprenticeship together with successful completion of an electrical course in a Canadian university, college or technical school.

An applicant for a restricted journeyman's licence must satisfy the chief inspector that he is competent to perform the branches of work specified in the licence. He is not permitted to do any other work than that specified.

An apprentice or other employee who does not hold a journeyman's licence may not do any electrical work except as an assistant to, and under the supervision of, a licensed journeyman employed on the same piece of work.

Employers, other than licensed contractors, are required to hold a licence. No employer may employ any person other than a licensed journeyman to take charge of an electrical installation or install electrical equipment.

Any licence may be suspended by the Minister on the recommendation of the chief inspector. The causes for which contractors' and journeymen's licences may be suspended, previously set out in the regulations, are now incorporated in the Act.

Other provisions deal with connection of electrical installations with distribution systems, reports, notices and permits, defective or dangerous equipment, and with

inspection and approval of electrical equipment stocked by supply houses or retail dealers. Many of these provisions were formerly in the regulations.

The Lieutenant-Governor in Council may make regulations fixing the fees to be paid for licences, inspections and permits.

The penalty section of the Act was revised and a number of changes made in the fines provided for certain offences, including the addition of a minimum fine as well as the former maximum amount.

Trade Schools

The trades which have been brought within the scope of the Trade Schools Regulation Act, 1939, by Order in Council have now been incorporated in the Act (L.G., 1939, p. 1235; 1948, p. 752). The amendment, therefore, consolidates all designated trades under the Act. The trade of "business courses by correspondence" has been omitted.

Collective Bargaining for Teachers

The Teachers' Salary Negotiation Act, 1949, was passed to establish procedure for collective bargaining between teachers and boards of school trustees. In general, the procedure set up by this Act is similar to the rules for establishing Conciliation Boards under the Trade Union Act, 1944.

The Act applies to the boards of school units and districts organized under the Larger School Units Act, 1944, the School Act and the Secondary Education Act, and to all teachers regularly employed in day classes in schools in the unit or district, or employed on a full time basis as supervisors.

"Collective bargaining" means negotiating in good faith with the view to the adoption of a salary schedule or the revision of an existing schedule, embodying in writing the terms of the schedule or its revision, execution by the parties of the schedule or revision, and negotiating from time to time for the settlement of disputes.

The Act declares the right of a group of teachers (or a single teacher where only one is employed), to organize and bargain collectively either on their own behalf or through a committee selected by the majority of the group. Similarly, a school board has the right to bargain on its own behalf or through a committee selected by a majority of the Board. A committee selected by either party may contain only one member who is not one of the group concerned, and must be the exclusive representative of the group or of the Board for collective bargaining.

Either a school board or a majority of a group of teachers may by notice require the other party to enter upon collective bargaining proceedings within thirty days after receipt of notice. If the notice for collective bargaining is for the purpose of negotiating a salary schedule or for the revision of an existing one, the request must be made between November 1 and January 15.

At the request of either party, a three-man Board of Conciliation may be set up, at the discretion of the Minister, whenever a board and group of teachers fail to negotiate a salary schedule or the revision of an existing schedule or fail to settle a dispute. The request must include a concise statement of the claims of the parties and of the attempts which have been made at conciliation.

Within ten days after being notified by the Minister of his intention to appoint a Conciliation Board, each party must nominate one member. If the parties agree on a joint nomination, a one-man Conciliation Board may be set up. In default of nominations by either or both sides, the Minister may appoint representatives from panels submitted to him by a trustees' association, the Saskatchewan Teachers' Federation or jointly by the two bodies. When the two representatives have been appointed, they must select a chairman within five days. The chairman and one other member of the Board will constitute a quorum.

Within 15 days after the Conciliation Board is established, it must begin to hear and determine the matters referred to it. The Board must give full opportunity to all parties to present evidence and to be heard.

Any party to a reference may be represented before the Board by not more than three persons of his choice and must be bound by the acts of the representative. The findings and recommendations of the majority of the members must be those of the Board, but a member of the Board may submit a minority report.

The award, signed by the concurring members, must be submitted to the Minister and to the interested parties within twenty days after establishment of the Board. A further report clarifying any matter relating to the award must be issued at the Minister's request.

If the parties so agree in writing before the Board sits or within twenty days after the date of its award, the award will be binding.

Salary schedules which are adopted or revised as a result of collective bargaining

will come into effect at the beginning of the next academic year, and remain in effect for at least one academic year. However, where the award relates to a dispute arising from the operation or interpretation of an existing salary schedule, it shall be effective from the commencement of the current academic year or at a time set by the Conciliation Board.

Old Age and Blind Persons' Pensions

A minor amendment was made in the section of the Old Age and Blind Persons' Pensions Act which provides for the recovery of pension payments from the estate of a deceased pensioner. Previously, this section stated that the Social Welfare Board may not make a claim where the net value of the estate is less than \$2,000 and where its value exceeds that amount, only the excess may be charged. This provision is now applicable at the discretion of the Board, and the Board is permitted not to make a claim even when the net value of the estate exceeds \$2,000.

Health Services and Hospitalization

An amendment to the Health Services Act, 1946, which, *inter alia*, provides for the levying of a personal tax on the residents of a health region for financing health services, limits the dependents who may be included along with the father and mother in the family maximum personal tax of \$40 per year to children under 18 years, children over 18 who are dependent because of physical or mental infirmity and children between 18 and 21 who are attending a secondary school, university or an approved school of nursing. Formerly, all dependents under 21 years could be included in the total family tax.

The same amendment was made in the Hospitalization Act, 1948, which provides for hospital services for every person who has lived in the Province for six months. The family maximum in the case of the hospitalization tax is \$30.

A new section added to the Act deals with payroll deductions by employers for the payment of the hospitalization tax. With the Lieutenant-Governor in Council's approval, the Health Services Planning Commission may require an employer to make deductions in advance from a worker's wages by instalments over such period of time as the Commission deems advisable. For failure to make such deduction when required by the Commission, an employer may be liable to a maximum fine of \$200.

Amendments were made to the City, Town, Village and Rural Municipality Acts regarding the care of indigent sick persons. These exclude persons who are beneficiaries under the Hospitalization Act from the sections which make the council of the city, town, village or rural municipality liable for hospital treatment of indigent patients.

A new section added to the Town Act makes provision for liability for indigent patients where the hospital is in another province and where reciprocal provisions have been or will be made by the Legislature of that province. If such a person has been a resident of a town for at least thirty days, is not a beneficiary under the Hospitalization Act, and is admitted to a hospital in another province which receives aid from the general revenues of that province, the town council will pay the hospital board for the care and treatment of the patient up to \$5 a day.

The similar sections in the Village and Rural Municipality Acts were amended to allow village and rural municipal councils to pay the board of a hospital outside Saskatchewan charges up to \$5 a day instead of the previous limit of \$2.50 in the case of villages, and \$2 in the case of rural municipalities.

Social Welfare and Rehabilitation

The statutes were repealed which were enacted in 1944 setting up the Department

of Social Welfare and the Department of Reconstruction and Rehabilitation. Provision is now made for a Department combining their activities called the Department of Social Welfare and Rehabilitation. The new Department will administer a number of Acts including the Child Welfare Act, the Old Age and Blind Pensions Act, and the Social Aid Act. The Department will also administer matters relating to the rehabilitation of members of the Armed Forces and of industrial and other workers who were displaced persons. Provision is made for agreements with the Dominion Department of Veterans Affairs regarding the settlement of discharged members of the Armed Forces on land in Saskatchewan, and for co-operation with other departments of the Dominion Government, with other provinces, and with municipalities in Saskatchewan.

To advise the Minister on matters of social welfare and rehabilitation a Social Welfare Board is to be set up of which the members will be the Deputy Minister of Social Welfare and Rehabilitation, the Directors of Old Age Pensions, Child Welfare and Social Aid, the Director of Corrections and not more than three additional members appointed by the Lieutenant-Governor in Council.

An amendment made in the Social Aid Act, 1947, defines "member of a family" to include an adult indigent person who, by reason of physical or mental infirmity, is dependent on the head of the family for support.

Recent Regulations Under Provincial Legislation

Saskatchewan has further extended its Minimum Wage Act to cover places with a population of 300 or over, and has again raised minimum rates of wages for workers in all classes of workplace. ¶Regulations have been made in Manitoba providing for grants for the establishment and maintenance of technical courses in high schools.

British Columbia Hours of Work Act

Workers employed in construction of the Pine Pass and Hope-Princeton Highways are again permitted extended hours. An Order of the Board of Industrial Relations (No. 32E) made on April 27, gazetted April 28, will allow a nine-hour day and a 54-hour week for these workers for the period from April 28 to December 31, 1949.

The exemption under which working hours of bartenders, waiters and utility men working on a split shift in premises licensed

to sell beer should be confined to 13, instead of the 12-hour limit set by the Act, is continued for a further period of three months, up to and including April 30, by an Order (34B) made on April 4, and gazetted April 7. A previous Order permitted this exception to January 31 (L.G., Feb., 1949, p. 185).

British Columbia Workmen's Compensation Act

Poisoning by any process involving the use of or exposure to methylchloride, and

dermatitis caused by any process involving contact with spices or essential oils, were added to the industrial diseases under the Act by Orders of the Workmen's Compensation Board made on March 24 and April 26, respectively, and gazetted March 31 and April 28. The former regulation is effective from March 1, 1949, and the latter from April 1.

Manitoba Education Department Act and Public Schools Act

Technical Courses

Regulations 18/49 respecting grants for the establishment and maintenance of technical courses in high schools were filed on April 5, and gazetted April 9. These regulations will apply to all grants payable after January 1, 1948.

Grants may be paid to school districts and school areas offering home economics, industrial, agricultural and commercial courses as prescribed in the Program of Studies, or technical courses otherwise authorized by the Minister of Education. "Technical course" is defined as a course taken in a secondary school, by ten or more students, to which the students devote at least fifty per cent of their school time. A "technical teacher" must spend at least half of his or her time in the teaching of a technical course.

Provision is made for two kinds of grants, teacher grants and equipment and supply grants.

To qualify for a full technical teacher grant, a school district must have employed a technical teacher and operated a technical course for not less than 200 teaching days in a year. It must have provided approved space and equipment and transmitted required returns to the Minister within 15 days of the close of the term. If a course operates for less than 200 days in a year, payment must be made on a *pro rata* basis.

The number of teacher grants to which a school district or area is entitled is to be calculated either with reference to the number of technical teachers employed or to the enrolment. Grants will be payable at the rate of \$600 for each eligible teacher. Payment will be made separately in respect of spring and fall terms, on the basis of 120 teaching days for a spring term and 80 days for a fall term. Grants will be calculated separately for each course, unless two are combined with the approval of the Minister.

Grants may also be paid to reimburse school districts and areas for approved expenditures for technical equipment and supplies. The amount of the grant will be either \$300 for each teacher for whom a

grant is paid plus \$10 for each student enrolled, or two-thirds of the amount actually spent by the district or area for equipment and supplies, whichever is the lesser.

Saskatchewan Boiler and Pressure Vessel Act

By Order in Council 665/49 of April 12, gazetted April 23, a new category has been added to the schedule of fees payable for inspections of pressure vessels other than those used for liquefied petroleum gas (L.G., March, 1949, p. 312).

Saskatchewan Health Services Act

The general regulations under this Act were consolidated and revised by an Order in Council (606A/49) made on April 1 and gazetted April 16. These re-state, with minor changes, the persons entitled to the health services provided by the Act; require, as before, a health services card to be issued to or on behalf of each beneficiary at such times as may be determined by the Health Services Planning Commission; and set out, in detailed form, the medical, surgical, optical, special nursing, dental, chiropodists' and hospital services, physiotherapy, drugs and appliances for which payment may be made by the Minister of Public Health and the conditions under which payment may be made.

Provision is also made for health services to beneficiaries outside the Province, for a Central Medical Assessment Board to act in an advisory capacity and to authorize payment for medical and surgical services, and for the setting up of a fund for payment for medical services.

Similar regulations, approved by O.C. 611/49, were issued on April 5 governing the provision of health services to social aid recipients under the Health Services Act.

Saskatchewan Hours of Work Act

By an amendment to the Order (No. 1) (L.G., 1947, p. 1187) which permits work in shops up to 11 hours on one day in the week without payment of overtime provided that time and one-half is paid after 44 hours in a week, it is stipulated that this exemption will not apply to places with a population below 500. The Order now applies to any shop in, or within a five-mile radius of, a city of less than 10,000 people, in nine larger towns and in the 48 places of 500 or more population listed.

A new regulation (No. 17) exempts from Section 4 of the Hours of Work Act (which limits hours to eight and 44 provided time

and one-half is paid after those limits) workers in shops and offices located in, or within a five-mile radius of, 83 smaller towns with a population of between 300 and 500. In these centres, time and one-half must be paid for all work done in offices and shops beyond 48 hours. The Order will come into force on June 6 and will apply to April 1, 1951.

These regulations were approved by Orders in Council 779/49 and 780/49 on April 22 and gazetted April 30.

Saskatchewan Minimum Wage Act

The Saskatchewan Minimum Wage Act now applies to towns with a population of 300 or over, and the area within a five-mile radius of each, as a result of Minimum Wage Board Order "Q" (O.C. 586/49) of April 1, gazetted April 9. Eighty-three towns and villages not previously covered are now brought under the Act. In 1945, the Act was made applicable to all towns with a population of 500 or over (L.G., 1945, p. 1699).

A further revision of minimum wage Orders under this Act has now been made. The last revision was made in 1947 (L.G., 1947, p. 1026). Effective June 6, 1949, the new Orders raise minimum rates for most full-time workers by \$2.50 a week or by about 14 per cent. Part-time rates are increased by five cents an hour. The Orders now apply to places of 300 or more population as a result of Order "Q", noted above, which was made on April 1, 1949. As before, agricultural workers, domestic servants in private homes, employees governed by the Fire Departments Platoon Act, registered nurses in hospitals, and persons employed solely in a managerial capacity are exempted from the regulations.

Hotels and restaurants are now grouped with hospitals, nursing homes and educational institutions in each of the three main groups (cities, nine larger towns, and smaller towns and villages), thus reducing the number of Orders from 16 to 13. Nos. 9-13, inclusive, are special Orders for long-distance trucking, janitors, lumbering, amusement places and summer resorts. The towns of Melfort and Nipawin are added to the list of larger towns and Wynyard is omitted. The list now includes the nine towns of Canora, Estevan, Humboldt, Kamsack, Lloydminster, Melfort, Melville, Nipawin and Shaunavon and the area within a five-mile radius of each.

The new rate for all workplaces in cities and in the nine larger towns is \$21 instead of \$18.50 a week. The former \$16 rate for full-time workers in all smaller places covered by the Act is now raised to \$18.50.

Changes made in the special Orders 9-13 are noted below. The rates apply uniformly to both men and women.

As before, the employment of children under 16 in hotels, restaurants, hospitals, educational institutions and places of amusement is forbidden, but the amusement Order (No. 12) permits the Chairman of the Minimum Wage Board to exempt an employer from the provision.

In the Orders (Nos. 2, 5 and 8) governing hotels, restaurants and hospitals, it is now provided that a female who does not reside on the premises must not begin or finish work between 12.30 a.m. and 6 a.m. instead of between 12.30 and 5 a.m., as formerly.

A new provision in all except the special Orders (9-13) states that a rest period granted to an employee must be considered as time worked.

Cities and Larger Towns

Orders 1-5 cover workers in factories, shops, offices, hotels, restaurants, hospitals, educational institutions, nursing homes, and other places of employment in cities and in the nine larger towns. As noted above, for these a new minimum of \$21 is set.

Part-time workers are now to receive a minimum of 55 cents an hour rather than 50 cents, and, except in the case of school children, they must be paid at least \$1.65 each time they are required to report for work. Messengers on foot or bicycle will continue to have the same minima, \$12 a week for full-time and 35 cents an hour for part-time. For those who drive horse-drawn or motor vehicles, the rates are still \$24 a week for full-time and 60 cents an hour for part-time.

As before, unless the Board permits otherwise, the number of part-time workers is limited to 25 per cent of the full-time workers, unless there are less than four full-time workers, in which case one may be employed.

Smaller Places

Orders 6, 7 and 8, which govern workers in the same classes of workplace in a list of 131 smaller places with 300 or more people, fix a minimum rate of \$18.50 a week. The part-time rate is increased from 40 to 45 cents an hour with a three-hour minimum of \$1.35 for a worker when called to work. Messengers' rates are unchanged. The same restriction as that noted above applies with respect to the number of part-time workers.

Public Holidays

As before, workers receive pay at regular rates if they do not work on eight specified public holidays.

A full-time worker who is employed in a week in which a holiday occurs and is not required to work on the holiday must be paid a full week's wages at the regular weekly rate.

For work done on a holiday, employees in all work places except hotels, restaurants, hospitals, etc. must receive in addition to the regular weekly wage, time and one-half the regular rate for every hour or part of an hour worked.

Workers in hotels, restaurants, hospitals, nursing homes and educational institutions, if required to work on a public holiday, must be paid, in addition to the regular weekly wage, wages at their regular rate for all time worked on the holiday or may be granted equivalent time off at regular rates of pay within four weeks.

Part-time workers are to be remunerated in the same way as full-time workers but in the proportion that their weekly hours bear to 32 or 36, as the case may be. There is now no provision for compensatory leave in lieu of work on a holiday for part-time workers in hotels, restaurants, hospitals, nursing homes and educational institutions.

Hours of Work and Overtime

As before, Orders covering all workplaces in cities including hospitals, hotels, restaurants, etc., and all factories, shops and offices covered by the Act provide that a "full-time employee" is one who works at least 36 hours in a week or at least 32 hours in a week in which a holiday occurs. Overtime is time worked beyond eight hours in a day or 44 hours in a week, except for a week which contains a public holiday, in which case overtime is time worked beyond 36 hours.

The Orders applying to hotels, restaurants, hospitals and other workplaces in towns and villages define full-time employees as those whose hours are not less than 37 in a week, or 36 if a holiday occurs during the week. In these Orders, overtime is time worked beyond 48 hours, or in a week containing a public holiday, beyond 40 hours.

Long Distance Truckers

Order No. 9 covers employees who regularly travel in the course of their duties to two or more cities, towns or villages at least 10 miles apart. If such employee operates a motor vehicle bearing a licence issued by the Highway Traffic Board and designated by certain letters, he must be paid either 60 cents an hour or 2½ cents a mile, whichever is greater. If he does not

operate a vehicle so designated, he must be paid 60 cents an hour which was the previous rate for all long distance truckers.

Janitors

Order 10 governs janitors and caretakers in buildings used chiefly for residential purposes in any city, or town of over 300 people, and within a five-mile radius. Previously, the Order for janitors covered these workers in buildings used exclusively for residential, office or commercial purposes.

The minimum full-time rate for janitors is raised from \$24 to \$27.50 a week. For part-time, the rate is 55 cents an hour instead of 50 cents.

Lumbering

Order 11 applying to persons engaged in the lumbering industry increases the minimum rate from 50 to 60 cents an hour for all workers except cooks, cookees, bull cooks or watchmen. The latter group must be paid a minimum of \$115 a month, as formerly. Deductions from wages for three meals a day and lodging, as before, must not exceed \$1.15 a day.

Amusement Places—Summer Resorts

Order 12, which covers places of amusement, is the only Order in which minima are unchanged. In cities, and in towns with more than 300 people and within a five-mile radius, persons working in billiard-rooms, bowling-alleys, skating-rinks, dance halls, theatres, and other places where games of skill are played must be paid at least 50 cents an hour with a minimum in cities of \$1.50 a day.

A new provision allows the prohibition of the employment of children under 16 in places of amusement to be waived, conditionally or otherwise, by the chairman of the Minimum Wage Board.

Workers employed in the summer resorts of Carlyle Lake, Kenosee Lake, Katepwe, Regina Beach and Waskesiu, and the area within a three-mile radius of each, during the season June 15-September 15, are now to receive not less than 40 cents an hour rather than 35 cents, and at least \$1.60 must be paid for each day on which a worker is required to report for duty.

Wage Deductions

Deductions from wages for meals in hotels, restaurants, educational institutions, hospitals, nursing homes and summer resorts are limited to 25 cents a meal, or 75 cents a day; formerly 20 cents and 60 cents.

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act. Published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant had not shown just cause for having voluntarily left his employment within the meaning of the Act.—CU-B 377 (June 23, 1948).

MATERIAL FACTS OF CASE:

The claimant, single, who had been at sea for a lengthy period as a boatswain, filed an application for benefit upon completion of the voyage and stated therein that he had voluntarily left his employment because his ship was again going to sea on a long voyage and he wanted a change.

The Insurance Officer disqualified the claimant for a period of six weeks under Section 41 (1) of the Act on the ground that he had voluntarily left his employment without just cause. From this decision of the Insurance Officer the claimant appealed to a Court of Referees, stating: "Had completed voyage for which I was signed on and was discharged in accordance with the Articles of Agreement between myself and the Master." The Court of Referees unanimously upheld the decision of the Insurance Officer.

The union of which the claimant is a member appealed to the Umpire.

DECISION:

Did the claimant actually leave his employment voluntarily?

When the claimant filed his claim for benefit, he definitely stated that he had voluntarily left his employment on board the ship. Furthermore, at the hearing before the Court of Referees, Mr., the Union's representative stated:—

He had the privilege of signing on that ship again, signing new articles, but he did not want to do that. He may have wanted to get employment ashore.

I fail to see, therefore, how it can be contended that the claimant did not voluntarily leave his employment.

Has the claimant shown just cause for having voluntarily left his employment within the meaning of Section 41 (1) of the Act?

The claimant gave as his reasons that he had already been on the ship for a lengthy period and that he wanted "a change".

The Union further stated in its submission to me that the claimant "was entitled to the necessary period of time for relaxation and personal business ashore".

As already stated in previous decisions, leaving one's employment in order to take a vacation or to look after personal business affairs cannot be regarded as just cause within the meaning of the Act.

The claimant might have had personal reasons for having voluntarily left suitable employment; however, as an insured person claiming benefit under the Act, he had to show just cause which he failed to do.

I agree with the unanimous finding of the Court of Referees, and the appeal is dismissed.

Held that the claimant had shown just cause for having voluntarily left his employment within the meaning of the Act.—CU-B 378 (June 23, 1948).

MATERIAL FACTS OF CASE:

The claimant who was employed by a dairy for approximately a year and a half as a salesman on a milk delivery route, voluntarily left when the manager refused to let him have a key to the dairy building which he alleged he required. There had been considerable friction between the claimant and the manager which culminated in the above incident and an alleged expression of doubt by the manager as to the claimant's honesty. The manager admitted, however, that the claimant was not dishonest but was careless in keeping a record of his sales and that he had refused him a key.

The Insurance Officer disqualified the claimant for a period of six weeks under Section 41 (1) of the Act, on the ground that he had voluntarily left his employment without just cause, and this decision was upheld by a majority decision of the Court of Referees.

The claimant appealed to the Umpire.

DECISION:

The question to decide is whether the claimant has shown just cause for having voluntarily left his employment.

The main factor which prompted the claimant to leave his employment was that, in his opinion, his honesty was doubted by the manager of the dairy, although the latter did state that he did not consider the claimant "dishonest but careless" in accounting for the milk entrusted to him.

In view of the feeling which existed between the parties concerned, I consider that it would have been a hardship for the claimant to remain in the employ of the dairy and consequently, that he has shown just cause for having voluntarily left his employment.

The decision of the Court of Referees is reversed and the appeal of the claimant is allowed.

New Umpire Under UI Act

The appointment of the Hon. Justice Alfred Savard as Umpire under the Unemployment Insurance Act was officially confirmed by Order in Council, P.C. 67-1781, dated April 13, 1949.

He succeeds the Hon. Justice Lucien Cannon, who was the first Umpire appointed under the Unemployment Insurance Act, resigning because of ill health earlier in the year.

Unemployment Insurance Statistics March, 1949*

The monthly report on the operation of the Unemployment Insurance Act, issued by the Dominion Bureau of Statistics states that during March, 1949, a total of 103,402 claims for Unemployment Insurance benefit was filed at local offices of the Unemployment Insurance Commission compared with 108,759 in February and 76,248 during March, 1948. Included in these totals are "revised claims" numbering 14,616 in March, 15,296 in February and 12,379 in March last year. Revised claims represent reconsiderations of existing claims and are, therefore, of interest mainly in connection with the administrative load carried by the various offices. Thus, initial and renewal claims, which represent almost exclusively new cases of recorded unemployment among insured persons, numbered 88,786 in March, 1949, 93,463 in February and 63,869 in March, 1948.

At March 31, there were 185,787 (151,436 male and 34,351 female) ordinary claimants on the live unemployment register compared with 208,818 (172,968 male and 35,850 female) at February 28, and 136,356 (107,777 male and 28,579 female) at March 31, 1948. Ordinary claimants are those who have separated from their former employment and therefore, at any date, represent the

number of insured persons recorded as unemployed at that time. In addition there were on March 31, 11,912 (10,127 male and 1,785 female) "other claimants" on the live unemployment register as against 7,066 (5,904 male and 1,162 female) on February 28, and 5,249 (4,516 male and 733 female) on March 31, last year. "Other Claimants" are largely short-time claimants, that is, those who have been put on short time at their places of employment, but a few are casual claimants, that is, those who, on the basis of their past employment record, have been classed as casual workers by the local office manager.

In Table E-6, claimants on the live unemployment register at March 31, are classified according to the number of days they have been continuously on the register since the last initial or renewal claim was filed in each case. When arriving at the number of days, however, Sundays are not counted, short periods of employment which do not require a new claim are not included and an initial claim that follows without interruption the termination of a claimant's immediately preceding benefit year is ignored.

Claims disposed of in March, 1949, totalled 105,125, including 1,389 referred to courts of referees for further consideration and 1,215 special requests not granted, that is, requests for ante-dating, extension of the two-year period and additional benefit for those having a dependent. In the remaining 102,521 cases, in which the main consideration was entitlement to benefit, 82,277 were considered entitled to benefit and 20,244 not entitled to benefit.

Chief reasons for non-entitlement to benefit as given by adjudicating officers were: "insufficient contributions while in insurable employment" 9,947 cases, "voluntarily left employment without just cause" 4,722 cases, "refused an offer of work and neglected an opportunity to work" 1,186 cases, "discharged for misconduct" 1,017 cases and "not capable of and not available for work" 729 cases.

A total of 239,826 persons were paid \$10,361,473 benefit as compensation for 4,644,642 compensated unemployed days during March, 1949, compared with 210,681 beneficiaries paid \$8,158,903 for 3,734,487 compensated unemployed days in February and 154,754 persons paid \$6,629,826 for 3,364,791 compensated days during March, 1948. The average duration of the unemployment compensated was, then, 19.4 days in March, 1949, 17.7 days in February and 21.7 days in March last year. The average amount of benefit paid per beneficiary was \$43.20 in March, 1949, \$38.73 in February and \$42.84 in March, 1948. The average

* See Tables E-1 to E-7.

amount of benefit paid per compensated day of unemployment was \$2.23 in March, 1949, \$2.18 in February and \$1.97 in March, last year.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for the month ending March 31, 1949, showed

3,699,803 employees were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1948, an increase of 54,310 since February 28, 1949.

As at March 31, 1949, 212,290 employers were registered as having insurable employees representing an increase of 356 since February 28, 1949.

WAGES, HOURS AND WORKING CONDITIONS IN THE PULP AND PAPER AND PAPER BOX INDUSTRIES, OCTOBER 1948*

Average wage rates in the Pulp and Paper Industry in 1948 had increased 93.5 per cent and in the Paper Box Industry, 102.3 per cent over comparable rates in 1939. Ninety per cent of the workers in the two industries were covered by collective agreements in writing. The most common weekly hours in the Pulp and Paper Industry were 48, based on a six-day week; in the Paper Box Industry, the majority were on a five-day week of 45 hours. Most of the mills gave one week's vacation with pay after one year and two weeks after five years.

The Pulp and Paper Industry

The wage rate index for this industry reached a high of 193.5 in 1948, based on rates in 1939 as 100. The annual percentage increases were fairly uniform up to 1945 when a relatively small change was indicated, followed by much larger increases in the past three years.

| Year | Index | Annual Percentage Change |
|-----------|-------|--------------------------|
| 1939..... | 100.0 | — |
| 1940..... | 104.6 | 4.6 |
| 1941..... | 109.5 | 4.7 |
| 1942..... | 115.1 | 5.1 |
| 1943..... | 120.3 | 4.5 |
| 1944..... | 125.7 | 4.5 |
| 1945..... | 127.3 | 1.3 |
| 1946..... | 148.6 | 16.7 |
| 1947..... | 173.8 | 17.0 |
| 1948..... | 193.5 | 11.3 |

* The information in this article was prepared from data obtained in the general annual survey of wage rates and hours of labour for 1948 made by the Research and Statistics Branch of the Department of Labour. Employers were asked to report their straight-time wage or salary rates or the average straight-time earnings for workers on piecework for the last pay period preceding October 1, as well as certain working conditions within their establishments. In the tables on wage rates, the averages shown are for selected representative occupations in each industry. The predominant ranges of rates include approximately the middle 80 per cent of the workers in each occupation in order to exclude extremely high and low rates and at the same time to show the ranges which contain the rates for the majority of workers. The averages, however, include all the workers in the occupation. Information on wage rates for 1948 in *Logging and Construction* was published in the April *LABOUR GAZETTE* and for *Civic Employees* in the May issue.

For a summary of provincial legislation on working conditions, see *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, an annual publication of the Department of Labour.

There were 89 returns used in this analysis of the industry, indicating an employment figure in these establishments at October, 1948, of some 42,200 plant employees (Table 1). This figure is exclusive of office staff which numbered approximately 5,200 employees in 1948 but included a certain number of workers outside the mills engaged in municipal work in a few cases where the mills owned their own townsites. These 89 returns include the great majority of pulp and paper mills in operation in Canada in 1947.

Although more than half the mills employed less than 500 workers each, three-quarters of the total number of workers were in mills employing more than 500 workers. Sixteen of the mills, including a total of 865 workers, employed less than

100 workers each while nine, with 26 per cent of the total workers, employed over 1,000 each.

Wage Rates,* Table 2.—For purposes of wage rate statistics, the Pulp and Paper Industry is divided into four parts: pulp, newsprint, paper other than newsprint (including kraft, specialty papers, etc.), and maintenance. The wage rates for machine crews are based on the speed and width of the machines which they operate; hence, the rates paid to crews of the larger, faster newsprint machines are higher than in the manufacture of other types of paper, as indicated in Table X. Taking Canada as a whole, newsprint machine tenders, one of the highest paid occupations in Canadian industry, averaged \$2.15 per hour in 1948 as compared with slightly less than \$2 in 1947. In a large number of paper mills the basic rate in 1948 for unskilled workers was \$1 per hour.

Collective Agreements.—All but eight of the mills reported having some form of collective agreement in writing, covering 95 per cent of the total number of mill workers. Seventeen of the mills, employing 11,600 workers, reported having more than one agreement in effect at the time. The majority of mills had agreements with either the International Brotherhood of Paper Makers or the International Brotherhood of Pulp, Sulphite and Paper Mill Workers or, in many cases, agreements with both; these unions are affiliated with the American Federation of Labour and the Grades and Labour Congress. A few of the other unions represented within the industry were the International Association of Machinists, the International Brotherhood of Electrical Workers and the International Brotherhood of Operating Engineers.

Standard Weekly Hours of Work, Table 3.—All the mills reported working a six-day week of 44 to 60 hours with 73 of the 89 mills and 85 per cent of the workers on a 48-hour schedule. The eight mills working longer than 48 hours per week employed only three per cent of the total number of workers.

Overtime Rates of Pay, Table 4.—Time and one-half was the rate of pay provided for overtime during the working week in the industry in all but three relatively small mills. The only other rate reported which provided premium pay was double time and one-half and applied to work done on observed statutory holidays only in 19 of the mills, employing nearly one-quarter of the workers.

Vacations with Pay, Table 5.—All but two of the mills reported giving vacations with pay and in every instance an initial

vacation of at least one week was reported after one year or less of service.

Most of the mills, including 95 per cent of the workers, reported giving a maximum vacation of two weeks, usually after five years of service.

Statutory Holidays, Table 6.—More than one-half the mills, accounting for two-thirds of the workers, reported both observing and paying for four statutory holidays.

All the mills reported observing holidays varying in number from one to 12 and 78 of the 89 reported paying for either two, three, four or eight of the holidays observed. Ninety-six per cent of the workers were in mills paying for three or four statutory holidays.

Shift Work, Table 7.—Most of the mills reported a certain amount of shift work with one-third of the workers reported working other than day shift. In 58 mills, there were workers reported on three-shift operations; in another three, only a two-shift operation was reported and in 19 mills, both two- and three-shift schedules were in effect.

As will be noted from the table, few workers received a wage differential for work on second or third shifts.

Sick Leave with Pay.—There were almost 27,000 workers in the 49 mills reporting provision for sick leave with pay. In many instances, plans were not effective until the employee was with the company one year and in some cases a medical certificate was required; others allowed one-half or one day per month of service to cover sick leave; some companies paid for the first six days of illness when an employee is off more than 12 consecutive days and others paid a stipulated flat rate after the first seven days; several companies reported group insurance schemes without giving details and a few other mills reported paying for sick leave at the discretion of the management.

The Paper Box Industry

The average wage rate index for the industry in 1948 indicated that average rates had more than doubled since 1939. The annual increase in 1948 was very little less than that shown for the previous year.

| Year | Index | Annual Percentage Change |
|-----------|-------|--------------------------------|
| 1939..... | 100.0 | — |
| 1940..... | 102.9 | 2.9 |
| 1941..... | 115.5 | 12.2 |
| 1942..... | 123.9 | 7.3 |
| 1943..... | 128.9 | 4.0 |
| 1944..... | 133.1 | 3.3 |
| 1945..... | 138.5 | 4.1 |
| 1946..... | 151.6 | 9.5 |
| 1947..... | 175.8 | 16.0 |
| 1948..... | 202.3 | 15.1 |

In making an analysis of the Paper Box Industry, returns from 79 plants were used, employing 7,271 plant workers and 955 office workers (Table 8). More than half the plants and workers were situated in Ontario.

Almost three-quarters of the plants employed less than 100 workers each but these accounted for only 40 per cent of the workers. Another 22 per cent of the workers were in the four largest mills which employed between 300 and 500 workers.

Wage Rates, Table 9.—The over-all average of \$1.03 per hour for skilled adjusters, as shown in Table 9 was eight cents higher than in 1947. Increases in average rates for the other occupations, four of which are female, ranged from four to 14 cents per hour. The wide ranges of rates which appear in many cases are due chiefly to the prevalence of piecework.

Collective Agreements.—Of the 79 mills whose returns were used, 37 reported having agreements in writing covering a total of 4,500 workers. Thirty-five per cent of both plants and workers under agreement were covered by agreements with the International Pressmen and Assistants' Union of North America (AFL-TLC).

Standard Weekly Hours of Work,

Table 10.—Half the plants and 57 per cent of the plant employees worked 44 or 45 hours per week. Another 26 per cent of the plant employees worked longer than 45 hours.

Eighty per cent of the workers were in the 61 plants reporting a five-day week. Nearly half of these plant employees worked 45 hours while another one-third worked a shorter week; only a few were on a 40-hour week.

Weekly hours in the 18 plants on a six-day week ranged between 44 and 50. One-half of these plants and 58 per cent of the plant employees worked between 44 and 46½ hours.

Overtime Rates of Pay, Table 11.

Time and one-half was the rate paid for overtime after either daily or weekly hours in plants employing 84 per cent of the workers. In a few Ontario plants, time and one-quarter or one-third were the rates paid.

For work on Sundays and observed statutory holidays, time and one-half was the usual rate although approximately 30 per cent of the workers were in plants

reporting a rate of double time for Sundays and holidays. Only in one instance was double time and one-half reported which was applicable to holiday work.

Vacations with Pay, Table 12.—All the plants reported giving at least one week's vacation after a service of one year or less.

In 30 plants, employing 1,900 workers, the vacation did not exceed one week regardless of length of service. In 49 of the 79 plants, a maximum vacation of two weeks was given after one to ten years of service. Over 60 per cent of the workers were in plants giving two weeks after five years. In four cases, three weeks of vacation were given after 20 to 25 years of service.

Statutory Holidays, Table 13.—From six to ten holidays were reported observed by all the plants and from one to ten were paid for in the case of nearly 80 per cent of the workers. The remaining workers were in 18 plants observing between seven and ten holidays and paying for none.

Nine plants, employing nearly 1,300 workers, paid for only four of the eight or nine holidays they observed. About 800

workers in ten plants were paid for six days although the number observed in seven of the plants was eight days; in another, ten days; and in the remaining two plants, six days.

Although more than half the plants observed eight holidays, only 11 reported paying for the total number observed.

Shift Work, Table 14.—There was very little shift work reported in this industry, with about eight per cent of the workers on second or third shifts. Wage differentials, ranging between four and ten cents per hour as well as ten and 15 per cent, were paid to less than half the workers reported on shift work.

Sick Leave with Pay.—In 13 of the 79 plants, employing 16 per cent of the workers, some provision was reported for paid sick leave. Nine of the plants reported group insurance coverage and the remaining two stated that payment depended on circumstances or was at the discretion of management and the remaining two did not give details as to their plans.

An analysis of the current employment situation prepared by the Research and Statistics Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

CURRENT EMPLOYMENT CONDITIONS

The seasonal increase in employment during April resulted in labour shortages appearing in a number of fields, notably agriculture and the service trades. Within a short time, labour scarcities were expected to be fairly general throughout industry. The degree of high employment enjoyed this summer may vary from area to area, but the outlook was favourable except in a few localities where the dominating industry shows signs of decline or where the construction program has been curtailed.

Thousands of workers obtained jobs during the month of April. The number of persons registered for work at the Employment Service offices dropped from 247,000 to 204,000 during the month, each week showing an accelerated rate of decline. Outside work was opening up exceptionally well because of fine weather conditions, and employment expanded rapidly in construction, agriculture and transportation. Trained workers in all fields were first to benefit by the seasonal upswing and most qualified

workers were back on the job by the end of April. Labour shortages were again evident in the agricultural industry and in many of the women's trades in the service industries. As in previous years, the labour force in these categories will be supplemented by immigration. Throughout this period of seasonal expansion, labour turnover remained relatively low.

Employment in all areas benefited in varying degree. The most decided improvement occurred in the Pacific region, where

REGIONAL EMPLOYMENT TRENDS

Average: 1939=100

Seasonally Adjusted

a balanced labour supply in most fields, and shortages in others, had already replaced the heavy winter surplus of workers. A few areas such as New Glasgow, Pictou and Sydney of Nova Scotia, and Sorel of Quebec remained burdened with unemployment. The difficulty in these localities lay in their heavy dependence on one industry, coal mining and shipbuilding respectively, where some market difficulties were being encountered. For most areas, the construction program will determine the extent of jobs available and, from early reports, job opportunities as a whole may again exceed the supply of workers. Where construction work appeared to be falling off, the effect was expected to be felt largely in the reduction of summer jobs for high school and university students.

Industrial Analysis

Employment activity in **agriculture** picked up considerably during the month of April as the 1949 season got under way. The volume of this demand differed considerably by region, however, in accordance with the varying weather conditions. For the most part, the season was more advanced in the four western provinces.

In British Columbia, spring ploughing and planting was general; large numbers of men were also employed in other branches of the industry such as nurseries, orchards and hop fields. The chief labour demand was for experienced dairy hands. Dry weather prevailed in the Prairies and seeding operations were well under way. Demand for farm hands was heavy, with wages ranging from \$100 to \$125 per month. Local labour generally was sufficient to meet demand, although pockets of labour shortage were evident, notably in the Brandon area.

In most of Eastern Canada, cold and wet weather had delayed ploughing but, nevertheless, many farmers were seeking additional help. Considerable interest was shown in workers from Displaced Persons camps, as Canadian applicants were scarce. Some 1,100 Displaced Persons, including 800 for sugar beet work, were brought to Canada for farm work during April. In the Maritimes, little farm work had been started during April, and requests for farm help were few.

The employment level in Eastern Canada pulpwood **logging** was sustained during April as driving operations got under way. The ice was breaking up on the lakes and rivers and men were moving back into the bush for another few weeks' work after a short holiday following the end of cutting. Sawmills were entering their active season and this also relieved local unemployment.

In Quebec, cold weather in the northern section during the latter part of the month delayed river driving until some time in May. Summer cutting operations this year were expected to be small.

After a winter of relatively high unemployment, when logging operations were restricted due chiefly to weather conditions, the British Columbia logging industry was returning to normal. Camps were re-opening and taking on full crews. The demand for workers was steadily increasing and skilled loggers were in short supply. The spring break-up had halted some interior operations temporarily and market conditions had forced marginal operators out of business, but apart from this, prospects appeared promising for the industry.

Steady employment levels, which have characterized the coal **mining** industry during the past year, were temporarily interrupted during April by lay-offs in both the Maritime and Western coal mines. Mild weather was reported to be the chief cause of lay-offs. However, the industry also faced a number of developments, the long term effects of which might be disadvantageous for the industry. The shift from coal to oil as fuel, which was interrupted by the recent oil shortage, was again taking place. The impact of this development was more important for mines in Alberta, where the coal mines compete with local petroleum and natural gas supplies, than in mines in the other provinces. In Nova Scotia, changes in production methods, including greater mechanization, were resulting in a gradual drop in manpower requirements.

In Canadian base metal mines, the employment outlook was obscure. Demand appeared generally strong still but an unexpected price drop this spring had caused the industry some concern.

Spring job quitting, a normal occurrence among underground staffs, had cut into the supply of experienced men available. Many mines were consequently looking for replacements. A good supply of labour was available, although fully qualified men were sometimes difficult to find.

Job opportunities in the **manufacturing** industries were increasing during April. The most notable expansion occurred in the clothing industry which was experiencing its usual spring peak in production. Labour demand was primarily for women workers, who constituted some 70 per cent of the work force. Demand was chiefly for skilled labour, although some job openings were available for the unskilled. Of the vacancies for women reported to the Employment Service at the end of April, 2,400 specified

skilled workers and 400 unskilled. Applicants for this type of work outnumbered jobs in both cases as 2,600 skilled and 1,200 unskilled women were registered.

In spite of the improvement in the employment situation during the month, a considerable number of unplaced applicants in the manufacturing industries were registered with the Employment Service at the end of April. In metalworking occupations, for example, there were 1,400 unplaced machinists, tool makers and die setters, 1,100 machine shop workers, 1,200 structural iron and steel workers and 1,500 welders and flame cutters. In the unskilled field, large numbers were found in occupations of the food and tobacco (2,200), lumber products (3,100), pulp and paper products (1,100) and metal working industries (1,900). Openings in these trades were temporarily scarce.

In the **construction** industry, the extent of activity tended to vary throughout the country. Generally it appeared that, although another busy year may be expected for the industry, work was slow in getting under way in many places. In some sections, however, especially the Prairies and British Columbia where fine weather prevailed, the volume of work was such that a shortage of skilled men resulted.

During April, the number of unplaced construction workers registered with the National Employment Service dropped from 42,000 to 29,000. All fully qualified men were working in areas where the season had begun. The group unplaced at the end of the month consisted of 17,800 skilled men and 11,600 unskilled. Included in the skilled group were 12,000 carpenters, 800 bricklayers and tile setters, 1,700 painters, and 1,300 plumbers and steam-fitters.

Regional Analysis

Spring employment expansion was under way during April in the **Maritime** region and the number of unplaced workers registered at Employment offices steadily declined. Fishing and construction were active, but the agricultural season had not yet opened. An early start for agriculture was expected in May, however.

The logging season was over with the completion of river driving. Sawmills were due to open as soon as spring freshets subsided. Pulp cutting operations planned for the summer were not extensive, because of market conditions. Herring fishing was employing several thousand men during April. The sealing industry has been revived again in Newfoundland after a lapse during the war years, and was employing about 1,000 men.

The coal mining situation grew more serious, as the shortage of orders for coal continued despite vigorous sales efforts. The effect on employment had been sharp and part-time mining operations had cut the income of the workers still employed.

Transportation activity increased in Newfoundland and northern Nova Scotia ports. Halifax reported April as the best month of the season for waterfront employment, although a sharp curtailment in activity occurred near the end of the month as traffic shifted to the port of Montreal. However, requirements for unskilled workers were increasing in construction and this will probably absorb a great part of the displaced waterfront workers. The Canadian Seamen's Union strike was still in progress; most shipowners on the east coast entered into an arrangement with the Seafarers' International Union. At Saint John, waterfront employment was rapidly falling to the summer level.

In the **Quebec** region, seasonal activity in mining, transportation and services stimulated general employment during April, and the labour surplus declined steadily. Agriculture, construction and river driving were expected to absorb many more workers in May.

Cutting and hauling operations in the woods were completed for the year, the level of employment having been about 20 per cent less than in 1948. River drives were expected to employ 20,000 men during May. All sawmills, except those dependent on the river drive for their log supply, were in operation.

In the mining areas of western Quebec, the usual spring movement of underground mining men had already begun and mines were placing orders in clearance for replacements.

In manufacturing industries, caution continued to be evident in the hiring policy. Some curtailment was reported in textile employment due to loss of export contracts. The shoe industry, however, showed signs of revival and employment was expanding with the brighter market outlook. The locomotive and aircraft industries have large contracts scheduled which were expected to sustain employment.

Employment conditions in the **Ontario** region during April reflected the buoyancy of seasonal influences. Increased activity in construction, the return of farm workers to the land, and the re-opening of navigation caused a marked decline in the labour surplus. Seasonal expansion in manufacturing, in addition to the more plentiful supply of steel, also stimulated labour demand.

In manufacturing, prospects were quite favourable. Labour turnover had been at a

low level with workers now showing an obvious desire to remain in their present jobs and becoming more and more interested in long-term employment. Although some industries this year had been forced into temporary reductions in hours of work, this was a normal condition in the adjustment of supply to demand, and did not indicate any serious over-production or a decline in the level of employment. On the contrary, employment was above the 1948 level and further expansion was indicated.

Agricultural activity was on the upswing and labour demand was growing. In some areas local labour was already absorbed; transfers of Displaced Persons from northern logging districts eased the situation.

Another big year for construction was indicated, but the season was slow in starting. Skilled tradesmen were being absorbed steadily, but demand for labourers was slow.

With hot and dry weather during April in the *Prairie* region, spring employment activity rapidly accelerated. The labour surplus was declining sharply and scarcities of certain types of workers developed in several areas.

Seeding for the 1949 grain crop was going ahead faster than for many years. There had been a steady demand for workers, which in some areas far exceeded the supply. Men with power farming experience particularly were in demand. Transient farm hands, and workers returning from logging camps, added to the supply of local labour. The very dry weather had created a serious problem concerning a possible grasshopper infestation, and control campaigns were being organized by the provincial governments.

General construction activity opened up about a month ahead of previous years, since contractors were able to carry out excavation work without interruption from rain. Shortages of good construction workers were already reported from some areas and full employment in this industry was again indicated. By summer, an acute scarcity of skilled tradesmen was expected if material was available for the projects scheduled. Construction work on industrial buildings had speeded up and many completions were scheduled for the summer, which will probably boost manufacturing employment.

In logging areas, preparations for the spring drive were completed. Operations were planned for early May, when the winter's cut would be floated to sawmills and pulp mills. Very little pulpwood cutting was expected in the coming summer, since stocks of pulpwood had reached an

all-time high, and the outlook for wholesale and retail markets seemed somewhat uncertain.

The employment situation in the *Pacific* region had been improving rapidly and the expansion of industrial activity during April cut the labour surplus by 25 per cent. Construction, mining and logging absorbed the majority of workers; a large number also entered the fishing industry. Fairly heavy dispersals of men to outside points occurred as seasonal activity increased in the primary industries. There was already a shortage of logging skills, and construction tradesmen were expected to be soon in short supply.

Logging camps were returning to full operation as weather permitted and labour demand was growing rapidly. Sawmills were again in operation and faced a period of full production as log inventories increased. Labour needs were light except for key skills; if skilled men were available, additional shifts could be arranged which would absorb further unskilled labour. The shingle industry was fairly active; while the demand for high-grade shingles was steady, second grades were glutting all storage facilities and the market for them was poor. Pulp and paper plants continued to operate at capacity.

The fishing season started with the halibut run, and some 1,500 men were employed during April; salmon fishing was to open shortly.

The base metal mining and smelting industry was working at a high level, with plans under way for further expansion. An allocation of \$900,000 has been provided for the second phase of survey work in connection with the proposed aluminum plant site.

Employment Service Activities

Great progress was made during April in reducing the backlog of applicants registered for work. In fact, the monthly decline in unplaced applicants, totalling 43,000, exceeded that of any previous month on record. Starting with a weekly drop of 7,000, the rate of decline jumped to 15,000 by the last week of April. This brought the number unplaced to just over the 200,000 mark at the end of April.

During this active seasonal period, employment offices were effecting at least 11,000 placements each week, increasing to a total of 17,000 in the last week of April, according to preliminary estimates. Additional persons registered for jobs offset the impact of this high placement rate on the total number who remained unplaced at the end of each week. In addition, employment

offices were able to add approximately 2,000 to 3,000 jobs each week to the backlog of orders on file.

As usual at this time of year, seasonal industries were the major sources of employment. Thousands of additional workers in agriculture and construction were hired during the month. Transportation industries also took on many workers, both for water and inland activity.

This expansion as a whole conformed to the usual seasonal pattern. In construction, employers were noticeably cautious in their hiring, taking on mostly former employees; fewer orders than usual were coming through to the Employment Service. Agriculture was active and, while orders at employment offices were more plentiful than in previous years, this appeared to be more the result of wider participation by the Service in the field of farm labour, than a strengthened demand for workers. Despite these conditions, demand was rapidly nearing the supply of workers in construction, and had already surpassed the available supply in agriculture.

Not all employment operations at this time were in the seasonal field. Re-call of workers temporarily laid off still accounted for a large part of employment activity. The more fluid labour market in manufacturing had stepped up both the hiring and separation rate.

Replacement needs also were a factor at this time, although this type of demand was less significant than in previous years. Each spring outside work and other seasonal jobs attract workers from employment which they had accepted during the winter months when jobs were scarce. This creates openings in a wide number of in-

dustries, which themselves are not seasonal in character. This year, however, the re-shuffling movement has been much smaller, especially in the men's fields. However, women were leaving jobs more readily and, because of this, hotels, restaurants and laundries, were now again facing a shortage of workers.

The Employment Service, in co-operation with university authorities were also busy at this time finding jobs for the 17,000 university students expecting to graduate this year. Although this is the highest number on record to graduate in one year, absorption of these workers into employment was progressing very satisfactorily. By the end of April, it was estimated that 80 per cent of the graduating class had already been placed. Technical help for the most part was being absorbed immediately, although there was a scarcity of jobs locally for a small number of chemical engineers in the Prairie provinces and British Columbia. Employment activity was slower among commerce and arts graduates. The placement difficulty here, however, was greatly lessened by the high calibre of students graduating and their absorption into commerce and industry seemed assured, even if slightly delayed.

In addition, approximately 35,000 university students were looking for summer jobs. Generally these students faced less favourable employment conditions than in 1948, although at this early date, it is difficult to estimate all potential openings. Indicating the current rate of absorption is the fact that by the end of April approximately one-half of the students in the four Western provinces, had found jobs, according to a recent survey.

Unemployment in Trade Unions March 31, 1949*

Trade union unemployment in Canada declined slightly to 3.2 per cent at the end of March, 1949, from 3.4 at the close of the previous quarter and from 3.1 at March 31, 1948. At the date under review 2,658 locals reported a combined membership of 524,880. Reports were received from 2,676 locals with 538,153 members in the previous quarter, while at the end of March, 1948, the percentage was based on reports from 2,578 locals representing 524,435 members. Unemployment in trade unions rose in construction and mining but declined in logging and manufacturing at the end of the quarter under review.

In this analysis unemployment refers only to involuntary idleness due to economic causes. Persons who are without work because of illness, a strike or a lockout, or who are engaged in work outside their own trade are not considered as unemployed. As the number of reporting unions varies from quarter to quarter with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that the figures refer only to organizations reporting.

Table C-11 shows the percentage of union unemployment at certain dates in each province. As compared with the previous quarter, the percentage rose in Nova Scotia, Quebec and Saskatchewan and declined in

* See Tables C-11 and C-12.

the remaining provinces. With the exception of Nova Scotia, Ontario and Alberta the latest figures were higher than at the end of March, 1948.

A separate compilation is made each quarter of trade union unemployment in the largest city in each province with the exception of Prince Edward Island. Compared with the previous quarter the percentage increased only in Saint John, from 2.6 to 12.6, and in Montreal, from 1.8 to 2.4. The percentage decreased in Winnipeg, from 2.5 to 1.4, in Regina, from 1.4 to 0.6, in Edmonton, from 3.9 to 1.8, and in Vancouver from 6.2 to 3.4; the percentage was unchanged in Halifax at 7.8 and in Toronto at 1.6. In comparison to March, 1948, the percentage rose in Saint John and Winnipeg.

Returns were received from 1,095 locals in the manufacturing industries. These reported 276,792 members of whom 6,740 were unemployed at the end of March. At the end of the previous quarter 9,944 of 285,885 members reported by 1,090 locals were without work. At March 31, 1948, reports were received from 1,028 locals with 271,399 members of whom 5,557 were unemployed.

In the transportation group, reports were received from 860 locals with a total of 106,551 members of whom 1,576 were unemployed at the reporting date. Three months earlier 1,606 of 111,150 members had been unemployed; at the end of March, 1948,

there were 1,070 unemployed of a total of 108,421.

Unemployment in mining rose from 0.5 to 1.5 per cent. Reports were received from 69 locals with 22,746 members. The increase in the rate in this group was mainly due to the unemployment of 244 out of 2,609 members in the non-metallic mining unions. Only 92 of a total reported membership of 16,890 in coal mining unions were out of work.

Seasonal unemployment among union members in the building and construction trades continued, being somewhat higher than in the previous quarter. Reports were received from 222 local unions with 51,054 members of whom 4,814 or 11.4 per cent were unemployed at the end of March as compared with 7.9 per cent three months earlier. The percentage increased among bricklayers, from 6.3 to 8.6, carpenters, from 10.5 to 17.0, electrical workers, from 2.2 to 4.2, painters, from 2.6 to 4.9, and miscellaneous building workers, from 12.8 to 15.6. At March 31, 1948, the percentage of trade union unemployment in the construction group was 8.1.

In public and personal services, the percentage of unemployment declined to 1.3 from 1.5 in the previous quarter.

In the lumbering and logging industry of Ontario and British Columbia, four locals which had 7,256 members reported 1,480 as being unemployed.

Percentage of Unemployment as Reported by Trade Unions

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index increased point one from 159.2 to 159.3 between March 1 and April 1, 1949. The food index declined from 199.1 to 198.5 during the period March 1 to April 1 as slight increases in beef, pork, milk, bread and flour were overbalanced by a substantial drop in the price of butter, and small decreases in lard and shortening. The clothing index registered a further slight increase from 182.7 to 183.2, while the fuel and light index remained unchanged at 131.0 and the home furnishings and services index increased from 167.9 to 168.0. The index of miscellaneous goods and services advanced from 128.1 to 128.4 reflecting an increase in the automobile transportation series. Rents rose from 121.7 to 122.4 reflecting the results of a quarterly rent survey.

From August, 1939 to April 1, 1949 the increase in the cost-of-living index was 58.0 per cent.

Cost of Living in Eight Cities

Cost-of-living indexes for four of the eight regional cities moved higher during March while two were unchanged and two were lower. Increases in clothing, home furnishings and services, and rentals were mainly responsible for the advances. For other cities the decline in foods was of sufficient proportions to overbalance strength in other groups.

Composite city index changes between March 1 and April 1, 1949, were as follows: Saint John +0.1 to 155.9; Montreal -0.1 to 161.9; Toronto +0.2 to 154.8; Saskatoon +0.2 to 161.6; Edmonton +0.1 to 154.3, and Vancouver -0.2 to 160.5. Halifax remained at 152.3 and Winnipeg at 153.8.

Wholesale Prices, March, 1949

The composite index of wholesale prices dropped a further 0.5 points to 157.6 (base 1926=100) between February and

March, reflecting index declines in five of the eight major groups. Among sub-group changes non-ferrous metals dropped 4.6 points to 161.6 when substantial recessions occurred for lead and zinc prices which outweighed fractional strength in silver. A decline of 1.2 to 127.4 for chemicals and allied products was due to weakness in quotations for alcohol, shellac and red and white lead while the vegetable products index was lowered 1.0 to 136.0 when declines in grains, cottonseed oil, cocoa beans and potatoes outweighed a firmer tone for oranges and pepper. Animal products moved down 0.7 points to 167.7 following reductions in prices for raw furs, butter, cheese and whitefish which more than overbalanced increases in livestock, fresh and prepared meats and eggs. Lower prices for petroleum products, notably coal oil and fuel oil outweighed an increase in manufactured gas to change the non-metallic mineral series from 138.0 to 137.9. The textile products index remained unchanged at 162.4 when increases in rayon thread and woollen hosiery balanced a decrease in the price of jute bags. Two groups were higher, wood, wood products and paper advancing 0.8 to 191.9 supported by firmer prices for fir lumber and western cedar shingles. These outweighed a decline in spruce lumber. Higher prices for rolling mill products and hardware were responsible for a gain of 0.6 to 171.6 in the iron and steel products group.

Canadian farm product prices at wholesale rose 0.7 to 145.8 between February and March due to firmer prices for animal products. The index for this series rose 2.6 points to 180.9 in the same interval reflecting a firmer tone for livestock, fowl and eggs. These overbalanced weakness in prices of hides and raw wool. Vegetable products declined 0.5 to 124.8 when lower quotations for potatoes, Ontario barley and Ontario peas overbalanced strength in western oats and onions.

COST OF LIVING AND WHOLESALE PRICES IN CANADA FROM JANUARY 1914 TO DATE

(Base 1935-39=100)

STRIKES AND LOCKOUTS*

Canada, April, 1949

The time loss due to disputes between employers and workers which resulted in work stoppages during April, 1949, was little changed from the previous month but was much greater than that for April, 1948. Preliminary figures show 18 strikes and lockouts in existence, involving 7,877 workers, with a time loss of 139,500 man-working days, as compared with 10 strikes in March, 1949, with 5,978 workers involved and a loss of 135,725 days. In April, 1948, there were 18 strikes, involving 4,678 workers, with a time loss of 51,269 days.

During the current month, three strikes, involving asbestos miners and mill-workers in various centres in Quebec, bakery workers in Winnipeg and Selkirk, Man., and seamen in Canadian and foreign ports, involved over 85 per cent of the total workers and caused more than 93 per cent of the total time loss.

For the first four months of this year, preliminary figures show 33 strikes and lockouts, involving 10,535 workers, with a time loss of 356,657 man-working days. For the similar period in 1948 there were 48 strikes, with 18,099 workers involved and a loss of 384,367 days.

Based on the number of wage and salary workers in Canada, the time lost in April, 1949, amounted to 0.17 per cent of the estimated working time, the same as in the

previous month; 0.06 per cent in April, 1948; 0.11 per cent for the first four months of 1949; and 0.12 per cent for the first four months of 1948.

Of the 18 strikes recorded for April, 1949, one resulted in favour of the workers, three in favour of the employers, four were compromise settlements and two were indefinite in result, work being resumed pending final settlement. At the end of the month eight strikes were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945; and at Ottawa and Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C., on May 30, 1946; coal miners, Edmonton district, Alta., January 13, 1948; and seamen, Great Lakes and St. Lawrence River, June 6, 1948. The strike of printing pressmen at Toronto, Ont., which commenced on December 15, 1947, is considered to have lapsed. The strike of soft drink factory workers at Edmonton, Alta., which began on December 1, 1947, was reported as terminated on April 11, 1949.

* See Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month. Statistics given in the annual review, issued as a supplement to the *LABOUR GAZETTE* for April, 1949, and in this article are taken, as far as is possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in February, 1949, was 117 and ten were still in progress from the previous month, making a total of 127 during the month.

In all stoppages of work in progress in the period there were 19,000 workers involved and a time loss of 54,000 working days was caused.

Of the 117 disputes leading to stoppages of work which began in February, two, directly involving 100 workers, arose out of demands for advances in wages, and 46, directly involving 5,000 workers, on other wage questions; seven, directly involving 900 workers, on questions as to working hours; 20, directly involving 3,900 workers, on questions respecting the employment of particular classes or persons; 37, directly involving 2,000 workers, on other questions respecting working arrangements; and three, directly involving 800 workers, on questions of trade union principle. Two stoppages, directly involving 1,900 workers, were in support of workers involved in other disputes.

United States

Preliminary figures for March, 1949, show 275 strikes and lockouts beginning in the month, in which 500,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 3,600,000 man-days. Corresponding figures for February, 1949, are 225 strikes and lock-

outs, involving 80,000 workers, with a time loss of 650,000 days.

Final figures for the year, 1948, show 3,419 strikes and lockouts involving 1,960,000 workers, with a time loss of 34,100,000 man-days. Comparable figures for 1947, are 3,693 strikes and lockouts with 2,170,000 workers involved and a time loss of 34,600,000 man-days.

SELECTED PUBLICATIONS RECEIVED IN LIBRARY OF DEPARTMENT OF LABOUR, OTTAWA*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers.

Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

NOTE.—Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available. ⁽¹⁾ Labour Force survey figures given are as of March 5, 1949, February 21, 1948 and February 23, 1946. ⁽²⁾ Base 1926=100. ⁽³⁾ Figures are as at end of quarter ending March 31, 1949, 1948, 1946, 1944 and 1939 respectively. ⁽⁴⁾ Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average for 1946=100. ⁽⁵⁾ First of month.

⁽⁶⁾ Base 1935-1939=100. ⁽⁷⁾ Figures are for four week periods. ⁽⁸⁾ Annual figures; monthly not available.

⁽⁹⁾ Year-end figures. ⁽¹⁰⁾ Annual index.

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners)

(SOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*)

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operating firms.

| Week preceding | Average Hours Worked | | | Average Hourly Earnings | | |

* Industries, classified in the durable manufactured industries.

¹ Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.c., the latest figures are as follows:—Jan. 1, 1949, 224-9; Feb. 1, 1949, 224-9; Mar. 1, 1949, 226-6; at Mar. 1, 1948, the index was 196-4.

² Chiefly street and electric railways. For information respecting the sex distribution of the persons in recorded employment, see Table C-5.

| January 1, 1949..... | 43.2* | 97.2 | 41.99* | 138.9 | 129.1 | 107.6 |
| February 1, 1949..... | 42.9 | 97.2 | 41.70 | 138.0 | 129.0 | 107.0 |
| March 1, 1949 (†)..... | 42.9 | 97.5 | 41.83 | 138.4 | 128.8 | 107.5 |

NOTE: Average Real Weekly Earnings were computed by dividing the index of the cost of living into an index of the average weekly earnings, both indexes having been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are: January 1, 1945, 39.6 hours, \$27.72; April 1, 1945, 43.6 hours, \$30.69; January 1, 1946, 38.1 hours \$25.87; January 1 1947 38.1 hours, \$29.03; January 1, 1948, 38.3 hours, \$33.17; April 1, 1948, 41.6 hours, \$37.02; January 1, 1949, 40.6 hours, \$39.46.

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices, etc. occur from time to time.

(a) Rent figures are obtained by multiplying increases since June, 1941 by the average rental determined by the census of that date. The increases are based upon reports from real estate agents and *periodic sample surveys* which are now being conducted by direct interview.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents, have been shown where this type of dwelling is more common than single houses.

(c) Averages include prices for cuts with bone-in.

TABLE F-4.—RETAIL PRICES OF STAPLE FOODS,

| Locality | Beef | | | | | Veal front roll (boneless) per lb. | Lamb leg roast per lb. | Pork | | Bacon side fancy sliced rind-on per lb. |

| Cumulative totals..... | 48 | | 18,099 | | 384,367 | ·12 |

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, DURING APRIL, 1949.⁽¹⁾

| Industry, Occupation and Locality | Number Involved | | Time Loss in Man-Working Days | Particulars ⁽²⁾ |
|--|-----------------|-------------------------|-------------------------------|---|
| | Establishments | Workers | | |
| Strikes and Lockouts in Progress Prior to April, 1949 | | | | |
| MINING— Asbestos miners, mill-workers, etc., Asbestos, Black Lake, Coleraine, Norbestos, Thetford Mines, P.Q. | 10 | ⁽³⁾ 4,650 | 110,000 | Commenced February 14; for a new agreement providing for increased wages, elimination of asbestos dust, welfare and pension plan, extension of vacations with pay, pay for nine statutory holidays, following reference to provincial conciliation; untermi- nated. |
